FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Notice of Ending of Federal Supplemental Benefit Period in Alabama

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Alabama effective June 11, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93-572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Alabama on January 9, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATER

The employment security agency of the State of Alabama has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on May 21, 1977, and the immediately preceding twelve weeks, was less than 5 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Alabama for the week ending on May 21, 1977, and that the Federal Supplemental Benefit Period in that State terminates on June 11, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Alabama Department of Industrial Relations of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will exontinue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Alabama should contact the nearest Unemployment Compensation Claims Office or Employment Service Division Office of the Alabama Department of Industrial Relations in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Ending of Federal Supplemental Benefit Period in Delaware

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Delaware effective June 11, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93-572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Delaware on January 23, 1977, and that the Federal Supplemental Benefit Period in that State terminates on June 11, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Delaware Department of Labor of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Delaware should contact the nearest State Employment Office of the Delaware Department of Labor in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Ending of Federal Supplemental Benefit Period in Kentucky

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Kentucky effective June 4, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Public Law 93-572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Kentucky on February 6, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of Kentucky has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on May 14, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Kentucky for the week ending on May 14, 1977, and that the Federal Supplemental Benefit Period in that State terminated on June 4, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Kentucky Department for Human Resources of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Kentucky should contact the nearest State Employment Office of the Kentucky Department for Human Resources in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Ending of Federal Supplemental Benefit Period in Maryland

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Maryland, effective June 4, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Public Law 93-572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Maryland on February 20, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of Maryland has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on May 14, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Maryland for the week ending on May 14, 1977, and that the Federal Supplemental Benefit Period in that State terminated on June 4, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Maryland Employment Security Commission of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Maryland should contact the nearest State Employment Office of the Maryland Employment Security Commission in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Notice of Ending of Federal Supplemental Benefit Period in Minnesota

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Minnesota effective May 28, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93-572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Minnesota on February 27, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5 percent over a period of thirteen

consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

Determination of "Off" Indicator

The employment security agency of the State of Minnesota has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on May 7, 1977, and the immediately preceding twelve weeks, was less than 5 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4–75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Minnesota for the week ending on May 7, 1977, and that the Federal Supplemental Benefit Period in that State terminated on May 28, 1977.

Information for Claimants

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Minnesota Department of Employment Services of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Minnesota should contact the nearest Local Office of the Minnesota Department of Employment Services in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Ending of Federal Supplemental Benefit Period in Mississippi

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Mississippi, effective June 25, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Public Law 93–572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Mississippi on March 27, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of Mississippi has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on June 4, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19 (b), and as authorized by the Secretary of Labor's Order 4–75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Mississippi for the week ending June 4, 1977, and that the Federal Supplemental Benefit Period in that State terminates on June 25, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Mississippi Employment Security Commission of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Mississippi should contact the nearest State Employment Office of the Mississippi Employment Security Commission in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Notice of Ending of Federal Supplemental Benefit Period in Missouri

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Missouri effective May 28, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93–572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Missouri on February 13, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of Missouri has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on May 7, 1977, and the immediately preceding twelve weeks, was less than 5 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4–75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Missouri for the week ending on May 7, 1977, and that the Federal Supplemental Benefit Period in that State terminated on May 28, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Missouri Department of Labor and Industrial Relations of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Missouri should contact the nearest State Employment Office of the Missouri Department of Labor and Industrial Relations in their locality.

Signed at Washington, D.C. on June 10, 1977.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Notice of Ending of Federal Supplemental Benefit Period in New Mexico

This notice announces the ending of the Federal Supplemental Benefit Period in the State of New Mexico effective June 4, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93–572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of New Mexico on March 6, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of New Mexico has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on May 14, 1977, and the immediately preceding twelve weeks, was less than 5 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4–75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of New Mexico for the week ending on May 14, 1977, and that the Federal Supplemental Benefit Period in that State terminated on June 4, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated

sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the New Mexico Employment Security Commission of the end of the Federal Supplemental benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of New Mexico should contact the nearest Employment Office of the New Mexico Employment Security Commission in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Ending of Federal Supplemental Benefit Period in North Carolina

This notice announces the ending of the Federal Supplemental Benefit Period in the State of North Carolina, effective May 14, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Public Law 93-572, enacted December 31, 1974) (the Act created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of North Carolina on February 13, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of North Carolina has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157), that the average rate of insured unemployment in the State for the period consisting of the week ending on April 23, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of North Carolina for the week ending April 23, 1977, and that the Federal Supplemental Benefit Period in that State terminated on May 14, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the North Carolina Employment Security Commission of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of North Carolina should contact the nearest State Office of the North Carolina Employment Security Commission in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Ending of Federal Supplemental Benefit Period in Tennessee

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Tennessee effective May 28, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Public Law 93-572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Tennessee on January 30, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of Tennessee has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on May 7, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Tennessee for the week ending May 7, 1977, and that the Federal Supplemental Benefit Period in that State terminated on May 28, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Tennessee Department of Employment Security of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Tennessee should contact the nearest State Employment Security Office of the Tennessee Department of Employment Security in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Ending of Federal Supplemental Benefit Period in Utah

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Utah, effective June 25, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Public Law 93-572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Utah on March 27, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of Utah has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on June 4, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Utah for the week ending June 4, 1977, and that the Federal Supplemental Benefit Period in that State terminates on June 25, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Utah Industrial Commission of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Utah should contact the nearest Employment Security Office of the Utah Industrial Commission in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Ending of Federal Supplemental Benefit Period in West Virginia

This notice announces the ending of the Federal Supplemental Benefit Period in the State of West Virginia, effective June 18, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Public Law 93–572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of West Virginia on January 30, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of West Virginia has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on May 28, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19 (b), and as authorized by the Secretary of Labor's Order 4–75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of West Virginia for the week ending May 28, 1977, and that the Federal Supplemental Benefit Period in that State terminates on June 18, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the begnning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the West Virginia Department of Employment Security of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of West Virginia should contact the nearest State Employment Office of the West Virginia Department of Employment Security in their locality.

Signed at Washington, D.C., on June 13, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Notice of Ending of Federal Supplemental Benefit Period in Wisconsin

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Wisconsin effective May 28, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Public Law 93–572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Wisconsin on February 27, 1977.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of Wisconsin has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on May 7, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19(b), and as authorized by the Secretary of Labor's Order 4–75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Wisconsin for the week ending on May 7, 1977, and that the Federal Supplemental Benefit Period in that State terminated on May 28, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Wisconsin Job Service of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State unless that program subsequently triggers off in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Wisconsin should contact the nearest District Office of the Wisconsin Job Service in their locality.

Signed at Washington, D.C., on June 10, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

[FR Doc.77-17035 Filed 6-16-77;8:45 am]

Occupational Safety and Health Administration

HAWAII STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On January 4, 1974, notice was published in the FEDERAL REGISTER (39 FR 1010) of the approval of the Hawaii plan and the adoption of Subpart Y to Part 1952 containing the decision.

The Hawaii plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act. State standards comparable to 29 CFR Part 1910 (37 FR 22102) and 29 CFR Part 1926 (37 FR 27503) were adopted by the State and approved by the Occupational Safety and Health Administration on December 27, 1974 (39 FR 44823). However, there have been many Federal changes to the standards since the initial approval of the State standards. Accordingly, Hawaii has revised these standards and promulgated them in accordance with applicable State procedures.

Section 1952.310(a) of Subpart Y sets forth the State's procedure for the adoption of at least as effective State standards. By letter dated March 22, 1977, from Joshua C. Agsalud, Director of the Hawaii Department of Labor and Industrial Relations, to Gabriel J. Gillotti, Regional Administrator, and incorporated as part of the plan, the State submitted proof documents concerning the adoption of Federal standard changes (except as noted below) to 29 CFR Parts 1910, 1926 and 1928 from February 28, 1973 through October 22, 1976. The standards Hawaii did not adopt from Federal changes were the Federal deletion of 4,4'-Methylenebis and the thirteen carcinogen laboratory standards (Hawaii retained these standards), the Coke Oven Emission standard with corrections and 29 CFR 1928.57(d), Cotton Gins. Hawaii has no Coke Ovens or Cotton Gins, therefore elected not to adopt these standards. These standards, which are contained in Hawaii Occupational Safety and Health Standards—Rules and Regulations, were promulgated by the State after public hearings.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards. The State standards are more specific in several areas particularly with respect to 29 CFR 1928.57 (b) and (c), Farm Field equipment and Farmstead equipment and the Carcinogen standards of Subpart Z or 29 CFR 1910.1003 through 1910.1016. The detailed standards comparisons are available at the locations specified below.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, 450 Golden Gate Avenue, Room 9470, San Francisco, California 94102, the Office of the Department of Labor and Industrial Relations, Room 308, 825 Mililani Street, Honolulu, Hawaii 96313; and Office of the Directorate of Federal Compliance and State Programs, Occupational Safety and Health Administration, Room N3605, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

4. *Public participation.* Under § 1953.2 (c) of this chapter, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Hawaii plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason:

1. The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious.

This decision is effective June 17, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at San Francisco, California, this 26th day of April 1977.

GABRIEL J. GILLOTTI,
Regional Administrator.

[FR Doc.77-17377 Filed 6-16-77;8:45 am]

VIRGIN ISLANDS STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4), will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On September 11, 1974, notice was published in the FEDERAL REGISTER (38 FR 24896) of the approval of the Virgin Islands plan and adoption of Subpart S to Part 1952 containing the decision.

The Virgin Islands plan provides for the adoption of Federal standards as Virgin Islands standards by reference without publishing such regulations in full, provided that such regulations shall be clearly identified in the adopting regulation, and that copies of the FEDERAL REGISTER containing such regulations shall be maintained in the Office of the Lieutenant Governor, available for inspection by the public. On November 5, 1974, notice was published in the FEDERAL REGISTER approving the adoption by reference on March 21, 1974 of Federal Standards 29 CFR Parts 1910, 1918 and 1926, as Virgin Islands rules and regulations, 24 V.I.R.R. 36(b) 1, 2, and 3.

The Virgin Islands approved plan excludes Subpart D of 29 CFR Part 1926 (Occupational Health and Environmental Control), Subpart G of 29 CFR Part 1910 (Occupational Health and Environmental Control) and §§ 1910.13 (Ship repairing), 1910.14 (Shipbuilding), 1915, 1916, 1917 and 1918 of 29 CFR. (Longshoring), which reference Parts 1915, 1916, 1917 and 1918 of 29 CFR In addition, § 1910.19 (Asbestos Dust) of Part 1910 and Part 1919 (Gear Certification) are excluded by the scope of the Virgin Islands 18(b) plan. Notwithstanding the exclusion of Longshoring, 29 CFR Part 1918 has been adopted by ref-

erence since § 1926.605 (Marine Operations and Equipment) references 29 CFR Part 1918.

Section 1953.20 of 29 CFR provides that where "any alteration in the Federal program could have an adverse impact on the 'at least as effective as' status of the State program, a program change supplement to a State plan shall be required." In response to Federal standards changes, the State has submitted by a letter dated March 15, 1977 from Mr. Jean D. Larsen, Assistant Commissioner of the Virgin Islands Department of Labor and Director of the Division of Occupational Safety and Health, to Mr. Alfred Barden, Regional Administrator, and incorporated as a part of the plan, State certification documenting promulgation of regulations (March 4, 1977) adopting all changes and additions to 29 CFR Parts 1910, 1918, 1926, 1928 as 24 V.I.R.R. 36(b) 1, 2, 3, 4 up to and including March 4, 1977. (On March 11, 1977, notice was published in the FEDERAL REGISTER of adoption by reference of 29 CFR Part 1928 as V.I.R.R. 36(b)4 on November 30, 1976.)

The authority to adopt such standards is contained in Title 3, Section 940, of the Virgin Islands Code. The adopting regulations were issued by the Commissioner of Labor of the Virgin Islands Department of Labor and were approved and promulgated by the Governor of the Virgin Islands.

2. *Decision.* Having reviewed the Virgin Islands Regulations providing for the adoption of Federal standards by reference, it has been determined that Virgin Islands Regulations are identical to Federal standards and are hereby approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during the normal business hours at the following locations: Office of the Regional Administrator, Region II, 1515 Broadway, Room 3445, New York, New York 10036; Office of the Director for Federal Compliance and State Programs, Room N-3605, 200 Constitution Avenue, N.W., Washington, D.C. 20210; Department of Labor, Government of the Virgin Islands, Dronigans Gade, Charlotte Amalie, St. Thomas, V.I. 00801, and at Hospital Street, Christiansted, St. Croix, V.I. 00820.

4. *Public participation.* Under 29 CFR 1953.2(2), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Virgin Islands plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

(1) The standards are identical to the Federal standards and are therefore deemed to be at least as effective.

(2) The standards were adopted in accordance with the procedural requirements of State law and further participation would be unnecessary.

This decision is effective June 17, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at New York, New York, this 22nd day of March 1977.

ALFRED BARDEN,
Regional Administrator,
Occupational Safety and Health.

BARBARA JUNE ET AL.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 27, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 27, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 8th day of June 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-1455]

ARMCO STEEL CORP., MARION WORKS

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1455: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to a worker petition received on December 15, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing carbon steel bars, reinforcing bars, sign posts and fence posts at the Marion Works of Armco Steel Corporation in Marion, Ohio.

The Notice of Investigation was published in the FEDERAL REGISTER on January 7, 1977 (42 FR 1531). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Armco Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that for the principal products produced at the Marion Works; reinforcing bar, sign posts and fence posts, criteria (2) and (4) have not been met. For the other product produced at the Marion Works, carbon steel bar-size light shapes, without regard to whether any of the other criteria have been met, criterion (3) has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average annual employment of production workers at the Marion Works of Armco Steel Corporation declined 27.1 percent in 1975 compared to 1974. Average employment increased 14.0 percent in 1976 compared to 1975. Employment decreased in the fourth quarter of 1975 and the first quarter of 1976 compared to the same quarters one year earlier. In the fourth quarter of 1976, average employment decreased 9.3 percent compared to the preceding quarter. Workers are not separately identifiable.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

A. Reinforcing Bars.—Sales of concrete reinforcing bars by the Marion Works in net tons increased 62.1 percent in the first 11 months of 1976 compared to the first 11 months of 1975.

B. Fence and Sign Posts.—Sales of sign posts and fence posts in net tons increased 34.0 percent in the first 11 months of 1976 compared to the first 11 months of 1975.

C. Hot Rolled Shapes.—Sales of carbon steel bar-size light shapes in net tons declined 43.0 percent in the first 11

months of 1976 compared to the first 11 months of 1975.

INCREASED IMPORTS

A. Reinforcing Bars.—Imports of concrete reinforcing bars declined from 358.2 thousand net tons in 1972 to 286.4 thousand net tons in 1973. Imports increased to 477.5 thousand net tons in 1974, decreased to 141.9 thousand net tons in 1975 and increased to 192.2 thousand net tons in 1976. The ratio of imports to domestic shipments declined from 8.0 percent in 1972 to 5.6 percent in 1973. The ratio increased to 9.5 percent in 1974, declined to 3.9 percent in 1975 and increased to 5.0 percent in 1976.

B. Fence and Sign Posts.—Imports of Fence Gates, Posts and Fittings, which includes sign posts and fence posts, decreased from 6.7 thousand short tons in 1972 to 4.6 thousand short tons in 1973. Imports increased to 4.7 thousand short tons in 1974, declined to 0.8 thousand short tons in 1975 and increased to 3.0 thousand short tons in 1976. The ratio of imports to domestic production declined from 2.8 percent in 1972 to 1.8 percent in 1973, remained at 1.8 percent in 1974 and declined to 0.3 percent in 1975. The ratio increased to 1.2 percent in 1976.

C. Hot Rolled Bar Shapes.—Imports of carbon steel bar-size light shapes decreased from 562.7 thousand short tons in 1972 to 457.4 thousand short tons in 1973. Imports increased to 521.5 thousand short tons in 1974, declined to 167.2 thousand short tons in 1975 and further declined to 164.3 thousand short tons in 1976. The ratio of imports to domestic shipments declined from 75.1 percent in 1972 to 44.2 percent in 1973. The ratio increased to 53.1 percent in 1974, declined to 22.7 percent in 1975 and further declined to 19.5 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers of the Marion Works did not switch purchases of reinforcing bars, sign posts and fence posts from the Marion Works to foreign suppliers. In cases where purchases from Armco declined, the decrease was attributed to declines in highway and commercial construction or because the customers switched purchases to other domestic manufacturers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with concrete reinforcing bar, sign posts and fence posts produced at the Marion Works of the Armco Steel Corporation, Marion, Ohio have not contributed importantly to the total or partial separation of workers at that plant as required for certification under Section 222 of the Trade Act of 1974.

It is further concluded that increased imports of articles like or directly competitive with carbon steel bar-size light shapes have not increased, either absolutely or relative to domestic production, as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

Office of the Secretary

[TA-W-1454]

ARMCO STEEL CORP., SAND SPRINGS WORKS

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1454: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers producing fence posts and reinforcing bars at the Sand Springs, Oklahoma plant of Armco Steel Corporation, Middletown, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on January 7, 1977 (42 FR 1531). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from the Sand Springs Works, Oklahoma, Armco Steel Corporation, its customers, the American Iron and Steel Institute, the U.S. Department of Commerce, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important, but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criteria (1) and (4) have not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers increased 4 percent from November to December 1975 and increased 3.0 percent in 1976 compared to 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of fence posts decreased 49.6 percent in terms of quantity in 1975 compared to 1974. Sales increased 51.8 percent in 1976 compared to 1975. Sales of reinforcing bars decreased 32.3 percent in 1975 compared to 1974 but increased 3.6 percent in 1976 compared to 1975.

Production of fence posts and reinforcing bars, in terms of quantity decreased 49.8 percent in 1975 compared to 1974 but increased 76.4 percent in 1976 compared to 1975.

INCREASED IMPORTS

U.S. imports of reinforcing bars decreased 20.0 percent from 1972 to 1973 and increased 66.7 percent from 1973 to 1974, and then declined 70.3 percent from 1974 to 1975. Imports increased 35.4 percent from 1975 to 1976. The ratio of imports to domestic shipments increased from 3.9 percent in 1975 to 5.0 in 1976.

There is no available import data for fence posts as a single product. Estimates are available grouping fence gates, fence posts and fittings together. Imports of this group of products increased 26.4 percent from 1971 to 1972 and declined 31.3 percent from 1972 to 1973. Imports increased 2.2 percent from 1973 to 1974 and declined 83.0 percent from 1974 to 1975. Imports increased 250.0 percent in the first nine months of 1976 compared to the similar period in 1975. The ratios of imports to domestic shipments increased from 0.3 percent in the first nine months of 1975 to 1.1 percent in the similar period in 1976.

CONTRIBUTED IMPORTANTLY

Customers of the Sand Springs Works indicated they have not switched their purchases to imported fence posts or reinforcing bars. Customers cited the proximity of domestic sources and the superior quality of domestic posts and rebars as the reason for preferring domestic manufacturers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at the Sand Springs, Oklahoma plant of Armco Steel Corporation have not become totally or partially separated as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17379 Filed 6-6-77;8:45 am]

[TA-W-1499]

BETHLEHEM STEEL CORP., BURNS HARBOR PLANT

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-1499: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to a worker petition received on December 15, 1976, which was filed by the United Steelworkers of America on behalf of workers and former workers producing steel sheet, plate, and tin products at the Burns Harbor plant of Chesterton, Indiana, of Bethlehem Steel Corporation.

The Notice of Investigation was published in the FEDERAL REGISTER on January 18, 1977 (42 FR 3367). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Bethlehem Steel Corporation and the United Steelworkers of America.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (1) has not been met.

The Burns Harbor plant of Bethlehem Steel Corporation produces cold-rolled and hot-rolled steel sheet, steel plate, and tin products.

Pursuant to the requirements of 29 CFR 90.2 total separations must be the equivalent to a total unemployment of five percent or 50 workers, whichever is less. Evidence developed in the Department's investigation revealed that the total separations which occurred during the period of possible coverage amounted to less than five percent of the workforce employed at Burns Harbor plant. The total number of workers experiencing separations during the period November 15, 1975, one year prior to the signature date of the petition, to the present was less than 50 workers.

Pursuant to the requirements of 29 CFR 90.2, "partial separations" means, that the workers' hours of work have been reduced to 80 percent or less of the workers' average weekly hours at the firm or appropriate subdivision thereof. Evidence developed in the Department's investigation revealed that the workers' average weekly hours of work have not been reduced to less than 80 percent of their average weekly hours from November 15, 1975, one year prior to the signature date of the petition, to the present.

Plant sales increased 16 percent in quantity in 1976 compared to 1975. Plant production increased 17 percent in quantity in 1976 compared to 1975. Therefore, no threat of total or partial separation is evident.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at the Burns Harbor plant of Bethlehem Steel Corporation, Chesterton, Indiana have not become totally or partially separated, nor threatened to become separated, as required for certification in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17381 Filed 6-16-77;8:45 am]

[TA-W-1587]

BROWN SHOE CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1587: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on January 24, 1977 in response to a worker petition received on January 24, 1977 which was filed by the Boot and Shoe Workers' Union on behalf of workers and former workers producing women's shoes at the Houston, Missouri plant of the Brown Shoe Company, St. Louis, Missouri.

The notice of investigation was published in the FEDERAL REGISTER on February 1, 1977 (42 FR 6017). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Brown Shoe Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment of production workers at the Houston, Missouri plant declined 10.9 percent from 1974 to 1975 and increased 4.4 percent from 1975 to 1976. Employment declined 1.8 percent in the last six months of 1976 compared to the same period of 1975. Employment declined 10.6 percent in the fourth quarter of 1976 compared to the same quarter of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production of women's shoes at the Houston, Missouri plant declined 2.2 percent in quantity from 1974 to 1975 and increased 9.7 percent from 1975 to 1976. Production declined 7.7 percent in quantity in the last six months of 1976 compared to the same period of 1975.

INCREASED IMPORTS

Imports of women's and misses' nonrubber footwear, except athletic, increased absolutely from 1972 to 1973, declined from 1973 to 1974, and then increased each year from 1974 to 1976. The ratio of imports to domestic production declined from 114.1 percent in 1975 to 106.3 percent in 1976.

CONTRIBUTED IMPORTANTLY

Brown Shoe Company increased its imports of women's shoes from 1975 to 1976.

The sole customer to whom the shoes produced at the Houston, plant are sold, increased its import purchases of women's shoes from 1975 to 1976. This customer could not provide refined information concerning its purchases from the Houston plant in isolation from its total purchases of women's shoes from Brown Shoe. However, the recent finding of the International Trade Commission, based on the high level of import penetration, is that customers of domestic manufacturers have increasingly

shifted from domestically produced shoes to imported shoes.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's shoes produced at the Houston, Missouri plant of the Brown Shoe Company contributed importantly to the total or partial separations of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Houston, Missouri plant of the Brown Shoe Company who became totally or partially separated on or after July 1, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 9th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17382 Filed 6-16-77;8:45 am]

[TA-W-1484]

BUFFALO (N.Y.) DISTRICT REPUBLIC STEEL CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1484: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing various steel products at the Buffalo District plants, Republic Steel Corporation, Cleveland, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on January 11, 1977 (42 FR 2381). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Republic Steel Corporation, its customers, the U.S. Department of Commerce, the United Steelworkers of America, the American Iron and Steel Institute, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that without regard to whether any of the other criteria have been met, criterion (3) has not been met regarding production of carbon steel bars and criterion (2) has not been met regarding production of carbon and alloy steel bars.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers in the Buffalo District declined 7.4 percent from 1974 to 1975 and then increased 6.9 percent from 1975 to 1976.

Workers are not separately identifiable by product line.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Raw Steel production at the Buffalo District plants declined 18.2 percent from 1974 to 1975 and then increased 14.9 percent from 1975 to 1976.

The two major products produced at the Buffalo District plants are carbon bars (77.2 percent of total shipments in 1976) and alloy bars (22.6 percent of total shipments in 1976). Insignificant amounts of hot rolled carbon and alloy strip are produced there.

Shipments of carbon bars declined 25.5 percent from 1974 to 1975 and then increased 3.8 percent from 1975 to 1976. Shipments declined in the first quarter of 1976 and then increased in each of the subsequent quarters of 1976 compared to the respective quarter in 1975.

Shipments of alloy bars declined 31.2 percent from 1974 to 1975 and then increased 50.4 percent from 1975 to 1976. Shipments increased in each quarter of 1976 compared to the respective quarter of 1975.

INCREASED IMPORTS

Imports of carbon hot and cold rolled steel bars declined absolutely and relative to domestic shipments and consumption in each year from 1972 through 1976. Imports declined 37.1 percent from 1974 to 1975 and declined 7.0 percent from 1975 to 1976. The ratios of imports to domestic shipments and consumption declined from 7.7 percent and 7.2 percent, respectively, in 1975 to 6.6 percent and 6.3 percent, respectively, in 1976.

Imports of alloy hot and cold rolled steel bars declined absolutely and relative to domestic shipments and consumption in each year from 1972 through 1974 and then increased from 1974 through 1976. Imports increased 67.8 percent from 1974 to 1975 and 9.0 percent from 1975 to 1976. The ratios of imports to domestic shipments and consumption increased from 3.1 percent and 3.0 percent, respectively, in 1975 to 3.3 percent and 3.3 percent, respectively, in 1976.

CONTRIBUTED IMPORTANTLY

Shipments of carbon and alloy steel bars at Republic Steel's Buffalo District plants have followed the trend in the industry from 1974 through 1976. Industry wide demand for these steel products is dependent upon demand from the automobile industry, orders from steel service centers, and demand from the machinery industry. Demand for alloy bars is also dependent upon demand from the tool manufacturing industry. Markets served by Republics Steel are predominantly the automobile industry, distributors (steel service centers) and the machinery and equipment industry. These three markets accounted for over 50 percent of Republic's total shipments in 1972 through 1976.

Shipments fell in 1975 due to decreased demand from the automobile industry as well as reduced orders from steel service centers. Steel service centers reduced orders as they attempted to readjust high inventory levels. Shipments increased in 1976 due to the recovery of, and increased demand from, the automobile industry.

Customers who purchased alloy bars from Republic's Buffalo District either decreased purchases of imports from 1974 to 1976 or did not start importing until 1976. The Buffalo District experienced increasing shipments of alloy bars in 1976.

Customers who purchased carbon bars from Republic's Buffalo District either did not purchase imports or purchased minor amounts of imports in 1974 and 1975 (while increasing purchases from Republic) and then stopped purchasing imports in 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of carbon steel bars have not increased and that sales or production of carbon and alloy steel bars at the Buffalo (New York) District plants of the Republic Steel Corporation, Cleveland, Ohio have not declined as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17383 Filed 6-16-77;8:45 am]

[TA-W-1589]

CHARLES DOBBS, LTD

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1589: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on January 24, 1977 in response to a worker petition received on January 4, 1977 which was filed on behalf of workers and former workers producing men's sport shirts at Charles Dobbs, LTD, New York, New York.

The Notice of Investigation was published in the FEDERAL REGISTER on February 1, 1977 (42 FR 6017). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Charles Dobbs, LTD, its customers, the National Cotton Council of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers employed by Charles Dobbs decreased 37 percent in January–November 1976 compared to the like period in 1975. The average number of salaried workers decreased 13 percent in January–November 1976 compared to the same period in 1975. Charles Dobbs went out of business in December 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Net dollar sales of men's sport shirts by Charles Dobbs decreased 42 percent from 1975 to 1976. All production operations were terminated on December 3, 1976.

INCREASED IMPORTS

Imports of men's and boys' woven sport shirts decreased yearly from 63.3 million shirts in 1971 to 41.6 million shirts in 1973 and increased annually to 79.8 million shirts in 1976. The ratio of imports to domestic production declined yearly from 42.0 percent in 1971 to 27.5 percent in 1973 and rose yearly to 41.0 percent in 1975.

Imports of men's and boys' knit sport and dress shirts, excluding T-shirts, increased annually from 41.7 million shirts in 1971 to 78.8 million shirts in 1973, declined to 54.9 million shirts in 1974, and then increased annually to 74.0 million shirts in 1976. The ratio of imports to domestic production rose yearly from 21.8 percent in 1971 to 25.6 percent in 1973, decreased to 17.8 percent in 1974, and rose to 20.9 percent in 1975.

CONTRIBUTED IMPORTANTLY

Customers stated that their purchases of men's sport shirts from Charles Dobbs had declined from 1975 to 1976. Printed sport shirts worn with leisure suits was a popular fashion in 1975. In 1976, however, leisure suits and printed sport shirts went out of style and knit shirts and sweaters came into fashion. Customers indicated that they purchased imports of sport shirts and of knit shirts in 1975 and 1976. Charles Dobbs closed its production facilities and went out of business on December 3, 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the men's sport shirts produced at Charles Dobbs, LTD, New York, New York contributed importantly to the total or partial separations of the workers at that firm. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers at Charles Dobbs, LTD, New York, New York who became totally or partially separated from employment on or after January 3, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 9th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17384 Filed 6-16-77;8:45 am]

[TA-W-1486]

CLEVELAND DISTRICT, REPUBLIC STEEL CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1486: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing various steel products at the Cleveland District plants, Republic Steel Corporation, Cleveland, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on January 11, 1977 (42 FR 2380). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Republic Steel Corporation, its customers, the U.S. Department of Commerce, the United Steelworkers of America, the American Iron and Steel Institute, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more importantly than any other causes.

The investigation has revealed that without regard to whether any of the other criteria have been met, criterion (2) has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers in the Cleveland District declined 13.8 percent from 1974 to 1975 and increased 10.1 percent from 1975 to 1976.

Workers are not separately identifiable by product line.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Raw steel production at the Cleveland District plants declined 13.3 percent from 1974 to 1975 and then increased 9.4 percent from 1975 to 1976.

Total shipments, in tons, declined 26.7 percent from 1974 to 1975 and then increased 13.1 percent from 1975 to 1976.

The three major products produced at the Cleveland District plants are carbon cold rolled sheet (41.1 percent of total shipments in 1976), carbon hot rolled sheet (27.6 percent of total shipments in 1976) and carbon bar (19.7 percent of total shipments in 1976). Eight other products are produced (electroplate, slabs, stainless, alloy hot rolled sheet, carbon plate, alloy bar, alloy plate and alloy cold rolled sheet), each of which constituted less than 5 percent of total shipments in 1975 and 1976.

Shipments of carbon cold rolled sheets declined 29.3 percent from 1974 to 1975 and then increased 39.9 percent from 1975 to 1976.

Shipments of carbon hot rolled sheet declined 19.4 percent from 1974 to 1975 and then increased 17.1 percent from 1975 to 1976.

Shipments of carbon bars declined 17.0 percent from 1974 to 1975 and then increased 7.5 percent from 1975 to 1976.

Total shipments of carbon cold and hot rolled sheet and carbon bar increased in each quarter of 1976 compared to the respective quarter of 1975.

INCREASED IMPORTS

Imports of carbon cold rolled sheet declined absolutely in each year from 1972 through 1975. Imports declined 18.9 percent from 1974 to 1975 and then increased 13.7 percent from 1975 to 1976. Imports declined relative to domestic shipments and consumption from 1972 to 1973 and increased from 1973 through 1975. The ratios of imports to domestic shipments and consumption declined from 16.5 percent and 14.2 percent, respectively, in 1975 to 13.2 percent and 11.7 percent, respectively, in 1976.

Imports of carbon hot rolled sheet declined absolutely in each year from 1972 through 1975. Imports declined 14.5 percent from 1974 to 1975 and then increased 8.4 percent from 1975 to 1976. Imports declined relative to domestic shipments and consumption from 1972 to 1973 and increased from 1973 through 1975. The ratios of imports to domestic shipments and consumption declined from 14.0 percent and 12.4 percent, respectively, in 1975 to 11.3 percent and 10.2 percent, respectively, in 1976.

Imports of carbon hot and cold rolled steel bars declined absolutely and relative to domestic shipments and consumption in each year from 1972 through 1976. Imports declined 37.1 percent from 1974 to 1975 and declined 7.0 percent from 1975 to 1976. The ratios of imports to domestic shipments and consumption declined from 7.7 percent and 7.2 percent, respectively, in 1975 to 6.6 percent and 6.3 percent, respectively, in 1976.

CONTRIBUTED IMPORTANTLY

Shipments of carbon steel sheets and carbon steel bars at Republic Steel's Cleveland District plants have followed the trend in the industry from 1974 through 1976. Industry wide demand for these steel products is dependent upon demand from the automobile industry and orders from the steel service centers. Demand for carbon steel bars is also dependent upon demand from the machine industry. Markets served by Republic Steel are predominantly the automobile industry, distributors (steel service centers) and the machinery and equipment industry. These three markets accounted for over 50 percent of Republic's total shipments in 1972 through 1976.

Shipments fell in 1975 due to decreased demand from the automobile industry as well as reduced orders from steel service centers. Steel service centers reduced orders as they attempted to readjust high inventory levels. Shipments increased in 1976 due to the recovery of, and increased demand from, the automobile industry.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales or production have not declined at the Cleveland District plants of Republic Steel Corporation, Cleveland, Ohio as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17385 Filed 6-16-77;8:45 am]

[TA-W-1815]

COASTAL ICE AND FUEL, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1815: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 21, 1977 in response to a worker petition received on March 15, 1977 which was filed on behalf of workers and former workers of Coastal Ice and Fuel, Inc., Brownsville, Texas.

The notice of investigation was published in the FEDERAL REGISTER on April 5, 1977 (42 FR 15158). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Coastal Ice and Fuel, Inc., and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important, but not necessarily more important than any other cause.

If any of the above criteria is not satisfied, a negative determination must be made.

Coastal Ice and Fuel, Inc. unloads and services shrimp boats. Servicing operations consist primarily of unloading shrimp, supplying ice, fuel and other supplies and repairing the vessels as required. None of the employees of Coastal Ice and Fuel, Inc. are engaged in the catching of shrimp.

Coastal Ice and Fuel, Inc. does not produce an article within the meaning of Section 222(3) of the Act and this Department has already determined that the performance of services are not covered by the adjustment assistance program; see Notice of Determination in Pan American World Airways, Incorporated (TA-W-153, 40 FR 54639). Coastal Ice and Fuel, Inc. performed a service, the unloading and servicing of shrimp boats.

CONCLUSION

After careful review of the issues, I have determined that services of the kind provided by Coastal Ice and Fuel, Inc., Brownsville, Texas are not "articles" within the meaning of Section 222 (3) of the Trade Act of 1974. The petition for trade adjustment assistance is, therefore, denied.

Signed at Washington, D.C. this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17386 Filed 6-16-77;8:45 am]

[TA-W-1427]

CONNORS STEEL CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1427: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to a worker petition received on December 15, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing steel at the Huntington, West Virginia plant of the Connors Steel Company, a subsidiary of H. K. Porter Company, Inc.

The notice of investigation was published in the FEDERAL REGISTER on January 4, 1977 (42 FR 882). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of H. K. Porter Company, Inc., its customers, the American Iron and Steel Institute, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that criteria one, two and four have not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers at the Huntington plant of Connors Steel declined 12.8 percent in 1975 compared to 1974 and then increased 3.1 percent in 1976 compared to 1975. There have been no layoffs due to lack of work at the Huntington plant since November, 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total production at the Huntington plant declined in quantity 41.2 percent in 1975 compared to 1974 and then increased 18.7 percent in 1976 compared to 1975. Sales of bar-size light shapes and heavy structural shapes, the major products manufactured at Huntington, increased in quantity 39.6 percent in 1976 compared to 1975 after declining in 1975 compared to 1974. Sales of bar-size light shapes and heavy structural shapes increased in six consecutive quarters from the third quarter of 1975 through the fourth quarter of 1976.

INCREASED IMPORTS

Imports of bar-size light shapes, one of the principal products manufactured at the Huntington plant, decreased from 562.7 thousand tons in 1972 to 167.2 thousand tons in 1975 and to 164.3 thousand tons in 1976. The ratio of imports to domestic shipments of bar-size light shapes declined from 75.1 percent in 1972 to 22.7 percent in 1975 and to 19.5 percent in 1976.

Imports of carbon steel structural shapes decreased from 1,614.0 thousand tons in 1972 to 804.9 thousand tons in 1975 and then rose to 1,351.4 thousand tons in 1976. The ratio of imports to domestic shipments of carbon structural shapes declined from 34.1 percent in 1972 to 19.5 percent in 1975 and then increased to 40.0 percent in 1976.

Imports of steel rails increased from 42.3 thousand tons in 1972 to 96.2 thousand tons in 1975 and then fell to 71.8 thousand tons in 1976. The ratio of imports to domestic shipments of steel rails was 4.4 percent in 1972 and 1973, increased to 5.4 percent in 1974, to 7.7 percent in 1975 and then declined to 5.4 percent in 1976.

Imports of mine roof bolts increased from 1,228 thousand pounds in 1972 to 4,952 thousand pounds in 1974, declined to 2,082 thousand pounds in 1975 and then increased to 2,092 thousand pounds in 1976. The ratio of imports to domestic production increased from 0.27 percent in 1972 to 0.92 percent in 1974 and then declined to 0.42 percent in 1975 and to 0.41 percent in 1976.

Imports of joint bars and tie plates increased from 7.1 thousand tons in 1972 to 8.8 thousand tons in 1973, declined to 5.0 thousand tons in 1974, to 3.2 thousand tons in 1975 and then increased to 9.7 thousand tons in 1976. The ratio of imports to domestic shipments increased from 3.3 percent in 1972 to 3.7 percent in 1973, declined to 1.7 percent in 1974, to 1.3 percent in 1975 and then increased to 3.6 percent in 1976.

CONTRIBUTED IMPORTANTLY

The Department's investigation revealed that most of the major customers contacted do not purchase imported steel products similar to those purchased from Connors and had increased purchases from Conners in 1976.

Two customers purchase small amounts of imported steel not readily available from domestic sources. One of these customers has increased purchases of structural shapes from Connors in recent years and only imports when Connors cannot supply all of its domestic requirements. The other customer proportionally reduced purchases from Connors and its foreign source in 1975 and 1976 due to decreased demand for structural shapes.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the steel products manufactured at the Huntington, West Virginia plant of Connors Steel Company, a subsidiary of H. K. Porter Company, Inc., did not contribute importantly to the total or partial separations of the workers producing such articles at that plant.

Signed at Washington, D.C. this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17387 Filed 6-16-77;8:45 am]

[TA-W-1412]

EDGEWATER STEEL CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1412: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 14, 1976 in response to a worker petition received on December 14, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing forged railroad wheels and rings (or bearing races) at the Edgewater Steel Corporation, Oakmont, Pennsylvania.

The Notice of Investigation was published in the FEDERAL REGISTER on January 4, 1977 (42 FR 877). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Edgewater Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any other criteria have been met, criterion (3) has not been met for workers engaged in the production of wheels, and criterion (4) has not been met for workers engaged in the production of rings.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Plant employment decreased 9 percent in 1975 compared to 1974 and declined 10 percent in 1976 compared to 1975. All employees work interchangeably between the two major product lines at the Oakmont plant.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Railroad wheel sales, in quantity, declined 6 percent in 1975 compared to 1974 and declined 18 percent in 1976 compared to 1975.

Ring (or bearing race) sales, in quantity, decreased one percent in 1975 compared to 1974 and declined 6 percent in 1976 compared to 1975.

Production data were not made available.

INCREASED IMPORTS

Imports of wheels and axles for railway applications increased each year between 1972 and 1975, from 24,391 net tons in 1972 to 74,955 net tons in 1975. Imports decreased to 32,197 net tons in 1976 compared to 1975, a 57 percent decrease.

The ratio of imports to domestic production of steel wheels and axles for railway applications decreased from 7.1 percent in 1972 to 6.7 percent in 1973. The ratio increased to 14.2 percent in 1974 and to 19.9 percent in 1975. The import to production ratio dropped in 1976 to 10.6 percent.

Imports of rings (inner and outer races for anti-friction bearings) increased from 270.6 million in 1972 to 323.3 million in 1973 and then declined to 207.5 million in 1974 and 202.3 million in 1975. Imports increased to 233.6 million in 1976.

The ratio of imports of rings to domestic production increased from 13.7 percent in 1972 to 14.5 percent in 1973 and then decreased to 9.5 percent in 1974. The ratio increased to 10.9 percent in 1975 and remained at that same percentage for 1976. The import to production ratio was lower in 1976 than the 1972–1976 average ratio which was 11.7 percent.

CONTRIBUTED IMPORTANTLY

Edgewater's ring customers have not been switching to imports. Customers indicated that purchases of rings were primarily from domestic manufacturers. Edgewater officials stated that there were no imports of products competitive with the rings they produce.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with forged rings produced at Edgewater Steel Corporation, Oakmont, Pa. have not contributed importantly to the total or partial separations of workers at that plant.

It is further concluded that imports of articles like or directly competitive with the wheels produced at the Oakmont, Pa. plant of Edgewater Steel Corporation have not increased, either absolutely or relative to domestic production, as required for certification in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17388 Filed 6-16-77;8:45 am]

[TA-W-1718]

FABIEN CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1718: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977 in response to a worker petition received on February 22, 1977 which was filed by the Machine Printers and Engravers Union on behalf of workers and former workers producing printed textiles at Fabien Corporation, Lodi, New Jersey.

The notice of investigation was published in the FEDERAL REGISTER on March 15, 1977 (42 FR 14185). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Fabien Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met.

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales, production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers declined 7.2 percent in 1975 compared to 1974, 24.0 percent in 1976 compared to 1975, and 44.8 percent in the first quarter of 1977 compared to the same period in 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales and production declined 11.7 percent in quantity in 1975 compared to 1974, 36.8 percent in 1976 compared to 1975, and 55.5 percent in the first two months of 1977 compared to the same period in 1976.

INCREASED IMPORTS

Imports of cotton broadwoven printcloth declined both absolutely and relative to domestic production and consumption in 1975 from 1974, and then increased from 85.5 million square yards in 1975 to 133.1 million square yards in 1976, an increase of 56 percent. The ratio of imports to domestic production and consumption increased from 13.5 percent and 12.9 percent, respectively, in 1975 to 20.6 percent and 19.8 percent, respectively, in 1976.

Imports of man-made woven printed fabric increased from 11.9 million square yards in 1975 to 14.7 million square yards in 1976, an increase of 24 percent. The import/production and import/consumption ratios increased from 0.56 percent and 0.56 percent, respectively, in 1975 to 0.69 percent and 0.70 percent, respectively, in 1976.

CONTRIBUTED IMPORTANTLY

Customers of Fabien are primarily converters who buy greige goods and commission Fabien to finish the fabric, by printing it, in accordance with apparel manufacturers' specifications. During the course of the investigation, it was established that converters, in general, do not import printed or finished fabric. One of Fabien's customers, however, who is a converter, was found to purchase imported cotton printed fabric.

The Department's survey of apparel manufacturers who are customers of converters revealed that manufacturers are importing printed or finished fabric for use in the production of men's and women's wearing apparel. The converters reported a growing trend toward the bypassing of converters and the purchasing of finished fabric from foreign sources.

CONCLUSION

After a careful review of the facts obtained in the ivestigation, I conclude that increases of imports of articles like or directly competitive with printed textiles produced at Fabien Corporation contributed importantly to the total or partial separation of the workers of that firm. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers at Fabien Corporation, Lodi, New Jersey who became totally or partially separated from employment on or after May 28, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 9th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17389 Filed 6-16-77;8:45 am]

[TA-W-1638]

GENERAL ELECTRIC COMPANY, SYRACUSE, NEW YORK

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1638: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 8, 1977 in response to a worker petition received on January 21, 1977 which was filed by the International Union of Electrical, Radio and Machine Workers on behalf of workers and former workers producing vidicon tubes in the Imaging Devices Operation at the Electronics Park complex of the General Electric Company, New York, New York.

The Notice of Investigation was published in the FEDERAL REGISTER on March 4, 1977 (42 FR 12495). No public hearing was requested and none was held.

The Notice of Investigation identified the product manufactured by the petitioning workers as special pickup tubes and light valve tubes and the plant as being located in Liverpool, New York. Subsequent investigation revealed that workers in the Imaging Devices Operation did not produce light valve tubes and produced a wide variety of pick-up tubes known as vidicon tubes. The plant is located in the Electronics Park complex of General Electric in Syracuse, New York.

The information upon which the determination was made was obtained principally from officials of the General Electric Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that criteria (3) and (4) have not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average hourly employment in the Imaging Devices Operation increased 4.7 percent from 1974 to 1975, declined 17.1 percent from 1975 to 1976, and declined 26.3 percent in the first quarter of 1977 compared to the same period in 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECLINED ABSOLUTELY

The value of total sales of vidicon tubes by the Imaging Devices Operation increased 20.0 percent from 1974 to 1975, declined 13.9 percent from 1975 to 1976 and declined 39.4 percent in the first quarter of 1977 compared to the same period in 1976.

Total sales of vidicon tubes by quantity increased 6.7 percent from 1974 to 1975, declined 31.7 percent from 1975 to 1976 and declined 19.9 percent in the first quarter of 1977 compared to the same period in 1976.

INCREASED IMPORTS

Imports of light sensing electronic devices, which include imports of vidicon tubes, declined absolutely from 335.6 thousand units in 1973 to 96.8 thousand units in 1974, increased to 267.7 thousand units in 1975 and then declined to 223.3 thousand units in 1976, a decline of 16.6 percent from 1975.

The ratio of imports to domestic production declined from 65.4 percent in 1973 to 19.0 percent in 1974, increased to 48.1 percent in 1975 and declined to 39.7 percent in 1976.

CONTRIBUTED IMPORTANTLY

General Electrics Imaging Devices Operation (IDO) sells vidicon tubes for three general markets, supplying U.S. Government contractors, GE's own in-house production operations, and other domestic users.

Since 1974, approximately 50 percent of all vidicon tubes produced in IDO were sold to one customer. That customer, which used the vidicon tube in a missile manufactured for the U.S. government, purchases all of the vidicon tubes used in that missile from IDO. The customer has reduced its purchases of vidicon tubes from IDO by approximately 70 percent since 1975 as the U.S. government has phased out production of the missile for which the tubes were produced.

The Imaging Devices Operation also produces vidicon tubes for a variety of commercial closed circuit television cameras sold by General Electric and by independent manufacturers.

Customers purchasing vidicon tubes for commercial closed circuit television cameras either did not purchase ported vidicon tubes or had decreased their purchases from the Imaging Devices Operation in order to purchase vidicon tubes from other domestic suppliers.

All of the commercial closed circuit television cameras sold by General Electric are manufactured in the Imaging Systems Operation (ISO) which is also located in the Electronics Park complex. Prior to the second half of 1975, the Imaging Devices Operation (IDO) supplied all of the vidicon tubes used in the commercial closed circuit television cameras manufactured by ISO. During the period under investigation, production of vidicon tubes for ISO constituted approximately 5 percent of total vidicon tube production in IDO. In the second half of 1975, the Imaging Systems Operation introduced a new commercial closed circuit television camera using an imported vidicon tube. A similar tube had never been manufactured by the Imaging Devices Operation and the introduction of the new camera did not affect IDO's production of vidicon tubes for the Imaging Systems Operation. Production of vidicon tubes for the Imaging Systems Operation increased 17.1 percent from 1975 to 1976 and was unchanged in the first quarter of 1977 compared to the same period in 1976.

CONCLUSION

After a careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with vidicon tubes manufactured in the Imaging Devices Operation at the Electronics Park complex of General Electric Company, Syracuse, New York did not contribute importantly to the total or partial separation of the workers at that operation.

Signed at Washington, D.C. this 9th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17390 Filed 6-16-77;8:45 am]

[TA-W-1558]

GLASS DIMENSIONS, INCORPORATED MAGNOLIA, MASSACHUSETTS

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-1558: investigation regarding certification of eligibility to apply for adjustment assistance as perscribed in Section 222 of the Act.

The investigation was initiated on January 10, 1977, in response to a worker petition received on that date which was filed on behalf of workers and former workers producing blown glass planters at Glass Dimensions, Inc., Magnolia, Massachusetts.

The Notice of Investigation was published in the FEDERAL REGISTER of January 28, 1977 (42 FR 5451). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Glass Dimensions, Inc., its customers, the U.S. Department of Commerce, the U.S. Inter-

national Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974, must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities; either actual or relative to domestic production; and

(4) That such increased imports has contributed importantly to the separations or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment at Glass Dimensions declined 14 percent, 17 percent, 50 percent, and 40 percent in the four quarters of 1976, compared to employment in the previous quarter. Layoffs began occurring in the second half of 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales by Glass Dimensions declined 29 percent, 76 percent, and 36 percent in the second, third, and fourth quarters of 1976, compared to sales in the prior quarter.

Production declined 15 percent and 60 percent in the second and third quarters of 1976 compared to production in the previous quarter. All production of blown glass plant rooters was terminated in September 1976.

INCREASED IMPORTS

Imports of ceramic, glass, and plastic flower pots and planters, including blown glass planters such as those produced by Glass Dimensions, increased in each year from 1973 to 1976. Imports increased from $41.5 million in 1972 to $51.6 million in 1973, $60.4 million in 1974, $66.4 million in 1975, and $67.9 million in 1976.

CONTRIBUTED IMPORTANTLY

Customers of Glass Dimensions indicated that the blown glass planters produced and sold by Glass Dimensions were the first items of their kind on the market. After purchasing from Glass Dimensions during mid-1976 the customers discovered that they could purchase imported blown glass planters at prices below those of Glass Dimensions. Customers cancelled or reduced orders from Glass Dimensions and increased purchases of imports. Reduced orders resulted in increased inventories at Glass Dimensions and a termination of production in September 1976.

CONCLUSION

After careful review of the facts obtained in the investigation I conclude that increases of imports of articles like or directly competitive with blown glass planters produced at Glass Dimensions, Inc. contributed importantly to the total or partial separation of the workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Glass Dimensions, Inc., Magnolia, Massachusetts, who became totally or partially separated from employment on or after June 30, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17391 Filed 6-16-77;8:45 am]

[TA-W-1674]

KENBAR INDUSTRIES SOMERVILLE, NEW JERSEY

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1674: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 22, 1977 in response to a worker petition received on February 15, 1977 which was filed on behalf of workers and former workers producing electronic testing equipment at Kenbar Industries, Somerville, New Jersey.

The notice of investigation was published in the FEDERAL REGISTER on March 8, 1977 (42 FR 13088). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Kenbar Industries, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

All employees of Kenbar Industries were laid off during the third quarter of 1976. Since that time, there have been no employees on the active payroll.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales declined 14.6 percent in 1975 compared to 1974. Sales declined 20.5 percent from 1975 to 1976. Production was terminated in the third quarter of 1976.

INCREASED IMPORTS

Imports of electronic testing equipment increased in each year from 1972 through 1976. Imports increased from $88 million in 1972 to $179 million in 1976. Imports increased relative to domestic production from 10.6 percent in 1972 to 11.2 percent in 1975 and 12.2 percent in 1976.

CONTRIBUTED IMPORTANTLY

A major customer of Kenbar, accounting for 65–70 percent of Kenbar's sales prior to mid-1975, reduced purchases and ultimately cancelled all orders with Kenbar in 1975 while substantially increasing purchases of imported electronic testing equipment. Purchases of imported test equipment by that firm relative to total purchases increased from 34 percent in 1973 to 39 percent in 1974 and 53 percent in 1975.

Following the loss of its major customer, Kenbar secured a production contract with another firm. That firm cancelled its contract after concluding that Kenbar's product could not compete successfully against a foreign product already on the market. Thus, Kenbar lost orders directly as a result of competition from imports, and indirectly in its inability to solicit new contracts in competition with imports.

CONCLUSION

After careful review of the facts obtained in the investifation, I conclude that increases of imports like or directly competitive with electronic testing equipment produced at Kenbar Industries, Somerville, New Jersey contributed importantly to the total or partial separation of the workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers at Kenbar Industries, Somerville, New Jersey who became totally or partially separated from employment on or after July 16, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of Trade Act of 1974.

Signed at Washington, D.C., this 9th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17392 Filed 6-16-77;8:45 am]

[TA-W-1315]

KENOSHA METAL PRODUCTS, INCORPORATED KENOSHA, WISCONSIN

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1315: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 30, 1976 in response to a worker petition received on that date which was filed on behalf of workers and former workers engaged in employment related to the production of capped bumper bolts and stampings for automobiles at Kenosha Metal Products, Inc., Kenosha, Wisconsin.

The notice of investigation was published in the FEDERAL REGISTER on December 14, 1976 (41 FR 54560). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Kenosha Metal Products, Inc., its customers, the U.S. International Trade Commission, the U.S. Department of Commerce, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that criteria (2) and (4) have not been met with respect to capped bumper bolts; and criteria (3) and (4) have not been met with respect to stampings for automobiles.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers at Kenosha Metal Products, Inc. remained constant from 1974 to 1975 and decreased 17 percent from 1975 to 1976.

Average weekly hours worked by production workers at Kenosha Metal Products, Inc. decreased 1 percent from 1974 to 1975 and remained constant from 1975 to 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of capped bumper bolts by Kenosha Metal Products, Inc. in terms of quantity decreased 31 percent in value from 1974 to 1975 and increased 26 percent from 1975 to 1976.

Sales of stampings by Kenosha Metal Products, Inc. increased 5 percent in terms of quantity from 1974 to 1975 and decreased 40 percent from 1975 to 1976.

Production of capped bumper bolts by Kenosha Metal Products, Inc. decreased 31 percent in quantity from 1974 to 1975 and increased 26 percent from 1975 to 1976. Production of stampings by Kenosha Metal Products, Inc. increased 5 percent in quantity from 1974 to 1975 and decreased 34 percent from 1975 to 1976.

INCREASED IMPORTS

Imports of stampings are contained within a basket category (TSUSA number 629.2770 parts not otherwise specified of motor vehicles). This basket category includes hundreds of items and there is no reliable estimate of the portion of this category stampings represent. OTAA survey data indicated there are no imports of small stampings competitive with those produced by Kenosha Metal Products, Inc.

Imports of capped bumper bolts are contained within a basket category (TSUSA number 629.2770 parts not otherwise specified of motor vehicles). This basket category includes hundreds of items and there is no reliable estimate of the portion of this category capped bumper bolts represent. OTAA survey data indicated imports of capped bumper bolts decreased in quantity from 1974 to 1975, then increased 14 percent from 1975 to 1976. The ratio of imports to domestic production increased from 14.4 percent in 1975 to 15.4 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers of stampings surveyed indicated that they had not switched their purchases from stampings produced at Kenosha Metal Products, Inc. to imported stampings.

Customers of capped bumper bolts indicated that they had not switched their purchases from capped bumper bolts produced at Kenosha Metal Products, Inc. to imported capped bumper bolts.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with capped bumper bolts and stampings for automobiles produced at Kenosha Metal Products, Inc., Kenosha, Wisconsin did not contribute importantly to the total or partial separations of the workers at that plant. Therefore, workers at Kenosha Metal Products, Inc., Kenosha, Wisconsin are not eligible to apply for trade adjustment assistance.

Signed at Washington, D.C. this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc 77-17393 Filed 6-16-77;8:45 am]

[TA-W-1461]

LACLEDE STEEL COMPANY, ALTON, ILLINOIS

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1461: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 20, 1976 in response to a worker petition received on that date which was filed on behalf of the workers and former workers producing hot rolled carbon steel sheet and strip, carbon steel pipe, and carbon steel wire at Laclede Steel Company's Alton, Illinois plant.

The notice of investigation was published in the FEDERAL REGISTER (42 FR 1536) on January 7, 1977. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Laclede Steel Company, its customers, the U.S. International Trade Commission, the U.S. Department of Commerce, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation revealed that the fourth criterion has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers at the Alton, Illinois plant of the Laclede Steel Company decreased 8.0 percent from 1974 to 1975 and then increased 0.8 percent from 1975 to 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales and production of hot rolled carbon steel sheet and strip at the Alton, Illinois plant decreased 17.3 percent in quantity from 1974 to 1975 and then increased 4.0 percent from 1975 to 1976.

Sales of carbon steel pipe decreased 11.2 percent in quantity from 1974 to 1975 and then increased 11.3 percent from 1975 to 1976. Carbon steel pipe production increased 2.1 percent in quantity from 1974 to 1975 and increased 12.0 percent from 1975 to 1976.

Sales of carbon steel wire decreased 18.5 percent in quantity from 1974 to 1975 and then increased 20.8 percent from 1975 to 1976. Carbon steel wire production fell 20.8 percent in quantity from 1974 to 1975 and then increased 21.7 percent from 1975 to 1976.

INCREASED IMPORTS

Imports of hot rolled carbon steel sheet decreased in every year from 1972 to 1975, declining 32.4 pecent during the period. Imports subsequently increased 8.4 percent from 1975 to 1976. The imports to domestic shipments ratio for hot rolled sheet decreased from 16.3 percent in 1972 to 11.0 percent in 1973, rose to 11.7 percent in 1974 and 14.0 percent in 1975, and then fell to 11.3 percent in 1976.

Imports of hot rolled carbon steel strip decreased 21.0 percent from 1972 to 1973, increased 2.3 percent from 1973 to 1974, decreased 50.0 percent from 1974 to 1975, and then rose 32.0 percent from 1975 to 1976. The imports to domestic shipments ratio for hot rolled strip varied from 2.0 percent to 3.0 percent each year during 1972–1976.

Imports of carbon steel pipe and tubing decreased 10.9 percent from 1972 to 1973, increased 13.1 percent from 1973 to 1974, decreased 13.4 percent from 1974 to 1975, and then increased 18.0 percent from 1975 to 1976. The imports to domestic shipments ratio for carbon steel pipe and tubing decreased from 28.6 percent in 1972 to 20.3 percent in 1973 and then rose steadily to 35.8 percent in 1976.

Imports of carbon steel wire decreased 15.9 percent from 1972 to 1973, increased 27.8 percent from 1973 to 1974, fell 36.9 percent from 1974 to 1975, and then increased 6.4 percent from 1975 to 1976. The imports to domestic shipments ratio declined from 23.3 percent in 1972 to 17.5 percent in 1973, increased to 22.6 percent in 1974, and then fell to 22.0 percent in 1975 and to 19.9 percent in 1976.

CONTRIBUTED IMPORTANTLY

The Department's investigation revealed that the majority of the largest customers of Laclede Steel Company's Alton, Illinois plant do not purchase imported steel products. Those customers that do purchase imports have been increasing their purchases from Laclede. Customers who reduced purchases from Laclede did so because of changes in product specifications which could only be met by other domestic suppliers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with hot rolled carbon steel sheet and strip, carbon steel pipe, and carbon steel wire produced at the Olton, Illinois plant of Laclede Steel Company did not contribute importantly to the total or partial separations of workers producing such articles at that plant.

Signed at Washington, D.C. this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17394 Filed 6-16-77;8:45 am]

[TA-W-1668]

LITTLE FALLS FOOTWEAR, INC. ST. JOHNSVILLE, NEW YORK

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1668: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 22, 1977 in response to a worker petition received on February 11, 1977 which was filed by three workers on behalf of workers and former workers producing slippers and women's casual summer shoes at the St. Johnsville, New York plant of Little Falls Footwear, Inc.

The notice of investigation was published in the FEDERAL REGISTER on March 8, 1977 (42 FR 13088). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from information and publications provided by officials of Little Falls Footwear, Inc. and its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average weekly employment of production workers at Little Falls Footwear decreased 1.6 percent in 1975 compared with 1974, decreased 14.5 percent in 1976 compared with 1975 and decreased 21.2 percent in the first quarter of 1977 compared with the first quarter of 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of slippers and women's casual summer shoes in terms of quantity decreased 12.1 percent in 1975 compared with 1974, decreased 12.8 percent in 1976 compared with 1975 and decreased 31.1 percent in the first two months of 1977 compared with the first two months of 1976.

Production of slippers and women's casual summer shoes in terms of quantity decreased 14.3 percent in 1975 compared with 1974, decreased 14.5 percent in 1976 compared with 1975 and decreased 36.0 percent in the first two months of 1977 compared with the first two months of 1976.

INCREASED IMPORTS

Imports of house slippers, in terms of quantity increased 32.4 percent in 1973 compared with 1972, increased 8.2 percent in 1974 compared with 1973, decreased 5.2 percent in 1975 compared with 1974 and increased 17.2 percent in 1976 compared with 1975. The ratios of imports to domestic production and consumption increased from 33.9 percent and 25.3 percent, respectively, in 1975 to 39.3 percent and 28.2 percent, respectively, in 1976.

Imports of women's and misses' nonrubber footwear, except athletic, with nonleather uppers in terms of quantity increased 14.3 percent in 1973 compared with 1972, decreased 15.2 percent in 1974 compared with 1973, decreased 1.9 percent in 1975 compared with 1974 and increased 4.7 percent in 1976 compared with 1975. The ratios of imports to domestic production and consumption decreased from 161.4 percent and 61.7 percent, respectively, in 1975 to 153.7 percent and 60.6 percent, respectively, in 1976.

CONTRIBUTED IMPORTANTLY

Customers indicated that they increased purchases of imported slippers and shoes. Purchases of slippers and shoes from Little Falls Footwear declined during 1976 and the first two months of 1977. Although customers indicated that they preferred the quality of domestic slippers and shoes, those that do purchase imports did so because of the price differentials which exist between imported and domestic slippers and shoes.

CONCLUSION

After careful review of the facts obtained in the investigation, it is concluded that increases of imports like or directly competitive with slippers and women's casual summer shoes produced by the St. Johnsville, New York plant of Little Falls Footwear, Inc. contributed importantly to the total a partial separations of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of slippers and women's casual summer shoes at the St. Johnsville, New York plant of Little Falls Footwear, Inc. who became totally or partially separated from employment on or after September 11, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17395 Filed 6-16-77;8:45 am]

[TA-W-1415]

NORTHWEST STEEL ROLLING MILLS, INCORPORATED, SEATTLE, WASHINGTON

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1415: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 14, 1976 in response to a worker petition received on December 14, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing concrete reinforcing bar and bar-size light shapes at Northwest Steel Rolling Mills, Incorporated, Seattle, Washington.

The notice of investigation was published in the FEDERAL REGISTER on January 4, 1977 (42 FR 892). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Northwest Steel Rolling Mills, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average weekly employment of production workers declined 19.9 percent from 1975 to 1976.

Workers for reinforcing bar and bar-size light shapes are not separately identifiable. All workers are involved in the production of both product lines.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total sales at the Seattle plant of Northwest Steel Rolling Mills declined in value 37.3 percent from 1974 to 1975 and further declined 9.0 percent from 1975 to 1976. The principal product produced at the plant is concrete reinforcing bar.

INCREASED IMPORTS

Imports of concrete reinforcing bars declined from 358.2 thousand net tons in 1972 to 286.4 thousand net tons in 1973. Imports increased to 477.5 thousand net tons in 1974, declined to 141.9 thousand net tons in 1975 and increased to 192.2 thousand net tons in 1976. The ratio of imports to domestic shipments declined from 8.0 percent in 1972 to 5.6 percent in 1973. The ratio increased to 9.5 percent in 1974, declined to 3.9 percent in 1975 and increased to 5.0 percent in 1976.

In the seven western states steel market principally served by the Seattle plant the ratio of imports of concrete reinforcing bars to domestic shipments increased from 8.4 percent in 1975 to 14.3 percent in 1976.

CONTRIBUTED IMPORTANTLY

The Department's investigation revealed that customers of Northwest Steel Rolling Mills have reduced purchases from Northwest Steel and increased purchases of imported concrete reinforcing bar. The price differential between domestic and imported reinforcing bar was the factor cited most frequently as the reason that customers switched from domestic to foreign suppliers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with concrete reinforcing bar produced by Northwest Steel Rolling Mills, Incorporated contributed importantly to the total or partial separation of workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at Northwest Steel Rolling Mills, Incorporated in Seattle, Washington, including those at the electric furnace melt shop in Kent, Washington, who became totally or partially separated from employment on or after December 3, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17396 Filed 6-16-77;8:45 am]

[TA-W-1626]

ROHM AND HAAS NORTH CAROLINA, INCORPORATED, FAYETTEVILLE, NORTH CAROLINA

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1626: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 7, 1977 in response to a worker petition received on January 28, 1977 which was filed on behalf of workers and former workers producing partially oriented polyester yarn and textured polyester yarn at Rohm and Haas North Carolina Inc., Fayetteville, North Carolina, a subsidiary of Rohm and Haas, Inc., Philadelphia, Pennsylvania.

The Notice of Investigation was published in the FEDERAL REGISTER (42 FR 12500) on March 4, 1977. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Rohm and Haas North Carolina Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are

threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (4) has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of partially oriented polyester yarn and textured polyester yarn production workers at Rohm and Haas North Carolina, Inc. increased 12 percent from 1974 to 1975, and then decreased 35 percent from 1975 to 1976.

Average employment of salaried workers at Rohm and Haas North Carolina, Inc. increased 8 percent from 1974 to 1975, then decreased 13 percent from 1975 to 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Company sales of partially oriented polyester yarn decreased in value 52 percent from 1974 to 1975, and 61 percent from 1975 to 1976.

Company sales of textured polyster yarn decreased in value 58 percent from 1974 and 1975, and 52 percent from 1975 to 1976.

Company production of partially oriented polyester yarn decreased in quantity 42 percent from 1974 to 1975, and 40 percent from 1975 to 1976.

Company production of textured polyester yarn increased in quantity 69 percent from 1974 to 1975, then decreased 42 percent from 1975 to 1976.

Production of partially oriented polyester yarn and polyester textured yarn at Rohm and Haas North Carolina, Inc. ceased in November 1976.

INCREASED IMPORTS

Imports of textured man-made yarn decreased both absolutely and relatively in every year compared to the previous year from 1972 through 1975. The ratio of imports to domestic production declined from 2.5 percent in 1974 to 2.0 percent in 1975. Imports decreased 2 percent absolutely from 1975 to 1976.

Imports of partially oriented yarn (POY) are infreqeunt and neligible representing no more than 1 percent of domestic shipments at any one time. In addition, imports of POY are not identifiable, being classified in different TSUSA basket categories depending upon the port of entry and date of classification.

Imports of spun non-cellulosic yarn increased from 10,126,000 pounds in 1972 to 14,089,000 pounds in 1973, decreased to 5,622,000 pounds in 1974 and 4,905,000 pounds in 1975 and then increased to 8,783,000 pounds in 1976.

Imports of spun cellulosic yarn decreased from 412,000 pounds in 1972 to 95,000 pounds in 1973, increased to 356,000 pounds in 1974, increased to 973,000 pounds in 1975 and then decreased to 490,000 pounds in 1976.

CONTRIBUTED IMPORTANTLY

The petition alleges that increased imports of cloth and articles of clothing have caused a decrease in the domestic production of fabric and yard, thus adversely affecting production and employment at Rohm and Haas North Carolina, Inc. Imported cloth and articles of clothing cannot be considered to be like or directly competitive with yarn. Imports of yarn must be considered in determining import injury to workers producing yarn.

Customers surveyed indicated that they had not switched their purchases from partially oriented polyester yarn and textured polyester yarn produced at Rohm and Haas North Carolina, Inc., Fayetteville, North Carolina to imported partially oriented polyester yarn and textured polyester yarn.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with partially oriented polyester yarn and textured polyester yarn produced at Rohm and Haas North Carolina Incorporated, Fayetteville, N.C. did not contribute importantly to the total or partial separation of the workers of that firm.

Signed at Washington, D.C., this 9th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17397 Filed 6-16-77;8:45 am]

[TA-W-1830]

SEA LIFE ICE AND FUEL, INC. BROWNSVILLE, TEXAS

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1830: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 21, 1977 in response to a worker petition received on March 15, 1977 which was filed on behalf of workers and former workers of Sea Life Ice and Fuel, Inc., Brownsville, Texas.

The notice of investigation was published in the FEDERAL REGISTER on April 5, 1977 (42 FR 18158). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Sea Life Ice and Fuel, Inc. and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or porportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important, but not necessarily more important than any other cause.

If any of the above criteria is not satisfied, a negative determination must be made.

Sea Life Ice and Fuel, Inc. sells ice and fuel from its facility to shrimpboats. The facility consists of an ice plant, fuel storage tanks and one hundred feet of dockage. Sea Life Ice and Fuel, Inc. closed October 1, 1976 but is expected to reopen in June 1977 with the resumption of the shrimping season.

Sea Life Ice and Fuel, Inc. does not produce an article within the meaning of Section 222(3) of the Act and this Department has already determined that the performance of services are not covered by the adjustment assistance program; see Notice of Determination in Pan American World Airways, Incorporated (TA-W-153, 40 FR 54639). Sea Life Ice and Fuel, Inc. performed a service, the selling of ice and fuel.

CONCLUSION

After careful review of the issues, I have determined that services of the kind provided by Sea Life Ice and Fuel, Inc., Brownsville, Texas are not "articles" within the meaning of Section 222(3) of the Trade Act of 1974. The petition for trade adjustment assistance is, therefore, denied.

Signed at Washington, D.C., this 10th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-17398 Filed 6-16-77;8:45 am]

[TA-W-1429, 1451, 1452]

U.S. STEEL CORPORATION, FAIRFIELD WORKS, BIRMINGHAM, ALABAMA PLANT; BESSEMER, ALABAMA PLANT; FAIRFIELD, ALABAMA PLANT

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1429, TA-W-1451, and TA-W-1452: Investigations regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigations were initiated on December 15, 1976 in response to worker petitions received on December 15, 1976 which were filed by the United Steelworkers of America on behalf of workers and former workers producing carbon steel plate, structural and wire products at the Bessemer, Birmingham, and Fairfield, Alabama plants of U.S. Steel Corporation.

Notices of Investigation were published in the FEDERAL REGISTER as follows: TA-W-1429 on January 4, 1977 (42 FR 903), TA-W-1451 on January 7, 1977 (42 FR 1542), and TA-W-1452 on January 7, 1977 (42 FR 1543). No public hearing was requested and none was held.

The information upon which the determinations were made was obtained principally from officials of U.S. Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm have an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely; and

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separation, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four criteria have been met.

TOTAL OR PARTIAL SEPARATIONS

Workers are not separately identifiable by individual plants. All workers are identifiable by product line for the entire Fairfield Works.

A. WIRE PRODUCTS

The average number of workers engaged in employment related to the production of wire products at the Fairfield Works decreased 58.4 percent in 1975 compared to 1974. Employment declined 3.0 percent in the first 11 months of 1976 compared to the like period in 1975. Employment decreased in the 4th quarter of 1975 and the 2nd quarter of 1976 compared to the same quarters one year earlier.

B. STRUCTURALS

The average number of workers engaged in employment related to the production of structurals at the Fairfield Works decreased 13.7 percent in 1975 compared to 1974. Employment decreased 46.7 percent in the first 11 months of 1976 compared to the like period in 1975. Employment declined in the 4th quarter of 1975 compared to the same quarter one year earlier.

C. PLATES

The average number of workers engaged in employment related to the production of plates decreased 3.0 percent in 1975 compared to 1974. Employment decreased 45.3 percent in the first 11 months of 1976 compared to the like period in 1975. Employment declined in the 4th quarter of 1975 compared to the same quarter one year earlier.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production data was not made available. Sales data is presented for the entire Fairfield Works by product line.

A. WIRE PRODUCTS

Sales of wire products by the Fairfield Works decreased 62.9 percent in quantity in 1975 compared to 1974. Sales increased 6.7 percent in quantity in the first 11 months of 1976 compared to the like period in 1975. Sales decreased 73.2 percent in quantity and 11.5 percent in quantity, respectively, in the 4th quarter of 1975 and the 1st quarter of 1976 compared to the same quarters one year earlier.

B. STRUCTURALS

Sales of structurals by the Fairfield Works decreased 22.8 percent in quantity in 1975 compared to 1974. Sales decreased 41.7 percent in quantity in the first 11 months of 1976 compared to the like period in 1975. Sales decreased in the 4th quarter of 1975 and in each of the first 3 quarters of 1976 when compared to the same quarters one year earlier.

C. PLATES

Sales of plates by the Fairfield Works decreased 13.7 percent in quantity in 1975 compared to 1974. Sales decreased 40.1 percent in the first 11 months of 1976 compared to the like period in 1975. Sales decreased in the 4th quarter of 1975 and in each of the first 3 quarters of 1976 when compared to the same quarters one year earlier.

INCREASED IMPORTS

A. WIRE PRODUCTS

Imports of carbon steel wire decreased from 515.3 thousand tons in 1972 to 433.2 thousand tons in 1973. In 1974, imports increased to 553.8 thousand tons, then declined to 349.6 thousand tons in 1975. In 1976, imports increased 6.3 percent to 371.8 thousand tons.

The ratio of imports to domestic shipments of carbon steel wire decreased from 23.3 percent in 1972 to 17.5 percent in 1973. In 1974, the ratio increased to 22.6 percent, then decreased to 22.0 percent in 1975. In 1976, the ratio decreased to 19.9 percent.

B. STRUCTURALS

Imports of carbon steel structural shapes decreased from 1.6 million tons in 1972 to 1.3 million tons in 1973. In 1974, imports decreased to 1.1 million tons and further decreased to .8 million tons in 1975. In 1976, imports increased 75 percent to 1.4 million tons.

The ratio of imports to domestic shipments of carbon steel structural shapes decreased from 34.1 percent in 1972 to 21.3 percent in 1973. The ratio declined to 19.7 percent in 1974 and further declined to 19.5 percent in 1975. In 1976, the ratio increased to 40.0 percent.

C. PLATE

Imports of carbon steel plate decreased from 1.7 million tons in 1972 to 1.3 million tons in 1973. Imports increased to 1.7 million tons in 1974, then decreased to 1.4 million tons in 1975. In 1976, imports increased 14.3 percent to 1.6 million tons.

The ratio of imports to domestic shipments of carbon steel plate decreased from 26.3 percent in 1972 to 16.4 percent in 1973. In 1974, the ratio increased to 18.8 percent and increased again in 1975 to 19.4 percent. The ratio continued to increase in 1976 to 27.7 percent.

CONTRIBUTED IMPORTANTLY

The Office of Trade Adjustment Assistance conducted a survey of customers of the Fairfield Works that purchased carbon steel structurals, plates and wire products. Customers for each of the three products indicated that they had reduced purchases from the Fairfield plant and switched to imports. The cheaper prices offered for the imported product were indicated as the reason for switching. Most of the customers responding to the survey questionnaire reported that there was import influence affecting the marketing of steel structurals, wire products and plate.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with carbon steel structurals, plates, and wire products produced at the Fairfield Works of U.S. Steel Corporation (Bessemer, Birmingham, and Fairfield, Alabama) contributed importantly to the total or partial separation of workers at the plants. In accordance with the provisions of the Act, I make the following certification:

All workers at the Bessemer, Alabama; Birmingham, Alabama; and Fairfield, Alabama plants of the U.S. Steel Corporation engaged in employment related to the pro-

duction of one of the following products: carbon steel structural, plate, or wire products, who became totally or partially separated from employment on or after November 15, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 9th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1444]

UNITED STATES STEEL CORPORATION NATIONAL WORKS; MCKEESPORT, PENNSYLVANIA

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1444: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to a worker petition received on December 15, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing carbon steel pipe and tubing at the McKeesport, Pennsylvania plant of United States Steel Corporation.

The Notice of Investigation was published in the FEDERAL REGISTER on January 7, 1977 (42 FR 1540). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of United States Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issues a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all four criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers declined 24.6 percent in the first eleven months of 1976 compared to the same period in 1975. The average number of production workers declined in the fourth quarter of 1975 and in each of the first three quarters of 1976 compared to the same quarters one year earlier.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of carbon steel pipe and tubing produced at the McKeesport plant declined 60.7 percent in quantity in the first nine months of 1976 compared to the same period in 1975.

Production of carbon steel pipe and tubing at the McKeesport plant declined 51.9 percent in quantity in the first nine months of 1976 compared to the same period in 1975. Production declined in the last quarter of 1975 and in each of the first three quarters of 1976 compared to the same quarters one year earlier.

INCREASED IMPORTS

U.S. imports of carbon steel pipe and tubing declined from 1.8 million short tons in 1972 to 1.6 million short tons in 1973. Imports increased to 1.8 million short tons in 1974, declined to 1.5 million short tons in 1975 and increased to 1.8 million short tons in 1976. The ratio of imports to domestic shipments of carbon steel pipe and tubing decreased from 28.6 percent in 1972 to 20.3 percent in 1973 before increasing to 21.5 percent in 1974, 22.8 percent in 1975, and 35.8 percent in 1976.

CONTRIBUTED IMPORTANTLY

Some customers of tubular products made at the McKeesport plant indicated that they reduced purchases from U.S. Steel and increased their reliance on imported pipe and tubing. Other customers indicated that they lost business to competitors that sold cheap imported tubular products and this caused them to reduce their purchases from the McKeesport plant.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with carbon steel pipe and tubing produced at the National Works of United States Steel Corporation contributed importantly to the total or partial separation of the workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of carbon steel pipe and tubing at the McKeesport, Pennsylvania plant of the National Works of United States Steel Corporation who became totally or partially separated from employment on or after November 15, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 9th day of June 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

Employment and Training Administration

SUBCOMMITTEE ON EQUAL APPRENTICESHIP OPPORTUNITY; FEDERAL COMMITTEE ON APPRENTICESHIP

Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. 1) notice is hereby given of a meeting of the Subcommittee on Equal Apprenticeship Opportunity to be held on June 27, 1977, at the Department of Labor Building, Room S-5215 (A-C), 200 Constitution Avenue NW., Washington, D.C. The meeting will be in session from 4 p.m. until 5 p.m. approximately.

The agenda for the meeting will include a discussion of civil rights issues, focusing on measures to improve opportunities for women in apprenticeship. Specifically, the Subcommittee will consider a regulatory approach, including the review of recommendations for goals and timetables and other avenues to expand opportunities for women.

Members of the public are invited to attend the proceedings. Any member of the public who wishes to file written data, views or arguments pertaining to the agenda may do so by furnishing it to the Executive Secretary at any time prior to the meeting. Thirty duplicate copies are needed for the members and for inclusion in the minutes of the meeting.

If time permits, members of the public may be permitted to address the Subcommittee on the above issues.

Any member of the public who wishes to speak at this meeting should so indicate in such a written statement; also the nature of intended presentation and the amount of time needed. The Chairman will announce at the beginning of the meeting the extent to which time will permit the granting of such requests.

Communications to the Executive Secretary should be addressed as follows:

Mrs. M. M. Winters, Bureau of Apprenticeship and Training, ETA, U.S. Department of Labor, 601 D St. NW. (Rm. 5434), Washington, D.C. 20213.

Signed at Washington, D.C., this 16th day of June 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training Administration.

NATIONAL SCIENCE FOUNDATION

ADVISORY COUNCIL, TASK GROUP NO. 4

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

NAME: Task Group No. 4 of the NSF Advisory Council.

PLACE: Room 421, National Science Foundation, 1800 G Street, NW., Washington, D.C. 20550.

DATE AND TIME: July 7, 1977, 9 a.m.

TYPE OF MEETING: Open.

CONTACT PERSON:
Ms. Margaret Windus, Executive Secretary, NSF Advisory Council, National Science Foundation, Room 518, Washington, D.C. 20550, telephone 202-632-4384.

PURPOSE OF TASK GROUP: The purpose of the Task Group, composed of members of the NSF Advisory Council, is to provide the full Council with a mechanism to consider numerous issues of interest to the Council that have been assigned by the National Science Foundation.

SUMMARY MINUTES: May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, Room 248, National Science Foundation, Washington, D.C. 20550.

AGENDA: To assess the need for and potentail benefits from increased scientific cooperation between the U.S. and Western Europe countries. Suggest scientific areas, modes, and institutional mechanism best suited for such cooperation.

M. REBECCA WINKLER,
Acting Committee Management Officer

JUNE 14, 1977.

ADVISORY PANEL FOR OCEANOGRAPHY PROJECT SUPPORT

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

NAME: Advisory Panel for Oceanography Project Support.

DATE AND TIME: July 7 and 8, 1977, 9 am to 6 pm each day.

PLACE: Conference Center, W. Alton Jones Campus, University of Rhode Island, West Greenwich, Rhode Island.

TYPE OF MEETING: Closed.

CONTACT PERSON: Dr. Robert E. Wall, Head, Oceanography Section, Room 611, National Science Foundation, Washington, D.C. 20550, telephone 202-632-4227.

PURPOSE OF PANEL: To provide advice and recommendations concerning support for research in Oceanography.

AGENDA: Review and evaluation of research proposals and projects as part of the selection process for awards.

REASON FOR CLOSING: The proposals and projects being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

AUTHORITY TO CLOSE MEETING: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

JUNE 14, 1977.

NATIONAL TRANSPORTATION POLICY STUDY COMMISSION

NATION'S TRANSPORTATION NEEDS

Open Meeting

In accordance with Subsection 10(a) of the Federal Advisory Committee Act, Public Law 92-463, the National Transportation Policy Study Commission announces the following meeting:

Name: Meeting of the Commission.
Date: June 22, 23, and 24, 1977.
Time: 9 a.m. to 5 p.m.
Place: 2167 Rayburn House Office Bldg., Washington, D.C. 20515.
Type of meeting: Open.
Contact person: Beth Singley, National Transportation Policy Study Commission, 1750 K Street NW., Suite 800, Washington, D.C. 20006.
Purpose of the Commission: The National Transportation Policy Study Commission was established under Section 154 of the Federal-Aid Highway Act of 1976 (Pub. L. 94-280) to report findings and recommendations with respect to the Nation's transportation needs, both national and regional, through the year 2000.

Tentative agenda: Receipt of testimony from interested parties on identifying National transportation issues.

Dated: June 13, 1977.

EDWARD R. HAMBERGER,
General Counsel.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on June 13, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

NEW FORMS

DEPARTMENT OF AGRICULTURE

Economic Research Service, Savanna, Illinois Port Feasability Study, single time, country elevators in 11 county areas, Gaylord Worden, 395-4730.

OFFICE OF SCIENCE AND TECHNOLOGY GROUP

EARTHQUAKE HAZARDS REDUCTION ADVISORY GROUP

Establishment

Pursuant to the Federal Advisory Committee Act (Public Law 92-463), it is hereby determined that the establishment of the Earthquake Hazards Reduction Advisory Group is necessary, appropriate, and in the public interest in connection with the performance of the duties imposed upon the Director, Office of Science and Technology Policy (OSTP) by the National Science and Technology Policy, Organization, and Priorities Act of 1976. This determination follows consultation with the Office of Management and Buget (OMB), pursuant to section 9(a)(2) of the Federal Advisory Committee Act and OMB Circular No. A-63, Revised.

1. *Name of Group.* Earthquake Hazards Reduction Advisory Group.

2. *Purpose.* The Office of Science and Technology Policy, together with other units in the Executive Office of the President, is commencing a review of activities and plans appropriate to the Federal, state, local governmental units and the private sector for the implementation of actions deriving from a comprehensive program of research in earthquake disaster mitigation. The initiation of this review follows earlier action by the President which led to the development of an accelerated program of research into these topics, carried out through the U.S. Geological Survey and the National Science Foundaiton. In order to provide a wide range of advice in the consideration of these elements of the implementation plan, the Advisory Group will be established to draw together experts at the state and local level and from the private sector. The advisory group will make recommendations to the Director, Office of Science and Technology Policy for his consideration in the further analysis undertaken by the Executive Office of the President and the affected Federal agencies prior to policy and budgetary recommendations to the President and the Congress.

3. *Effective Date of Establishment and Duration.* The establishment of the Earthquake Hazards Reduction Advisory Group is effective upon filing of the charter with the Director, Office of Science and Technology Policy, and with the standing committees of Congress having legislative jurisdiction over the Office of Science and Technology Policy. The Earthquake Hazards Reduction Advisory Group will continue one calendar year from the effective date.

4. *Membership.* The Earthquake Hazards Reduction Advisory Group will be composed of approximately 15 individuals selected from state and local officials and the private sector and having qualifications for providing expert knowledge.

5. *Advisory Group Operation.* The Earthquake Hazards Reduction Advisory Group will operate in accordance with provisions of the Federal Advisory Committee Act (Public Law 92-463), OSTP policy and procedures, OMB Circular No. A-63, Revised, and other directives and instructions issued in implementation of the Act.

FRANK PRESS,
Director.

SECURITIES AND EXCHANGE COMMISSION

[Administrative Proceeding File No. 3-5229]

ATLANTIC RICHFIELD CO. AND ARCO PIPE LINE CO.

Application and Opportunity for Hearing

JUNE 10, 1977.

In the matter of Atlantic Richfield Company and Arco Pipe Line Company, File Nos. 2-10609 (22-1468), 2-26457 (22-4460), 2-52162 (22-8095), 2-55309 (22-8705).

Notice is hereby given that Atlantic Richfield Company ("A.R.CO.") and ARCO Pipe Line Company ("Pipe Line"), a wholly owned subsidiary of A.R.CO., have filed an application under clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding by the Commission that the trusteeships of Morgan Guaranty Trust Company of New York (the "Bank") under certain indentures which are qualified under the Act and under a new indenture which is not qualified under the Act are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Bank from acting as Trustee under any of such qualified indentures.

Section 310(b) of the Act provides inter alia, that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest (as defined in the section), it shall within ninety days after ascertaining that it has such conflicting interest either eliminate such conflicting interest or resign. Subsection (1) of this section provides, with certain exceptions, that a trustee is deemed to have a conflicting interest if it is acting as trustee under another indenture of the same obligor. However, pursuant to clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture or indentures under which other securities of such obligor are outstanding, if the issuer shall have sustained the burden of proving on application to the Commission, and after opportunity for hearing thereon, that trusteeship under the qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting under any of such indentures.

A.R.CO. and Pipe Line allege that:

1. The Bank, as Trustee, has entered into the following indentures which were qualified under the Act ("Qualified Indentures"): (i) An indenture dated January 15, 1954, pursuant to which there were issued A.R.CO.'s 3¼ percent Debentures due 1979; (ii) an indenture dated May 15, 1967, pursuant to which there were issued A.R.CO.'s 5⅝ percent Debentures due 1997; (iii) an indenture dated November 1, 1974, pursuant to which there were issued Pipe Line's 8.70 percent Guaranteed Notes due 1981; and (iv) a first supplemental indenture thereto, dated February 1, 1976, pursuant to which there were issued Pipe Line's 8 percent Guaranteed Notes due 1984.

2. On April 7, 1977 Cavalier Trading Company ("Cavalier"), A.R.CO. and the Bank, as Trustee, entered into an Indenture dated as of April 7, 1977 (the "Cavalier Indenture") pursuant to which Cavalier may issue up to $70,000,000 principal amount of its Short-term Notes. Payment of Cavalier's Short-term Notes is unconditionally guaranteed by A.R.CO. pursuant to the terms of such Notes and the Cavalier Indenture. The Cavalier Short-term Notes are also guaranteed by Sequoia Marine Corporation ("Sequoia") and are secured by (i) ship mortgages from Sequoia to the Bank, as Trustee, on two vessels which are to be owned by Sequoia and chartered to Cavalier and (ii) the assignment to the Bank, as Trustee, or bareboat charter parties pursuant to which such vessels are to be chartered by Sequoia to Cavalier and sub-chartered by Cavalier to two wholly-owned subsidiaries of A.R.CO. Pursuant to the bareboat charter parties, upon the payment in full of the Cavalier Notes or under other specified circumstances, title to the vessels is to be transferred by Sequoia to such wholly-owned subsidiaries of A.R.CO. While Sequoia is the official, registered owner of record of the vessels, as a result of the bareboat charter parties A.R.CO. is deemed to be the owner of the vessels for A.R.CO.'s Federal income tax and financial reporting purposes. The Cavalier Short-term Notes will not be registered under the Securities Act of 1933 on the basis of, among other reasons, the exemption provided by Section 4(2) thereof, and the Cavalier Indenture has not been qualified under the 1939 Act on the basis of the provisions of Section 304(b) thereof.

3. All of the Qualified Indentures contain the provision permitted by the proviso in Section 310(b)(1) of the Act.

4. Legal title to the security under the Cavalier Indenture does not reside in A.R.CO. or Pipe Line; consequently, should the Bank have occasion to proceed against the security under the Cavalier Indenture, such action would not affect the rights of the holders of securities issued pursuant to the Qualified Indentures.

5. No default has existed at any time under the Qualified Indentures or the Cavalier Indenture. A.R.CO.'s obligations in respect of the Qualified Indentures and the Cavalier Indenture are unsecured and rank equally pari passu.

6. Such differences as exist among the Qualified Indentures and the Cavalier Indenture are not so likely to involve the Bank in a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Bank from acting as Trustee under any of the said indentures.

A.R.CO. and Pipe Line have waived (a) notice of hearing, (b) hearing on the issues raised by said application, and (c) all rights to specify procedures under Rule 8(b) of the Commission's Rules of Practice.

For a more detailed account of the matters of fact and law asserted, all persons are referred to said application, which is a public document on file in the offices of the Commission at the Public Reference Room, 1100 L Street NW., Washington, D.C.

Notice is further given that any interested person may, not later than June 30, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of law or fact raised by such application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-17310 Filed 6-16-77;8:45 am]

[Rel. No. 34-13613; File No. SR-CBOE-1977-13]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Proposed Rule Change By Self-Regulatory Organizations

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on June 2, 1977 the abovementioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

CBOE'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

OBLIGATIONS OF TERMINATING MEMBERS

Rule 3.19. Every member who sells or transfers his membership pursuant to the provisions of this Chapter must be current in all filings and payments of dues, fees and charges relating to that membership, including filing fees and charges required by the Securities and Exchange Commission and the Securities Investor Protection Corporation. If a member fails to make all such filings, or to pay all such dues, fees and charges, or to turn in his trading badge and membership certificate, the Secretary may, notwithstanding the other applicable provisions of this Chapter, withhold distribution of the proceeds of sale of said membership, or delay the effectiveness of the membership of the transferee, until such time as such failures have been remedied.

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed rule change is to provide the CBOE with a more effective means of fulfilling its responsibility as a Securities Investor Protection Corporation collection agent, as well as to obtain completed Securities & Exchange Commission forms which the CBOE is obligated to file for those members who have either sold or transferred their memberships. Implementation of this new rule specifically is addressed to both types of problems as well as to ensure that the CBOE will have additional leverage over those persons who, although terminating their membership status, fail to hand in trading badges and membership certificates, thereby reducing the CBOE's administrative problems in this area.

Section 6(b)(5) of the Securities Exchange Act of 1934, as amended, provides the statutory basis for the proposed rule change.

Comments were not solicited, nor have comments been received from members of the CBOE or otherwise concerning this amendment.

No burden would be imposed upon competition by virtue of the implementation of this proposed Rule 3.19.

On or before July 22, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and published its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted within 21 days of the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

JUNE 9, 1977.

[FR Doc.77-17307 Filed 6-16-77;8:45 am]

[Release No. 34-13609; File No. SR-DTC-76-8]

DEPOSITORY TRUST CO.

Proposed Rule Change by Self-Regulatory Organizations

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s (b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on May 26, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission Amendment No. 1 to a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change establishes a "third party" interface service between The Depository Trust Company (DTC) and the Midwest Securities Trust Company (MSTC). The proposed rule change is attached as Exhibit 2 to Amendment No. 1 to DTC's filing on Form 19b-4A, File No. SR-DTC-76-8.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed rule change is to implement a "third party" interface service between DTC and MSTC. This delivery service permits any participant in one depository to deliver to, or receive from, any participant in the other depository, "free" (without settlement) or for payment. Previously, only a participant affiliated with both depositories could use the interface and then only to move positions between its accounts in DTC and MSTC.

The proposed rule change facilitates the prompt and accurate clearance and settlement of securities transactions for which DTC is responsible in that the proposed rule change eliminates the need for dual participants to initiate multiple book-entry deliver orders with attendant charges to effect inter-depository movements, and it enables sole participants of one depository to effect book-entry deliveries to sole participants of the other depository, which would otherwise necessitate physical deliveries by inter-city securities drafts.

Comments on the proposed rule change were solicited by DTC Important Notice B 2808. No comments were received.

DTC believes that the proposed rule change creates no burden on competition.

Within 35 days of the date of publication of this notice in the FEDERAL REGISTER, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rules change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the public reference room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should be submitted within 21 days of the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[Rel. No. 20069]

MIDDLE SOUTH UTILITIES, INC.

Louisiana Power and Light Co.

JUNE 9, 1977.

PROPOSAL BY SUBSIDIARY COMPANY TO ISSUE AND SELL COMMON STOCK TO ITS PARENT HOLDING COMPANY

Notice is hereby given that Middle South Utilities, Inc. ("Middle South"), 225 Baronne Street, New Orleans, Louisiana 70112, a registered holding company, and a wholly-owned subsidiary company, Louisiana Power & Light Company ("Louisiana"), 142 Delaronde Street, New Orleans, Louisiana 70174, have filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Sections 6(a), 7, 9(a), 10, and 12(f) and Rule 43 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

Louisiana proposes to issue and sell to Middle South, and Middle South proposes to purchase 4,700,000 additional shares of its presently authorized but unissued common stock, no par value ("Common Stock") for an aggregate cash purchase price of $30,000,000. Louisiana proposes to apply the proceeds of such sale to the payment of short-term borrowings then outstanding for the partial financing of Louisiana's construction program having estimated expenditures of $198,000,000 in 1977, and for other corporate purposes.

Middle South proposes to borrow the funds required to acquire the Common Stock pursuant to a revolving credit agreement with a group of banks headed by Manufacturers Hanover Trust Company which provides for borrowings to be evidenced by Louisiana's unsecured short-term promissory notes. All interested persons are referred to Middle South's Declaration in File No. 70-6010 for a complete statement of the transaction.

No fees and expenses are anticipated in connection with the proposed transactions except for the filing fee paid to this Commission and for legal fees of Louisiana's counsel which are expected not to exceed $1,000. It is stated that no State commission and no Federal commission other than this Commission has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than July 3, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered), and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-17310 Filed 6-16-77;8:45 am]

[File No. 500-1]

MINER INDUSTRIES, INC.

Suspension of Trading

JUNE 9, 1977.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the securities of Miner Industries, Inc. being traded on a national securities exchange or otherwise is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 12:40 p.m. (EDT) on June 9, 1977 through June 18, 1977.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Application No. 02/02-5332]

KING SMALL BUSINESS INVESTMENT CO.

Application for a License To Operate as a Small Business Investment Co.

An application for a license to operate as a small business investment company under Section 301(d) of the Small Business Investment Act of 1958, as amended (Act) (15 U.S.C. 661 et seq.) has been filed by King Small Business Investment Corporation (Applicant) with the Small Business Administration (SBA) pursuant to 13 C.F.R. 107.102 (1977).

The officers and directors are as follows:

Richard M. Mancuso, President, General Manager, Director and 47 percent Stockholder, 32 Longleat Parkway, Eggertsville, New York.

Dr. Lawrence M. Murphy, Vice President, Director and 16 percent Stockholder, 257 E. Ferry Street, Buffalo, New York 14208.

Neil Ritz, Vice President, Director, 22 percent Stockholder and Treasurer, 8407 Kimberly Drive, Williamsville, New York 14221.

Dr. Thomas V. Guilo, Secretary, Director and 10 percent Stockholder, 19 Middlesex Road, Buffalo, New York 14216.

F. Rene Alvarez, Assistant Treasurer and 5 percent Stockholder, Apartado 354, Valencia, Venezuela.

The applicant, a New York corporation, authorized to operate in the State of New York, will maintain an office at 110 Pearl Street, Buffalo, New York 14202, and will begin operations with $500,000 of paid-in capital and paid-in surplus derived from the sale of common stock to the above individuals.

As a small business investment company under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owner and management and the probability of successful operations of the Applicant under this management, including adequate profitability and financial soundness, in accordance with the Act and SBA Rules and Regulations.

Any person may, not later than 15 days from the date of publication of this notice, submit to SBA written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Buffalo, New York.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: June 10, 1977.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

DEPARTMENT OF STATE

[Public notice CM7/81]

OCEAN AFFAIRS ADVISORY COMMITTEE

Meeting

Notice is hereby given pursuant to the provisions of Public Law 92-463 that a meeting of the Ocean Affairs Advisory Committee will be convened on July 6 and 7, 1977, at the Kodiak Travel Lodge Hotel, Kodiak, Alaska.

The meeting on July 6 will be open to the public. That session will include a discussion of the status of organization and staffing in the Bureau for Oceans and International Environmental and Scientific Affairs and, in particular, the Office of Oceans and Fisheries Affairs. Also discussed will be the role, function and membership of the Advisory Committee and the question of joint venture fisheries arrangements between foreign fishing concerns and American fishing interests. There will be, in addition, unclassified discussion of the 1977 session of the Law of the Sea Conference, of the status of implementation of Pub. L. 94-265, of U.S.-Canadian fisheries relations, of problems relating to tuna, shrimp and other distant water fisheries and also of pending or forthcoming fisheries negotiations.

The meeting on July 7 will not be open to the public as the discussion will involve matters exempt from public disclosure under 5 USC 552b(c)(1) and the public interest requires that such discussions be withheld from public disclosure.

These discussions will include examination and/or discussions of classified materials relating to the Law of the Sea Conference session mentioned above and to ongoing or forthcoming international fisheries negotiations.

Dated: June 10, 1977.

ROZANNE L. RIDGWAY,
Deputy Assistant Secretary for Oceans and Fisheries Affairs.

[FR Doc. 77-17464 Filed 6-16-77;8:45 am]

TENNESSEE VALLEY AUTHORITY

IMPLEMENTATION OF OFFICE OF MANAGEMENT AND BUDGET CIRCULAR A-95

Final Coordination Procedures

AGENCY: Tennessee Valley Authority (TVA).

ACTION: Final procedures.

SUMMARY: The Tennessee Valley Authority has adopted the following final procedures to guide the intergovernmental coordination and review of direct TVA developmental activities and the approval of non-TVA activities having a significant impact on state, interstate, areawide, or local development plans or programs or on the environment. These procedures implement Part II of the revised Office of Management and Budget (OMB) Circular No. A-95 published January 13, 1976 (41 FR 2052), and Title IV of the Intergovernmental Cooperation Act of 1968 (Pub. L. No. 90-577, 82 Stat. 1098). Because these procedures are intended primarily for intra-agency use with copies to be made available directly to the affected state and local clearinghouses, they will not be codified for publication as a section of the Code of Federal Regulations.

EFFECTIVE DATE: These final procedures will become effective on June 17, 1977.

FOR FURTHER INFORMATION CONTACT:

TVA, Director of Navigation Development and Regional Studies, 200A Liberty Building, Knoxville, Tennessee 37902.

SUPPLEMENTARY INFORMATION: The interim procedures upon which the final procedures are based were published for comment on June 28, 1976, and appear at 41 FR 26625. All of the comments received in response to the interim procedures were generally favorable. Several commenters, while of the opinion that the procedures would enhance future coordination, raised questions or made suggestions that indicated a need for clarification of the interim procedures.

DISCUSSION OF MAJOR COMMENTS

Two comments noted that while TVA's interim procedures give state and regional clearinghouses a period of 30 days for review and comment on TVA projects or land actions, OMB Circular No. A-95, Attachment A, Part I, section 4, gives two 30-day review periods. The portion of Attachment A applicable to TVA projects is Part II: Direct Federal Development. Section 5.a. of Part II provides that to the extent possible agencies will follow the general procedures of Part I. The final procedures provide that where project schedules permit, TVA will grant extensions of time for review. The final procedures also will allow sufficient flexibility so that "early informal consultation" prior to starting the formal A-95 review period may be made available.

One commenter noted that the procedures would be open to different interpretations as to significant impact if each responsible office or division within TVA was responsible for determining the need for A-95 coordination. Both the interim and final procedures provide for consultation with the Division of Navigation Development and Regional Studies as to the applicability of A-95 to a particular activity.

The remaining comments expressed the concern that the activities listed in the section Exclusions and Informal Review should not be eliminated from formal review and the comment process because particular actions had the potential to impact local economies and the environment. These comments indicate that our original statement on Exclusions and Informal Review was unclear. It has been the experience of TVA that the impacts associated with the types of activities listed under Exclusions and Informal Review are usually insignificant and therefore that the activities do not normally require A-95 coordination. However, the final procedures reaffirm and clarify that each particular action is reviewed within TVA and will undergo A-95 coordination if it is probable that it will have a significant impact on area or community development or the physical environment. Moreover, informal coordination will be available for some actions listed in the section on Exclusions and Informal Review, even though those actions will not significantly impact area or community development or the physical environment.

The final procedures are as follows:

OFFICE OF MANAGEMENT AND BUDGET CIRCULAR A-95, COORDINATION PROCEDURES

Office of Management and Budget Circular A-95 establishes procedures for coordination with state, regional, and local agencies of those Federal planning and developmental activities having a significant impact on area and community development or the physical environment.

Coordination is accomplished through a system of state, regional, and metropolitan clearinghouses set up under the OMB circular as intergovernmental liaison to ensure that appropriate governmental agencies, departments, and offices are given an opportunity to review and comment on the Federal proposal.

All direct TVA development activities and approval of non-TVA activities which significantly affect area and community development or the physical environment are subject to A-95 coordi-

nation. As used in this instruction, "development activities" include TVA projects and the acquisition, use, transfer, or grant of an interest in real property under TVA's control. "Approvals of non-TVA activities" include the licensing, permitting, or approval of non-Federal developments or activities. State and local activities or projects in which TVA is participating will be coordinated by the state or local agency sponsoring the activity or project if coordination is required under A–95, unless the TVA office or division responsible for the project or activity determines that TVA should assume coordination responsibility.

Where the developmental activity or approval requires the preparation of an environmental impact statement by TVA, the impact statement review and the A–95 coordination will be combined to the extent possible and the impact statement will be circulated to state and regional clearinghouses for review and comment.

COORDINATION PROCEDURES

Early in the process of planning a TVA development activity or in the processing of a request for a TVA approval the responsible office or division makes a determination as to the significance of effects upon area or community development and the need for A–95 coordination. The office or division consults with the Division of Navigation Development and Regional Studies in the event of uncertainty as to the applicability of A–95 to a particular activity or approval.

An advance alert will be of assistance in the maintenance of interagency relationships. This preliminary notice should be given in advance of providing the necessary descriptive materials for formal transmittal to the clearinghouses. Therefore, the responsible office or division should notify the Division of Navigation Development and Regional Studies as soon as a determination is made that any proposed project or action will require A–95 coordination.

The Division of Navigation Development and Regional Studies will be the primary point of contact within TVA between the state, regional, and metropolitan clearinghouses and TVA offices and divisions, except as noted in "Scheduling Review" below.

INFORMATION REQUIRED

TVA projects. On all projects requiring A–95 coordination materials approximately the type and scope submitted to the Office of the General Manager for project authorization should be furnished to the Division of Navigation Development and Regional Studies for transmittal to the appropriate state and regional clearinghouses. In general, the material should provide a broad description of the project (without needless reference to technical details and specifications), include any maps, charts, or other supportive data that is helpful in understanding the nature or scope of the proposal and, where relevant, include a statement of general project policies relating to land acquisition and road and utility adjustments.

Land transactions. Whenever land actions (not a part of an overall project) are proposed which require A–95 coordination, appropriate descriptive material and maps should be furnished to the Division of Navigation Development and Regional Studies for transmittal to the proper clearinghouses for state and local review.

TVA permits, licenses, and approvals. Whenever proposed actions to be carried out by other parties require a TVA permit, license, or other official TVA approval (e.g., approval pursuant to Section 26a of the TVA Act), the responsible office or division determines whether the proposed action will have such a significant effect upon area or community development as to require A–95 coordination and, if so, furnishes appropriate information to the Division of Navigation Development and Regional Studies for transmittal to the proper clearinghouses for state and local review.

Environmental impact statements. If coordination with state and local agencies involves projects or land actions which have a significant impact on area or community development and significant environmental impact, these two aspects of the project or action are coordinated concurrently by means of the environmental impact statement and the procedures for its review. The analysis of environmental considerations and the coordination of state, regional, and local reviews are carried out pursuant to TVA's Procedures for Environmental Planning and Assessment (39 FR 5671 (1974)).

Cooperative projects. With regard to state and local projects in which TVA is participating to an extent requiring the approval of the General Manager or the Board and coordination is not being handled by TVA, the office or division responsible for TVA's participation will request the state or local agency sponsoring the project or land action to furnish information to TVA to determine whether A–95 coordination is necessary or has been properly carried out.

SCHEDULING REVIEW

Many state and regional clearinghouses do not have large staffs to handle A–95 coordination; instead, the clearinghouses rely upon staffs from operating agencies for comments on specific matters. Therefore, informal consultation between TVA offices and divisions and counterpart state and local agencies will be important in TVA project planning, as these are the agencies that will eventually be asked to comment on project or land-related proposals transmitted by TVA for formal A–95 coordination. Such informal consultation will take place early in the preliminary planning of a project. At the same time, the Division of Navigation Development and Regional Studies should be notified concerning such advance discussions with state and local agencies and will, in turn, advise the appropriate state and regional clearinghouses of such preliminary planning and TVA contacts with state and local agencies.

Upon completion of general plans for a proposed TVA development activity or of the initial review of a request for approval or, where appropriate, the completion of a draft environmental impact statement, the information required for coordination will be furnished with sufficient copies by the office or division responsible to the Division of Navigation Development and Regional Studies to initiate review by the clearinghouses having jurisdiction over the area or areas concerned. Normally such review will be limited to one state and one regional clearinghouse. In the case of projects or actions affecting more than one state or subregion, all clearinghouses concerned will be included in the circulation of materials for review and comment.

Review time. State and regional clearing houses may have a period of 30 days after receipt of proposals for TVA projects or land actions for review and comment. Forty-five days will be allowed for review of and comment on draft environmental impact statements. In exceptional circumstances and for resaons stated at the time of transmittal by TVA, clearinghouses may be asked to expedite their review. iLmited extensions of time to comment may be granted by TVA where project schedules permit.

All comments received will be forwarded to appropriate TVA offices and divisions and will be considered in further planning or modification of plans for the proposal or in processing requests for approval. .Comments on draft environmental impact statements will be considered and treated in accordance with the requirements of the National Environmental Policy Act of 1969 and TVA's Procedures for Environmental Planning and Assessment (39 FR 5671 (1974)).

All steps of formal A–95 coordination should be completed prior to submission of a proposal or approval for final authorization. Generally, the entire proposal should be coordinated at one time. Separate parts of the proposal will not be resubmitted for coordination unless there are significant departures from the original or modified plans.

Notification of clearinghouses. Where no significant adverse comments or questions are raised by the reviewing clearinghouse, TVA will proceed to carry out the proposal or approval without further notice to the clearinghouses concerned unless notice is specifically requested. In the case of proposals or approvals where significant questions or objections were raised and not resolved or which are abandoned, postponed for a considerable length of time, or significantly modified before implementation, the clearinghouses concerned will be notified of the final action taken and the reasons therefor. Where the coordination and review was undertaken on the basis of a draft environmental impact statement, a copy of the final statement will be transmitted for information to each reviewing clearinghouse.

EXCLUSIONS AND INFORMAL REVIEW

All proposed activities which have a significant impact on area or community development of the physical environment will be submitted for formal A–95 coordination. The following actions normally do not have a significant impact on area or community development or the physical environment and therefore will usually not require A–95 coordination:

1. Agricultural land-use licenses and other agreements involving minor land uses.
2. Harvesting of timber and wood products from TVA lands.
3. Watershed research experiments and demonstrations or non-Federal lands, such as strip mine reclamation and hydrologic studies.
4. Minor plan approvals under Section 26a of the TVA Act.

Some actions may be coordinated on an informal basis even though TVA determines that they will not significantly impact area or community development or the physical environment. These actions include:

1. Routing of transmission lines.
2. Location of substations.
3. Changes in public access to TVA lakes and modification of reservoir shoreland facilities for recreation use.

In addition, whenever state, regional, or metropolitan clearinghouse review is desirable but not required under this instruction, the responsible office or division may request the assistance of the Division of Navigation Development and Regional Studies in carrying out such a review.

The Tennessee Valley Authority has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: June 10, 1977.

LYNN SEEBER,
General Manager.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. RFA 505–77–8]

PURCHASE OF REDEEMABLE PREFERENCE SHARES

Receipt of Application

Project. Notice is hereby given that the Peoria and Pekin Union Railway Company ("applicant"), 101 Wesley Road, Creve Coeur, Illinois 61611, has filed an application with the Federal Railroad Administration ("FRA") under section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976, 45 U.S.C. 825, seeking financial assistance through the sale to the United States of redeemable preference shares in the years 1977 through 1980 having an aggregate par value of $3,500,000. Applicant proposes to make 20 equal annual payments commencing in 1988 on each issuance of redeemable preference shares, with each payment to be applied first to dividends which accrue at the rate of 4.5 percent on the outstanding par value and thereafter to redemption of the par value of redeemable preference shares.

The proceeds of the sale of preference shares are to be used by the applicant (1) to replace 5.9 miles of 90-pound rail with 116-pound rail on its main line track between Peoria and Pekin, (2) to renew cross ties on 24 tracks in its A yard and 24 tracks on its B yard, and (3) to relay all ladder switches with 115-pound rail, in accordance with the following schedule:

Year	Project location	FRA funding
1977	Main line track	$320,000
	A & B yards	380,000
1978	do	800,000
1979	do	800,000
1980	do	1,200,000
	Total	3,500,000

Justification for project. The applicant states that the main line track project will increase productivity of equipment and capacity for movements of coal as well as decrease derailments and transit time of coal. In addition, applicant states that the A & B Yards project will increase yard productivity as well as decrease derailment and rehabilitation projects in additional yard facilities.

Comments. Interested persons may submit written comments on the application to the Associate Administrator for Federal Assistance, Federal Railroad Administration, 400 Seventh Street SW., Washington, D.C. 20590, not later than the comment closing date shown below. Such submission shall indicate the docket number shown on this notice and state whether the commenter supports or opposes the application and the reasons therfor. The application will be made available for inspection during normal busines hours in Room 5415 at the above address of the FRA.

The comments will be considered by the FRA in evaluating the application. However, formal acknowledgement of comments will not be provided.

The FRA has not approved or disapproved this application, nor has it passed upon the accuracy or adequacy of the information contained therein.

(Sec. 505 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94–210), as amended.)

Dated: June 14, 1977.

Comment closing date: July 18, 1977.

CHARLES SWINBURN,
Associate Administrator for Federal Assistance, Federal Railroad Administration.

DEPARTMENT OF THE TREASURY

Customs Service

RIGHT TO CONTEST ADMINISTRATIVE DECISIONS

Individual Notification

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: General Notice.

SUMMARY: The Customs Service, under a new procedure, will now notify each party of its right to seek judicial review of certain administrative decisions. The procedure is being adopted by the Customs Service in order to ensure that each party entitled to seek judicial review of certain administrative decisions is aware of its right to do so.

EFFECTIVE DATE: June 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard M. Belanger, Attorney, Regulations and Legal Publications Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202–566–8237).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Under sections 514 and 515 of the Tariff Act of 1930, as amended (19 U.S.C. 1514, 1515), and Part 174 of the Customs Regulations (19 CFR Part 174), a party dissatisfied with any of certain decisions made by a district director or regional commissioner of Customs may obtain review of that decision by filing a protest in writing with that Customs officer. A party may also seek further review of a protest by a Customs officer on a level higher than that of the Customs officer who participated directly in the decision which is the subject of the protest. The appropriate Customs officer shall review the protest and shall allow or deny the protest in whole or in part. Notice of the denial of any protest will be mailed to the protesting party. The party may then contest the denial of the protest by bringing a civil action in the United States Customs Court in accordance with 28 U.S.C. 2632.

It has come to the attention of the Customs Service that occasionally a party may not be aware of its right to judicial review of a denial of a protest.

Accordingly, Customs will immediately begin to individually notify each party of its right to judicial review in writing at the time of notice of denial of the protest. Furthermore, Customs will prepare appropriate amendments to Part 174 of the Customs Regulations to reflect this new procedure.

HARVEY B. FOX,
Acting Assistant Commissioner of Customs (Regulations and Rulings).

PLANET INSURANCE CO.

Surety Companies Acceptable on Federal Bonds: Termination of Authority

Notice is hereby given that the certificate of authority issued by the Treasury to Planet Insurance Company, Philadelphia, Pennsylvania, under Sections 6 to 13 of Title 6 of the United States Code, to qualify as an acceptable surety on Federal bonds is hereby terminated effective June 30, 1977.

The company was last listed as an acceptable surety on Federal bonds at 41 FR 28249 July 8, 1976.

With respect to any bonds currently in force with Planet Insurance Company, bond-approving officers of the Government should secure new bonds with acceptable sureties in those instances where a significant amount of liability remains outstanding.

Dated: June 10, 1977.

D. A. PAGLIAI,
Commissioner, Bureau of Government Financial Operations.

VETERANS ADMINISTRATION

ADVISORY COMMITTEE ON CEMETERIES AND MEMORIALS

Meeting

The Veterans Administration gives notice that a meeting of the Administrator's Advisory Committee on Cemeteries and Memorials, authorized by section 1001, title 38, United States Code, will be held in Veterans Administration Central Office, 810 Vermont Avenue NW., Washington, D.C. 20420, on July 20 and 21, 1977, in the Administrator's Conference Room, 10th floor, at 9 a.m. The meeting will be open to the public.

Those wishing to attend should contact Miss Kathy Kightlinger in the Office of the Director, National Cemetery System (phone 202-389-5202), not later than July 19, 1977. Any interested person may attend, appear before, or file a statement with the committee. Individuals wishing to make oral statements should indicate this in a letter to Miss Kightlinger in which they fully identify themselves and state the organization or association they represent or are speaking for. Written statements should be filed with Miss Kightlinger at the Washington address prior to the meeting. Oral statements will be heard only between 3 p.m. and 4 p.m. on July 20, 1977.

Dated: June 13, 1977.

By the direction of the Administrator:

RUFUS H. WILSON,
Deputy Administrator.

BURLINGTON NORTHERN INC. AND THE ATCHISON, TOPEKA AND SANTE FE RAILWAY CO.

Capital Incentive Rate on Certain Coal

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Intention to File a Schedule Stating a Capital Incentive Rate on Coal from Cordero, Wyoming to Smithers Lake, Texas pursuant to Ex Parte No. 327.

SUMMARY: The filing of the notice of intention initiates the 180-day period during which the Commission must determine the lawfulness of a proposed capital incentive rate schedule, as provided by Ex Parte No. 327, decided May 23, 1977. Any interested person seeking a hearing on the proposed rate must notify the Commission on or before July 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, Deputy Director, or Harvey Gobetz, Assistant Deputy Director, Section of Rates, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, (202) 275-7693 or 275-7656.

SUPPLEMENTARY INFORMATION: Burlington Northern, Inc., and The Atchison, Topeka and Santa Fe Railway Company propose to establish a new rate for the transportation of coal in unit trains from Cordero, Wyoming, to Smithers Lake, Texas. The establishment of the new rate would require a total capital investment in excess of $36 million by the aforementioned carriers. The railroad facilities to be augmented by the capital investment would consist of equipment for the proposed unit trains and necessary improvements in track structure. The proposed duration of the capital incentive rate is a minimum of 5 years. The responsible carrier representatives to whom inquiries and requests for documents relating to the proposal should be addressed are: Curtis H. Berg, 176 East Fifth Street, St. Paul, Minnesota 55101. Milton E. Nelson, Jr., 80 East Jackson Boulevard, Chicago, Illinois 60604.

Copies of the proposed tariffs are available for public inspection in the Public Tariff File, Room 6217, of the Interstate Commerce Commission, Washington, D.C. 20423.

H. G. HOMME, JR.,
Acting Secretary.

FOURTH SECTION APPLICATION FOR RELIEF

JUNE 14, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the Federal Register.

FSA No. 43381.—Alloys or Metals from Suspension Bridge, New York. Filed by Southwestern Freight Bureau, Agent, (No. B-677), for interested rail carriers.

Rates on alloys or metals, in carloads, as described in the application, from Suspension Bridge, New York, to Baytown, Beaumont, East Baytown, Houston and Korf, Texas.

Grounds for relief.—Truck-barge and market competition, also rate relationship.

Tariff.—Supplement 242 to Southwestern Freight Bureau, Agent, tariff 2-H, I.C.C. No. 5102.

Rates are published to become effective on July 13, 1977.

By the Commission.

H. G. HOMME, JR.,
Acting Secretary.

[Notice 75]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JUNE 13, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 4405 (Sub.-No. 557TA), filed May 18, 1977. Applicant: DEALERS TRANSIT, INC., 522 South Boston Ave., Enterprise Bldg., Tulsa, Okla. 74103. Applicant's representative: Leonard L. Bennett, 522 S. Boston Ave., Enterprise Bldg., Tulsa, Okla. 74103. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fiberglass support structures*, from the plantsite of Antennas For Communications, Inc., Ocala (Marion County), Fla., to all points within the United States (except Alaska and Hawaii), for 180 days. 4

AGENCY HOLDING THE MEETING: Federal Reserve System.

On Wednesday, June 22, 1977, at 10 a.m. a meeting of the Board of Governors of the Federal Reserve System will be held at the Board's offices at 20th Street and Constitution Avenue, NW., Washington, D.C., to consider the following items of official Board business:

Items open to public observation: (1) Proposal to operate an automated clearing house facility at the Columbia, South Carolina, office of the Federal Reserve Bank of Richmond; (2) Any agenda items carried forward from a previously announced meeting.

Items closed to public observation because the items fall under exemptions contained in the Government in the Sunshine Act (5 U.S.C. § 552b(c)): (1) Proposed redelegation to the Board of Governors of certain authority over Federal Reserve Bank building and renovation projects; specific application of this policy to the Miami and San Francisco building projects. This matter was originally scheduled for a meeting on June 15, 1977; (2) Any agenda items carried forward from a previously announced meeting.

The closed portion of the meeting will commence at the conclusion of the open discussion.

Information with regard to this meeting may be obtained from Mr. Joseph R. Coyne, Assistant to the Board, at 202–452–3204.

Board of Governors of the Federal Reserve System, June 14, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

AGENCY HOLDING THE MEETING: Federal Trade Commission.

TIME AND DATE: 10 a.m., Tuesday, June 21, 1977.

PLACE: Room 432, Federal Trade Commission Building, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

Nonadjudicative Matters

(1) Approval of Minutes of Nonadjudicative Matters Considered at Meeting of June 14, 1977.

(2) Consideration of Disposition of Nonpublic Part II Matter.

(3) Consideration of Acceptance of Proposed Consent Agreement in Firestone Photographs, Inc., File No. 762 3032.

(4) Consideration of Issuance of Complaint in Nonpublic Part II Matter.

(5) Consideration of Issuance of Proposed Complaint in a Nonpublic Part II Matter.

Adjudicative Matter Under Part 3 of the Rules of Practice

(1) Consideration of certification of Joint Motion to Withdraw Matter from Adjudication in Vital-E, et al., Docket No. 9082.

(2) Consideration of Motion to Withdraw Complaint Counsel's Motion to Amend Complaint in Block Drug Company, Inc., et al., Docket No. 9050.

(3) Consideration of Certification of Joint Motion to Withdraw Matter from Adjudication as to certain respondents in Gold Bullion International, Ltd., et al., Docket No. 9094.

CONTACT PERSON FOR MORE INFORMATION:

Leonard J. McEnnis, Jr., Office of Public Information: 202–523–3830; Recorded Message: 202–523–3806.

[S–671–77 Filed 6–14–77;11:58 am]

6

AGENCY HOLDING THE MEETING: Federal Trade Commission.

TIME AND DATE: 10 a.m., Wednesday, June 22, 1977.

PLACE: Room 432, Federal Trade Commission Building, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

STATUS: Open.

MATTERS TO BE CONSIDERED:

The Commission has not yet scheduled any matters for discussion at this meeting. If no item is placed on the agenda by 10 a.m., on Wednesday, June 22, 1977, the meeting will automatically be cancelled. Any item that is placed on the agenda before that time will be announced in accordance with the Additional Information procedures posted with Commission Meeting Notices outside Room 130 of the Federal Trade Commission Building.

CONTACT PERSON FOR MORE INFORMATION:

Leonard J. McEnnis, Jr., Office of Public Information: 202–523–3830; Recorded Message: 202–523–3806.

[S–672–77 Filed 6–14–77;11:58 am]

7

AGENCY HOLDING THE MEETING: Federal Trade Commission.

TIME AND DATE: 2 p.m., Wednesday, June 15, 1977.

PLACE: Room 432, Federal Trade Commission Building, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

STATUS: Open.

MATTERS TO BE CONSIDERED:

(1) Briefing of Commissioners and certain agency personnel as to zero base budgeting techniques.

CONTACT PERSON FOR MORE INFORMATION:

Leonard J. McEnnis, Jr., Office of Public Information: 202–523–3830; Recorded Message: 202–523–3806.

[S–680–77 Filed 6–15–77;9:18 am]

8

AGENCY HOLDING THE MEETING: Interstate Commerce Commission.

TIME AND DATE: 9:30 a.m., Tuesday, June 21, 1977.

PLACE: Commission's Offices, 12th and Constitution Avenue NW., Washington, D.C.

STATUS: Open Regular Conference.

MATTERS TO BE CONSIDERED:

(1) Trans Alaska Pipeline—Status Update; and (2) Department of Energy Legislation.

CONTACT PERSON FOR MORE INFORMATION:

Public Information Officer, Douglas Baldwin, telephone 202–275–7252.

[S–675–77 Filed 6–14–77;3:37 pm]

9

AGENCY HOLDING THE MEETING: National Transportation Safety Board.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 29617, June 9, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: June 16, 1977, 9:30 a.m. [NM–77–15a].

CHANGE IN THE MEETING: The following agenda item has been added:

Letter to Congressman Robert N. C. Nix, Chairman, Committee on Post Office and Civil Service; comments on H.R. 2733 and H.R. 3928.

[S–677–77 Filed 6–14–77;4:23 pm]

10

AGENCY HOLDING THE MEETING: The Renegotiation Board.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 30270, June 13, 1977.

PREVIOUSLY ANNOUNCED DATE AND TIME OF MEETING: Monday, June 20, 1977, 10 a.m.

CHANGES IN MEETING: Items 7 and 8 are added to the previously announced agenda.

MATTERS TO BE CONSIDERED:

7. Recision of Interpretation 80 concerning Foreign Sales. 8. Republic Corporation Fiscal year ended October 31, 1969.

STATUS: Item 7 is open to the public. Item 8 is closed to the public.

CONTACT PERSON FOR MORE INFORMATION:

Kelvin H. Dickinson, Assistant General Counsel-Secretary, 2000 M Street NW., Washington, D.C. 20446, 202–254–8277.

Dated: June 13, 1977.

GOODWIN CHASE,
Chairman.

[S–676–77 Filed 6–14–77;4:18 pm]

11

AGENCY HOLDING THE MEETING: United States Parole Commission.

TIME AND DATE: 9 a.m., Thursday, June 23, 1977.

PLACE: K.C.I. Bank Bldg., 8800 NW., 112th St., Kansas City, Mo. (Kansas City, Mo., is the location of the North Central Regional Office of the Commission.)

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Budget Committee Report and consideration, deliberation, and vote on fiscal year 1979 budget.

2. Fiscal year 1978 supplemental budget.

3. Administrative function performance by other governmental units, including personnel rules and practices of the Commission and such units.

4. Approval of minutes of meeting of March 9, 1977 on subjects of personnel, reprimand, budget and consideration of an inmate's parole.

CONTACT PERSONS FOR MORE INFORMATION:

M. E. Malin Foehrkolb, Washington, D.C., 202–724–3117. Betty Freeman, Kansas City, Mo., 816–243–5690.

FEDERAL COMMUNICATIONS COMMISSION

■

RADIOTELEGRAPHY IN MARITIME SERVICES

Changes in Frequencies, Operation Procedures, Technical Standards and Other Criteria

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20813; FCC 77-380]

RADIOTELEGRAPHY IN MARITIME SERVICES

Changes in Frequencies, Operation Procedures, Technical Standards and Other Criteria

AGENCY: Federal Communications Commission.

ACTION: Report and Order to amend Commission's Rules and Regulations as necessary to comply with treaty requirements.

SUMMARY: Amends Parts 2, 81 and 83 to implement changes in frequencies, operating procedures, technical standards and other criteria relating to the use of radiotelegraphy in the maritime services adopted at the ITU World Maritime Administrative Radio Conference, Geneva, 1974.

EFFECTIVE DATE: July 18, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Walter E. Weaver, Aviation and Marine Division, Safety and Special Radio Services Bureau (202—632-7197).

SUPPLEMENTARY INFORMATION:

Adopted: June 2, 1977.

Released: June 10, 1977.

By the Commission: Commissioner Quello absent.

In the matter of amendment of Parts 2, 13, 81 and 83 to implement changes in frequencies, operating procedures, technical standards and other criteria relating to the use of radiotelegraphy in the maritime services adopted at the ITU World Maritime Administrative Radio Conference, Geneva, 1974; *Report and Order* (Proceeding terminated). (41 FR 32434.)

1. The Commission released its Notice of Proposed Rule Making (FCC 76-455) in the instant proceeding on June 4, 1976, which was published in the FEDERAL REGISTER on June 15, 1976 (41 FR 24155). By its Order printed in the FEDERAL REGISTER on August 3, 1976 (41 FR 32434), the Commission granted an extension of time in which to file comments. The dates for filing comments and replies have passed.

2. Comments were filed by the American Commercal Barge Line Company (ACBL); American Institute of Merchant Shipping (AIMS); Collins Division of Rockwell International Corporation (Collins); Communications Associates, Inc. (CAI); ITT Mackay Marine (Mackay); ITT World Communications, Inc. (Worldcom); Mobile Marine Radio, Inc. (MMR); and Scientific Radio Systems, Inc. (SRS). No reply comments were filed.

3. CAI and Mackay in their comments provide an overview of the proposed rule amendments set forth in the Notice of Proposed Rule Making with which we heartily agree and believe should be brought to the attention of interested persons:

CAI: "* * * A review of marine communications over the last decade indicates a dramatic increase in usage. There are more users, there is more communication per user, there are completely restructured frequency assignments, and there is a marked change in the shipping industry's attitude toward their communication needs. Add to this the changes being brought about in the international political scene, past, present and future. Each of these factors continues to increase at an increasing rate making it highly probable the rise in marine communication, and the need for more change, over the next five years will substantially surpass the last five * * *."

4. CAI and Collins provide strong supportive comments in regard to the use of frequency synthesizers, as follows:

CAI: "* * * A marine communication philosophy predicated upon the use of synthesizers in the h.f. band is apparent, as well as reasonable. The technology is not new. Other services have been using synthesizers for twenty years. The popularity of synthesizers now dominant in marine v.h.f. transmitters is considerable, especially when it is considered that v.h.f. synthesizers were first proposed in 1968 and first introduced in 1971. Today the use of synthesizer technology for marine v.h.f. and h.f. communications is an accepted technique by most planners.

"The use of synthesizers does provide an additional degree of complexity and expense. This, however, is the inevitable price to be paid for accommodating more users and more communications in an inexpandable spectrum space.

"The obvious advantage, of course, is the availability of any of the authorized frequencies such that all of the services available to a voyager are truly available * * *. There are other justifying advantages as well. The ability to transmit immediately from a cold start in the event of an emergency is very important, when it is recognized that often frequencies other than those allocated to distress are used for this purpose. AMVER traffic being an example. And, of course, frequency stability is in itself almost all the justification that is needed. Many of the communication problems encountered in the marine service can be traced directly or indirectly to a lack of frequency stability."

Collins: "Technology, well within the state-of-the-art, is available to meet the technical performance requirements proposed by the Commission in this proceeding without presenting an unreasonable economic burden.

"Specifically, when considering equipment requirements to utilize the available 924 A1 and 338 F1 emission channels, the economics involved clearly indicate the use of frequency synthesizer systems, in lieu of individual crystal control on each of a number of channels. The use of such synthesizer systems is further indicated considering future changes in frequencies that are likely to occur * * * in connection with future ITU actions. A corollary benefit with synthesizer techniques is that greatly improved frequency precision and stability and, hence, tolerance can readily be achieved economically * * *."

5. In their comments ACBL notes that provision was not included in the Notice of Proposed Rule Making for operation of narrow-band direct-printing on the inland and intracoastal waterways, and requests that such provision be included in the rules. The license records for the public coast station at Jeffersonville, Ind. (WFN) show that radio-teletypewriter (narrow-band direct-printing) was initiated on a developmental basis during 1970 and has continued to the present time. We are sympathetic to the continuation of WFN use of narrow-band direct-printing, however, we feel that rule amendments to provide for this usage on a regular basis should be handled as a separate rule making proceeding. We are not, therefore, disposing of ACBL's request in this proceeding. We are making changes to the proposed § 81.204(c) to provide for requirements specified by the Government subsequent to release of the Notice of Proposed Rule Making. The changes to § 81.204(c) affect stations KFS, WAX, WLO, and WSL. Section 81.204(c), as amended, is set forth below.

6. AIMS comments that it is established procedure of many shipping companies to have a public coast telegraph station transmit a fleet call each day to have their vessels report positions, etc. Further, that there are cases when vessels of a single licensee may need to intercommunicate and therefore would need a common channel. AIMS expresses the view that under the proposed assignment of working frequencies there will no longer be a common working channel for all ships of a given licensee. We believe that proposed § 83.319(b) is fully self-explanatory in regard to which radiotelegraph working frequencies may be used by ship stations. Further, this section provides adequate flexibility to permit both of the types of operation referred to by AIMS. For communications other than the two types mentioned by AIMS, we expect the ship radiotelegraph station to comply with the basic intent of the International Telecommunication Union here involved. ITU's intent is to spread usage of the working frequencies evenly between the using ship stations. The objective of this is to avoid a bunching of ship stations on a relatively few frequencies, which would result in interference and disruption of communications. In order to do this, we have assigned two series numbers of working frequencies to each radiotelegraph station.

7. Mackay expresses the view that the action proposed in paragraph 25 of the Notice of Proposed Rule Making "discontinue consideration of transmitters such as the 2013, ET8065, and similar types" might be interpreted to mean any transmitter that uses frequency multipliers. Mackay requests that the intent be clarified for the benefit of transmitter designers. To provide the requested clarification, we refer interested persons to our intent as set forth in paragraph 25 of the Notice of Proposed Rule Making which, briefly summarized, was that transmitters using the harmonic relationship scheme of operation would not be acceptable on new ships or as new replacement transmitters on existing ships.

8. In this proceeding we are strongly recommending that ship stations, pursuant to 1974 WMARC Resolution Mar. 2-4, employ a frequency synthesis generator(s), in lieu of discrete crystals, as a means of providing capability to operate on all of the frequencies and to improve the frequency stability of the transmitter. We are not, however, requiring the use of a synthesizer or that a vessel be fitted with all frequencies. Ship operators will, however, be expected to fit those frequencies needed for whatever routes its vessels travel. This would include calling channel series Nos. 5 and 6 and the necessary group calling channels to establish communication over the areas traversed, as well as the necessary working channels, intership channels, channels as may be required for communication with Government stations, and other necessary frequencies to fulfill the objectives of Resolution A.283 of the Intergovernmental Maritime Consultative Organization (IMCO).

9. Frequency tolerance applicable to transmitters currently installed aboard ship. It is clear that the existing tolerance specified in Part 83 (.005 percent or 60 ppm) will not assure, for the bands 6, 8, 12, 16 and 25 MHz, that the A1 carrier will be maintained within the 500 Hz channel spacing adopted by the 1974 WMARC, as set forth in §§ 83.317 and 83.319. Thus, it is necessary that some other frequency tolerance be applied. In view of our action in reducing the number of mandatorily fitted channels, we recognize that ship stations may continue to use discrete crystals to maintain transmitter frequency stability. We recognize the difficulties associated with maintaining even reasonably tight tolerances where discrete crystals are employed, particularly in older types of shipboard transmitter. Further, this situation worsens where the normal operation calls for the removal of one and insertion of a replacement crystals. Since the transmitter must be maintained within the 500 Hz channel bandwidth, we are amending section 83.131 to change the applicable frequency tolerance from 50 parts per million to 200 Hz, as set forth in the attached Appendix 1. Further, where crystal changes are employed, we encourage the installation and use aboard ship of frequency measuring devices together with oscillator adjustment capability, so that the ship station radio operator can maintain the transmitter on the assigned frequency.

10. Frequency tolerance applicable to transmitters type accepted or type approved after November 30, 1977. Specification of frequency tolerance in terms of percent of a frequency is inadequate where a uniform channel bandwidth is applied at all megacycle orders. To avoid penalty at either the low end or at the high end, the frequency tolerance applied must be related to the channel bandwidth. Since the 1974 WMARC specified a uniform channel bandwidth independent of megacycle order, we are specifying frequency tolerance in cycles per second (Herts).

11. In recent years it has been the general practice in the industry to install a shipboard transmitter which is capable of being used for multiple types of service, for example, for A1 Morse, radiotelephony, narrow-band direct-printing and for facsimile. Frequency tolerance is not adjusted in these transmitters depending on the type of service being used. The tolerance applied is that which is designed into the transmitter and this is independent of service usage.

12. In looking at frequency tolerance for radiotelegraphy (narrow-band direct-printing), we are basically concerned that in demodulation the transmitted tones (mark and space) fall within the limits of the (receiver) filter for each tone. While standards have not yet been adopted, these filters could have a bandwidth on the order of ±35 Hz. The 1974 WMARC adopted a tolerance for narrow-band direct-printing (NB-DP) of ±15 Hz for coast stations and ±40 Hz for ship stations. Where a tone modulated suppressed carrier SSB transmitter is used, the error would be 55 Hz; the tones (mark and space) would fall outside the receiver filter bandwidth; and, thus, the NB-DP system would not function properly.

13. Where a SSB transmitter is used aboard ship for multiple service purposes, we believe it is essential that the frequency tolerance applicable to that transmitter be such that it is capable of meeting the most stringent of the service requirements. Insofar as we know, the most stringent service requirement is that of NB-DP. With a coast station frequency tolerance of ±15 Hz, receiver filter bandwidth of ±35 Hz, the shipboard frequency tolerance must be ±20 Hz. We are, therefore, adopting a frequency tolerance of ±20 Hz for transmitters type accepted or type approved after November 30, 1977, for use in the maritime mobile service on frequencies below 27.5 MHz, except as applies to survival craft station transmitters operating on 8364 kHz. In the case of survival craft station transmitters operating on 8364 kHz and type accepted or type approved after November 30, 1977, we are adopting a frequency tolerance of ±50 Hz. Selection of the value of ±50 Hz for survival craft station transmitters, after November 30, 1977, is a compromise measure responsive to the strong comments filed by AIMS and Mackay.

14. AIMS expresses the view that vessels in the domestic trade (enrolled vessels) should not be required to fit more than seven crystals, thus providing seven series of harmonically related frequencies in the 4, 6, 8, 12, and 16 MHz bands. We know of no reason nor does AIMS advance any, why vessels in the domestic trade should be treated differently from other United States vessels. It is our view that vessels in the domestic trade, as with vessels in other trades, must fit with those frequencies which are required to satisfactorily operate in the concerned maritime mobile service. By this action it is our intention to place responsibility squarely on the shoulders of the vessel operators to assure that each vessel is fitted for the use of all frequencies needed for the service of that vessel, as well as for the use of those frequencies which are needed for communication with Government and non-Government coast stations and for intership communication.

15. Collins notes that the proposed rule amendments to Part 81 do not but should include changes in frequency tolerance applicable to coast stations employing narrow-band direct-printing, in the band 4-29.7 MHz, adopted and set forth in the revised ITU Radio Regulations (see Appendix 3, note 1) and Appendix 20B, paragraph (d). Collins is correct, the referenced sections of the revised ITU Radio Regulations for the indicated bands and type of service impose a tolerance applicable to coast station equipment: of 15 Hz, where installed after January 1, 1976; of 40 Hz, where installed prior to January 1, 1976; and of 15 Hz, to all equipment after January 1, 1985. No reply comments were filed in opposition to Collins comment, or to the inclusion in Part 81 of a frequency tolerance of 15 Hz applicable to public coast radiotelegraph stations operating narrow-band direct-printing in the maritime mobile service bands between 4 and 29.7 MHz. We agree that a tolerance of 15 Hz should be made applicable to public coast radiotelegraph coast stations operating narrow-band direct-printing.

16. With regard to the matter of frequency tolerance to be applied to coast stations employing narrow-band direct-printing, it is appropriate to note that this subject was considered at length and in depth by Special Committee 64 (SC 64) of the Radio Technical Commission for Marine Services (RTCM). The final report[1] of that group was completed prior to the 1974 World Maritime Administrative Radio Conference (WMARC) and includes the following text:

"RTCM recommends that HF radioteleprinter systems provide for the following technical characteristics and operational practices:

(1) System frequency stability of transmitters and receivers should be held to within 35 Hz, nominally (25 Hz for ship and 10 Hz for coast station equipment) and not exceed 70 Hz at any time. The system stability includes receiver frequency stability, as well as transmitter frequency stability, and does not exceed permissible FCC frequency tolerances for the latter.

17. We believe that the above referenced examination by SC 64 is adequate to establish the order of magnitude of frequency tolerance which should be applied to coast stations employing radioteleprinter (narrow-band direct-printing) in the high frequency maritime bands. The results rendered by SC 64 were available to and were used by the United States Delegation at the 1974 WMARC and contributed to the decision

[1] See Final Report of RTCM Special Committee No. 64, MF, HF and VHF Maritime Radioteleprinter and Data Systems and Operation, dated June 17, 1976.

of the WMARC to apply the 15 Hz frequency tolerance in this instance. These things considered, we believe it is appropriate, therefore, to amend § 81.131 of Part 81 to apply a frequency tolerance of 15 Hz to public coast radiotelegraph stations employing narrow-band direct-printing on high frequencies in the maritime mobile service bands. Section 81.131 presently applies a frequency tolerance of 20 Hz, thus, the amendment will tighten that tolerance by 5 Hz. To provide a reasonable period for implementation, the effective date of the new tolerance (15 Hz) is delayed until January 1, 1978. The amended § 81.131 is set forth below.

18. SRS points out that when (for radioteleprinter) audio tones centered around 1,700 Hz are applied as modulation to a single sideband suppressed carrier transmitter, the residual carrier will fall outside of the authorized bandwidth and, thus, the rules require that the carrier be suppressed to the 50 microwatt level. SRS is correct in their reconstruction of the current provisions of the rules. MMR also comments on this matter. In view of the circumstances discussed in the following two paragraphs, we believe that to include the above provisions in the rules is correct, and that a change to lower the level (towards 50 milliwatts) of permitted spurious emissions would not be in the public interest.

19. The requirement for suppression to the 50 microwatt level was imposed to avoid disruption of other radioteleprinter uses of the frequencies outside the authorized bandwidth. Since the spacing between channels is uniform on a 500 Hz basis, a carrier at 1700 Hz below the assigned frequency would fall inside the channel limits of the frequency three channels lower, and if not adequately suppressed would disrupt the use of that lower channel. This situation was anticipated and considered by RTCM SC 64 during their study of HF maritime radioteleprinter and data systems. For example, some foreign administrations permit the carrier to be suppressed to the 50 milliwatt level and we have received complaints that this steady state signal (residual carrier) has and is causing disruption of radioteleprinter use of properly authorized frequencies. This situation should worsen as greater and greater use is made of the narrow-band direct-printing (NB–DP) channels. If the future usability of the NB–DP channels is to be maintained, it will be necessary at some point that other administrations increase (towards 50 microwatts) the required suppression of the residual carrier. (Further details regarding this subject are included in the Final Report of RTCM SC 64, as referred to above.)

20. We reject MMR's comment that "As an alternative to eliminate residual carrier emission interference, the 1700 hertz standard proposed on § 81.143(c)(2) is appropriate". The two requirements are not alternatives. The off-set (FSK audio tones) are permitted so that a single sideband (SSB) voice transmitter can be used, additionally, for A1 Morse and for radioteleprinter. This permits one transmitter to be used aboard ship for multiple purposes, or conversely, it nullifies the need to install two or more types of transmitters aboard ship. Technically, an A1 Morse or radioteleprinter transmitter is substantially simpler to design and produce than a SSB transmitter. Recognizing the practical and/or economic considerations involved, we accept the use of SSB transmitters for A1 Morse and radioteleprinter, however, we apply to such SSB transmitters the same technical requirements as are applicable to non-SSB A1 Morse and radioteleprinter transmitters. Neither of the two types are permitted to radiate an interfering signal on the third lower channel.

21. Further, we do not agree with MMR's statement that the two requirements are "redundant" since we have two signals, each of which must be treated. Lastly, MMR provides no factual information in support of their statement that the imposition of these two requirements "* * * would require the redesign of certain existing transmitters * * *". Insofar as we know, all of the SSB transmitters employed for radioteleprinter operations by MMR's station WLO have been type accepted by the manufacturer for 0.3 F1 emission and, thereby, meet the 50 microwatt spurious emission level requirement.

22. In paragraph 22 of the Notice of Proposed Rule Making information was requested in regard to the tuning range capability of the harmonic relationship type shipboard transmitters to cover the 25 MHz band without modification. We indicated that if extension of the tuning range was feasible, we would expect affected ship stations to have the capability to operate in the 25 MHz band. In their comments, Mackay indicates that the Radiomarine Corporation type CRM–T1A–1000M and the ITT Mackay Marine type 2013 telegraph transmitters could not be adjusted to operate in the 25 MHz band. Further, Mackay advises that the extent of modification required to extend frequency coverage to include the 25 MHz is unknown at this time. Informal information indicates that a similar situation exists with regard to the RCA Corporation ET–8065 type transmitter. CAI corrects our NPRM to wit, their type CA–35 equipment does not cover the 25 MHz band, and further advises that it is not economically feasible to retrofit the 25 MHz band in outstanding equipment.

23. On the basis of the foregoing, we believe that it would be impractical and unreasonable to require all shipboard transmitters, with particular reference to many of those now in service, to have a capability to operate in the 25 MHz band. On the other hand, we believe it is both practical and reasonable to require a capability to operate on all radiotelegraph frequencies in all bands, including the 25 MHz band, in new equipment type accepted in the future. Accordingly, this requirement is set forth in modified § 83.315(d) below.

24. Worldcom comments, in reference to paragraphs 29 through 36, of the Notice of Proposed Rule Making, that they should not be required to fit special calling receivers to guard the ship calling bands prescribed in proposed § 81.209 (a). Further, Worldcom estimates that to fit these special receivers would involve expenditures of $70,000 per station, or a total of $350,000 for all five of their public coast radiotelegraph stations.[2] The reference paragraphs do not, nor were they intended to require that Worldcom purchase new or special receivers to monitor the ship calling frequencies. We do intend that Worldcom and other licensees of public coast radiotelegraph stations shall fulfill the requirements of § 81.209 (a), (b), and (c) at each of their public coast radiotelegraph stations. It should be noted that the other public coast radiotelegraph coast station operators are faced with the same requirements as Worldcom and they have not viewed the changes imposed by the 1974 WMARC with the same apprehension expressed by Worldcom.

25. Worldcom believes that any requirement for special receivers as contemplated in section 81.209 "* * * should be deferred pending final disposition of Docket No. 19544 and the evolvement of the ultimate coast station configuration; also, that the need for such special receivers should be reviewed in the light of operational requirements under the ultimate coast station configuration when such is determined." We have disposed of the matter of "special receivers" in the foregoing paragraph. As to deferment pending final disposition of Docket No. 19544, the rules describing the technical performance capabilities of receivers used in public coast radiotelegraph stations are necessary for those stations to provide satisfactory service to ship stations on and after June 1, 1977, the date on which the new internationally agreed calling procedure will be initiated at coast stations licensed by this Commission. Where a particular difficulty is experienced in providing full service by June 1, 1977, paragraph 50, hereof, discusses a basis for obtaining short term relief.

26. In a similar vein, Worldcom's comment that the old calling procedure (whereby the calling bands are scanned) has been fully adequate to meet the service needs, can be noted as the only dissenting opinion, or as a minority opinion. It is not necessary to discuss the merits or faults of the old calling procedure, since it has been replaced by the new procedure adopted at the 1974 WMARC. That new calling procedure is now the world standard, it has been ratified by the United States and its use is mandatory.

[2] Worldcom provides no details in regard to how these figures were derived. Further, we believe that these figures far exceed the current cost for receivers of the type that will perform in consonance with the requirements of § 81.209.

27. With regard to Worldcom's understanding that the ITU Radio Regulations as adopted at the 1974 WMARC do not require receivers as described by § 81.209, we do not concur. If the United States is to fulfill the spirit and intent of the 1974 WMARC relative to the new calling procedure, and we believe this is the only means by which the advantages of the new calling procedure can be realized, it is necessary that public coast radiotelegraph stations employ receivers as described in § 81.209. Use of wideband (covering several 0.5 kHz channels) receivers, such as are now employed for the old calling procedure, will not provide the necessary technical capability to distinguish between desired and undesired signals. There was and is an urgent need to provide a calling procedure which will make it possible for a ship station to contact a coast station within a reasonable period of time. Under the old procedure, a ship station cannot determine which frequency if any, is being guarded by a coast station. The new procedure removes this major problem. Under the new procedure, a ship station knows which frequency(s) a coast station is required to guard. In the future, following reports from ship stations, if a coast station does not respond to ship station calls, we plan to ascertain the circumstances or reasons for that lack of response.

28. Collins comments that the operating procedure used on the digital selective calling frequencies, in § 81.203, should provide for the use of error control (protected) NB–DP when it is known that a ship station employs that type of terminal equipment. We are hopeful that the forthcoming 1977 meeting of CCIR will be successful in reaching semi-final agreement on the digital selective calling system to be used by the maritime mobile service and that the 1979 WARC, or more likely the maritime conference following the 1979 WARC will adopt that system into the international Radio Regulations. During the interim period, we believe it would be premature and probably would unnecessarily complicate use of the digital selective calling frequencies to provide for the use of error control ("protected") systems. That is, if we provide for the use of "protected" systems on the digital selective calling frequencies, the coast station would almost surely be forced to make its calls in both the "protected" and "unprotected" modes. Any unnecessary increase in occupancy time, by either coast or ship stations, of the digital selective calling frequencies must be avoided. We believe that the limited number of digital selective calling frequencies versus hundreds of coast stations plus over 22,000 vessels clearly demonstrates why such unnecessary use must be avoided. Ship or coast stations fitted with error control terminals are required by the International Radio Regulations and by §§ 81.143(e) and 83.143(e), hereof, to have a simple device to bypass the error control system. Accordingly, during the interim period we are not providing at United States coast stations for the use of error control ("protected") systems on the digital selective calling frequencies. Transmissions on those frequencies by ship and coast stations during the interim period shall, therefore, be in the "unprotected" mode. We will, of course, continue to monitor the international program to establish a world-wide digital selective calling system, and if circumstances so require, will revise the foregoing policy to be in accord with that program. Further, should it develop that one or more other administration(s) require that digital selective calls to its coast station(s) be made in the "protected" mode, United States vessels fitted with error control terminals should comply with that requirement.

29. Collins submits two comments in regard to proposed section 2.303, first, that the table following § 2.303(a) should include "Limited Coast (radiotelephone)"; and second, that § 2.303(b)(3) should apply to digital selective calling systems and not to sequential single-frequency code (SSFC) systems. We concur with both comments and have amended § 2,303 to be in accord therewith, as set forth in the attached Appendix.

30. Mackay suggests in regard to proposed § 83.317(h) that the endings of the tabulated frequencies (between 2089.5 and 2092.5 kHz) be in steps of not less than one hundred (100) Hz, for example, 2089.75 kHz would read 2089.7 kHz. This arrangement would permit the use of frequency synthesizers which provide incremental steps of 100 Hz. We concur with Mackay's suggestion and have amended the table of frequencies appearing in § 83.317(h), as set forth in the attached Appendix. In the revised table we have not used the 200 Hz spacing suggested by Mackay. Instead we have used a spacing of 300 Hz, except adjacent to 2,190 kHz, where a spacing of 400 Hz has been provided. The wider spacing (400 Hz) adjacent to 2,191 will provide a slightly greater protection to 2,191 kHz, which is used by some ITU Region 3 countries for safety and radionavigation purposes.

31. MMR suggests in regard to proposed § 81.143 (e) and (f), that in lieu of recognizing Automatic Repeat Request (ARQ) and Forward Error Correcting (FEC) systems we should require standardization upon the ARQ and ITU–FEC systems. MMR feels that "unprotected" radioteleprinter and other FEC systems, permitted by the proposed rules, are wasteful of both spectrum and coast station operating time and that expansion of their use should not be tolerated. Recognizing that such systems are presently in shipboard use, MMR suggests that the existing users of such systems be given "grandfather" rights. We are sympathetic to MMR's view that it is desirable to promote and enhance the growing requirement for NB–DP radiotelegraph service. Where MMR proposes that we take this opportunity to establish appropriate technical standards, we, on the other hand, feel it would be premature at this time to impose this type of standard on an infant service. In particular, we believe that to impose the mandatory fitting of error detection-correction equipment, with the sizable economic expenditure involved, could retard the growth of this service. We are, therefore, proceeding on the basis that persons desiring or requiring an improved service will fit the error detection-correction equipment as part of the initial installation; further, that if such equipment is not installed initially, it is likely that it will be installed later as the user develops a need for an improved service.

32. MMR expresses both a general and a specific dissatisfaction with proposed § 81.204(c). MMR states that § 81.204(c) "* * * is premature and inappropriate. The Commission has, in this subsection of the regulations, proposed codification of the frequency assignment plan in such fashion as will serve to permanently assign the frequencies without specific regard as to the public interest, convenience and necessity. It is incongruous, for example, that frequency allocations have been proposed for eight coast stations for which applications to close are presently pending before the Commission. Moreover with respect to those stations, MMR respectfully submits that if the applications to close are granted, the frequency assignments should be made available to other licensees. All too often in the past the Commission has allowed telegraphy licensees to cross-license frequencies, thus precluding, such as occurred with respect to station WAX, the opportunity for those licensees needing frequencies to obtain additional allocations, upon a showing of need and the public interest, convenience and necessity, when they become available due to closure of another station. MMR respectfully submits that the Commission must address this issue and must amend its procedures in order to provide for a more equitable distribution of the public coast station frequencies in accordance with the requirements of section 309 of the Communications Act, rather than at the private convenience of individual licensees."

33. Treating the comments of MMR in the order presented:

(a) The arrangement set forth in § 81.204(c) is neither premature or inappropriate. MMR makes no effort to substantiate or to give support to their claim. In June 1975 the staff had prepared a draft plan for the distribution of NB–DP paired frequencies between the concerned public coast radiotelegraph stations, which was then coordinated with the concerned government agencies. In July 1975 we coordinated that draft plan with the affected communication common carriers, the results of which were included in the first draft of the Notice of Proposed Rule Making (later to become Doc. No. 20813). The instant Notice of Proposed Rule Making was released June 4, 1976. In September 1976 we requested the communication common carriers to supply the basic characteristics of coast transmitting and receiving stations in order that the appropriate notices (Standard Form 128) could be supplied to the International Frequency Registration Board, pursuant to the 1974 WMARC Resolution Mar 2–7,

showing the frequencies and areas proposed to be employed at United States public coast radiotelegraph stations. That information was supplied, included on Standard Form 128 and filed with the IFRB.

MMR has not (1) in June 1975, or (2) in response to the instant proceeding, or (3) in September 1976, indicated or stated that the NB–DP frequencies proposed for station WLO were inadequate or unsatisfactory. Further, MMR has given no basis or reason for dissatisfaction with the NB–DP frequencies proposed for ITT Worldcom, RCA Globcom, or TRT Telecommunications public coast radiotelegraph stations. In fact, MMR has not clearly stated they are opposed to the NB–DP frequencies proposed for the ITT, RCA, or TRT stations. MMR's implication in the phrase "permanently assign" is true only to the extent that the rules set forth in Part 81 are permanent. As all are aware, Part 81 is frequently amended to meet changing conditions and the public need.

(b) MMR refers to the Memorandum Opinion and Order, Docket No. 19544 (FCC 76–454) released May 27, 1976 (41 FR 22059), and to applications to close eight public coast radiotelegraph stations. MMR refers, further, to § 81.204 (c), which designates frequencies for those eight stations, and expresses the view that it is "incongruous" that the Commission has proposed "frequency allocations" for those eight stations. Noting the non-final status of the referenced Memorandum Opinion and Order, the Commission will act appropriately on this matter at such time as a decision is reached to close or not to close those stations.

(c) MMR addresses the matter of cross-licensing in the vein that it precludes other licensees from access to those frequencies and uses TRT's station WAX as an example. Cross licensing has been the standard, rather than the exception, for several decades. It was initiated on a near full scale basis for communication common carrier fixed public and aeronautical fixed stations following the 1951 Extraordinary Administrative Radio Conference. In more recent years it has been applied to various maritime mobile frequency usage. In 1952 it was agreed, in meetings convened by the Commission (at which the communication common carriers and aeronautical representatives were present) on the basis that it (cross-licensing) provided the best means for protecting international registrations of United States frequency assignments and, second, as providing maximum flexibility to FCC licensees in the use of those frequencies. In the following years we know of no reversal of or desire to reverse the 1952 decision. It is our view that the 1952 decision was then, and remains today, fully in the public interest.

We turn now to MMR's reference to TRT's station WAX as an example of procedure contrary to the public interest. We suggest that one or more of the problems associated with MMR's efforts to expand its radiotelephony operations are being applied, incorrectly, to MMR's radiotelegraphy operations. Aside from the usual crowding in the coast radiotelegraph bands, we are not aware that MMR has inadequate frequencies for its radiotelegraph operations.

(d) The last reference is to MMR's comment, quoted above, that the Commission must address this issue and must amend its procedures, etc. If we correctly construe the issue referred to, it would require that we examine in detail the frequency assignments to each of the common carriers providing public coast radiotelegraph service. In the absence of a documented need for additional coast radiotelegraph frequencies by one or more of the concerned common carriers, and we know of no such need, recognizing the substantial economic burden to each carrier which would result from reaffirmation of the current procedure or development of a new procedure (for example, formal documentation of the pertinent statistics for each station, public hearings to obtain needed facts, diversion of legal, engineering and operational personnel from normal duty assignments), it is our opinion that in the absence of a documented need such action would provide no practical benefit, would serve no useful purpose, and would not be in the public interest. In any event, we do not see that Section 309 of the Communications Act is involved.

34. MMR comments that they have learned that other administrations will use the same NB–DP frequencies as proposed for United States coast stations and suggests that prior to finalization of § 81.204(c) the Commission should coordinate that plan with foreign administrations. There are over 150 foreign administrations which potentially have access to Appendix 15A frequencies and, thus, it is clear that several administrations will employ each family of the NB–DP frequencies. The need for coordination of NB–DP frequency assignments between administrations is recognized in 1974 WMARC Resolution Mar 2–7. Recognizing that a specialized conference would be required, probably following the 1979 WARC, for the maritime mobile service, the IFRB states that entries in the Master Register are being made in a manner which will not prejudice the decisions of such conference. Considering the number of United States public coast radiotelegraph stations involved, we know of no means, other than by a worldwide conference attended by using administrations, which could be employed to effect the suggested coordination. While it is our view that a coordinated plan would reduce conflicts between user administrations in the use of NB–DP frequencies, it would (1) require a reduction in the number of frequencies to which United States stations have access, and (2) require an extended period of time in which to complete. Until a clearer picture develops as to which United States and foreign stations will provide NB–DP service, we believe that the public interest is best served by proceeding on an evolutionary basis, up to the time of convening of an international maritime conference. We do not, therefore, propose to undertake any large scale international coordination with other administrations in the use of NB–DP frequencies.

35. MMR comments in regard to proposed § 81.205 that paragraph (e) appears to be in conflict with paragraphs (a) through (d) and that the section should be rearranged to initially indicate that the format detailed therein is optional rather than mandatory. MMR appears to have misunderstood the text of paragraph (e) since under the conditions stated it is of no concern to MMR or to any other coast station what format or procedure is employed. Once the coast station has patched the ship station through to the addressee, or vice versa, the transmitting station can use any procedure that station desires to use. On the other hand, except under the conditions set forth in (e), the procedure/format in paragraphs (a) through (d) is mandatory. In view thereof, we see no need to rearrange § 81.205.

36. MMR comments that the Commission should allow coast stations having A1 Morse capability to employ A1 Morse, on a secondary basis in an operational mode, for telegraphy set up and control. Further, MMR refers to MMR comments in Doc. No. 20449, which MMR states address this requirement and requests that those comments be incorporated by reference. MMR referenced comments were submitted in Doc. No. 20449 notwithstanding the Commission's statement in the Notice of Proposed Rule Making in that proceeding that the Commission would not consider the matter of use of radiotelephone frequencies to set up and back up direct-printing (radio teleprinter). MMR referenced comments in Docket No. 20449 did not refer, in any way, to the use of A1 Morse to set up a radioteleprinter circuit.

37. MMR comments that the Commission should allow, as some European administrations are doing, coast stations having A1 Morse capability to employ A1 Morse, on a secondary basis in an operational mode, for telegraphy set up and control. By "telegraphy set up" we construe MMR's reference to be to radioteleprinter set up. Proposed § 81.204(b)(6) treats this subject. In § 81.204(b)(6) we are requiring that radioteleprinter circuits be set up by radioteleprinter calls on the digital selective calling or on NB–DP frequencies. We are not authorizing the routine use of A1 Morse to set up radioteleprinter circuits, although we are providing for the interim contingency use of A1 Morse in the case where the ship or coast station may not know which NB–DP frequency(s) is to be used. We fully expect that after accurate frequency and operational information appears in ITU's Lists of Ship Stations and Coast Stations, or that information is otherwise disseminated, and the non-standard radioteleprinter systems aboard ship have been brought into accord with these rules, that the interim

contingency need for the use of A1 Morse set up will be discontinued altogether. At that time we plan to delete this interim contingency provision from proposed § 81.204(b)(6).

38. MMR requests, in regard to proposed § 81.152, that the requirements of this section be modified to permit radioteleprinter operation by a person holding a radiotelegraph third-class operator permit (T–3) or a radiotelephone third-class operator permit (P–3), when those (T–3 or P–3) operators are under the direct supervision and responsibility of an operator holding a radiotelegraph second-class operator license (T–2) or higher class of operator license. MMR states (1) that the staffing of each radioteleprinter operating postion with a T–2 technician is unnecessary; (2) creates an undue salary expense requirement; and (3) is infeasible inasmuch as a person with a T–2 operator license is overqualified merely to serve as a radioteleprinter operator. In support thereof, MMR expresses the view (4) that the requested amendment would be consistent with existing section 81.155 which allows for operation of telephony service by an unlicensed person where that person is subject to the direct supervision of a duly licensed operator; (5) corresponds to the Commission's proposed action in Docket No. 20862; and (6) is necessary to provide adequate staffing as prescribed by the Commission's Memorandum Opinion & Order (FCC 76–454) in Docket No. 19544, released May 27, 1976 (41 FR 22059, June 1, 1976). No opposing views were filed relative to MMR's request.

39. Part 13, § 13.21(f)(2) requires that an applicant (a) for a P–3 operator permit must complete tests of written examination elements 1 and 2; or (b) for a T–3 operator permit, must complete tests of written examination elements 1, 2, and 5. Element 1 covers basic law—provisions of laws, treaties, and regulations with which every operator should be familiar. Element 2 covers basic operating practice—radio operating procedures and practices generally followed or required in communicating by means of radiotelephone stations. Element 5 covers radiotelegraph operating practice—radio operating procedures and practices generally followed or required in communicating by means of radiotelegraph stations primarily other than in the maritime mobile services of public correspondence.

40. In viewing the above test elements together with the scope of authority permitted operators holding the various categories of licenses or permits, as set forth in § 13.61 (specifically § 13.61(g), in the case of class P–3, and 13.61(d) in the case of class T–3), it is not necessary to modify §§ 13.21 or 13.61 in order to effect the modifications requested by MMR. It is necessary, however, that, as requested, § 81.152 be amended. With regard to the merit of the arguments advanced by MMR in support of the requested amendment, we are persuaded that the requested amendment would facilitate the staffing and operation of public coast radiotelegraph stations. In addition, we believe that the requested amendment would not adversely affect the quality and/or capability of operating personnel at those stations. We are, therefore, amending § 81.152 to permit the operation of radioteleprinter operating positions at public coast radiotelegraph stations by personnel holding either a P–3 or a T–3 operator authorization, subject to the limitations set forth in the appropriate paragraphs of § 13.61. Section 81.152 as amended is set forth below.

41. In paragraph 28 of the Notice of Proposed Rule Making we set forth the policy which we proposed to apply to the older ship transmitters of the harmonic relationship type. That policy, modified to be in accord with the revision herein adopted, together with the applicable exceptions, is set forth below:

(a) Discontinue the availability of the type transmitters set forth below for use in ship stations after May 31, 1977; however.

(b) We will continue to license those transmitters aboard existing ship stations if the crystal oscillator section of these transmitters is modified [1] to comply with the 200 Hz frequency tolerance and to incorporate the capability to provide all A1 Morse calling and working frequencies, including those frequencies which are harmonically related and those which are not harmonically related, which are necessary to the vessels operation, provided these transmitters meet the other applicable provisions of the rules; but that

(c) We will preclude the installation of the ship transmitters set forth below (either unmodified or modified as set forth in (b), above) aboard new ships, or as replacement transmitter(s) aboard existing ships.

42. AIMS and CAI directed comments to the above policy and/or to the transmitters listed below. With regard to the matter of harmonic relationship type transmitter, AIMS expresses the view that if this type transmitter is fitted with a frequency synthesis generator (in lieu of crystals), this type transmitter should be approved for installation aboard new ships. Based on the comments filed, these transmitters will not operate in the 25 MHz band and no encouragement is given that they can be modified, practicably and on an economically feasible basis, to operate in that band. In our view, this deficiency alone provides a fully adequate basis from which to prohibit their installation on new ships. We are, therefore, rejecting AIMS request that these type transmitters be permitted to be installed on new ships. Accordingly, that portion of Appendix 2 which relates to harmonic relationship type transmitters is adopted without charge.

43. CAI's comments are directed to inclusion in Appendix 2 of their transmitter type CA–35. CAI (1) advises that they now have available a control/exciter unit that provides a capability to be set to each of the required frequencies and (2) provides with their comments a graph of power measurements for the CA–35 MKII/CL–36 showing power output variation vs. frequency and in their comments state that low power measurement may be attributable to other factors, including: malfunctioning transmitter (components or adjustments), faulty installation, an improper antenna, an improperly tuned antenna, or a lack of understanding of test parameters.

44. Based on these actions and statements by CAI, the transmitter type CA–35 has been removed from Appendix 2, which is modified in accordance therewith, and adopted as set forth in the attached Appendix. CAI is correct that it was not the Commission's intent to present the CA–35 in an unfair light to present and potential users.

45. CAI "* * * requests that there be a type acceptance requirement to measure the power output of all transmitters (affected by this proceeding) at all band-edge and mid-band frequencies. And further, that the FCC published rated power of the transmitter be determined by these measurements and shall be no more than 1 dB above the lowest recorded power in this test." We concur that CAI's request has merit since it would assure that the public was informed as to the lower output levels of the transmitter. The public would not, however, be informed as to the upper output levels. These points notwithstanding, the Commission's rules are written around the minimization of interference based on the concept of a maximum output power. Thus, there is no practical means by which CAI's suggested approach can be incorporated into the rules short of a change in concept and a major reworking of the rules. We feel that such a major undertaking is not now justified.

46. Comments were not submitted in regard to the following proposed sections and they are, accordingly, adopted without change as set forth below.

47. In Appendix 3 to the Notice of Proposed Rule Making we provided a (27 page) listing of ship stations currently licensed for the use of radiotelegraphy. We requested licensees to inform the Commission of vessels which should be added to or deleted from that Appendix; of transmitter types in use aboard the respective vessels which differ from the

[1] These requirements could be fulfilled by the installation of a type accepted frequency synthesis generator.

listed transmitters; or of changes which should be made in other particulars deemed appropriate. The requested information was supplied, on an informal basis, by American Telephone & Telegraph Co., ITT/Mackay Marine and RCA Frequency Bureau. The information supplied has been used to update our master copy. A new master copy will be released to the public, as a separate document, it will contain specific series numbers of working frequencies and identification numbers (selective calling) for ship stations currently licensed for telegraphy. Listed ships are now authorized the use of these assignments, in conjunction with their existing station authorization.

48. In keeping with the intent of the 1974 WMARC to improve the effectiveness of the A1 Morse calling procedure by evenly distributing calls throughout the calling bands, Series No. 4 on the East coast and Series No. 11 on the West coast will be guarded by the United States Coast Guard for AMVER purposes. This action is being taken to separate public correspondence calling channels from AMVER calling channels and to establish permanent dedicated A1 Morse calling channels for the United States Coast Guard AMVER program.

49. The Commission is fully aware of the small amount of time available to put into effect the new calling procedure.

Further, we are aware that the effectiveness of the Commission's Memorandum Opinion and Order on Docket No. 19544 is stayed for purposes of clarification. In view thereof, we recognize that some of the affected licensees may have difficulty in providing full service in accordance with the instant Report and Order, particularly where new, replacement, or additional equipment is involved. Accordingly, where such situation appertains, we will consider on a case by case basis requests from affected licensees for an interim waiver of the rules in order to allow licensees to comply insofar as possible with the intent of these new rules.

50. In the Notice of Proposed Rule Making we had anticipated that changes (see paragraph 49) might be required to Part 13 to bring it into accord with consequential changes to §§ 81.152 and/or 83.159. As set forth in paragraph 41, above, no changes to Part 13 are required.

51. Any application for modification of license to comply with any rule amendments adopted herein may be submitted without a fee.

52. Accordingly, *it is ordered*, That, pursuant to the authority contained in section 303 (c), (f), (g), and (r) of the Communications Act of 1934, as amended, and in the Final Acts of the World Maritime Administrative Radio Conference, Geneva, 1974, Parts 2, 81 and 83 of the Commission's rules are amended effective July 18, 1977, as set forth in the attached Appendix.

53. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FEDERAL COMMUNICATIONS COMMISSION

Parts 2, 81, and 83 of Chapter I, Title 47, Code of Federal Regulations, are amended as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

Section 2.106 is amended to read as follows:

§ 2.106 Table of frequency allocations.

FEDERAL COMMUNICATIONS COMMISSION—Continued

Band (kHz) (7)	Service (8)	Class of station (9)	Frequency (10)	Nature (of services, of stations) (11)
8343.5 to 8357.25	do	do		Ship (paired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands).
8357.25 to 8357.75	do	do	8357.5	Ship (nonpaired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands)
8357.75 to 8359.75	do	do		Ship (working, A1 Morse telegraphy)
8359.75 to 8374.4	do	do		Ship (calling, A1 Morse telegraphy).
8374.4 to 8376	do	do	8375.2	Ship (digital selective calling).
8376 to 8435.4	do	do		Ship (working, A1 Morse telegraphy)
8435.4 to 8704.4	do	Coast		Coast (wide-band and A1 Morse telegraphy, facsimile, special and data transmission systems and direct-printing telegraphy systems).
8704.4 to 8718.25	do	do		Coast (paired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands).
8718.25 to 8718.9	do	do	8718.5	Coast (digital selective calling)
8718.9 to 8815	do	do		Coast (telephony, duplex).
12330 to 12420.2	do	Ship		Ship (telephony, duplex)
12420.2 to 12439.5 (US82).	do	Ship Coast		Ship. Coast (telephony, simplex)
12439.5 to 12479.5	do	Ship		Ship (wide-band telegraphy, facsimile and special transmission systems).
12479.5 to 12483	do	do Buoy Interrogating coast.		Ship Buoy Interrogating coast (oceanographic data transmission)
12483 to 12491	do	Ship		Ship (wide-band telegraphy, facsimile and special transmission systems).
12491 to 12519.75	do	do		Ship (paired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands).
12519.75 to 12526.75	do	do		Ship (nonpaired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands).
12526.75 to 12539.6	do	do		Ship (working, A1 Morse telegraphy)
12539.6 to 12561.6	do	do		Ship (calling, A1 Morse telegraphy).
12561.6 to 12564	do	do	12562.3 12562.8	Ship (digital selective calling).
12564 to 12652.3	do	do		Ship (working, A1 Morse telegraphy).
12652.3 to 13070.8	do	Coast		Coast (wide-band and A1 Morse telegraphy, facsimile, special and data transmission systems and direct-printing telegraphy systems).
13070.8 to 13099.75	do	do		Coast (paired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands)
13099.75 to 13100.8	do	do	13100 13100.5	Coast (digital selective calling)
13100.8 to 13200	do	do		Coast (telephony, duplex)
16460 to 16587.1	do	Ship		Ship (telephony, duplex)
16587.1 to 16596.4 (US82).	do	do Coast		Ship. Coast (telephony, simplex)
16596.4 to 16636.5	do	Ship		Ship (wide-band telegraphy, facsimile and special transmission systems).
16636.5 to 16640	do	do Buoy Interrogating coast.		Ship. Buoy Interrogating Coast (oceanographic data transmission)
16640 to 16660	do	Ship		Ship (wide-band telegraphy, facsimile and special transmission systems).
16660 to 16694.75	do	do		Ship (paired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands).
16694.75 to 16705.8	do	do		Ship (nonpaired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands).
16705.8 to 16719.8	do	do		Ship (working, A1 Morse telegraphy)
16719.8 to 16748.8	do	do		Ship (calling, A1 Morse telegraphy)
16748.8 to 16752	do	do	16749.9 16750.4	Ship (digital selective calling).
16752 to 16859.4	do	do		Ship (working, A1 Morse telegraphy).
16859.4 to 17196.9	do	Coast		Coast (wide-band and A1 Morse telegraphy, facsimile, special and data transmission systems and direct-printing telegraphy systems)
17196.9 to 17231.75	do	do		Coast (paired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands)
17231.75 to 17232.9	do	do	17232 17232.5	Coast (digital selective calling)
17232.9 to 17360	do	do		Coast (telephony, duplex).
22000 to 22124	do	Ship		Ship (telephony, duplex).
22124 to 22139.5 (US82).	do	do Coast		Ship. Coast (telephony, simplex).
22139.5 to 22160.5	do	Ship		Ship (wide-band telegraphy, facsimile and special transmission systems).
22160.5 to 22164	do	do Buoy Interrogating coast.		Ship. Buoy. Interrogating coast (oceanographic data transmission)
22164 to 22192	do	Ship		Ship (wide-band telegraphy, facsimile and special transmission systems).
22192 to 22225.75	do	do		Ship (paired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands).

FEDERAL COMMUNICATIONS COMMISSION—Continued

Band (kHz) (7)	Service (8)	Class of station (9)	Frequency (10)	Nature (of services, of stations) (11)
22225.75 to 22227	do	do		Ship (nonpaired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands).
22227 to 22247	do	do		Ship (calling, A1 Morse telegraphy).
22247 to 22250	do	do	22248 22248.5	Ship (digital selective calling).
22250 to 22310.5	do	do		Ship (working, A1 Morse telegraphy).
22310.5 to 22561	do	Coast		Coast (wide-band and A1 Morse telegraphy, facsimile, special and data transmission systems and direct printing telegraphy systems).
22561 to 22594.75	do	do		Coast (paired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands).
22594.75 to 22596	do	do	22595 22595.5	Coast (digital selective calling).
22596 to 22720	do	do		Coast (telephony, duplex).
•	•	•	•	•
25.01 to 25.07	Land mobile.	Base Land mobile.	25.02–25.06 (NG32)	Industrial.
25.07 to 25.76	Maritime mobile.	Ship		Ship (calling, A1 Morse telegraphy).
25.76 to 25.0901	do	do		Ship (nonpaired, narrow-band direct-printing telegraph and data transmission systems, at speeds not exceeding 100 bands).
25.0901 to 25.11	do	do		Ship (working, A1 Morse telegraphy).
25.11 to 25.33	Land mobile.	Base Land mobile.	25.12–25.16 (NG32)	Industrial.
•	•	•	•	•

In § 2.303, the existing paragraph is amended and designated as (a) and a new paragraph (b) is added, to read as follows:

§ 2.303 Other forms of identification of stations.

(a) The following table indicates forms of identification which may be used in lieu of call signs by the specified classes of stations. Such recognized means of identification may be one or more of the following: name of station, location of station, operating agency, official registration mark, flight identification number, selective call number or signal, selective call identification number or signal, characteristic signal, characteristic of emission or other clearly distinguishing form of identification readily recognized internationally. Reference should be made to the appropriate part of the rules for complete information on identification procedures for each service.

Class of Station	Identification, other than assigned call sign
•	•
	Ship telegraph—When an official call sign is not yet assigned; Complete name of the ship and name of licensee. On 156.65 MHz: Name of ship. Digital selective call.
Ship telepgraph	Digital selective call.
Public coast (radiotelephone) and Limited Coast (Radiotelephone).	The approximate geographic location in a format approved by the Commission. Coast station identification number.
Public coast (radiotelegraph).	Coast station identification number.
•	•

(b) Digital selective calls will be authorized by the Commission and will be formed by groups of numbers (0 through 9), however, the first digit must be other than 0, as follows:

(1) Coast station identification number: 4 digits.

(2) Ship station selective call number: 5 digits.

(3) Predetermined group of ship stations: 5 digits.

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

1. In § 81.131, a footnote is added to paragraph (b) (3) (ii), to read as follows:

§ 81.131 Authorized frequency tolerance.

• • • • • •

(b) • • •

Frequency ranges	Tolerance—parts in 10^6 unless shown as hertz (Hz)
• • • • •	
(3) From 4,000 to 27,500 kHz:	
(i) For A3A, A3B, A3H, and A3J emissions.	20 Hz.
(ii) For narrow-band direct-printing telegraph and data transmission system.	20 Hz [1].
(iii) For other than (i) and (ii) above.	15.
• • • • •	

2. In § 81.143, paragraph (c) is amended and new paragraphs (d), (e) and (f) are added to read as follows:

§ 81.143 Narrow-band direct-printing radiotelegraph equipment.

• • • • • •

(c) (1) Class F1 emission shall be used, with a total frequency shift of 170 Hertz.

(2) When frequency shift keying is effected by applying audio signals to the input of a single sideband transmitter, the suppressed (residual) carrier, when it falls outside the authorized bandwith, shall be suppressed to the level prescribed by § 81.140. Further, the center audio frequency between the ±85 Hz tones shall be 1,700 Hz, ±5 Hz, above the suppressed (residual) carrier.

(d) The higher of the emitted frequencies shall correspond to "space" (start), and the lower the emitted frequencies shall correspond to "mark" (stop).

(e) Where an error control system is employed the apparatus shall be provided with a simple device to bypass the error control system to permit transmission and reception over the radio path of uncorrected signals conforming with (a), above.

(f) When an error-detecting and correcting system is used for direct-printing telegraphy in the maritime mobile service, a 7-unit ARQ system or a 7-unit forward acting error-correcting and indicating time diversity system, using the same code, shall be employed.

[1] A frequency tolerance of 15 Hz is applicable effective January 1, 1978.

3. In § 81.152, paragraph (d) is amended to read as follows:

§ 81.152 Operator required.

• • • • • •

(d) Description of Station	Minimum operator authorization
Public coast telegraph, all classes.	T–2.
Coast telephone, all classes, except in Alaska:	
Exceeds 250 watts carrier power or 1,500 watts peak envelope power.	T–2 or P–2.
250 watts or less carrier power; or 1,500 watts or less peak envelope power operating on frequencies below 30 MHz.	T–3 or P–3.
250 watts or less carrier power, or 1,500 watts or less peak envelope power operating on frequencies above 30 MHz.	RP.
Coast telephone, in Alaska:	
Exceeds 250 watts carrier power; or 1,500 watts peak envelope power, Class I station.	T–2 or P–2.
Exceeds 250 watts carrier power, or 1,500 watts peak envelope power, Class II or Class III station.	T–3 or P–3.
250 watts or less carrier power, or 1,500 watts or less peak envelope power, all classes.	RP.
Marine fixed, except in Alaska.	T–3 or P–3.
Marine fixed in Alaska	RP.
Marine utility coast	RP.
Shipyard base	RP.

• • • • • •

4. In § 81.184, paragraphs (a) and (b) are amended and note deleted, to read as follows:

§ 81.184 Transmission of traffic lists by coast stations.

(a) Public coast stations are authorized to transmit, on their normal working frequencies in the appropriate bands, lists of official call signs (or, alternatively in the use of radiotelephony, the names of the respective ships), in alphabetical order insofar as practicable, of all mobile stations for which they have traffic on hand. The use of calling frequencies for this purpose is prohibited; however, coast stations may announce on a calling frequency that they are about to transmit such call lists on a specified frequency. These traffic lists shall be transmitted at intervals of:

(1) In the case of radiotelephony, at least two hours and not more than four hours during the working hours of the coast station.

(2) In the case of radiotelegraphy, at least one hour and not more than four hours during the working hours of the coast station.

(b) An announcement on a calling frequency that a coast station is about to transmit a call list on a specified working frequency shall be as brief as practicable, but in any event shall not be repeated more than twice.

5. The present section heading and text of § 81.203 is redesignated § 81.223 and a new § 81.203 is adopted to read as follows:

§ 81.203 Digital selective calling frequencies.

(a) The carrier frequencies set forth in the table below are available for use by each coast station authorized to employ frequencies in the band 4—27.5 MHz for calls to ship stations by means of digital selective calling. The associated reply frequencies are also shown.

Coast station transmit to ships (kHz): [1]	Coast station receive from ships (kHz) [1]
4357	4187.6
6506	6281.4
8718.5	8375.2
13100	12562.3
13100.5	12562.8
17232	16749.9
17232.5	16750.4
22595	22248
22595.5	22248.5

[1] These frequencies are available for use effective June 1, 1977.

(b) Until such time as a digital selective calling system and associated procedures have been agreed upon and adopted into the ITU Radio Regulations, coast station authorized to employ narrow-band direct-printing (NB–DP) for communication with ship stations may, effective June 1, 1977, use the frequencies designated in paragraph (a) of this section for calls to ship stations fitted for the use of narrow-band direct-printing equipment.

(c) In using the frequencies indicated for transmission, coast stations should make reasonable effort to avoid the creation of interference to other coast stations employing the same frequencies.

(d) In calling ship stations by narrow-band direct-printing, the coast station shall use the ship station selective call number (5 digits) and effect self-identification by the use of the coast station identification number (4 digits).

(e) Calls to a ship station shall employ the following format:

(1) Ship station selective call number, repeated twice;

(2) "DE", sent once; and

(3) Coast station identification number, repeated twice.

(f) When the ship station does not reply to a call sent three times at Intervals of two minutes, the calling shall cease and shall not be renewed until after an interval of fifteen minutes.

6. The present section heading and text of § 81.204 is redesignated § 81.224 and a new § 81.204 is adopted to read as follows:

§ 81.204 Assignable frequencies—Narrow-band direct-printing radiotelegraph and data transmission systems.

(a) Each of the specific frequencies set forth in the following table under the column headed "coast transmit" may be licensed as an assigned frequency for use by coast stations employing narrow-band direct-printing radiotelegraphy for communication with ship stations employing the same system, subject to and in accordance with the provisions of paragraph (b) of this section and Subpart E of this part, and upon the express condition that interference shall not be caused to any service or station which, in the discretion of the Commission, may have priority on the frequency or frequencies involved: *Provided*, That the use of each of these frequencies may be restricted by the Commission to specific areas or locations in order to avoid or minimize interference between stations.

69			17231.5	16694.5		

(b) The procedures set forth in this paragraph shall be used, except in cases of distress, urgency or safety, when communicating by means of narrow-band direct-printing (NB–DP) radiotelegraphy with ship stations. In that regard:

(1) Traffic may be exchanged with or without the use of error-correcting equipment.

(2) For communication between two stations, the ARQ mode should be used when available.

(3) For transmissions to two or more ship stations, the forward-error-correcting mode should be used when available.

(4) When using (paired) frequencies set forth in paragraph (a) of this section, the coast station shall receive the ship station on the frequencies, indicated in the table under "coast receive", which are paired with the frequencies used by the coast station. Cross-band operation is prohibited between coast station transmissions on frequencies listed in another section of this part and ship station transmissions on frequencies listed in paragraph (a) of this section.

(5) When receiving ship station transmissions on (non-paired) NB–DP frequencies, the coast station shall transmit on one or another of the frequencies listed in § 81.206. Special arrangements may be made between a coast station and ship stations, or shipping companies, for the use of specific frequencies.

(6) Calls to ship stations by NB–DP shall normally be made by radioteleprinter on the frequencies of § 81.203 (a), or on the NB–DP frequencies assigned to the coast station. The routine use of A1 Morse radiotelegraphy frequencies for the setting up of a NB–DP circuit is not authorized. *Provided, however*, That coast stations may, when the above alternatives are unsuccessful, call ship stations by A1 Morse radiotelegraphy, shift to A1 Morse radiotelegraphy working frequencies, and complete arrangements for setting up a NB–DP circuit.

(c) Subject to and in accordance with the provisions of paragraph (a) and (b) of this section, coast radiotelegraph stations may, upon grant of a proper application, be authorized to employ the coast transmit frequencies specified in the indicated Series No., as set forth in paragraph (a) of this section, as follows:

Call letters of coast station:	*NB–DP series No. available June 1, 1977*
KPS	1, 3, 28, 47
KHK	10, 22, 42
KLB	8, 33, 50
KLC	5, 17, 48
KOK	6, 30, 49
KPH	13, 14, 21, 22, 38
WAX	10, 15, 36
WCC	13, 14, 21, 22, 38
WLO	5, 15, 25, 54

WOE	6, 21, 26, 42
WPA	9, 22, 44
WSC	9, 18, 40
WSL	1, 3, 28, 47

7. The present section heading and text of § 81.205 is redesignated § 81.225 and a new § 81.205 is adopted to read as follows:

§ 81.205 Narrow-band direct-printing (NB–DP) operating procedure.

(a) When both terminals of the NB–DP circuit are satisfied that the circuit is in operable condition, the message preamble shall be transmitted in the following format:

(1) One carriage return and one line feed,

(2) Serial number or number of the message,

(3) The name of the office of origin,

(4) The number of words,

(5) The date of handing in of the message,

(6) The time of handing in of the message, and

(7) Any service instructions. (See CCITT, Geneva 1972, Section 6 of the General provisions applying to all methods of working.)

(b) Upon completion of transmission of the preamble, the address, the text and the signature shall be transmitted as received from the sender.

(c) Upon completion of transmission of the signature, the coast station shall, following the signal "COL", routinely repeat all service indications in the address and for figures or mixed groups of letters, figures or signs in the address, text or signature.

(d) In telegrams of more than 50 words, routine repetition shall be given at the end of each page.

(e) The provisions of paragraphs (a) through (d) of this section may or not, at the discretion of the user, be utilized when a direct connection between ship station and addressee, or vice versa, is employed.

8. In § 81.206, the table following paragraph (a) is amended by the deletion and, in lieu thereof, the addition of direct replacement frequencies, as follows:

§ 81.206 Assignable frequencies.

* * * * *

Area	90–160 (kHz)	415–525 (kHz)	2 MHz (kHz)	4 MHz (kHz)	6 MHz (kHz)	8 MHz (kHz)	12 MHz (kHz)	16 MHz (kHz)	22 MHz (kHz)

9. In § 81.207, paragraph (e) is amended and a new paragraph (f) is added to read as follows:

§ 81.207 Frequencies for call and reply.

* * * * *

(e) Pending availability of an internationally agreed plan for establishing two-way communications by radioteleprinter, the interim procedure set forth in this section may be employed until June 1, 1977.

* * * * *

(f) The frequencies set forth in the table below are available for use effective June 1, 1977, by coast radiotelegraph stations for calls to ship stations by means of digital selective calling. The associated reply frequencies are also shown.

	Coast receive from ships (kHz)
4357	4187.6
6506	6281.4
8718.5	8375.2
13100	12562.2
13100.5	12562.8
17232	16749.9
17232.5	16750.4
22596	22248
22595.5	22248.5

§ 81.208 [Redesignated]

10. The present section heading and text of § 81.208 is redesignated § 81.218 and subparagraph (d)(3) thereof is deleted.

§§ 81.208—81.214 [Redesignated]

11. The numbering of the heading and text of §§ 81.209 through 81.214 is

changed and redesignated §§ 81.219 through 81.224, as follows:

Changed from sec.:	Changed to and redesignated sec.

(b) The receiving installation employed on each designated frequency shall fulfill the following requirements:

(1) The receiving antennas provided shall be capable of effective and efficient reception of calls from ship stations on each of the designated frequencies.

(2) The transmission lines connecting antennas and receivers shall provide a minimum of attenuation of incoming signals.

(3) When more than one receiver is operated from a single antenna, means shall be provided to minimize the attenuation of incoming signals and interaction between receivers.

(c) The receivers employed shall: (1) Be capable of being accurately set to and of being reset to any one of the designated calling frequencies in each band for which the receiver is intended to operate. The time required to set or to reset the receiver to frequency shall not exceed 5 seconds.

(2) Have a selectivity capability such that it will reject signals on adjacent channels 500 Hz removed.

(3) Have a long term frequency stability of not more than 50 Hz, and shall not require recalibration more often than once each 90 days.

(4) Have a minimum sensitivity of 2 microvolts across receiver input terminals of 50 Ohms, or equivalent.

(5) Provide a power output and audio frequency response adequate to drive headphones, loudspeakers, and/or recording equipment, as necessary to meet normal station operations. The harmonic audio distortion shall not exceed five percent (5 percent) at any rated output power.

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

1. Section 83.131, paragraph (b) is amended to read as follows:

§ 83.131 Authorized frequency tolerance.

• • • • •

(b) • • •

Frequency ranges	Tolerance, parts in 10^6 unless shown as Hz
(1) From 100 to 535 kHz:	
(i) For transmitter using A2H emission, type accepted or type approved before November 30, 1977.	50 Hz.
(ii) For transmitters using other than A2H emissions and classes of emission specified in (2) and (3), below, type accepted or type approved before November 30, 1977.	1,000.
(iii) For transmitters, type accepted or type approved after November 30, 1977.	20 Hz.
(2) From 100 to 535 kHz: Emergency transmitter only, the use of which is certified solely to safety communications or defined in § 83.6(a), type accepted or type approved:	
(i) Before November 30, 1977	3,000.
(ii) After November 30, 1977	20 Hz.
(3) Survival craft stations on 500 kHz: For transmitters, type accepted or type approved:	
(i) Before November 30, 1977	5,000.
(ii) After November 30, 1977	20 Hz.
(4) Ship stations from 1605–2070 and 2080 to 3500 kHz:	
(i) For transmitters using other than A3A, A3H, and A3J emissions, type accepted or type approved before November 30, 1977.	200.
(ii) For transmitters using A3A, A3H and A3J emissions, type accepted or type approved before November 30, 1977.	50 Hz.
(iii) For transmitters type accepted or type approved after November 30, 1977.	20 Hz.
(5) Ship stations from 2070 to 2080 kHz: For transmitters type accepted or type approved:	
(i) Before November 30, 1977	50.
(ii) After November 30, 1977	20 Hz.

12. A new § 81.209 is added, to read as follows:

§ 81.209 Watch on ship calling frequencies.

(a) Coast stations shall maintain a continuous listening watch, subject to normal variations in radio propagation, during their working hours for calls from ship stations on frequencies as set forth in the following table:

(6) Survival craft stations on 2182 kHz: For transmitters type accepted or type approved:	
(i) Before November 30, 1977	200.
(ii) After November 30, 1977	20 Hz.
(7) Stations when using frequencies within the band 4000–27500 kHz:	
(i) Ship stations using emission A1 with transmitters type accepted or type approved:	
(a) Before November 30, 1977	200 Hz.
(b) After November 30, 1977	20 Hz.
(ii) Ship stations using frequencies allotted for narrow-band direct-printing telegraph and data transmission system with transmitters type accepted or type approved:	
(a) Before November 30, 1977	50 Hz.
(b) After November 30, 1977	20 Hz.
(iii) Ship stations using A3A, A3H, or A3J emissions with transmitters type accepted or type approved:	
(a) Before November 30, 1977	50 Hz.
(b) After November 30, 1977	20 Hz.
(iv) Ship stations using emissions other than (i), (ii), or (iii), above, with transmitters type accepted or type approved:	
(a) Before November 30, 1977	50
(b) After November 30, 1977	20 Hz.
(v) Survival craft stations on 8364 kHz with transmitters type accepted or type approved:	
(a) Before November 30, 1977	200
(b) After November 30, 1977	50 Hz.

• • • • •

2. In § 83.133, the table following paragraph (a) is amended to read as follows:

§ 83.133 Authorized bandwidth.

(a) Unless otherwise specified in the station license, ship stations shall use bandwidths not exceeding those set forth in this paragraph for the respective classes of emission authorized in § 83.132.

Classes of emission	Emission designator	Authorized bandwidth (kilohertz)
A1	0.16A1	0.4
A2	2.66A2	2.8
A3	6A3	8.0
A9	3.2A9	25.0 [2]
F1	0.3F1 [1]	0.5 [1]
F3	16F3 [3]	20.0 [2]
F3	36F3 [3]	40.0 [2]
F9	20000F9	20000
P0	Variable	Variable
A3A	2.8A3A	3.0 [4]
A3H	2.8A3H	3.0 [4]
A3J	2.8A3J	3.0 [4]
A3B	5.6A3B	7.0 [4]

[1] • • •
[2] • • •
[3] • • •
[4] • • •
[5] • • •

• • • • • •

3. In § 83.134, paragraph (d) is amended to read as follows:

§ 83.134 Transmitter Power.

• • • • •

(d) Other than for the frequencies specified in § 83.360 and as may be specified in the specific limitations in § 83.351, transmitter power for telephony on frequencies below 27.5 MHz shall not exceed the following values in watts:

Area	Frequency band (megahertz)	Class of emission	Transmitter power
Great Lakes area and Mississippi River north of Baton Rouge, La., and connecting inland waters.	2 to 27.5	Any	150
Other than the above	2 to 4	Ship to shore:	
		A3	[1] [2] 400
		A3H, A3A, A3J	[1] [3] 150
		Ship to ship:	
		A3	150
		A3H, A3A, A3J	150
	4 to 27.5	Any	[4] 1,500

[1] Except for distress, urgency and safety purposes the maximum power which may be used on 2170.5, 2182, and 2191 kHz is 150 W.
[2] Except for the limitation specified in footnote 1 to this table, for cargo vessels of 300 gross tons and over this value is 500 W.
[3] Except for the limitation specified in footnote 1 to this table, passenger vessels of 5,000 gross tons and over this value is 1,000 W.
[4] For passenger vessels of 5,000 gross tons and over this value is 3,000 W.

• • • • • • •

4. In § 83.143, paragraph (c) is amended and new paragraphs (d), (e) and (f) are added to read as follows:

§ 83.143 Narrow-band direct-printing radiotelegraph equipment.

• • • • • •

(c) (1) Class F1 emission shall be used, with a total frequency shift of 170 Hertz.

(2) When frequency shift keying is effected by applying audio signals to the input of a single-sideband transmitter, the suppressed (residual) carrier, when it falls outside the authorized bandwidth, shall be suppressed to the level prescribed by § 83.136. Further, the center audio frequency between the ±85 Hz tones shall be 1700 Hz, ±5 Hz, above the suppressed (residual) carrier.

(d) The higher of the emitted frequencies shall correspond to "space" (start), and the lower of the emitted frequencies shall correspond to "mark" (stop).

(e) Where an error control system is employed the apparatus shall be provided with a simple device to by-pass the error control system to permit transmission and reception over the radio path of uncorrected signals conforming with (a), above.

(f) When an error-detecting and correcting system is used for direct-printing telegraphy in the maritime mobile service, a 7-unit ARQ system or a 7-unit forward acting error-correcting and indicating time diversity system, using the same code, shall be employed.

5. In § 83.155, paragraphs (d) and (e) are amended to read as follows:

§ 83.155 Operator(s) required by Title III of Communications Act of 1934.

• • • • • •

(d) Each cargo ship of the United States which in accordance with Part II of Title III of the Communications Act is equipped with a radiotelephone station shall for safety purposes carry at least one qualified operator. Where the power of the station does not exceed 250 watts carrier power or 1,500 watts peak envelope power, such operator shall hold a radiotelephone third-class operator permit or higher class of operator authorization. Where the power of the station exceeds 250 watts carrier power or 1,500 watts peak envelope power, such operator shall, as a minimum, hold a radiotelephone second-class operator license.

(e) Each vessel of the United States transporting more than six passengers for hire, which in accordance with Part III of Title III of the Communications Act is equipped with a radiotelephone installation, shall for safety purposes carry at least one qualified operator. Where the power of the station does not exceed 250 watts carrier power or 1,500 watts peak envelope power, such operator shall hold a radiotelephone third-class operator permit or higher class of operator authorization. Where the power of the station exceeds 250 watts carrier power or 1,500 watts peak envelope power, such operator shall, as a minimum, hold a radiotelephone second-class operator license.

6. In § 83.156, paragraph (b) is amended to read as follows:

§ 83.156 Operator(s) required by the Safety Convention.

• • • • • •

(b) Each cargo ship of the United States which is not subject to Part II of Title III of the Communications Act but which in accordance with the radio provisions of the Safety Convention is equipped with a radiotelephone station, shall for safety purposes carry at least one qualified operator. Where the power of the station does not exceed 250 watts carrier power or 1,500 watts peak envelope power such operator shall hold a radiotelephone third-class operator permit or higher class of operator authorization. Where the power of the station exceeds 250 watts carrier power or 1,500 watts peak envelope power such operator shall, as a minimum, hold a radiotelephone second-class operator license.

7. Section 83.159 is amended to read as follows:

§ 83.159 Operator requirements for non-compulsory stations.

Description of station	Minimum operator authorization
Public ship telegraph, except direct-printing, all categories	T–2
Public ship direct-printing telegraph	P–3
Public or limited ship telephone, more than 250 watts carrier power or 1,500 watts peak envelope power	P–2
Public or limited ship telephone, not more than 250 watts carrier power or 1,500 watts peak envelope power	P–3
Public or limited ship telephone, not more than 100 watts carrier power or 400 watts peak envelope power	RP

[1] With ship radar endorsement or T–2, with ship radar endorsement.

8. The present section heading and text of § 83.315 is redesignated § 83.332 and a new § 83.315 is adopted to read as follows:

§ 83.315 Authorized frequencies.

(a) The tables in §§ 83.316, 83.317, 83.318, 83.319, 83.320 and 83.321 set forth the carrier frequencies, which, when authorized by a station license may be used by ship stations employing A1 Morse or narrow-band direct-printing radiotelegraphy for communication with ship or coast stations.

(b) Frequencies available for assignment for manual Morse radiotelegraphy in the bands between 90 kHz and 27.5 MHz are designated in the respective sections, as follows:

(1) In § 83.316, ship calling and working frequencies, 90–160 and 405–535 kHz.

(2) In § 83.317, Calling frequencies, A1 Morse radiotelegraphy (C1–C18)

(3) In § 83.318, Digital selective calling frequencies.

(4) In § 83.319, Working frequencies, A1 Morse radiotelegraphy. (W1–W62)

(5) In § 83.320, Working frequencies, Narrow-band direct-printing telegraph and data transmission systems, paired. (R1–R69)

(6) In § 83.321, Working frequencies, Narrow-band direct-printing telegraph and data transmission systems, non-paired. (P1–P28)

(c) Frequencies in the bands between 2 and 27.5 MHz assigned in accordance with this section to a station or a particular vessel will be retained on the license of that station, should the station be relicensed at a later date to a different licensee.

(d) The ship station licensee shall assure that each radiotelegraph ship station authorized to employ frequencies set forth in §§ 83.317 and 83.319 shall be fitted for operation on each of those frequencies which are necessary to provide satisfactory communication over the sea routes traversed, including:

(1) Calling channel series No. 5;

(2) Calling channel series No. 6;

(3) Group calling channel(s) necessary for communication with each national and international public coast radiotelegraph station with which service is needed;

(4) The two A1 Morse working channels designated by the Commission for use by each vessel;

(5) Each group calling channel(s) necessary for communication with each Government coast station with which service is needed;

(6) Other A1 Morse working channels required for working with other ship stations and with public radiotelegraph stations with which service is needed;

(7) Other A1 Morse working channels required for working with Government coast and ship stations; and

(8) Frequencies as necessary to fulfill the safety objectives of Resolution A.283 of the Intergovernmental Maritime Consultative Organization (IMCO).

(e) The ship station licensee shall assure that each radiotelegraph ship station authorized to employ frequencies set forth in §§ 83.318, 83.320, and 83.321 shall be fitted for operation on each of those frequencies which are necessary to provide satisfactory communication over the sea routes traversed, including;

(1) Each of the narrow-band direct-printing (NB–DP) ship station frequencies which are paired with the NB–DP frequencies employed at national or international public coast radiotelegraph stations with which service is needed;

(2) Each of the NB–DP ship station frequencies which are paired with the NB–DP frequencies employed at Government coast stations with which service is needed;

(3) Each of the NB–DP ship station frequencies needed for communication with other ship stations, both Government and non-Government; and

(4) All of the digital selective calling ship station frequencies required to provide full participation with other stations of the maritime mobile service.

9. The present section heading and text of § 83.317 is redesignated § 83.333 and a new § 83.317 is adopted to read as follows:

§ 83.317 Calling frequencies—A1 Morse radiotelegraphy.

(a) Ship radiotelegraph calling frequencies in the bands between 2 and 27.5 MHz are set forth in the seven tables of this section. All of these frequencies are available to all properly authorized ship stations. In paragraphs (c) through (f) of this section the calling frequencies are arranged by Channel Series numbers. The Channel Series which is routinely guarded by coast radiotelegraph stations at United States locations is marked by appropriate footnote. The specific frequencies of the Channel Series which are guarded at a coast station will vary subject to normal propagation conditions. For vessels operating internationally, the calling frequencies which are routinely guarded at coast stations at other than United States locations can be determined by reference to the ITU publication entitled "List of Coast Stations". The world-wide plan for the distribution and use of calling frequencies appears in Appendix 15C and Resolution No. MAR 2–5 to the current edition of the ITU Radio Regulations.

(b) Each ship station licensee authorized to employ A1 More radiotelegraphy on frequencies in the maritime mobile service bands between 4 and 27.5 MHz shall provide capability to operate on the required calling frequencies from among the following:

Channel series	Band 4 MHz	6 MHz	8 MHz	12 MHz	16 MHz	22 MHz	25 MHz
1	4180.2	6270.3	8360.4	12540.6	16720.8	22230	25071
2	4180.6	6270.9	8361.2	12541.8	16722.4	22230	25071
3	4181	6271.5	8362	12543	16724	22228	25071
4	4181.4	6272.1	8362.8	12544.2	16725.6	22228	27071
5	4181.8	6272.7	8363.6	12545.4	16727.2	22232	25073
6	4182.2	6273.3	8364.4	12546.6	16728.8	22234	25073
7	4182.6	6273.9	8365.2	12547.8	16730.4	22238	25071
8	4183	6274.5	8366	12549	16732	22238	25071
9	4183.4	6275.1	8366.8	12550.2	16733.6	22236	25071
10	4183.8	6275.7	8367.6	12551.4	16735.2	22236	25071
11	4184.2	6276.3	8368.4	12552.6	16736.8	22242	25075
12	4184.6	6276.9	8369.2	12553.8	16738.4	22242	25075
13	4185	6277.5	8370	12555	16740	22240	25075
14	4185.4	6278.1	8370.8	12556.2	16741.6	22240	25075
15	4185.8	6278.7	8371.6	12557.4	16743.2	22246	25075
16	4186.2	6279.3	8372.4	12558.6	16744.8	22246	25075
17	4186.6	6279.9	8373.2	12559.8	16746.4	22244	25075
18	4187	6280.5	8374	12561	16748	22244	25075

(c) World-wide common channels:

Channel Series 5 (C5): 4181.8, 6272.7, 8363.6, 12545.4, 16727.2, 22232.0, 25073.0 kHz.[1]

Channel Series 6 (C6): 4182.2, 6273.3, 8364.4, 12546.6, 16728.8, 22234.0, 25073.0 kHz.[1]

[1] Routinely guarded by all coast radiotelegraph stations.

[2] Routinely guarded by all east coast radiotelegraph stations.

(d) East Coast:

C1 kHz	C2 kHz	C3 kHz [2]	C4 kHz
4180.2	4180.6	4181.0	4181.4
6270.3	6270.9	6271.5	6272.1
8360.4	8361.2	8362.0	8362.8

22244.0	22244.0	22244.0	22244.0
22246.0	22246.0	----------	22246.0
25075.0	25075.0	25075.0	25075.0

[4] Routinely guarded.

(h) The frequencies set forth in this paragraph are available for use by any ship station authorized to employ A1 Morse radiotelegraphy. The conditions of use are set forth in Section 83.323 (b) and (c).

Kilohertz	Kilohertz	Kilohertz	Kilohertz
2089.75		2090.50	2091.75
2090	2091.25	2090.75	2092
2090.25	2091.50	2091	2092.25

(i) Initial calls by ship stations shall be made on the appropriate frequencies of Channel Series 3, 9, 13, or 17. Routinely, calls shall not be made on Channel Series 5 or 6 until after calls on the appropriate frequencies of Channel Series 3, 9, 13, or 17 have been unsuccessful.

10. The present section heading and text of § 83.318 are deleted and a new § 83.318 is added to read as follows:

§ 83.318 Digital selective calling frequencies.

(a) The frequencies set forth in the table below are available for use effective June 1, 1977, by ship stations for calls to coast radiotelegraph stations by means of digital selective calling. The associated reply frequencies are also shown.

Ship station transmit to coast (kHz):	Ship station receive from coast (kHz)
4187.6	4357
6281.4	6506
8375.2	8718.5
12562.3	13100
12562.8	13100.5
16749.9	17232
16750.4	17232.5
22248	22595
22248.5	22595.5

(b) When the frequencies specified in paragraph (a) of this section are used for calling by narrow-band direct-printing, the procedures set forth in § 83.329 shall be applicable.

11. The present section heading and text of § 83.319 are deleted and a new § 83.319 is adopted to read as follows:

§ 83.319 Working frequencies—A1 Morse radiotelegraphy.

(a) Ship radiotelegraph working frequencies are set forth in Tables (d)(1) through (d)(6) of this section. The first line in each Series Nos. 1–53, inclusive, indicates the harmonically related assignable carrier frequencies in the 4, 6, 8, 12, and 16 MHz bands. The other frequencies listed in Series Nos. W1–W53 opposite (a), (b) and (c); all 22 and 25 MHz frequencies; and the frequencies indicated in Series Nos. W54–W62, inclusive, are not necessarily harmonically related.

(b) Two Series Nos. of working frequencies, for example W1 and W31, are assigned to each radiotelegraph ship station. Frequencies from the two Series Nos. assigned to each radiotelegraph ship station should be used for normal working. Other Series Nos., and frequencies therefrom, may be used by a ship station when the frequencies of the two assigned Series Nos. are not adequate.

(c) The transition by ship stations from the A1 Morse radiotelegraph working frequencies set forth in § 83.333 (H1 through H11) and § 83.335 (L1 through L49) to the working frequences set forth in this section (W1 through W62) shall be effected in an orderly manner and shall be completed on or before May 31, 1977. During the interim period prior to June 1, 1977, both the old frequencies (§§ 83.333 and 83.335) and the new frequencies (§ 83.319) are available for use by ship stations. Effective June 1, 1977, §§ 83.333 and 83.335 are deleted.

12. The present section heading and text of § 83.320 are deleted and a new § 83.320 is adopted to read as follows:

§ 83.320 Working frequencies—narrow-band direct-printing telegraph and data transmission systems—paired.

(a) Ship radiotelegraph working frequencies—narrow-band direct-printing telegraph and data transmission systems—paired with coast station frequencies, for use in the bands between 4 and 23 MHz are set forth in paragraph (d), below. The use of these frequencies is subject to the applicable provisions of Subpart E of this Part and to §§ 83.329 and 83.330.

(b) The transition by ship stations from the narrow-band direct-printing working frequencies set forth in § 83.336 (N1 through N10) to the NB–DP working frequencies set forth in this section (R1 through R69) shall be effected in an orderly manner and shall commence June 1, 1977 and be completed on or before June 30, 1977. During the interim period prior to July 1, 1977, the old frequencies set forth in § 83.336 will be available until July 1, 1977, and the new frequencies set forth in this section will be available commencing June 1, 1977. Effective July 1, 1977, § 83.336 is deleted.

(c) The frequencies set forth in paragraph (d), below, are available for use by radiotelegraph ship stations authorized to employ narrow-band direct-printing. The ship station shall transmit to a coast station on the frequencies which are paired with the Series No. used by the coast station for transmission.

(d) The frequencies set forth in the following table are available for communication by radioteleprinter with coast stations when used in accordance with the technical criteria set forth in § 83.143 and other sections of Subpart E of this part.

13. The present Section heading and text of § 83.321 are deleted and a new § 83.321 is adopted to read as follows:

§ 83.321 Working frequencies—narrow-band direct-printing telegraph and data transmission systems—non-paired.

(a) Ship radiotelegraph working frequencies—narrow-band direct-printing telegraph and data transmission systems—non-paired with coast station frequencies, for use in the bands between 4 and 25.5 MHz are set forth in paragraph (b), below. The frequencies are available for use by radiotelegraph ship stations authorized to employ narrow-band direct-printing and are subject to the applicable provisions of Subpart E of this Part and to §§ 83.329 and 83.330.

(b)

	Narrow-band Direct-printing—Nonpaired						
	4 MHz	6 MHz	8 MHz	12 MHz	16 MHz	22 MHz	25 MHz

(c) The frequencies set forth in paragraph (b) of this section are available for use by ship stations effective July 16, 1977.

14. In § 83.324, paragraph (d) is deleted and designated "reserved"; and paragraph (e) is amended to read as follows:

§ 83.324 Frequencies for working.

* * * * *

(d) [Reserved]

(e) Working frequencies in the band 2 to 27.5 MHz are listed in § 83.319. Frequencies in the band 2065–2107 kHz are not available for assignment to aircraft.

* * * * *

15. The present section heading and text of § 83.328 are deleted and a new § 83.328 is adopted to read as follows:

§ 83.328 A1 Morse radiotelegraph operating procedure.

(a) Except for the transmission of distress or urgency signals, all transmission from stations on board ship must cease within the band 485–515 kHz during each 500 kilohertz silence period, i.e., for three minutes twice an hour beginning at x h. 15 and x h. 45, Greenwich mean time.

(b) In order to facilitate radiotelegraph communication in the maritime mobile service, all ship stations transmitting by means of telegraphy shall, whenever practicable, use the service abbreviations ("Q" signals) listed in Appendix 13A to the ITU Radio Regulations.

(c) Before transmitting a ship station shall take precautions to ensure that its emissions will not interfere with transmissions already in progress; if such interference is likely, the station shall await an appropriate break in the communications in progress. This requirement does not apply to stations where unattended operation is possible through automatic means on frequencies dedicated to narrow-band direct-printing.

(d) In order to reduce interference, ship stations shall, within the means at their disposal, endeavour to select for calling the band with the most favorable propagational characteristics for effecting reliable communication. In the absence of more precise data, a ship station shall, before making a call, listen for the signals of the station with which it desires to communicate. The strength and intelligibility of such signals are useful as a guide to propagational conditions and indicate which is the preferable band for calling.

(e) Method of calling. The call consists of: (1) The call sign of the station called, not more than twice; the word "DE"; the call sign of the calling station, not more than twice; if useful, the frequency on which the called station should reply; and the letter "k".

(2) When the calling station has more than one radiotelegram to transmit to the station called, the service abbreviation followed by the figure giving the number of such telegrams (i.e., "QTC2"), should precede the letter "k".

line feed; "DIRTLX"; telex destination

(3) For normal calling, the call may be transmitted twice at an interval of not less than one minute; thereafter it shall not be repeated until after an interval of three minutes.

(4) A ship station calling a coast station in any of the frequency bands allocated to the maritime mobile service between 4 and 27.5 MHz shall use one of the frequencies set forth in § 83.317.

(f) Method of reply. The reply to calls consists of: The call sign of the calling station, not more than twice; the word "DE"; and the call sign of the station called, once only.

(g) In addition to compliance with all applicable sections of this part, the operation of ship stations using radiotelegraphy shall comply with the applicable provisions of Article 39 of the ITU Radio Regulations.

16. The present section heading and text of § 83.329 are deleted and a new § 83.329 is adopted to read as follows:

§ 83.329 Calling by Narrow-band direct-printing.

(a) Until such time as a digital selective calling system and associated procedures have been agreed upon and adopted into the ITU Radio Regulations, ship stations employing narrow-band direct-printing (NB–DP) may, effective June 1, 1977, use the frequencies designated in § 83.318 to call United States coast radiotelegraph stations.

(b) Where it is known that the coast station maintains a watch on other frequencies for ship station calls by NB–DP, the ship station should make its initial NB–DP call on those frequencies.

(c) Calls to a coast station or other ship station shall employ the following format: Coast station identification number, repeated twice; "DE", sent once; and ship station selective call number, repeated twice.

(d) When the coast station does not reply to a call sent three times at intervals of two minutes, the calling shall cease and shall not be renewed until after an interval of fifteen minutes.

17. The present section heading and text of § 83.330 is redesignated § 83.340 and a new § 83.330 is adopted to read as follows:

§ 83.330 Narrow-band direct-printing operating procedure.

(a) The procedures set forth in this section shall be used, except in cases of distress, urgency or safety, when communicating by means of narrow-band direct-printing (NB–DP) radiotelegraphy with a coast radiotelegraph station or with other ship stations. In that regard:

(1) Traffic may be exchanged with or without the use of error-correcting equipment.

(2) For communication between two stations, the ARQ mode should be used when available.

(3) For transmissions from one coast station or ship station to two or more other stations, the forward-error-correcting mode should be used when available.

(4) Information regarding the services provided by each station open to public correspondence is indicated in the I.T.U. List of Coast Stations and in the List of Ship Stations, together with information on charging.

(b) Calls to coast stations shall normally be made by radioteleprinter on the NB–DP frequencies on which the coast station maintains a watch.

(1) The transmit frequencies and frequencies on which coast stations maintain a watch are indicated in the List of Coast Stations.

(2) When using (paired) frequencies set forth in § 83.320, the ship station shall employ the ship station frequencies paired with the frequencies in use by the coast station, that is, when the coast station employs, for example, Series No. 1, the ship station shall also employ Series No. 1. Cross-band operation between a coast station on, for example, Series No. 1 and a ship station on, for example, Series No. 14 is prohibited.

(3) When using (non-paired) frequencies set forth in § 83.321, the coast station will transmit on one of the frequencies set forth in § 81.206.

Special arrangements may be made between ship stations, or shipping companies, and coast stations for the use of specific frequencies.

(c) As an exception to the procedure specified in paragraph (b), above, under other than normal circumstances, ship stations may call coast stations on A1 Morse radiotelegraphy calling frequencies, shift to A1 Morse radiotelegraphy working frequencies, and complete arrangements for setting up a NB–DP circuit.

(1) The routine use of A1 Morse radiotelegraph frequencies for the setting up of a NB–DP circuit with United States coast stations is not authorized: *Provided, however,* That A1 Morse radiotelegraph frequencies may be used by a ship station to set up a NB–DP circuit when efforts to establish the circuit on NB–DP frequencies has proven unsuccessful.

(d) In calling the coast station by NB–DP, the ship station shall use the coast station indentification number (4 digits) and effect self-identification by the use of the ship station selective call number (5 digits).

(e) When both terminals of the NB–DP circuit are satisfied that the circuit is in operable condition, the ship station shall indicate by the following procedure, prior to transmission of the message preamble, which of two modes are to be used in the exchange of traffic:

(1) Conversational mode, where the stations concerned are connected directly either automatically or under manual control; or

(2) Store-and-forward mode, where traffic is stored at the coast station until the circuit to the called station can be set up, either automatically or under manual control.

(3) When the conversational mode is selected, this shall be supplied to the receiving station by transmission of the following: One carriage return and one code (2 or 3 numbers). (See CCITT, Geneva 1972, Annex to Recommendation F69); the land subscribers telex number; and "+", indicating end of sequence.

(4) When the store-and-forward mode is selected, this shall be supplied to the receiving station by transmission of the following: One carriage return and one line feed; "TLX"; telex destination code (2 or 3 numbers). (See CCITT, Geneva 1972, Annex to Resolution F69); the land subscribers telex number; and "+", indicating end of sequence.

(f) Following completion of the procedure set forth in subparagraphs (e)(3) or (e)(4), above, the message preamble shall be transmitted as follows: Serial number or number of the message; the name of the office of origin; the number of words; the date of handing in of the message; the time of handing in of the message; and any service instructions. (See CCITT, Geneva 1972, section 6 of the General provisions applying to all methods of working.)

(g) Upon completion of transmission of the preamble, the address, text, and signature shall be transmitted as received from the sender.

(h) Upon completion of transmission of the signature, the transmitting station shall, following the signal "COL," routinely repeat all service indications in the address and for figures or mixed groups of letters, figures, or signs in the address, text or signature.

(i) In telegrams of more than 50 words, routine repetition shall be given at the end of each page.

(j) The provisions of paragraphs (f) through (i) of this section may or not, at the discretion of the user, be utilized when a direct connection between ship station and addressee is employed.

APPENDIX 2

Effective July 18, 1977, the following type transmitters are not available for use for radiotelegraphy aboard a ship station:

(1) As a transmitter to be installed initially aboard a new ship; or

(2) As a transmitter to be installed to replace an existing transmitter.

Manufacturer	Basic type No.	Remarks
TT Mackay Marine Division, Mackay Radio & Telegraph Co.	156 167 2003 2006 2013	(1)
RCA Corp	ET-8019 ET-8023 ET-8029 ET-8052 ET-8063 ET-8065	(1)
Radiomarine Corp	ET-8065 CRM-T1A-1000 CRM-T1B-1000 CRM-T1C-1000	(1)

[1] A number of grants have been made for type acceptance of modifications of the basic transmitter. Each modification granted retained the basic identification number (for example 2013), but added suffix letters, or a combination of letters and numbers (for example, 2013AAP 2013A P1, 3013BP, 2013BP1, etc.). Withdrawal of authority, under the conditions specified above, is applicable to all transmitters the identification of which includes the basic type number listed. Such transmitters which were licensed and in use aboard ship prior to July 18, 1977 may continue to be used when modified to meet the frequency tolerance specified in sec. 83.131 and operate on the frequencies below 22,720 kHz as set forth in secs. 83.317 and 83.319.

PART III

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

■

ANIMAL WELFARE

Definition of Terms and Regulations

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—ANIMAL WELFARE

PART 1—DEFINITION OF TERMS

PART 2—REGULATIONS

Health Certification, C.O.D., Minimum Age, Recordkeeping, Annual Reports Required of Research Facilities, and Certain Other Governmental Instrumentalities, and Other Requirements for Certain Animals

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The Animal and Plant Health Inspection Service (APHIS) is amending the regulations under the Animal Welfare Act concerning health certification, minimum age, and C.O.D. shipments of certain animals transported in commerce. APHIS is also amending the regulations under the Animal Welfare Act concerning recordkeeping requirements, annual reports required of certain facilities, departments, agencies and instrumentalities which use animals in research, and the definitions contained in the regulations. Such amendments to the regulations are authorized by the Animal Welfare Act or required by the Animal Welfare Act Amendments of 1976, to assure the humane care, treatment and transportation of certain animals.

EFFECTIVE DATE: September 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. Dale F. Schwindaman, Senior Staff Veterinarian, Animal Care Staff, Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. (301–436–8271).

SUPPLEMENTARY INFORMATION: On March 15, 1977, APHIS published proposed new and revised regulations under the Animal Welfare Act (42 FR 14126). This rule amends Parts 1 and 2 of Subchapter A, Chapter 1, Title 9, Code of Federal Regulations to (1) require persons required to be licensed or registered under the Act and Federal, State and local governmental agencies or instrumentalities to provide a health certificate by a licensed veterinarian for live dogs, cats, or nonhuman primates presented to any carrier or intermediate handler for transportation in commerce, (2) require a minimum age of eight (8) weeks be established for dogs and cats presented by any person to any carrier or intermediate handler for transportation, in commerce, except to registered research facilities, (3) require all C.O.D. type arrangements for shipping animals in commerce by any intermediate handler or carrier to be prohibited unless, the consignor guarantees in writing, payment of all transportation costs, including any return transportation and any other incidental or out-of-pocket expense for any animals shipped in commerce by any intermediate handler or carrier, (4) change recordkeeping requirements for dealers, exhibitors, research facilities, and operators of auction sales to allow the flexibility of using their systems of recordkeeping, (5) to change and clarify the annual reporting requirements for research facilities and certain governmental instrumentalities and the responsibilities of the institutional committee and attending veterinarian, (6) amend definitions in the regulations to conform with the Animal Welfare Act Amedments of 1976, (7) add certain new definitions, and (8) rearrange the definitions in an appropriate order of associated subjects.

A total of 59 comments were received within the comment period in response to the proposed changes. Many of the comments received raised questions or made suggestions which because of their validity, warranted a number of changes from the proposed regulations.

DISCUSSION OF COMMENTS

HEALTH CERTIFICATES

APHIS proposed health certification for certain live dogs, cats, and nonhuman primates which are delivered to an intermediate handler or carrier for transportation in commerce by any dealer, research facility, exhibitor, operator of an auction sale or any department, agency, or instrumentality of the United States or any State or local government. Several comments were received as to why all persons were not required to provide a health certificate for live dogs, cats, and nonhuman primates presented for transportation in commerce. Section 10 of the Animal Welfare Act Amendments of 1976 (Pub. L. 94–279) which added dealers, inter alia, a new subsection (b) to section 13 of the Act (7 U.S.C. 2143) only requires dealers, research facilities, exhibitors, operators of auction sales and departments, agencies or instrumentalities of the United States or of any State or local governments to provide health certificates issued by a licensed veterinarian. The certificate must be provided by such parties with the delivery of any live dog, cat, or additional kinds or classes of animals designated by the Secretary, to any intermediate handler or carrier for transportation in commerce. Such section gives the Secretary authority to name additional kinds and classes of animals which require health certification, but no authority to require such health certification from other than those persons named.

APHIS proposed a form for the required health certification and identified such form as the USDA Individual Health Certificate and Identification Form (VS Form 18–1). A majority of the comments received criticized the proposed VS Form 18–1 because it was limited to the health certification of only one animal at a time and would create additional costs for shipment of certain animals by carriers or intermediate handlers. This inflationary cost was attributed to the additional time required of a licensed veterinarian to complete and execute a health certification form for each animal presented to a carrier or intermediate handler for transportation in commerce. Carriers also complained that such an individual health certificate would increase the quantity of paperwork processed and filed and would create additional labor and overhead costs.

APHIS believes it important to offer forms which may be used at a minimal cost for health certification as well as for identification of animals and recordkeeping by persons subject to the Act. Therefore, APHIS will offer two new forms for the required health certification which may also be used for recordkeeping purposes. The forms are the USDA Individual Health Certificate and Identification Form (VS Form 18–1) and the USDA Multianimal Health Certificate and Identification Form (VS Form 18–2).

C.O.D.

APHIS proposed that no C.O.D. type arrangement be used in the transportation of animals by intermediate handlers or carriers in commerce unless the consignor guarantees, in writing, the payment of all transportation costs, including any return transportation and any other incidental or out-of-pocket expenses involved for the care, feeding and storage or housing of the animal if the consignee fails to accept delivery of the shipment within 48 hours of notification of the arrival of the animal. It was further proposed that the intermediate handler or carrier must return to the consignor, or to his designee, any C.O.D. animal shipment not claimed within 48 hours after notice to the consignee of the animal's arrival at destination.

Several comments were received which viewed the 48 hours claim period for C.O.D. shipments of animals as excessive. However, the provisions of the Animal Welfare Act Amendments of 1976 (Pub. L. 94–279) concerning C.O.D. shipments specifically provide for a period of 48 hours after notice to the consignee of the arrival of an animal, for the consignee to claim the animal. APHIS therefore, cannot provide for less than a 48 hour claim period.

A maximum period of 24 hours was proposed for consignee notification of C.O.D. animal shipments. It was also proposed that the intermediate handler or carrier at destination be required to attempt to notify the consignee of a C.O.D. animal shipment at least every 6 hours after their arrival at destination for a maximum period of 24 hours. Thereafter, if the consignee cannot be located, the animal or animals involved would be required to be returned to the consignor or such other person designated by the consignor.

Comments received have indicated some confusion as to the meaning of the term "at destination", used in connection with C.O.D. live animal shipments as it relates to the carrier or intermediate handler initiating the consignee notification procedure. To clarify this problem, the phrase "at the animal holding area of the terminal cargo facility" has been substituted for the phrase "at destination" in § 2.80(b) of the regulations. This change clarifies the point in time at which the 24-hour notification period of the consignee shall begin following the arrival of C.O.D. animal shipments.

One commenter also suggested that a record of attempted consignee notifications relative to C.O.D. live animal shipments be required. The language of the proposed regulations does not clearly reflect the intent of APHIS with respect to this matter. However, it is the intent that such records of notification and attempts to notify consignees be made and kept. Without such information, it would be virtually impossible to establish whether or not compliance with the provision has occurred. Therefore, the regulations are amended specifically to require records of attempted notifications of and the final notification to consignees of C.O.D. shipments of animals.

Furthermore, comments regarding § 280(b) of the proposed regulations, indicate a need to clarify the phrase, "form accompanying the C.O.D. shipment." Therefore, the words "shipping document" are being substituted for the word "form." The term "shipping document," which is the airbill, waybill, or other similar document, specifically designates the form on which the time, date, method, and identity of the person attempting notification and the final notification, if accomplished, to the consignee shall be recorded. Such information shall also appear on the copy of the shipping document retained by the carrier or intermediate handler at destination.

Several comments were received which expressed a desire for more immediate initiation of notification to the consignee of the arrival of C.O.D. live animal shipments so as to expedite pickup of the animal. They argued that such a procedure would minimize lengthy storage of such animals at destination. APHIS recognizes the validity of these comments; however, the regulations in indicating that the carrier or intermediate handler shall attempt to notify the consignee at least once every 6 hours does allow immediate notification to occur. Available information indicates that carriers and intermediate handlers, in a very competitive effort to provide the best service available to the customer, notify the consignee of live animal shipments as soon as possible, usually in far less than 6 hours. In the absence of information which would indicate that past notification practices of the carriers and intermediate handlers has been cause for animal suffering, the APHIS finds no basis to change the notification requirements for C.O.D. shipments.

RECORDKEEPING

The Amendments to the Act deleted the requirements that records be maintained on forms supplied by the Secretary, and the proposed regulations require that records for dealers, exhibitors, research facilities and operators of auction sales be kept by one of three alternative methods: The first would be to utilize records created and used by such dealer, exhibitor, research facility, or operator of an auction sale unless they do not contain the information required by the regulations; the second would allow any such person who handles dogs and cats to continue using current forms which are supplied by the Secretary; and the third would provide for the use of new forms which are also being developed for health certification.

It was proposed that specific information, similar to that required on VS Form 18–5 and 18–6, revised, for dogs and cats, and similar to that required on VS Forms 18–19 and 18–20 for animals other than dogs and cats, must be maintained by dealers, exhibitors, research facilities, and operators of auction sales. One comment was received indicating confusion about requisite information relative to birth dates of dogs and cats, as required in proposed §§ 2.75(a)(1)(ii) and 2.75(a)(1)(iv)(C), as opposed to the approximate age of such animals. It appears that the date of birth of some animals may not be known; in such instances a statement of the approximate age of the animal will be sufficient. Accordingly, reference to the dates of birth in § 2.75(a)(1)(ii) is deleted and the term "if known" is added in § 2.75(a)(1)(iv)(C) to follow the phrase "the date of birth."

An additional comment was received regarding the making, keeping and maintenance of records and information by dealers, exhibitors, and research facilities concerning each dog or cat purchased or otherwise acquired or sold or otherwise disposed of, as related specifically to identifying the method of transportation utilized to transport such dog or cat (reference §§ 2.75(a)(1)(v) and 2.76(b)(c)). Since the expeditious transportation of dogs and cats in commerce may require the use of several different carriers and intermediate handlers, unknown to the shipper at the time of consignment of such animals, commenters argued that the dealer, exhibitor, or research facility should only be required to identify the initial carrier or intermediate handler to whom the shipment was consigned. Comments received also indicate a need to clarify the requirements for identification of privately owned conveyances used by dealers, exhibitors, and research facilities to transport dogs and cats. APHIS recognizes these arguments as sound and will require in §§ 2.75(a)(1)(v) and 2.76(b)(3) that only the initial carrier or intermediate handler to whom a shipment of animals is consigned be named, and that if a privately owned conveyance is used to transport animals, that only the name of the owner of the vehicle need be indicated.

USDA licensees and registrants commented that the required disclosure of the name and address of the person from whom dogs or cats or other animals were purchased or otherwise acquired on the copy of the record which accompanies the shipment of such animal sold or otherwise disposed of by a dealer, exhibitor, or research facility is unlawful disclosure of proprietary information.

Such disclosure reveals the sources of animals to competitors and the purchaser; thus allowing the customer to circumvent the USDA licensee or registrant and deal directly with the source of such animals. The Department has access to a licensee's or registrant's records to obtain such information and agrees that disclosure of the source of dogs and cats or other animals to a purchaser is not necessary to effectuate the purposes of the Act. Sections 2.75(a)(4), 2.75(b)(3), 2.76(d) and 2.77(b) therefore, include a provision which does not require that the source and date of acquisition of dogs, cats, or other animals appear on the copy of a record accompanying shipments of animals.

DISPOSITION OF RECORDS

Comments from dealers and air carriers were critical of the proposed requirement in § 2.81(a) that dealers, research facilities, exhibitors, operators of auction sales, carriers and intermediate handlers be required to keep and maintain records in connection with the requirements of the regulations and standards for a period of 2 years. The criticism is based on the undue burden created by the quantity of records accumulated and the cost involved in maintaining such quantities of accumulated records, e.g. storage equipment and space.

APHIS recognizes the validity of these arguments and also now believes that the need for keeping records in excess of one year for purposes of documenting alleged violation cases has generally proven to be unnecessary. Therefore, the regulations require records, documents or other papers to be maintained and kept for only one year unless the Deputy Administrator notifies in writing, the person subject to the Act that specified records be retained in excess of one year pending completion of an investigation or proceeding under the Act.

MINIMUM AGE REQUIREMENTS

Many comments were received concerning the proposal that any live dog or cat delivered by any person (including private owners) to any carrier or intermediate handler for transportation in commerce shall be at least eight weeks of age and have been weaned for a period of at least five days. There was no disagreement with the meaning requirement of the proposal.

Many commenters urged the Department to increase the minimum age requirement for puppies to ten weeks and in some instances, up to twelve weeks. Some people based such comments on data which purported to show that physical and psychological stress applied to a puppy around eight weeks of age may have long lasting effects on the temperament of the dog. However, scientific data also indicates that a puppy's familiari-

zation with the environment and association with man occurs between five and eight weeks of age and that this conditioning to the normal environment determines the animal's ability to function in its adult environment. No scientific information or data is currently available which shows that the normal stress resulting from the shipment of an eight week old puppy adversely affects its temperament, either as a puppy or an adult dog.

The other comments received urging a higher minimum age requirement for puppies were based upon the opinion of that the population explosion of dogs could be curbed if puppies were not allowed to be transported from the producer to pet shops during the "cute and desirable" age which generally is less than ten to twelve weeks of age. The fact that the problem of overpopulation of dogs may be curbed if puppies were not allowed to be transported to pet ships during their "cute and desirable age" is not within the Secretary's discretion under the Act, and, therefore, such comments cannot be considered in establishing the minimum age requirement.

Some commenters argued that minimum age requirements should be established on the basis of the individual breed of dog's maturity capability, e.g., larger breeds of dogs such as Saint Bernards and others could be transported at an earlier age (six weeks), while small breeds of dogs such as the Chihuahua and others should not be subjected to transportation in commerce before ten weeks of age. However, there is insufficient information and data available upon which to categorize all breeds of dogs in such a scheme and it would not take into consideration unrecognized breeds of dogs, cross breed, and dogs of varied and unknown heredity.

One commenter suggested that certain breeds of dogs can be shipped in commerce at six weeks of age if the expected adult weight will be twenty pounds or more; therefore, no puppies will be shipped under eight weeks of age unless they weigh two and one-half pounds, each. Minimum age requirements which would be based on breed identification, age, and weight would appear to create a very complicated situation requiring the receiving employee of the carrier or intermediate handler accepting dogs for transportation in commerce to be able to recognize breeds, ascertain ages, and compute individual animal weights. The administrative and enforcement problems of such a system, both to the Department and to carriers and intermediate handlers, militate against its adoption.

Available information also indicates that major producers of puppies already observe the eight week minimum age requirement within their industry and that many States have regulations which prohibit dogs and cats less than eight weeks of age from entering their States.

Although there was a divergence of opinions expressed regarding the minimum age requirement for dogs, there was a general consensus of opinion that eight weeks is an acceptable minimum age for transportation of cats by a carrier or intermediate handler.

While APHIS has decided to adopt an eight week minimum age requirement for dogs and cats delivered to any carrier or intermediate handler for transportation in commerce at this time, we will consider amending such minimum age requirements as additional information and data becomes available.

ANNUAL REPORT OF RESEARCH

The proposed regulations would require that each segment of a research facility or department, agency, or instrumentality of the United States using or intending to use live animals in research, testing, or experimentation under an attending veterinarian or institutional committee submit an annual report. One comment was received which indicated that consolidation of individual unit reports by a research facility or department, agency or instrumentality of the United States would provide a single point of contact at which data from widely separated units of the facility could be assembled and consolidated for submission of one annual report.

While this procedure may have its benefits, APHIS has learned from past experience that such benefits are far exceeded by its detriments. Such a consolidated annual report requires certification by an attending veterinarian or institutional committee. No one veterinarian or institutional committee is likely to have the requisite personal knowledge of all of the research, testing or experimentation conducted by each such individual unit of the facility and the care and treatment of the animals used, including whether or not appropriate anesthetics, analgesics, and tranquilizing drugs were used, to make such certification. Therefore, the certification of such a consolidated annual report would have to be done on the assumption that such procedures as required were followed or upon the assurances of others who may or may not have such knowledge or be qualified to make such determinations, that such required procedures were followed. In either case, there would be no way for APHIS to ascertain whether or not there was actual compliance with the Act, regulations, and standards at each individual unit of a facility, nor whether such report actually covered all such individual units of a facility.

Furthermore, requiring the actual attending veterinarian or institutional committee of each individual unit to sign the annual report covering such unit assures that their recommendations as to the appropriate care and treatment required for such animals at each such unit will be followed since the failure to do so will mean that such attending veterinarian or institutional committee cannot certify the annual report for such unit as required.

No other comments were received with respect to any other matter contained in the proposal.

Accordingly, Parts 1 and 2 of Subchapter A, Chapter 1, Title 9, of the Code of Federal Regulations are amended in the following respects:

1. § 1.1 is amended to read as follows:

§ 1.1 Definitions.

For the purpose of this subchapter, the following terms shall be construed, respectively, to mean:

(a) "Act" means the Act of August 24, 1966 (Pub. L. 89–544), commonly known as the Laboratory Animal Welfare Act, as amended by the Act of December 24, 1970 (Pub. L. 91–579), the Animal Welfare Act of 1970, and the Act of April 22, 1976 (Pub. L. 94–279), the Animal Welfare Act Amendments of 1976.

(b) "Department" means the U.S. Department of Agriculture.

(c) "Secretary" means the Secretary of Agriculture of the United States or his representative who shall be an employee of the Department.

(d) "Administrator" means Administrator of the Animal and Plant Health Inspection Service, U.S. Department of Agriculture, or any other official of the Animal and Plant Health Inspection Service to whom authority has heretofore been delegated or to whom authority may hereafter be delegated, to act in his stead.

(e) "Veterinary Services" means the office of the Animal and Plant Health Inspection Service to which is assigned responsibility for the performance of functions under the Act.

(f) "Deputy Administrator" means the Deputy Administrator for Veterinary Services or any other official of Veterinary Services to whom authority has heretofore been delegated or to whom authority may hereafter be delegated, to act in his stead.

(g) "Veterinarian in Charge" means a veterinarian of Veterinary Services who is assigned by the Deputy Administrator to supervise and perform the official work of Veterinary Services in a given State or States. As used in Part 2 of this subchapter, the Veterinarian in Charge shall be deemed to be the one in charge of the official work of Veterinary Services in the State in which the dealer, exhibitor, research facility, intermediate handler, carrier, or operator of an auction sale has his principal place of business.[2]

(h) "Veterinary Services representative" means any inspector or other person employed full time by the Department who is responsible for the performance of the function involved.

(i) "Licensed veterinarian" means a doctor of veterinary medicine who has a valid license to practice veterinary medicine in any State.

(j) "State" means a State of the United States, the District of Columbia, Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, or any other territory or possession of the United States.

[2] The name and address of the Veterinarian in Charge in the State concerned can be obtained by writing to the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Federal Building, Hyattsville, MD 20782.

(k) "Person" means any individual, partnership, firm, joint stock company, corporation, association, trust, estate, or other legal entity.

(l) "Dog" means any live or dead dog (*Canis familiaris*).

(m) "Cat" means any live or dead cat (*Felis catus*).

(n) "Animal" means any live or dead dog, cat, monkey (nonhuman primate mammal), guinea pig, hamster, rabbit, or any other warmblooded animal, which is domesticated or raised in captivity or which normally can be found in the wild state, and is being used, or is intended for use, for research, testing, experimentation, or exhibition purposes, or as a pet. Such term excludes birds, aquatic animals, rats and mice, and horses and other farm animals, such as, but not limited to, livestock or poultry, used or intended for use as food or fiber, or livestock, or poultry used or intended for use for improving animal nutrition, breeding, management, or production efficiency, or for improving the quality of food or fiber. With respect to a dog, the term means all dogs, including those used for hunting, security, or breeding purposes.

(o) "Farm animal" means any warmblooded animal (other than a dog, cat, monkey (nonhuman primate mammal), guinea pig, hamster, or rabbit) normally raised on farms in the United States and used or intended for use as food or fiber.

(p) "Wild state" means living in its original, natural condition; not domesticated.

(q) "Nonhuman primate" means any nonhuman member of the highest order of mammals, including prosimians, monkeys, and apes.

(r) "Commerce" means trade, traffic, transportation, or other commerce—(1) between a place in a State and any place outside of such State, or between points within the same State but through any place outside thereof, or within any territory, possession, or the District of Columbia; or (2) which affects trade, traffic, transportation, or other commerce described in (1).

(s) "Research facility" means any school (except an elementary or secondary school), institution, organization, or person that uses or intends to use live animals in research, tests, or experiments, and that: (1) purchases or transports live animals in commerce, or (2) receive funds under a grant, award, loan, or contract from a department, agency, or instrumentality of the United States for the purpose of carrying out research, tests, or experiments. *Provided, however,* That a "research facility" shall not include any such school, institution, organization, or person that does not use or intend to use live dogs or cats and which is exempted by the Administrator, upon application to him in specific cases and upon his determination that such exemption does not vitiate the purpose of the Act, except that the Administrator will not exempt any school, institution, organization, or person that uses substantial numbers of live animals the principal function of which school, institution, organization, or person is biomedical research or testing.[2]

(t) "Dealer" means any person who, in commerce, for compensation or profit, delivers for transportation, or transports, except as a carrier, buys, or sells, or negotiates the purchase or sale of, (1) any dog or other animal whether alive or dead for research, teaching, exhibition, or use as a pet, or (2) any dog for hunting, security, or breeding purposes, except that this term does not include—

(i) A retail pet store except such store which sells any animals to a research facility, an exhibitor, or a dealer; or

(ii) Any person who does not sell or negotiate the purchase or sale of any wild animal, dog, or cat, and who derives no more than $500 gross income from the sale of other animals during any calendar year.

(u) "Retail pet store" means any retail outlet where animals are sold only as pets at retail. Those species from the wild state (e.g. primates, anteaters, and ocelots) and which as adults in captivity require special conditions to provide safety in handling to either humans or the subject animals shall not be considered as pet animals.

(v) "Operator of an auction sale" means any person who is engaged in operating an auction at which animals are purchased or sold, in commerce.

(w) "Exhibitor" means any person (public or private) exhibiting any animals, which were purchased in commerce or the intended distribution of which affects commerce, or will affect commerce, to the public for compensation, as determined by the Secretary in specific instances, and such term includes carnivals, circuses, animal acts, and zoos exhibiting such animals whether operated for profit or not; but such term excludes retail pet stores, organizations sponsoring and all persons participating in State and county fairs, livestock shows, rodeos, purebred dog and cat shows, and any other fairs or exhibitions intended to advance agricultural arts and sciences, as may be determined by the Secretary in specific instances.

(x) "Licensee" means any person licensed pursuant to the provisions of the Act and the regulations in Part 2 of this subchapter.

(y) "Class 'A' dealer" means a dealer whose business involving animals includes only those animals that he breeds and raises as a closed or stable colony and those animals that he acquires for the sole purpose of maintaining or enhancing his breeding colony.

[2] A list of such exempted schools institutions, organizations, or persons shall be published periodically by Veterinary Services in the FEDERAL REGISTER. Such lists may also be obtained upon request from the Veterinarian in Charge.

(z) "Class 'B' dealer" means any dealer who does not meet the definition of a Class "A" dealer.

(aa) "Class 'C' licensee" means any exhibitor subject to the licensing requirements.

(bb) "Intermediate handler" means any person, including a department, agency, or instrumentality of the United States or of any State or local government (other than a dealer, research facility, exhibitor, or any person excluded from the definition of a dealer, research facility, exhibitor, an operator of an auction sale, or a carrier) who is engaged in any business in which he receives custody of animals in connection with their transportation in commerce.

(cc) "Carrier" means the operator of any airline, railroad, motor carrier, shipping line, or other enterprise which is engaged in the business of transporting any animals for hire.

(dd) "Registrant" means any research facility, carrier, intermediate handler, or exhibitor registered pursuant to the provisions of the Act and the regulations in Part 2 of this subchapter.

(ee) "Attending veterinarian" means a person who has graduated from a veterinary school accredited by the American Veterinary Medical Association's Council on Education or has a certificate issued by the American Veterinary Medical Association's Education Commission for Foreign Veterinary Graduates and who is responsible for evaluating the type and amount of anesthetic, analgesics, and tranquilizing drugs used on animals during actual research, testing, or experimentation where appropriate to relieve all unnecessary pain and distress in the subject animals.

(ff) "Standards" means the requirements with respect to the humane handling, care, treatment, and transportation of animals by dealers, exhibitors, research facilities, carriers, intermediate handlers, and operators of auction sales as set forth in Part 3 of this subchapter.

(gg) "Primary enclosure" means any structure used to immediately restrict an animal or animals to a limited amount of space, such as a room, pen, run, cage, compartment, or hutch.

(hh) "Housing facility" means any room, building, or area used to contain a primary enclosure or enclosures.

(ii) "Sanitize" means to make physically clean and to remove and destroy, to the maximum degree that is practical, agents injurious to health.

(jj) "Ambient temperature" means the temperature surrounding the animal.

(kk) "Euthanasia" means the humane destruction of an animal accomplished by a method which produces instantaneous unconsciousness and immediate death without visible evidence of pain or distress, or a method that utilizes anesthesia produced by an agent which cause painless loss of consciousness, and death following such loss of consciousness.

(ll) "Nonconditioned animals" means animals which have not been subjected to special care and treatment for sufficient time to stabilize and, where neces-

sary, to improve their health to make them more suitable for research purposes.

(mm) "Weaned" means that an animal has become accustomed to take solid food, and has so done, without nursing, for a period of at least five (5) days.

(nn) "Dwarf hamster" means any species of hamster, such as the Chinese and Armenian species, whose adult body size is substantially less than that attained by the Syrian or Golden species of hamsters.

(oo) "Handling" means petting, feeding, manipulation, crating, shifting transferring, immobilizing, restraining, treating, training, working or performing any similar activity with respect to any animal.

(pp) "Business year" means a 12-month period during which business is conducted, either on a calendar or fiscal year basis.

2. The Table of Contents cited in Part 2—Regulations is amended to read as follows:

Sec.
2.1 Application.
2.2 Acknowledgement of standards.
2.3 Demonstration of compliance with standards.
2.4 Issuance of licenses.
2.5 Duration of license.
2.6 Annual fees; and termination of licenses.
2.7 Annual report by licensees.
2.8 Notification of change of name, address, control, or ownership of business.
2.9 Officers, agents, and employees of licensees whose licenses have been suspended or revoked.
2.10 Licensees whose licenses have been suspended or revoked.
2.11 Denial of license.

REGISTRATION

2.25 Requirements and procedures.
2.26 Acknowledgement of standards.
2.27 Notification of change of operation.
2.28 Annual report of research facilities.

IDENTIFICATION OF ANIMALS

2.50 Time and method of identification.
2.51 Form of official tag.
2.52 How to obtain tags.
2.53 Use of tags.
2.54 Lost tags.
2.55 Removal of tag.

RECORDS

2.75 Records, dealers (except operators of auction sales) and exhibitors.
2.76 Records, research facilities.
2.77 Records, operators of auction sales.
2.78 Records, carriers and intermediate handlers.
2.79 Health certification and identification.
2.80 C.O.D. shipments.
2.81 Records, disposition.

COMPLIANCE WITH STANDARDS AND HOLDING PERIOD

2.100 Compliance with standards.
2.101 Holding period.

MISCELLANEOUS

2.125 Information as to business: Furnishing of by dealers, exhibitors, operators of auction sales, and research facilities.
2.126 Access and inspection of records and property.
2.127 Publication of names of persons subject to the provisions of this part.
2.128 Inspection for missing animals.
2.129 Confiscation and destruction of animals.
2.130 Minimum age requirements.

AUTHORITY: The provisions of this Part 2 issued under secs. 3, 5, 6, 10, 11, 12, 13, 14, 16, 17, 21; 80 Stat. 351, 352, 353, 84 Stat. 1561, 1562, 1563, 1564; 90 Stat. 418, 419, 420, 423; 7 U.S.C. 2133, 2135, 2136, 2140, 2141, 2142, 2143, 2144, 2146, 2147, 2151.

3. Throughout Part 2 of the regulations (9 CFR, Part 2) wherever the term "affecting commerce" appears, the term "in commerce" is substituted in lieu thereof.

4. Section 2.25 (9 CFR 2.25) is amended to read as follows:

§ 2.25 Requirements and procedures.

Each research facility, carrier, and intermediate handler and each exhibitor, not required to be licensed under section 3 of the Act and the regulations of this subchapter, shall register with the Secretary by completing and filing a properly executed form which will be furnished, upon request, by the Veterinarian in Charge. Such registration form shall be filed with the Veterinarian in Charge for the State in which the registrant has his principal place of business. Where a school or department of a university or college uses or intends to use animals for research, tests, or experiments, the university or college rather than the school or department will generally be considered the research facility and be required to register with the Secretary. In any situation in which a school or department of a university or college is a separate legal entity and its operations and administration are independent of those of the university or college, upon a proper showing thereof to the Secretary, the school or department will be registered rather than the university or college. A subsidiary of a business corporation, rather than a parent corporation, will be registered as a research facility or exhibitor unless the subsidiary is under such direct control of the parent corporation that to effectuate the purposes of the Act, the Secretary determines that it is necessary that the parent corporation be registered.

5. Section 2.28 (9 CFR 2.28) is amended to read as follows:

§ 2.28 Annual report of research facilities.

(a) The reporting facility shall be that segment of the research facility, or that department, agency, or instrumentality of the United States, that uses or intends to use live animals in research, tests, or experiments and for which an attending veterinarian has responsibility. Each reporting facility shall submit on or before December 1 of each calendar year to the Veterinarian in Charge for the State where the reporting facility is located, an annual report signed by a legally responsible official covering the previous Federal fiscal year of October 1 through September 30. Such report shall show that professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, during actual research, testing, or experimentation, were followed by the research facility, department, agency, or instrumentality of the United States. Such report shall include:

(1) The location of the facility or facilities where animals were used in actual research, testing, or experimentation;

(2) The common names and approximate numbers of animals upon which research, experiments, or tests were conducted involving no pain, distress, or use of pain relieving drugs: *Provided, however,* That routine procedures (e.g., injections, tattooing, and blood sampling) do not need to be reported;

(3) The common names and approximate numbers of animals upon which experiments or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used: *Provided, however,* That routine procedures (e.g., injections, tattooing, and blood sampling) do not need to be reported;

(4) The common names and approximate numbers of animals upon which experiments or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would adversely affect the procedures, results, or interpretation of the research, experiments, or tests and a brief statement explaining the reasons for the same: *Provided, however,* That routine procedures (e.g., injections, tattooing, and blood sampling) do not need to be reported; and

(5) Certification by the attending veterinarian of the research facility, or the department, agency, or instrumentality of the United States having laboratory animal facilities, or by an institutional committee of at least three members, one of whom is a Doctor of Veterinary Medicine, established for the purpose of evaluating the care, treatment, and use of all warmblooded animals held or used for research, testing, or experimentation, that the type and amount of anesthetic, analgesic, and tranquilizing drugs used on animals during actual research, testing, or experimentation was appropriate to relieve pain and distress for the subject animals.

6. In § 2.50(f) subparagraph (3) is amended by deleting the words "a form[2]" and substituting the phrase "or a record, as required by § 2.75," therefor, and deleting footnote 2.

7. In § 2.52 the reference to footnote 3 and footnote 3 is redesignated as footnote 2.

8. § 2.75 (9 CFR 2.75) is amended to read as follows:

§ 2.75 Records, dealers, and exhibitors.

(a) (1) Every dealer and exhibitor shall make, keep, and maintain systems of records or forms which fully and correctly disclose the following information concerning each dog or cat purchased or otherwise acquired, owned, held, or otherwise in his possession or under his control, including any offspring born of such animal while in his possession or under his control, transported, or sold, or otherwise disposed of:

(i) The name and address of the person, whether or not required to be licensed or registered under the Act, from whom such dog or cat was purchased or otherwise acquired, and his license number, if licensed under the Act, and when sold or otherwise disposed of, the person to whom sold or otherwise disposed of, and his license number, if licensed under the Act;

(ii) The dates of acquisition and disposition of such dog or cat;

(iii) The official USDA tag number or tattoo assigned to such dog or cat pursuant to §§ 2.50 and 2.54;

(iv) A description of each dog or cat which shall include:

(A) The species;

(B) The sex;

(C) The date of birth (if known) or approximate age;

(D) The color and any distinctive markings; and

(E) The breed or type.

(v) The method of transportation including the name of the initial commercial carrier or intermediate handler or if a privately owned conveyance is used to transport the dog or cat, the name of the owner of such privately owned conveyance.

(vi) The date and method of disposition of such dog or cat, e.g., sale, death, euthanasia, or donation.

(2) Record of Dogs and Cats on Hand (VS Form 18–5) and Record of Disposition of Dogs and Cats (VS Form 18–6) are forms which may be used by dealers and exhibitors upon which to make, keep, and maintain the information required by paragraph (a)(1) hereof concerning dogs and cats except as provided in § 2.79.

(3) The USDA Individual Health Certificate and Identification Form (VS Form 18–1) and the USDA Multianimal Health Certificate and Identification Form (VS Form 18–2) are forms which may be used by dealers and exhibitors upon which to make, keep, and maintain the information required by paragraph (a)(1) of this section and § 2.79.

(4) One copy of the record containing the information required by paragraph (a)(1) of this section shall accompany each shipment of any dog or cat purchased or otherwise acquired by a dealer or exhibitor. One copy of the record containing the information required by paragraph (a)(1) of this section shall accompany each shipment of any dog or cat sold or otherwise disposed of by a dealer or exhibitor: *Provided, however,* That information which indicates the source and date of acquisition of such dog or cat is not required to appear on the copy of the record accompanying the shipment. One copy of the record containing the information required by

paragraph (a)(1) of this section shall be retained by the dealer or exhibitor.

(b)(1) Every dealer and exhibitor shall make, keep, and maintain systems of records or forms which fully and correctly disclose the following information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, or otherwise in his possession or under his control, including any offspring born of such animals while in his possession or under his control, transported, or sold or otherwise disposed of:

(i) The name and address of the person, whether or not required to be licensed or registered under the Act, from whom such animals other than dogs or cats, were purchased or otherwise acquired, and his license number, if licensed under the Act, and when sold or otherwise disposed of, the person to whom sold or otherwise disposed of, and his license number, if licensed under the Act;

(ii) The species of such animals other than dogs and cats, and

(iii) The number of such animals other than dogs and cats.

(2) Record of Animals on Hand (Other Than Dogs and Cats) (VS Form 18–19) and Record of Acquisition, Disposition, or Transport of Animals (Other Than Dogs and Cats) (VS Form 18–20) are forms which may be used by dealers, and exhibitors upon which to keep and maintain the information required by paragraph (b)(1) hereof concerning animals other than dogs and cats except as provided in § 2.79.

(3) One copy of the record containing the information required by paragraph (b)(1) of this section shall accompany each shipment of any animal other than a dog or cat purchased or otherwise acquired by a dealer or exhibitor. One copy of the record containing the information required by paragraph (b)(1) of this section shall accompany each shipment of any animal other than a dog or cat sold or otherwise disposed of by a dealer or exhibitor: *Provided, however,* That information which indicates the source and date of acquisition of any animal other than a dog or cat is not required to appear on the copy of the record accompanying the shipment. One copy of the record containing the information required by paragraph (b)(1) of this section shall be retained by the dealer or exhibitor.

9. § 2.76 (9 CFR 2.76) is amended to read as follows:

§ 2.76 Records, research facilities.

(a) Every research facility shall make, keep, and maintain systems of records or forms which fully and correctly disclose the following information concerning each live dog or cat purchased or otherwise acquired, owned, held, or otherwise in its possession or under its control, including any offspring born of such live dog or cat while in its possession or under its control:

(1) The name and address of the person, whether or not required to be licensed or registered under the Act, from whom such live dog or cat was purchased or otherwise acquired and his license number, if licensed under the Act;

(2) The date of acquisition of each live dog or cat;

(3) The official USDA tag number or tattoo assigned to each live dog or cat pursuant to §§ 2.50 and 2.54;

(4) A description of each live dog or cat which shall include:

(i) The species;

(ii) The sex;

(iii) Date of birth (if known) or approximate age;

(iv) The color and any distinctive markings; and

(v) The breed or type.

(5) Any identification number or mark assigned to each live dog or cat by such research facility.

(b) In addition to the information required to be kept and maintained by every research facility concerning each live dog or cat, pursuant to paragraph (a) of this section, every research facility transporting, selling, or otherwise disposing of any live dog or cat to another person, shall make, keep, and maintain systems of records or forms which fully and correctly disclose the following information:

(1) The name and address of the receiver to whom such live dog or cat is transported, sold or otherwise disposed of;

(2) The date of such transportation, sale or other disposition, and

(3) The method of transportation including the name of the initial commercial carrier or intermediate handler or if a privately owned conveyance is used to transport the dog or cat, the name of the owner of such privately owned conveyance.

(c) The USDA Individual Health Certificate and Identification Form (VS Form 18–1), the USDA Multianimal Health Certificate and Identification Form (VS 18–2), and Record of Dogs and Cats on Hand (VS Form 18–5) are forms which may be used by research facilities upon which to keep and maintain the information required by paragraph (a) of this section. The USDA Individual Health Certificate and Identification Form (VS Form 1), the USDA Multianimal Health Certificate and Identification Form (VS Form 18–2), and Record of Disposition of Dogs and Cats (VS Form 18–6) are forms which may be used by research facilities upon which to keep and maintain the information required by paragraph (b) of this section.

(d) One copy of the record containing the information required by paragraphs (a) and (b) of this section shall accompany each shipment of any live dog or cat sold, or otherwise disposed of by a research facility: *Provided, however,* That information which indicates the source and date of acquisition of any dog or cat is not required to appear on the copy of the record accompanying the shipment. One copy of the record containing the information required by paragraph (a) and (b) of this section shall be retained by the research facility.

10. Section 2.77 (9 CFR 2.77) is amended to read as follows:

§ 2.77 Records, operators of auction sales.

(a) Every operator of an auction sale shall make, keep, and maintain systems of records or forms which fully and correctly disclose the following information concerning each animal consigned for auction, whether or not a fee or commission is charged:

(1) The name and address of the person who owned or consigned the animal for sale and his USDA license number, if licensed under the Act;

(2) The date of the consignment;

(3) The official USDA tag number or tattoo assigned to the animal pursuant to sections 2.50 and 2.54;

(4) A description of the animal which shall include:

(i) The species of the animal;

(ii) The sex of the animal;

(iii) The color and any distinctive markings on the animal;

(iv) The breed or type of the animals, if a dog or cat.

(5) The auction sales number assigned to the animal;

(6) The name and address of the buyer of the animal and his license number, if licensed under the Act.

(b) One copy of the record containing the information required by paragraph (a) of this section shall be given to the consignor of each animal, one copy of the record shall be given to the purchaser of each animal: *Provided, however*, That information which indicates the source and date of consignment of any animal is not required to appear on the copy of the record given to the purchaser of any animal. One copy of the record containing the information required by paragraph (a) of this section shall be retained by the operator of such auction sale for each animal sold by the auction sale.

11. Section 2.78 is amended to read as follows:

§ 2.78 Records, carriers and intermediate handlers.

(a) In connection with all live animals accepted for shipment on a C.O.D. basis or other arrangement or practice under which the cost of such animal or the cost of the transportation of such animal is to be paid and collected upon delivery of the animal to the consignee, the accepting carrier or intermediate handler, if any, shall keep and maintain a copy of the guarantee in writing of the consignor of such shipment for the payment of transportation charged for any animal not claimed, as provided in § 2.80, including, where necessary, both the return transportation charges and an amount sufficient to reimburse the carrier for out-of-pocket expenses incurred for the care, feeding, and storage of such animal. The carrier or intermediate handler at destination shall also keep and maintain a copy of the shipping document containing the time, date, and method of each attempted notification and the final notification to the consignee and the name of the person notifying the consignee, as provided in § 2.80.

(b) In connection with all live dogs, cats, or nonhuman primates delivered for transportation, in commerce, to any carrier or intermediate handler, by any dealer, research facility, exhibitor, operator of an auction sale, or department, agency, or instrumentality of the United States or of any State or local government, the accepting carrier or intermediate handler shall keep and maintain a copy of the health certification completed as required by § 2.79, tendered with each such live dog, cat, or nonhuman primate.

12. Section 2.79 (9 CFR 2.79) is amended to read as follows:

§ 2.79 Health certification and identification.

(a) No dealer, research facility, exhibitor, operator of an auction sale, or department, agency, or instrumentality of the United States or of any State or local government shall deliver to any intermediate handler or carrier for transportation, in commerce, any dog, cat, or nonhuman primate unless such dog, cat, or nonhuman primate shall be accompanied by a health certificate executed and issued by a licensed veterinarian. Such health certificate shall state that (1) the licensed veterinarian inspected such dog, cat, or nonhuman primate on a specified date which shall not be more than 10 days prior to the delivery of such dog, cat, or nonhuman primate for transportation, in commerce, and (2) when so inspected that such dog, cat, or nonhuman primate appeared to the licensed veterinarian to be free of any infectious disease or physical abnormality which would endanger the animal or animals or other animals or endanger public health.

(b) No intermediate handler or carrier to whom any live dog, cat, or nonhuman primate is delivered for transportation, in commerce, by any dealer, research facility, exhibitor, operator of an auction sale, or department, agency, or instrumentality of the United States or any State or local government shall receive such live dog, cat, or nonhuman primate for transportation, in commerce, unless and until it is accompained by a health certificate issued by a licensed veterinarian pursuant to paragraph (a) of this section.

(c) The USDA Individual Health Certificate and Identification Form (VS Form 18–1) and the USDA Multianimal Health Certificate and Identification Form (VS Form 18–2) are forms which may be used for health certification by a licensed veterinarian as required by this section.

13. A new § 2.80 (9 CFR 2.80) is added to read as follows:

§ 2.80 C.O.D. shipments.

(a) No carrier or intermediate handler shall accept any animal for transportation, in commerce, upon any C.O.D. or other basis where the cost of the animal or the cost for any such transportation or any other incidental or out-of-pocket expense is to be paid and collected upon delivery of such animal to the consignee, unless the consignor guarantees in writing the payment of all transportation, including any return transportation, if such shipment is unclaimed or the consignee cannot be notified in accordance with paragraphs (b) and (c) of this section, including reimbursing the carrier or intermediate handler for all out-of-pocket expenses incurred for the care, feeding, and storage or housing of such animal.

(b) Any carrier or intermediate handler receiving any animal at destination on a C.O.D. or other basis where the cost of the animal or the cost for any transportation or other incidental or out-of-pocket expense is to be paid and collected upon delivery of such animal to the consignee shall attempt to notify such consignee for period of 24 hours after arrival of the animal at the animal holding area of the terminal cargo facility, at least once every 6 hours during that period. The time, date, and method of each attempted notification and the final notification to the consignee and the name of the person notifying the consignee shall be recorded by the carrier or intermediate handler on the shipping document and a copy thereof, accompanying the C.O.D. shipment. If the consignee cannot be notified of the C.O.D. shipment within 24 hours after arrival of the shipment, the carrier or intermediate handler shall return the animal to the consignor, or to whomever the consignor has designated, on the next practical available transportation, in accordance with the written agreement required in paragraph (a) of this section and so notify the consignor.

Any carrier or intermediate handler which has notified a consignee of the arrival of a C.O.D. or other shipment of an animal, where the cost of the animal, or the cost for any transportation, or other incidental or out-of-pocket expense is to be paid and collected upon delivery of such animal to the consignee, which is not claimed by such consignee within 48 hours from the time of such notification, shall return the animal to the consignor, or to whomever the consignor has designated, on the next practical available transportation, in accordance with the written agreement required in paragraph (a) of this section and so notify the consignor.

(c) It shall be the responsibility of any carrier or intermediate handler to provide proper care, feeding, and storage or housing for any animal accepted for transportation, in commerce, under a C.O.D. or other arrangement where the cost of the animal or the cost for any transportation or other incidental or out-of-pocket expense is to be paid and collected upon delivery of such animal until the consignee accepts shipment at destination or until returned to the consignor or his designee should the consignee fail to accept delivery of the animal or the consignee could not be notified as prescribed in paragrah (b) of this section.

(d) Nothing in this section shall be construed as prohibiting any carrier or intermediate handler from requiring any additional guarantee than that required in paragraph (a) of this section for the payment of the cost of any transportation or out-of-pocket or other incidental expenses incurred in the transportation of any animal in commerce.

14. A new § 2.81 is added to read as follows:

§ 2.81 Records, disposition.

(a) No dealer, exhibitor, operator of an auction sale, research facility, carrier, or intermediate handler shall, within a period of one year from the making thereof, destroy or dispose of, without the consent in writing of the Deputy Administrator, any books, records, documents, or other papers required to be kept and maintained under this part.

(b) The records required to be kept and maintained under this part shall be held for such period in excess of the period specified in paragraph (a) of this section as necessary to comply with any other Federal, State, or local law. Whenever the Deputy Administrator notifies a dealer, exhibitor, operator of an auction sale, research facility, carrier, or intermediate handler in writing that specified records shall be retained pending completion of an investigation or proceeding under the Act, such dealer, exhibitor, operator of an auction sale, research facility, carrier, or intermediate handler shall hold such records until their disposition is authorized by the Deputy Administrator.

15. A new § 2.130 is added to read as follows:

§ 2.130 Minimum age requirements.

No dog or cat shall be delivered by any person to any carrier or intermediate handler for transportation, in commerce, except to a registered research facility, unless such dog or cat is at least eight (8) weeks of age and has been weaned.

* * * * *

(Secs. 3, 5, 6, 10, 11, 12, 13, 14, 16, 17, 21; 80 Stat. 351, 352, 353, 84 Stat. 1561, 1562, 1563, 1564, 90 Stat. 418, 419, 420, 423 (7 U.S.C. 2133, 2135, 2136, 2140, 2141, 2142, 2143, 2144, 2146, 2147, 2151); 37 FR 28464, 38 FR 19141.)

It does not appear that further public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that further notice and other public procedure with respect to these amendments are impracticable and unnecessary.

The reporting and recordkeeping requirements of these regulations have been approved by the Office of Management and Budget as required by the Federal Reports Act of 1942.

Done at Washington, D.C., this 8th day of June 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

PIERRE A. CHALOUX,
Acting Deputy Administrator,
Veterinary Services.

REAL ESTATE

Leasing of Military Real Estate

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

[AR 405–80]

[32 CFR Part 643]

REAL ESTATE

Granting Use of Real Estate

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Proposed rules.

SUMMARY: We are proposing a complete revision to the above identified Army regulation which was originally published under date of August 9, 1965, including all changes. Change 4, April 18, 1974, is the latest change. This regulation relates principally to the leasing of Army military real estate. This regulation is needed to provide current policy and procedural guidance for the administration of military real estate under the control of the Department of the Army. Moreover, it defines the responsibilities of the Chief of Engineers in the discharge of these functions, in consonance with pertinent Department of Defense Directives and Instructions concerning use of military real estate. The effect of this action is to make the public aware of policies and procedures governing the management of Army military real estate. It is also desired to inform the public concerning the conditions under which Army military real estate may be made available for limited public use.

DATES: Comments must be received on or before July 15, 1977.

ADDRESSES: Send comments to: HQDA (DAEN–REM–C) Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT:

William P. Bannister, Chief, Military Branch, Office of the Chief of Engineers, Forrestal Building, Washington, D.C. 20314 (202–693–6159).

NOTE.—The Corps of Engineers has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: June 8, 1977.

ALFRED F. LAWRENCE, Jr.
Colonel, Corps of Engineers, Executive.

Accordingly, we propose to establish regulations under 32 CFR 643 as follows:

PART 643—REAL ESTATE

Subpart A—General

Sec.
643.1 Purpose.
643.2 Applicability.
643.3 Authority to grant use of real estate.
643.4 Responsibilities of the Chief of Engineers (COE).
643.5 Responsibilities of major commands (MACOMS) and special staff agencies.
643.6 Responsibilities of overseas commanders.
643.7 Preparation of report of availability.
643.8 Approval of report of availability.
643.9 Approval of availability outside the United States.
643.10 Reports to DOD and the congressional committees on armed services.
643.11 Rights of entry.
643.12 Preparation and signing of instruments.
643.13 Military requirement for real estate under grant.
643.14 Inspection to assure compliance with terms of outgrants.
643.15 Unauthorized use.

Subpart B—Policy

643.21 Policy—Surveillance.
643.22 Policy—Public safety.
643.23 Policy—Preference.
643.24 Policy—Competition.
643.25 Policy—Grants which may embarrass the Department of the Army.
643.26 Policy—Commercial advertising and reservations.
643.27 Policy—Environmental considerations.
643.28 Policy—Historical and cultural environment.
643.29 Policy—Archaeological surveys.
643.30 Policy—Construction projects; protection of historical and archaeological data.
643.31 Policy—Flood hazards.
643.32 Policy—Endangered species.
643.33 Policy—Costal zone management.
643.34 Policy—Utilities on installations.
643.35 Policy—Restriction against leasing for mineral purposes.
643.36 Policy—Interim leasing of excess properties to facilitate economic readjustments.
643.37 Policy—Requests to search for treasure trove.
643.38 Policy—Utility rates.
643.39 Policy—American National Red Cross.
643.40 Policy—Young Men's Christian Association.
643.41 Policy-National Guard use.
643.42 Policy-Consents for crossing of rights of way and similar interests owned by the United States.

Subpart C—Leases

643.51 Additional items concerning leasing.
643.52 Term.
643.53 Consideration.
643.54 Receipts.
643.55 Mandatory revocation clause in lease.
643.56 Taxation of lessee's interest.
643.57 Subleasing.

Subpart D—License

643.71 Additional items concerning licenses.
643.72 License.
643.73 Term.
643.74 Consideration.

Subpart E—Easements

643.81 Additional items concerning easements.
643.82 Term
643.83 Consideration.
643.84 Easement grantees relocate or replace needed facilities.
643.85 Easement grantees—payments or removal or destruction of unneeded improvements.
643.86 Easements for various purposes with relinquishment of legislative jurisdiction.

Subpart F—Permits

643.101 Additional items concerning permits.
643.102 Permit.
643.103 Term.
643.104 Consideration.

Subpart G—Additional Authority of Commanders

643.111 Additional authority.
643.112 Army exchange activities.
643.113 Banks.
643.114 Civil disturbances.
643.115 Contractors—Permission to erect structures.
643.116 Credit unions.
643.117 Hunting, trapping, and fishing.
643.118 Nonappropriated funds—Authority to permit erection of structures.
643.119 Licenses incidental to post administration.
643.120 Post offices.
643.121 Private organizations on DA installations.
643.122 Reserve facilities—Air Force and Navy use.
643.123 Reserve facilities—Local civic organizations.
643.124 Trailer sites.
643.125 Transportation licenses.
643.126 Quarters.
643.127 Veterans' conventions.
643.128 Youth groups.
643.129 Joint carrier military traffic offices (JAMTO, JBMTO, JRMTO, SAM TO).

AUTHORITY: 10 U.S.C. 2667.

Subpart A—General

§ 643.1 Purpose.

(a) This regulation sets forth the authority, policy, responsibility, and procedure for making military real estate, under the control of the Department of the Army, available for use by other military departments, Federal agencies, State and local governmental agencies, private organizations or individuals.

(b) This regulation implements Department of Defense Directives and Instructions (4165 series), which include policies and procedures concerning use of military real estate.

§ 643.2 Applicability.

This regulation is applicable to Army military real estate, which includes land and improvements thereon and is also referred to as real property.

§ 643.3 Authority to grant use of real estate.

(a) The United States Constitution (Article IV, Section 3), provides that the Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States.

(b) One of the principal authorities for the use of military real estate for commercial purposes is Title 10, United States Code, Section 2667, which authorizes the Secretary of the Army (SA), whenever it is considered to be advantageous to the United States, to lease such real or personal property under Army control, which is not for the time needed for public use, upon such terms and conditions as the SA considers will promote the national defense or be in the public interest.

(c) Grants under statutory authorities cited in this regulation of real property pertaining to river and harbor, water resource development and flood control projects, will be under the policies and general guidelines set forth in this regulation.

(d) The SA may, under the general administrative powers vested in the office, authorize the use of real estate in the absence of statutory authority, in unusual circumstances, provided the property is not for the time being required for public use, the grant conveys no interest in the real estate and the proposed use will be of a direct benefit to the United States. Under this authority, the right to use real estate may also be granted to other military departments or Federal agencies.

(e) Except as otherwise provided in this regulation, an interest in real estate will not be granted unless authorized by law.

(f) Other laws authorizing grants for non-Army use of real estate for various purposes and Table of Related Army Regulations are set forth in Appendixes A and B, respectively.

§ 643.4 Responsibilities of the Chief of Engineers (COE).

(a) After it is determined that real estate located in the United States, Puerto Rico, American Virgin Islands and the Panama Canal Zone, is available for nonArmy use, the COE, except as otherwise provided in this regulation, is charged with responsibility for arranging for the use of real estate within the scope of this regulation. In the performance of this function, the COE is authorized to obtain such technical assistance from the using service as may be deemed necessary.

(b) COE has staff responsibility over real estate matters in Guam, American Samoa, Trust Territory of the Pacific Islands (TTPI), and in foreign countries.

(c) Except as otherwise provided in this regulation, determinations that real estate is available for non-Army use must be approved by the COE.

(d) The authority of the COE to grant use of real estate will be delegated, to the extent feasible, to U.S. Army Division and District Engineers (DE).

(e) The COE is responsible for the granting of temporary use of real estate reported excess to the General Services Administration (GSA), to the extent authorized by regulations issued pursuant to the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471, et seq.), and as provided in Title 10, United States Code, Section 2667 (f). The COE is also responsible for supervision and the issuance of instructions covering the granting of use of real estate within the scope of this regulation. Where Army or installation commanders are authorized to grant use of real estate, they are authorized to obtain technical assistance from the appropriate DE.

(f) In reviewing Army requirements for real estate (AR 405–10), the COE will consider the availability and adequacy of other military or federally-owned real estate to satisfy Army requirements before leasing privately-owned real estate, or renewing existing leases.

§ 643.5 Responsibilities of major commands (MACOMS) and special staff agencies.

Except as otherwise provided herein, determinations of availability will be approved by the COE or higher authority. MACOMS and special staff agencies are responsible for determining the real estate which can be made available for non-Army use, specifying the authorized uses of the property which will not be incompatible with military requirements for the property, the length of the term and any restrictions to be imposed on the grantee's use. Upon approval of the determination of availability, the real estate grant will be issued by the DE or as otherwise provided in this regulation.

§ 643.6 Responsibilities of overseas commanders.

Overseas commanders are charged with responsibility for the granting of use of real estate in overseas areas (Puerto Rico, Guam, the American Virgin Islands, American Samoa, TTPI, and the Canal Zone), and in foreign countries, for non-Army use under the policy and guidance expressed in this regulation, provided such use is consistent with the Status of Forces Agreements, Treaties, or the Agreements under which the Army controls such real estate.

§ 643.7 Preparation of report of availability.

A report of availability will be prepared by the installation commander or head of the special staff agency, when it is determined that for the time being the real estate is not required for Army use and can be made available, either concurrently with the Army, or exclusively, for use by another military department, by other Federal agencies, by State or local governmental agencies, private organizations or individuals. The installation commander's recommendation will be made as far in advance as possible so as to minimize the time lapse between the determination of availability and the date of use of the property by the grantee. Where real estate suitable for agricultural or grazing purposes is involved, the normal season for planting and grazing should be taken into consideration so that the property may be advertised in a timely manner. A copy of each report will be furnished to the appropriate DE for information. The report of availability will contain the information outlined in Appendix C.

§ 643.8 Approval of report of availability.

The recommendation that real estate is determined available for non-Army use will be submitted by the installation commander to the major commander for approval, through the echelon of command. The major commander will approve such recommendation and submit it to the appropriate DE for action, except recommendations involving the following actions will be forwarded to the COE:

(a) A lease or license, including licenses to States for National Guard purposes, if the estimated annual rental value exceeds $50,000.

(b) A permit, license, or other grant of real estate, regardless of value, which results in a significant reduction or redirection of installation mission objectives;

(c) A lease of land where the proposed lease term is in excess of 25 years for banks and Federal credit unions and/or the building to be constructed exceeds DOD space criteria;

(d) Any permit, license, agreement, or other grant to another military department or to a Federal agency of large or significant real estate holdings for a period in excess of five years (including renewal options);

(e) A grant of an easement which involves the replacement or relocation of Army facilities at an estimated cost in excess of $100,000;

(f) A grant of an easement where the estimated annual fair market value of the easement exceeds $50,000.

(g) A grant which is controversial or unusual in nature and may embarrass the DA;

(h) A grant involving search for treasure trove;

(i) A grant for vehicle speed contests;

(j) A grant at an active industrial installation, excluding unimproved land areas.

NOTE.—The Commander, U.S. Army Materiel Development & Readiness Command (DARCOM), is authorized to approve determinations of availability at standby industrial installations where the estimated annual rental value does not exceed $50,000.

§ 643.9 Approval of availability outside the United States.

Overseas commanders may authorize the use by another military department or a Federal agency of an installation or portion thereof located in designated overseas areas and in foreign countries when the real estate is not for the time needed for Army purposes or its concurrent use for other purposes will not interfere with the mission of the installation and such other use is not inconsistent with the agreement under which the property was acquired. Overseas commanders may also authorize any use of such property which is necessary in the accomplishment of the DA mission for which the property was acquired. All other proposed uses will be coordinated with the United States diplomatic mission in the country involved prior to submission to HQDA (DAEN–REM) WASH DC 20314, for approval. Where the overseas commander is authorized to approve such use, the commander or designee will prepare and execute the necessary grant.

§ 643.10 Reports to DOD and the congressional committees on Armed Services.

(a) The grants set forth in 1–8a. through f., with respect to real estate in the United States, Puerto Rico, American Virgin Islands, Guam, American Samoa, and the TTPI, require prior approval of the Assistant Secretary of Defense (I&L), and recommendations should contain information in justification thereof.

(b) The grants set forth in 1–8a., with respect to real estate in the United States and in designated overseas areas (excluding the Canal Zone), except leases for agricultural or grazing purposes, require a report to the Committees on Armed Services of the Senate and House of Repesentatives as provided in Title 10, United States Code, Section 2662.

§ 643.11 Rights of entry.

Pending the signing of the formal instrument, no right of entry will be granted unless authorized by the office wherein the instrument will be signed, except where contrary instructions have previously been issued by the DA. When authorized, rights of entry will be granted by the DE, or overseas commander, as appropriate.

§ 643.12 Preparation and Signing of Instruments.

Instruments granting temporary use of real estate will be prepared as provided in this temporary use of real estate will be prepared as provided in this regulation. Except where authority has been otherwise granted, the COE or designee will approve, execute, and distribute instruments to the extent authorized by the SA; otherwise, they will be prepared and submitted for execution by direction of the appropriate Assistant Secretary of the Army.

§ 643.13 Military requirement for real estate under grant.

When a military requirement arises for real estate which is being used under a grant for non-Army use, the withdrawal of availability will be approved at the same level of command as that required for determining the property available for non-Army use. The office responsible for effecting temporary use of the property should be promptly notified of the withdrawal of availability for non-Army use and the latest date the property will be required for military purposes. Termination of the use will be in accordance with the provisions of the grant unless military necessity requires other action. In order to avoid possible claims for damages and in the interest of good community relations and in furtherance of the Army's leasing program, the grantee will be allowed, when practicable, a reasonable time after notice of revocation, to vacate the premises, remove his property and, if required, restore the premises. In controversial cases, or where a claim for damages or litigation is anticipated, HQDA (DAEN–REM) WASH DC 20314, will be notified of the circumstances prior to sending notification of termination of the grant to the grantee.

§ 643.14 Inspection to assure compliance with terms of outgrants.

Commanders will provide general surveillance over areas made available for non-Army use and will advise the DE if and when there are any irregularities. Real estate which is being used for nonmilitary purposes will be inspected at least once each year by the COE, or by his representative, to determine whether grantees or occupants are complying with the terms of the instruments authorizing use and occupancy, except with respect to easements and licenses for rights-of-way for roads, streets, powerlines, pipelines, underground communication lines and similar facilities. The COE will make compliance inspections for such easements and licenses at least once during each 5-year period. However, the DE will check with installation commanders annually to assure that there are no situations which might need correction prior to the inspection. The installation commander will make interim inspections of all real estate being used for non-military purposes as are necessary for timely observation of the extent of compliance with grant provisions designed to protect and preserve the real estate for military requirements, and will furnish the appropriate DE a copy of a written report of the inspection reflecting findings and recommendations. In order that the grantee's operations not be unreasonably disrupted, the annual compliance inspection made by the DE will be coordinated with the installation commander so that, if feasible, only one inspection will be made. Where necessary, corrective action in accordance with applicable regulations will be taken for the enforcement of the terms of the grant by the responsible officer who granted the use. Overseas commanders are responsible for inspection of real estate under their jurisdiction and necessary corrective action.

§ 643.15 Unauthorized use.

Whenever it is observed that real estate under the control of the DA is being used and/or occupied by private parties without proper authority, corrective action will be taken to cause such unauthorized use to be discontinued or to formalize such use and occupancy by an appropriate grant in accordance with this regulation. In either event, compensation will be obtained for the unauthorized use of such property.

Subpart B—Policy

§ 643.21 Policy—Surveillance.

Installation Commanders will maintain constant surveillance over real estate under their jurisdiction to determine whether any of it is excess to requirements, or may be made available for other Army use, or may be made available for use for other than Army purposes and will process such determinations expeditiously in accordance with the provisions of this regulation. From time to time DOD, DA and GSA surveys will be made pursuant to Executive Order 11954, 7 January 1977, which enunciated a uniform policy for the Executive Branch of the Federal Government with respect to the identification of excess and under-utilized real estate (AR 405–70). Real estate for which is retained for future use will be quirement will be disposed of in accordance with AR 405–90. Real estate which the Army does not currently need but which is retained for future use will be made available to others for use either exclusively or concurrently with the Army. When an installation is in an inactive status, the presumption is that it is available for other military or Federal use or for leasing unless there are cogent reasons that such action should not be taken. The purpose of this rule is to put to beneficial use Federal property, which is not for the time required for its basic use, for the benefit of other Federal agencies, the local economy, or for the benefits accruing to the United States from the income and/or savings of maintenance, protection, repair, or restoration.

§ 643.22 Policy—Public safety: Requirement for early identification of lands containing dangerous materials.

(a) DA will not make available to others any real estate which is contaminated with explosives or with toxic materials or other innately or potentially harmful elements until such elements have been removed or have been rendered harmless, unless the proposed user of the area is aware of the condition of the area and is technically qualified and certified to make use of the area in its contaminated state.

(b) It is imperative that commanders keep records on and have a continuing awareness of the state of contamination of lands by explosives, military chemical or other dangerous materials.

(c) Procedures with respect to action to neutralize or decontaminate the area are set forth in AR 405–90.

§ 643.23 Policy—Preference.

Army real estate under the control of DA which is made available for use for other than Army purposes will be made available for use by other military departments or DOD activities and agencies, other Federal departments, activities or agencies, State or local governmental bodies and other private parties, in that order.

§ 643.24 Policy—Competition.

The use of real estate under the control of DA for private purposes will be granted only after reasonable efforts have been made to obtain competition for its use, through advertising. Advertising is any method of public announcement intended to aid directly or indirectly in obtaining offers on a competitive basis. Advertising may be accomplished by circulating and posting notices and by paid advertising in newspapers and trade journals. The purpose of seeking competition is to afford all qualified persons equal opportunity to bid for the use of the property, to secure for the Government the benefits which flow from competition, and to prevent criticism that favortism has been shown by officers or employees of the Government in making public property available for private use. Although the lease of Government real estate to civilians employed by the military departments or officers or enlisted personnel of the Armed Forces is not prohibited by law, it is essential that extreme care be exercised to avoid favoritism or the appearance of favoritism. Generally leases to Federal Government personnel will be granted only after competitive bid under the sealed bid method. The provisions of this paragraph do not affect the authority contained in AR 210–10 and 210–50 for furnishing quarters to civilian employees of DA. Also the provisions of this paragraph do not affect the use of Federal facilities by uniformed personnel as may be otherwise provided for. Other exceptions to the advertising policy are as follows:

(1) Granting easements, leases and licenses to public agencies and public utilities.

(2) Granting permits to other Federal agencies.

(3) Leasing cable pairs.

(4) Leases or licenses to utility companies having an exclusive franchise in the area, for space on Government-owned poles for attaching their electric transmission communication lines.

(5) COE is authorized to grant a waiver of competition upon a determination that it will promote the national defense or will be in the public interest or upon a determination that competition is impracticable.

§ 643.25 Policy—Grants which may embarrass the Department of the Army.

The use of property under DA control will not be authorized for any purpose when the proposed use or the revocation thereof might prove embarrassing to the DA.

§ 643.26 Policy—Commercial advertising on reservations.

DA will not authorize the posting of notices or erection of billboards or signs for commercial purposes on property under its control.

§ 643.27 Policy—Environmental considerations.

DA will not authorize the use of real estate, water and other natural resources when such use is not in harmony with the goals and intent of the following legislation and/or similar legislation which establishes a firm Federal policy and provides procedures to enhance the overall environmental quality.

(a) National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321) (AR 200–1, Chapter 1 and 2).

(b) Federal Water Pollution Control Act of 1972, as amended, (33 U.S.C. 1251) (AR 200–1, Chapter 3 and 9).

(c) Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

(d) Coastal Zone Management Act of 1972 (16 U.S.C. 1451).

(e) Clean Air Act of 1970, as amended (42 U.S.C. 1857) (AR 200–1, Chapter 4).

(f) Marine Protection, Research and Sanctuaries Act of 1072 (16 U.S.C. 1431) (AR 200–1, Chapter 3).

(g) Solid Waste Disposal Act, as amended, (42 U.S.C. 3251) (AR 200–1, Chapter 5).

(h) Federal Insecticide, Fungicide and Rodenticide Act, as amended, by the Federal Environmental Pesticide Control Act of 1972 (7 U.S.C. 136) (AR 200–1, Chapter 6).

(i) Noise Control Act of 1972 (42 U.S.C. 4901) (AR 200–1, Chapter 7). As a minimum, each Determination of Availability Report will include an environmental assessment evaluating the environmental consequences of the proposed outgrant action. When an environmental assessment reveals that the proposed action may significantly affect the quality of the human environment, is highly controversial or is anticipated to evoke litigation based upon environmental issues, a detailed environmental impact statement will be prepared and processed in accordance with NEPA. (AR 200–1, Chapter 2) (See AR 405–90, App. A and B).

§ 643.28 Policy—Historic and cultural environment.

(a) Executive Order No. 11593, 36 FEDERAL REGISTER 8921 (Appendix D) provides in part that the Federal Government shall provide leadership in preserving, restoring and maintaining the historic and cultural environment of the Nation: that Federal agencies shall:

(1) Administer the cultural properties under their control in a spirit of stewardship and trusteeship for future generations;

(2) Initiate measures necessary to direct their policies, plans and programs in such a way that federally owned sites, structures and objects of historical, architectural or archaeological significance are preserved, restored and maintained for the inspection and benefit of the people; and

(3) In consultation with the Advisory Council on Historic Preservation (16 U.S.C. 470i) institute procedures to assure that Federal plans and programs contribute to the preservation and enhancement of non-federally owned sites, structures and objects of historical, architectural or archaeological significance (AR 200–1, Chapter 8 and App. A).

(b) Outgrants will include conditions to assure protection of real estate as contemplated in a. above.

§ 643.29 Policy—Archeological surveys.

The SA under the authority of Title 16, U.S.C., Section 432, may allow the examination of ruins, the excavation of archeological sites, and the gathering of objects of antiquity upon Army lands by institutions which are deemed properly qualified to conduct such examinations, excavations and gatherings (AR 200–1, Chapter 8).

§ 643.30 Policy—Construction projects and activities; protection of historical and archeological data.

The Archeological and Historical Preservation Act of 1974 (16 U.S.C. 469 et seq.) provides for the preservation of historical and archeological data on all Federal or Federally-assisted construction projects or in connection with any federally licensed activities or programs.

§ 643.31 Policy—Flood hazards.

Each Determination of Availability Report will include an evaluation of the flood hazards, if any, relative to the property involved in the proposed outgrant action, pursuant to the provisions of Executive Order 11296, 10 August 1966. DA will not authorize the use of lands in flood plains for habitation purposes or any other use which may be uneconomical, hazardous or unnecessary.

§ 643.32 Policy—Endangered species.

The Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.), declares the intention of Congress to conserve threatened and endangered species of fish, wildlife and plants, and the ecosystems on which those species depend. The Act provides that Federal agencies must utilize their authorities in furtherance of its purposes by carrying out programs for the conservation of endangered or threatened species, and by taking such necessary action to insure that any action authorized by that agency will not jeopardize the continued existence of such endangered or threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretaries of the Departments of Commerce or Interior, as appropriate, to be critical.

§ 643.33 Policy—Coastal zone management.

(a) The Coastal Zone Management Act of 1972 (16 U.S.C. 1456), directs all Federal agencies conducting or supporting activities directly affecting the coastal zone of a state, to conduct or support those activities in a manner which is, to the maximum extent practicable, consistent with approved state management programs. The opinion of the Attorney General of the Unied States is that Federal lands are excluded from mandatory compliance with the state's coastal zone management program, regardless of the type of Federal jurisdiction exercised thereover. However, it is Army policy that its activities will comply, to the extent practicable, with a state's approved coastal zone management program.

(b) Applications for grants for use of real estate affecting land or water uses in the coastal zone of a state will include a certification that the proposed activity complies with the state's approved program and that applicant's activity will be conducted in a manner consistent with the law.

(c) An activity affecting land or water uses in the coastal zone of a state which will not be conducted in a manner consistent with an approved state program will be exempted from this certification requirement only if the Secretary of Commerce, on his own initiative or upon appeal of the applicant, determines that the activity is consistent with the objectives of the Coastal Zone Management Act or is otherwise necessary in the interest of national security.

§ 643.34 Policy—Public utilities on installations.

(a) Contracting officers, with the approval of Installation Commanders, are authorized to permit the extension of public utilities upon installations, as part of the contract for furnishing to the Government electricity, water and gas, where such extension is necessary solely to serve the installation and not in part to serve private consumers outside the installation. The above authorization is covered by the provisions of the contract for purchase of utilities services contained in Armed Services Procurement Regulations.

(b) Contracts or agreements for the sale of surplus utilities services as authorized by law or regulations will include similar authority for the purchaser to install and maintain such facilities on the installation as necessary in connection with the sale of such utilities services, in accordance with AR 420–41 and AR 105–23.

§ 643.35 Policy—Restriction against leasing for mineral purposes.

Title 10, U.S.C., section 2667, does not permit leasing for exploitation of oil, mineral, or phosphate lands but does not prohibit the lease of lands that may contain oil, mineral or phosphate provided the lease is granted for purposes not involving the use or taking of such substances. Title 30, U.S.C., Section 181, et seq., gives the Secretary of the Interior (SI) certain authority to lease oil, gas, and mineral deposits on public domain land provided it does not interfere with Federal use of the land. Title 30, U.S.C., Section 352, gives the SI certain authority to lease coal, phosphate, oil, oil shale, gas sodium, potassium and sulfur on acquired land, but such deposits on acquired lands which have been set aside for military or naval purposes are specifically excluded from leasing. Hence, there is no authority to lease minerals in acquired lands under the control of the DA. The only exception is where there is drainage of oil and gas deposits under such lands. In this event, the DE should be advised immediately in order that the Department of the Interior may be informed so that the interests of the United States will be protected.

§ 643.36 Policy—Interim leasing of excess properties to facilitate economic readjustment.

Interim outleasing of excess real property is authorized to lessen the economic impact on the local community, caused by an installation inactivation, closure or realignment. These outleases may be granted to State or local governmental bodies in consideration for care, custody, management and routine maintenance. Income derived from the use of the property in excess of the cost of care, custody, management and routine maintenance will be covered into the Treasury as miscellaneous receipts. The outleasing will generally conform to an economic recovery plan outlined by the Office of Economic Adjustment, OASD(I&L), will require coordination with the DASD-(I&H) and concurrence by the GSA. Leases are limited to one year and must be revocable by the Government on 30 days notice.

§ 643.37 Policy—Requests to search for treasure trove.

Subject to approval of the SA, the Administrator of General Services is authorized to make contracts with private parties to search for treasure trove on lands under the jurisdiction of the DA. Such searches will be subject to the regulation and control of the Installation Commander or officer having jurisdiction over the property.

§ 643.38 Policy—Utility rates.

(a) Rates for utilities furnished by the Army will be in accordance with AR 420–41.

(b) Payments for utilities or services furnished will be deposited to the Treasurer of the United States to the credit of the appropriation from which the costs of furnishing them was paid. Collection for utilities and services furnished by the Army is the responsibility of the officer having immediate jurisdiction over the property in accordance with AR 37–19 and AR 37–27.

§ 643.39 Policy—American National Red Cross.

(a) Title 10, U.S.C., Section 2670, authorizes the SA to grant revocable licenses permitting the erection and maintenance by the American National Red Cross on military reservations, of buildings suitable for the storage of supplies for the aid of the civilian population in case of serious national disaster, or the occupation for that purpose of buildings erected by the United States.

(b) Installation Commanders will furnish office space and quarters for Red Cross activities and personnel when assigned to duty with the Armed Forces in accordance with AR 930–5.

§ 643.40 Policy—Young Men's Christian Association (YMCA).

Title 10, U.S.C., Section 4778, authorizes the SA to grant revocable licenses permitting the erection and maintenance by the YMCA on military reservations, of such buildings as their work for the promotion of the social, physical, intellectual, and moral welfare of the garrisons may require.

§ 643.41 Policy—National Guard use.

Pursuant to the authority contained in Title 32, U.S.C., Section 503, the SA is authorized to grant revocable licenses to the States and territories for the use and occupancy of installations or portions thereof by the National Guard. A license may not be granted for the erection of a permanent National Guard Armory without specific congressional authority.

§ 643.42 Policy—Consents for crossing of rights of ways and similar interests owned by the United States.

Under the various easement authorities or under the administrative power in cases outside the purview of those authorities, the SA may consent to the granting of an easement by the owner of the servient estate, subject to such conditions as may be required to protect the Government's interest.

Subpart C—Leases

§ 643.51 Additional items concerning leasing.

In addition to the general and policy matters covered in Chapters 1 and 2, the following also apply with respect to the leasing of Army real estate.

§ 643.52 Term.

Each lease will be for a period not exceeding five years unless the SA determines that a longer period will promote the national defense or will be in the public interest.

§ 643.53 Consideration.

(a) Unless otherwise authorized by this regulation or directed by the SA, the consideration for a lease of real estate will be the appraised fair market rental value. However, the value of the maintenance, protection, repair or restoration by the lessee of the property leased, or of the entire unit or installation where a substantial part of it is leased, may be accepted as all or part of the consideration. The value of the maintenance, protection, repair or restoration, when added to the amount of the monetary payment to be made by the lessee, must equal the appraised fair market rental value of the property leased.

(b) Buildings and space may be leased to a State or political subdivision thereof for public school purposes, limited to use for classrooms and closely related academic instructions, through high school level, at no monetary consideration. Where bare land is leased for construction of a school through high school level, the acreage will not exceed criteria established by the appropriate state authority or the Department of Health, Education, and Welfare (HEW), the annual rental will be $25, and the lease term will not exceed 25 years unless otherwise approved by HQDA (DAEN-REM) WASH DC 20314. Real Estate may also be leased for educational purposes to public educational institutions at a reduced rental, after consultation with the HEW, and taking into account any benefits accruing to the United States through the use of such property. In any event, the lessee will be required to assume the cost of maintenance, protection,

repair or restoration of the property leased and the administrative costs incident thereto.

(c) Leases granted for agricultural, grazing or haying purposes will have attached thereto the land use regulations furnished by the installation commander specifying the items required to be performed by the lessee as part of the lease obligations. It is the policy of the DA that land leased for agricultural, grazing or haying purposes be returned to the Government in as good or better condition than when initially leased. The land use regulations will include those activities of maintenance, protection, repair or restoration of the property leased which the lessee will be required to perform as part or all of the consideration for the lease. Generally, an activity will qualify as an offset from rental if it is (1) performed on the leased premises, (2) of direct benefit to the installation in its authorized current or mobilization mission, as distinguished from desired programs, or in furtherance of the Army's leasing program, (3) directly related to the lessee's use of the leased property. Where all of the above criteria are met, the following activities may be authorized: Control of erosion, conservation of natural resources and maintenance of the viability of the land for continuing leasing, such as mowing, weed control, seeding, fertilizing, mulching, crop rotation, selected cutting, and soil conservation measures such as terraces, check dams, wells, springs, ponds, tile or open channels or culverts for drainage; firebreaks, inside fencing and cattle guards. Maintenance, protection, repair or restoration of buildings, roads, perimeter fencing, and similar improvements are not authorized as offsets from rental unless the property is leased to and beneficially used by the lessee, or as otherwise approved by HQDA (DAEN-REM) WASH DC 20314. Also, lessees will not be required to perform activities in support of recreation and welfare, fish and wildlife, beautification, and aesthetic programs, and the cost of establishing and maintaining recreation, swimming and fishing areas, wildlife habitats, food plots, and similar activities are not authorized as offsets from rental since these activities do not meet the criteria outlined above.

§ 643.54 Receipts.

Receipts will be deposited into the Treasury as miscellaneous receipts.

§ 643.55 Mandatory revocation clause in lease.

Each lease will contain a provision permitting the SA to revoke the lease at any time, unless it is determined that the omission of such provision from the lease will promote the national defense or will be in the public interest. In any event, the lease will be revocable by the SA during a national emergency.

§ 643.56 Taxation of lessee's interest.

The lessee's interest in leased property may be taxed by State or local governments as provided in Title 10, United States Code, Section 2667(e). Each lease will contain a provision that if and to the extent that the property owned by the Government and included in the lease, as opposed to the leasehold interest of the lessee therein, is later made taxable by state or local governments under an act of Congress, the lease will be renegotiated.

§ 643.57 Sublease or assignment.

A lease of real estate will not be subleased or assigned for direct or indirect use by another Federal agency. Except as specifically provided in the lease, a sublease or assignment of the lease will not be authorized without prior approval of HQDA (DAEN–REM) WASH DC 20314.

Subpart D—Licenses

§ 643.71 Additional items concerning licenses.

In addition to the general and policy matters covered in Subparts 1 and 2, the following also apply with respect to the granting of licenses.

§ 643.72 License.

A license is a bare authority to do a specified act upon the property of the licensor without acquiring any estate therein. The principal effect of a license is to authorize an act which in the absence of the licensee would constitute a trespass.

§ 643.73 Term.

The term of a license will be limited to a period reasonably necessary to accomplish the purpose for which the license is being granted, but in no event will the term exceed five years, without the approval of COE.

§ 643.74 Consideration.

When a license is granted under the authority of an easement or leasing statute, the same rules will apply in regard to consideration as is applicable to the granting of an easement or lease under the statute. Since the administrative power may be relied upon for the grant of a license only when such grant is of direct benefit to the Government, such grants may be made without consideration.

Subpart E—Easements

§ 643.81 Additional items concerning easements.

In addition to the general and policy matters covered in Subparts 1 and 2, the following also apply with respect to the granting of easements.

§ 643.82 Term.

The term for which an easement is granted will be guided by the type of easement, the period for which the land can be made available and the limitations of tht authorizing statute.

§ 643.83 Consideration.

Although the statutes authorizing grants of rights of way or easements do not make it mandatory that compensation be paid to the United States, such grants will reserve consideration in an amount equal to the fair market value as established by recognized appraisal practices. As an exception to this rule, grants to states, counties, municipalities, or political subdivisions thereof, will not require fair market value when the purpose of the easement is to serve the public interest or is to benefit the Federal Government.

§ 643.84 Easement—Grantees relocate or replace needed facilities.

In easement grants, grantees usually will be required to repair and restore damage done to Government land and improvements and to relocate or replace buildings and other needed facilities rendered useless or less useful by the exercise of the easement rights granted. DOD policy requires that in keeping the Army whole, the relocation or replacement of facilities will be limited to those for which there is a continuing requirement. By specific exclusion, establishment of a different category of facility is not authorized. (DODI 4165.12 III C)

§ 643.85 Easement grantees—Payment for removal or destruction of unneeded improvements.

Where a proposed right of way will require removal or destruction of improvements which are not required to be relocated or replaced to meet military needs, such improvements will be disposed of as excess property in accordance with AR 405–90, and a condition of the easement grant will be payment for such improvements as follows:

(a) Where the easement grant is to be made at fair market value to entities not entitled to grants of rights of way without charge, the charge for the grant will include the in-place fair market value of the improvements.

(b) Where the proposed grantee is a State or local Government agency normally granted a right of way without charge under Army policy and the grantee's project is subsidized wholly by an agency of the Federal Government, no charge will be made for the improvements thus lost, since any charge made would not reflect a net return to the Government.

(c) Where the proposed grantee is a State or local Government agency normally granted a right of way without charge under Army policy, and the grantee's project is not subsidized, or is subsidized only in part, the charge for such improvements removed or destroyed and not replaced will be the salvage value thereof.

§ 643.86 Easements for various purposes with relinquishment of legislative jurisdiction.

Title 40, U.S.C., Section 319, and delegation of authority thereunder from the Secretary of Defense authorizes the SA to grant easements and concurrently to relinquish to the State in which the affected land is located such legislative jurisdiction as is deemed necessary or desirable. Ordinarily, 40 U.S.C. 319 will not be used for easement grants which may be accomplished pursuant to authorities set forth in preceding paragraphs except where retrocession of legislative jurisdiction is intended.

Subpart F—Permits

§ 643.101 Additional items concerning permits.

In addition to the general and policy matters covered in subparts 1 and 2, the following also apply with respect to the granting of permits.

§ 643.102 Permit.

A permit is the temporary authority conferred on a Government agency to use real property under the jurisdiction of another Government agency.

§ 643.103 Term.

A permit may be granted to another military department, a DOD component, or Federal agency for a mutually agreeable period. If the permit is on a permanent or irrevocable basis, it is considered tantamount to a transfer and must be granted under special statutory authority. Where the real property involved is estimated to exceed $50,000 in value, a report must be made to the Congressional Committees on Armed Services, pursuant to Title 10, United States Code, Section 2662.

§ 643.104 Consideration.

(a) Permits are usually granted on a rent-free basis.

(b) The Army is authorized, however, to charge for space and space-related services provided non-DOD Federal agencies. Charges will be at rates established by GSA for the particular location pursuant to Title 40, United States Code, Sections 490 (j) and (k). Exceptions to this policy will be real property and related services provided to an organization which is solely in the support of the installation's mission. (For example: space assigned to a FAA air controller on an Army airfield; GAO activity auditing installation programs). Proceeds which are in excess of the actual operating and maintenance costs of providing the service shall be credited to miscellaneous receipts unless otherwise authorized by law. Reimbursement for utilities and services furnished to the permittee is the responsibility of the officer having immediate jurisdiction over the real estate. Where the use of real estate by a Federal agency under permit is authorized and the correspondence does not include information regarding charges to be made for the real estate, clarifying information will be obtained from HQDA (DAEN–REM) WASH DC 20314.

(c) Where real property is leased to or otherwise used by the Army and a rental or charge is paid therefor, any use of the real estate, for non-Army use, either under permit or other grant, will provide for reimbursement of a proportionate part of the rental or charge, unless otherwise approved by OCE. Reimbursement is the responsibility of the DE. Any other officer authorizing such use is responsible for notifying the DE of the non-Army use.

Subpart G—Additional Authority of Commanders

§ 643.111 Additional authority.

In addition to authorities and responsibilities set forth above, the following grants may be made by commanders as indicated.

§ 643.112 Army exchange activities.

Use of space and structures by the Army Exchange and its concessionaires is governed by AR 60–10.

§ 643.113 Banks.

(a) The establishment of banks, branch banks and banking facilities on Army installations is governed by AR 210–135.

(b) The Treasury Department determines whether a banking facility is self-sustaining and notifies the Commander, U.S. Army Finance and Accounting Center.

(c) Banking facilities which are not selfsustaining will be furnished space, utilities and custodial services without charge by the Installation Commander, provided space and services are available from existing resources.

(d) Banking facilities which are self-sustaining will be granted a lease by the DE, at fair market value, and reimbursement will be required for utilities and services furnished.

(e) A bank building may not be constructed on an Army installation without the prior approval of COE, SA and DOD.

§ 643.114 Civil disturbances.

Without reference to higher authority, and when it is found to be in the public interest, MACOM and heads of agencies having command responsibility may grant, without consideration, revocable licenses for joint use of active Army and USAR facilities during civil disturbance for not more than 30 days to the National Guard and to municipal, county, and state officials and law enforcement agencies. Licensees must agree that the privileges granted will be without expense to the DA, that the use will be subject to the control of the officer having jurisdiction over the property, that it will remove its property from the premises when the license is terminated, that it will pay the cost of any services furnished to it by the DA, and, if a non-Federal agency, that it will hold the Government harmless from any damages or claims arising out of the use. Where it is proposed to allow such use beyond 30 days, the proposal must be submitted to HQDA (DAEN–REZ) WASH DC 20314 for approval. Federal task force commanders, acting under instructions from the Chief of Staff, in a civil disturbance control operation may approve requests for the use of installations under their control (Ref AR 500–50).

§ 643.115 Contractors—Permission to erect structures.

Installation Commanders are authorized to permit the erection of temporary structures for use solely in connection with a Government contract for construction and related work for the period of the contract and with provision for removal and restoration of the premises upon expiration of the contract; provided that, in the interest of the United States, any structure suitable for military use may, in lieu of removal, be relinquished to and become the property of the United States. If the structure is to be used for any purpose other than the fulfillment of the contract, application will be made to the DE for such use in order that a proper real estate instrument may be processed.

§ 643.116 Credit Unions.

Installation Commanders are authorized under 12 U.S.C. 1770 to allot space in existing buildings, without charge for rent or services, to any credit union organized under State law or to any Federal Credit Union organized in accordance with the Federal Credit Union Act, provided that, in either case, the membership is composed exclusively of federal employees (including former federal employees who acquired membership while employed by the Federal Government and retained such membership) and members (husband, wife, child, parent, brother, sister, grandparent, or grandchild living with the employee) of their families. Construction and use of buildings by credit unions and reimbursement of the cost of maintenance, utilities and services provided to such buildings are governed by AR 210–24, AR 230–81 and AR 420–41.

§ 643.117 Hunting, trapping and fishing.

Applications to hunt, trap and fish on military reservations are governed by AR 420–74.

§ 643.118 Nonappropriated funds—authority to permit erection of structures.

The authority of Installation Commanders to permit structures to be erected on military installations with nonappropriated funds, as well as the title status of each, is defined in AR 60–10 and AR 210–55. Use of existing space and structures for activities of a civilian nonappropriated fund is governed by AR 230–81.

§ 643.119 Licenses incidental to post administration.

Installation commanders may authorize the use of property incidental to post administration which in the absence of such authority would amount to a trespass, such as licenses to merchants to enter the reservation to make deliveries. The authority noted herein may not be used to grant licenses in situations otherwise covered by this regulation.

§ 643.120 Post Office.

Title 10, United States Code, Section 4779b, provides that the SA shall assign suitable space for post office purposes at military posts where post offices have been established. Space assignment will be accomplished by arrangement between the Postmaster and installation commander.

§ 643.121 Private organizations on DA installations.

(a) AR 210–1 defines and classifies private organizations, such as thrift shops, and child care centers, located on Army installations and provides policy guidance for their authorization and operation. Installation commanders may authorize the use of available facilities or space to such private organizations, without monetary consideration, when the use is on a non-exclusive basis and subject to immediate termination when possession is required by the installation commander for another purpose.

(b) Where the private organization desires exclusive use of facilities or space, or for a specified period of time, the matter will be considered a leasing action, the lease will be granted by the DE and will provide for payment of a rental consideration. The installation commander will consult with the DE if there is a question whether a proposed use of facilities or space by a private organization should be authorized by the DE under lease or by the installation commander by the issuance of a license.

§ 643.122 Reserve facilities—Air Force and Navy use.

(a) MACOM may approve local agreements with appropriate Air Force or Navy commands, covering temporary use of existing Army Reserve facilities by the Air Force or Navy Reserve, provided, however, that the DA is reimbursed in proporationate share for the services furnished and that the cost of any alterations that may be desired will be borne by the military service concerned. Although no specific form is prescribed for those operational agreements, the agreements constitute Interservice Support Agreements subject to Joint AR 1–35/SECNAV INST 4000.20B/AFR 400.27. Nothing in such joint regulation disallows use of DE outgrants to supplement coverages of Interservice Support Agreements when requested and approved in accordance with this regulation. The terms used in the Interservice Agreements and/or DE outgrants will be those acceptable to the commands concerned. Agreements, however, which provide for the exclusive use of such property by the Air Force or Navy Reserve, or which involve a transfer of funds between services for other than minor utility services, or which involve an increase in personnel strength, or other complications, will be routed to the appropriate DE for execution of a formal permit.

§ 643.123 Reserve facilities—Local civic organizations.

In order to promote community relations in areas where Army Reserve Centers have been constructed, local civic and similar nonprofit organizations may be permitted to use the armory facilities during such periods that will not cause any interference with the primary use thereof for the administration and training of the Reserve Components of the Armed Services of the United States. Procedures and policy are outlined in AR 140–488.

§ 643.124 Trailer sites.

(a) Installation Commanders are authorized to grant revocable leases to military personnel and civilian personnel qualified to occupy public quarters for use and occupancy of individual trailer sites within approved trailer camp areas, and to revoke or renew such leases. (See AR 210–50.) Leases will be granted pursuant to Title 10, U.S.C., Section 2667. Necessary utilities will be provided on a reimbursable basis. In no event will the terms of the lease exceed a period of 2 years. DA Form 373 (Lease or Trailer Sites) will be used exclusively for this purpose.

(b) Leases may be revoked for nonpayment of rent, or breach of any condition of the lease or military necessity.

(c) Rents will be collected locally and turned over to the nearest Army Finance and Accounting Officer for deposit in accordance with procedure set forth in AR 37–103. A copy of the Cash Collection Voucher (DD Form 1131) will be forwarded to the appropriate DE.

§ 643.125 Transportation licenses.

Installation Commanders are authorized to grant revocable licenses and to revoke such licenses in the name of and by authority of the SA, for bus and taxicab service on installations. The following policy will be observed in granting such licenses; however, if real estate is required to be leased in accordance with e below, no commitment will be made to grant licenses until approval is received for the lease.

(a) One or more licenses (revocable at will and for a period not to exceed 5 years) may be granted, based upon the free competitive proposals of all available companies or individuals.

(b) DD Form 694 (Transportation License Military Reservation) will be used for this purpose.

(c) Only duly licensed operators will be permitted to operate on installations.

(d) No distinction will be drawn between taxicab and bus transportation.

(e) If use of Government property is desired for such purposes as at bus station, waiting rooms, storage space, offices in connection with the proposed transportation service, application for a lease will be forwarded to the appropriate DE for processing.

(f) Licenses may be revoked by the Installation Commander for breach of any condition of the license and for military necessity.

(g) The Installation Commander will furnish a copy of each such license, through channels, to the MACOM or to the head of the agency having command responsibility.

§ 643.126 Quarters.

The assignment and rental of quarters to civilian employees and other nonmilitary personnel will be accomplished in accordance with AR 210–50. Responsibility of the Corps of Engineers for the establishment of rental rates for quarters rented to civilian and military personnel is set forth in AR 210–12.

§ 643.127 Veterans' conventions.

Without reference to higher authority, MACOM may lend certain Army real property (including the use of unoccupied barracks) to national veterans' organizations for use at state or national conventions or for national youth, athletic or recreational tournaments sponsored by those organizations in accordance with AR 725–1.

§ 643.128 Youth groups.

(a) Installation Commanders may grant revocable-at-will licenses for one-time use, or for intermittent or continuing use of available meeting room facilities, without monetary consideration, to on-post youth groups such as the Boy Scouts, Girl Scouts and Little League.

(b) Installation Commanders may grant revocable-at-will licenses for one-time use, or for intermittent or continuing use, to off-post youth groups such as the Boy Scouts, Girl Scouts and the Little League for nonexclusive use of recreational areas or unimproved land areas within military reservations for recreational or camping purposes. Licenses will be granted for up to a period of one year without monetary consideration and will provide for a hold-harmless clause with respect to any and all claims against the Government and will require the repair of any damage or destruction resulting from such use.

§ 643.129 Joint Carrier Military Traffic Offices (JAMTO, JBMTO, JRMTO, SAMTO).

Installation Commanders will furnish office space without charge for JCMTO offices established in accordance with AR 55–365.

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

NEW GENERAL WAGE DETERMINATION DECISIONS

Alabama	AL77–1073
Mississippi	MS77–1078

MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

LABORERS

Group 1: All Helpers not herein separately classified; Cesspool Diggers and installers; Chat Box Man; Checker, tool dispatcher; Concrete dump manbelt, pipe and/or hoseman; Dumpman and/or spotter; Fence builder, guard rail builder highway; Form strippers; Labor, general or construction; Landscape gardener and nurseryman; Packing rod steel and pans; Rip rap stoneman; Astro turf layer; Cleanup, Bull gang; Trackman-railroad

Group 2: Cement finisher tender; Concrete curer (impervious membrane); Cutting torch operator; Fine grader (highway, engineering and sewer work only); Kettleman - Tarman; Power type concrete buggy

Group 3: Bander; Chucktender (except tunnel); Creosote tieman; Guinea chaser; Powderman helper; Rip-rap stone paver; Sandblaster (pot tender); Spiker and wrenchers

Group 4: Cement dumpers (Skip-type mixer or handling bulk cement); Chain saw machines (on clearing and grubbing); Concrete vibrating machines; Cribber and shorer (except tunnel); Floor sanders concrete; Hydraulic jacks, and similar mechanical tools not separately classified herein; Operators and tenders of penumatic and electric tools; Pipe caulker and/or backup man (pipeline); Pipe wrapper; Pneumatic gopher; Rigger/Signalman (pipeline)

Group 5: Air and water wash-out nozzleman; Asphalt rakers and ironers; Driller; Grade setter (pipeline); Hand guided trencher and similar operated equipment; Jackhammer and/or pavement breakers; Pipelayers (including but not limited to non-metallic, transite and plastic pipe, water pipe, sewer pipe, drain pipe, underground tile and conduit); Rock slinger; Scaler (using Bos'ns chairs or safety belt); Tampers (mechanical - all types); Precast manhole erector

Group 6: Concrete Cutting Torch; Concrete saw (hand guided); Driller, (core, diamond, wagon or air track); Drill doctor and/or air tool repairman; Gunman and mixerman (gunite); Sandblaster (nozzleman)

Group 7: Concrete Road Form Setter; Gunite nozzleman or rodman; Drillers, Joy Mustang, PR 143, 220 Gardner-Denver, Hydrasonic; Powderman; Scaler (drillers); Welders and/or pipelayers installing process piping; Form setter and/or builder

LABORERS
(Tunnel and Shaft Workers)

Group 1: Bull Gang, muckers, trackman; Dumpmen; Concrete crew (includes rodders and spreaders); Grout crew; Swamper (brakeman and switchmen on tunnel work); Change house man

Group 2: Nipper; Chucktender, Cabletender, Vibratorman, Jackhammer, Pneumatic tools (except driller)

Group 3: Grout Gunman

Group 4: Timberman, Retimberman - wood or steel blaster, driller powderman; Cherry pickerman; Powderman - primer house; Steel form raiser and setter; Kemper and other pneumatic concrete placer operator; Miner - finisher; Miners - Tunnel (hand or machine)

Group 5: Diamond Drill

Group 5A: Shaft and Raise Miner Welder

POWER EQUIPMENT OPERATORS
(Except Piledriving and Steel Erection)

Group 1: Air compressor operator; Field equipment serviceman helper; Heavy duty repair helper; Heavy duty welder helper; Oiler; Pump operator

Group 2: Conveyor operator; Generator operator - portable; Power grizzly operator; Self-propelled chip spreading machine - conveyor operator; Watch fireman; Welding machine operator - gasoline and diesel power

Group 3: Concrete mixer operator - skip type; Dinky operator - (under 20 tons wt.); Driver-more paver, Slurry seal machine, and similar type equipment; Motor crane driver; Power sweeper operator - self-propelled; Ross carrier or fork lift operator; Skip loader operator - all types with rated capacity 1-1/2 cu. yds. or less; Wheel type tractor operator (Ford, Ferguson, or similar type) with attachments such as fresno, push blade, post hole auger, mower, etc., excluding compacting equipment

Group 4: A-Frame boom truck or winch truck operator; Asphalt plant firemen; Elevator hoist operator (including Tuskay hoist or similar types); Grade checker (excluding civil engineer); Multiple power concrete saw operator; Pavement breaker, mechanical compactor operator, power propelled; Roller operator - all types - except as otherwise classified; Screed operator; Self-propelled chip spreading machine operator (including Slurry seal machine operator) Stationary pipewrapping and cleaning machine operator; Tugger operator

Group 5: Aggregate plant operator (including crushing, screening and sand plants, etc.); Asphalt plant mixer operator; Beltcrete machine; Boring machine operator; Concrete mechanical tamping, spreading or finishing machine (incl. Clary, Johnson, or similar types); Concrete pump operator; Concrete batch plant operator, all types and sizes; Conductor, brakeman, or handler; Drilling machine, including water wells; Elevating grader operator - all types and sizes (except as otherwise classified); Field equipment serviceman; Highline cableway signalman; Kolman belt loader operator or similar, w/belt width 48" or over; Locomotive engineer (incl. Dinky-20 tons wt. and over); Moto-paver and similar type equipment operator; Operating engineer rigger; Pneumatic-tired scraper operator (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment) up to and including 12 cu. yds.; Power jumbo form setter operator; Pressure grout machine operator (as used in heavy engineering construction); Road Oil mixing machine operator; Roller operator-on all types asphalt pavement; Self-propelled compactor, with blade; Skip loader operator-all types with rated capacity over 1-1/2 but less than 4 cu. yds.; Slip form operator (power driven lifting device for concrete forms); Soil cement road mixing machine operator - single pass type; Stationary Central generating plant operator-rated 300 k.w. or more; Surface heater and planer operator; Traveling pipewrapping machine operator

Group 5-A: Heavy duty mechanic and/or welder; Pneumatic tired scraper, all sizes and types over 12 cu. yds. up to and incl. 45 cu. yds. MRC (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment); Tractor operator (Pusher,

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Bulldozer, Scraper) up to 400 net horsepower rating; Trenching machine operator

Group 6: Auto-Grade Machine (CMI and similar equipment); Boring machine operator (including Mole, Badger and similar type); Concrete mixer operator-paving type, and mobile mixer; Concrete pump operator with boom attachment (Truck mounted); Crane operator-crawler and pneumatic type, under 100 ton capacity MRC; Crawler type tractor operator - with boom attachment; Derrick operator; Forklift operator for hoisting personnel; Grade-all operator; Helicopter hoist; Highline cableway operator (less than 20 tons rated capacity); Mass excavator operator (150 Bucyrus Erie and similar types); Mechanical hoist operator (two or more drums); Motor grade operator - any type power blade; Motor grade operator with elevating grader attachment; Mucking machine operator; Overhead crane operator; Piledriver engineer (portable, stationary or skid rig); Pneumatic-tired scraper operator - all sizes and types (Turnapull, Euclid, Cat, D-W, Hancock & similar equipment over 45 cu. yds., MRC); Power driven ditch lining or ditch trimming machine operator; Skip loader operator - all types with rated capacity 4 cu. yds., but less than 8 cu. yds.; Slip form paving machine operator (including Gunnert, Zimmerman & similar types); Specialized power digger operator- attached to wheel-type tractor; Tower crane (or similar type) operator; Tractor operator (Pusher, Bulldozer, Scraper (400 net horsepower and over; Tugger operator (two or more); Universal equipment operator-Shovel, Backhoe, Dragline, Clamshell, etc., up to 8 cu. yds.

Group 7: Crane operator - pneumatic or crawler (100 ton hoisting capacity and over MRC rating); Helicopter pilot - FAA qualified when used in construction work; Highline cableway operator, over 20 ton rated capacity and using traveling head and tail tower; Remote control earth moving equipment operator; Skip loader operator - all types with rate capacity of 8 cu. yds. or more; Universal equipment - Shovel, backhoe, dragline, clamshell, etc., 8 cu. yds. and over

TRUCK DRIVERS

Group 1: Teamsters; Pickups; Station Wagons; Manhaul driver

Group 2: Dump or flatrack (2 or 3 axle); Water truck (under 2500 gals.); Buggymobile (1 c. y. or less); Tireman; Bus drivers, ambulance driver, self-propelled street sweeper; Warehouseman

Group 3: Dump or flatrack (4 axle); Dumptor or dumpster (less than 7 c. y.); Water truck (2500 gals. but less than 4000 gals.)

Group 4: Dumptor or dumpster (7 c. y. but less than 16 c. y.); Dump or flatrack (5 axle); Water truck (4000 gals. and over); Slurry type equipment or leverman; Flaherty spreader or similar type equipment or leverman; Transit mix (8 c. y. or less)

Group 5: Dump or flatrack (6 axle); Transit mix (over 8 c. y. but less than 10.5 c. y.); Rock truck (i.e. Dart, Euclid and other similar type end dumps, single unit, less than 16 c. y.))

Group 5A: Oil tanker or spreader and/or bootman, retortman or leverman

Group 6: Transit mix (over 10.5 c. y. but less than 14 c. y.); Ross Carrier fork lift or lift truck; Hydro lift, Swedish Crane Iowa 300 and similar types; Concrete pump (when integral part of transit mix truck); Dump or flatrack (7 axle)

Group 7: Dump or Flatrack (8 axles)

Group 8: Off-Highway Equipment driver including but not limited to: 2 or 4 wheel power unit, i.e., Cat DW Series, Euclid, International and similar type equipment, transporting material when top loaded or by external means including pulling water tanks, fuel tanks or other applications under Teamster Classifications; Rock trucks (Dart, Euclid, or other similar end dump types) 16 c. y. and over; Ejectalls; Dumptor or dumpster (16 c. y. and over); Dump or flatrack (9 axles)

Group 8A: Heavy duty mechanic/welder; Body and fender man

Group 8B: Field Equipment serviceman or fuel truck driver

Group 8C: Heavy duty mechanic/welder helper

SUPERSEDEAS DECISION

STATE: Arizona COUNTY: Maricopa
DECISION NUMBER: AZ77-5059 DATE : Date of Publication
Supersedes Decision No. AZ76-5110 dated November 26, 1976, in 41 FR 52198.
DESCRIPTION OF WORK: Residential Construction consisting of single family homes and garden type apartments up to and including 4 stories

LABORERS

Group 1: All Helpers not herein separately classified; Cesspool Diggers and installers; Chat Box Man; Checker, tool dispatcher; Concrete dump manbelt, pipe and/or hoseman; Dumpman and/or spotter; Fence builder, guard rail builder highway; Form strippers; Labor, general or construction; Landscape gardener and nurseryman; Packing rod steel and pans; Rip rap stoneman; Astrm turf layer; Cleanup, Bull gang; Trackman-railroad

Group 2: Cement finisher tender; Concrete curer (impervious membrane); Cutting torch operator; Fine grader (highway, engineering and sewer work only); Kettleman - Tarman; Power type concrete buggy

Group 3: Bander; Chucktender (except tunnel); Creosote tieman; Guinea chaser; Powderman helper; Rip-rap stone paver; Sandblaster (pot tender); Spiker and wrenchers

Group 4: Cement dumpers (Skip-type mixer or handling bulk cement); Chain saw machines (on clearing and grubbing); Concrete vibrating machines; Cribber and shorer (except tunnel); Floor sanders concrete; Hydraulic jacks, and similar mechanical tools not separately classified herein; Operators and tenders of penumatic and electric tools; Pipe caulker and/or backup man (pipeline); Pipe wrapper; Pneumatic gopher; Rigger/Signalman (pipeline)

Group 5: Air and water wash-out nozzleman; Asphalt rakers and ironers; Driller; Grade setter (pipeline); Hand guided trencher and similar operated equipment; Jackhammer and/or pavement breakers; Pipelayers (including but not limited to non-metallic, transite and plastic pipe, water pipe, sewer pipe, drain pipe, underground tile and conduit); Rock slinger; Scaler (using Bos'ns chairs or safety belt); Tampers (mechanical - all types); Precast manhole erector

Group 6: Concrete Cutting Torch; Concrete saw (hand guided); Driller, (core, diamond, wagon or air track); Drill doctor and/or air tool repairman; Gunman and mixerman (gunite); Sandblaster (nozzleman)

Group 7: Concrete Road Form Setter; Gunite nozzleman or rodman; Drillers, Joy Mustang, PR 14J, 220 Gardner-Denver, Hydrasonic; Powderman; Scaler (drillers); Welders and/or pipelayers installing process piping; Form setter and/or builder

POWER EQUIPMENT OPERATORS
(Except Piledriving and Steel Erection)

Group 1: Air compressor operator; Field equipment servicemen helper; Heavy duty repair helper; Heavy duty welder helper; Oiler; Pump operator

Group 2: Conveyor operator; Generator operator - portable; Power grizzly operator; Self-propelled chip spreading machine - conveyor operator; Watch fireman; Welding machine operator - gasoline and diesel power

Group 3: Concrete mixer operator - skip type; Dinky operator - (under 20 tons wt.); Driver-moto paver, Slurry seal machine, and similar type equipment; Motor crane driver; Power sweeper operator - self-propelled; Ross carrier or fork lift operator; Skip loader operator - all types with rated capacity 1-1/2 cu. yds. or less; Wheel type tractor operator (Ford, Ferguson, or similar type) with attachments such as fresno, push blade, post hole auger, mower, etc., excluding compacting equipment

Group 4: A-Frame boom truck or winch truck operator; Asphalt plant firemen; Elevator hoist operator (including Tuskey hoist or similar types); Grade checker (excluding civil engineer); Multiple power concrete saw operator; Pavement breaker, mechanical compactor operator, power propelled; Roller operator - all types - except as otherwise classified; Screed operator; Self-propelled chip spreading machine operator (including Slurry seal machine operator) Stationary pipewrapping and cleaning machine operator; Tugger operator

Group 5: Aggregate plant operator (including crushing, screening and sand plants, etc.); Asphalt plant mixer operator; Beltcrete machine; Boring machine operator; Concrete mechanical tamping, spreading or finishing machine (incl. Clary, Johnson, or similar types); Concrete pump operator; Concrete batch plant operator, all types and sizes; Conductor, brakeman, or handler; Drilling machine, including water wells; Elevating grader operator - all types and sizes (except as otherwise classified); Field equipment serviceman; Highline cableway signalman; Kolman belt loader operator or similar, w/belt width 48" or over; Locomotive engineer (incl. Dinky-20 tons wt. and over); Moto-paver and similar type equipment operator; Operating engineer rigger; Pneumatic-tired scraper operator (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment) up to and including 12 cu. yds.; Power jumbo form setter operator; Pressure grout machine operator (as used in heavy engineering construction); Road Oil mixing machine operator; Roller operator-on all types asphalt pavement; Self-propelled compactor, with blade; Skip loader operator-all types with rated capacity over 1-1/2 but less than 4 cu. yds.; Slip form operator (power driven lifting device for concrete forms); Soil cement road mixing machine operator - single pass type; Stationary Central generating plant operator-rated 300 k.w. or more; Surface heater and planer operator; Traveling pipewrapping machine operator

Group 5-A: Heavy duty mechanic and/or welder; Pneumatic tired scraper, all sizes and types over 12 cu. yds. up to and incl. 45 cu. yds. MRC (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment); Tractor operator (Pusher,

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Bulldozer, Scraper) up to 400 net horsepower rating; Trenching machine operator

Group 6: Auto-Grade Machine (CMI and similar equipment); Boring machine operator (including Mole, Badger and similar type); Concrete mixer operator-paving type, and mobile mixer; Concrete pump operator with boom attachment (Truck mounted); Crane operator-crawler and pneumatic type, under 100 ton capacity MRC; Crawler type tractor operator - with boom attachment; Derrick operator; Forklift operator for hoisting personnel; Grade-all operator; Helicopter hoist; Highline cableway operator (less than 20 tons rated capacity); Mass excavator operator (150 Bucyrus Erie and similar types); Mechanical hoist operator (two or more drums); Motor grade operator - any type power blade; Motor grade operator with elevating grader attachment; Munking machine operator; Overhead crane operator; Piledriver engineer (portable, stationary or skid rig); Pneumatic-tired scraper operator - all sizes and types (Turnapull, Euclid, Cat, D-W, Hancock & similar equipment over 45 cu. yds., MRC); Power driven ditch lining or ditch trimming machine operator; Skip loader operator - all types with rated capacity 4 cu. yds., but less than 8 cu. yds.; Slip form paving machine operator (including Gunnert, Zimmerman & similar types); Specialized power digger operator- attached to wheel-type tractor; Tower crane (or similar type) operator; Tractor operator (Pusher, Bulldozer, Scraper (400 net horsepower and over; Tugger operator (two or more); Universal equipment operator-Shovel, Backhoe, Dragline, Clamshell, etc., up to 8 cu. yds.

Group 7: Crane operator - pneumatic or crawler (100 ton hoisting capacity and over MRC rating); Helicopter pilot - FAA qualified when used in construction work; Highline cableway operator, over 20 tons rated capacity and using traveling head and tail tower; Remote control earth moving equipment operator; Skip loader operator - all types with rate capacity of 8 cu. yds. or more; Universal equipment - Shovel, backhoe, dragline, clamshell, etc., 8 cu. yds. and over

TRUCK DRIVERS

Group 1: Teamsters; Pickups; Station Wagons; Manhaul driver

Group 2: Dump or flatrack (2 or 3 axle); Water truck (under 2500 gals.); Buggymobile (1 c. y. or less); Fireman; Bus drivers, ambulance driver, self-propelled street sweeper; Warehouseman

Group 3: Dump or flatrack (4 axle); Dumptor or dumpster (less than 7 c. y.); Water truck (2500 gals. but less than 4000 gals.)

Group 4: Dumptor or dumpster (7 c. y. but less than 16 c. y.); Dump or flatrack (5 axle); Water truck (4000 gals. and over); Slurry type equipment or leverman; Flaherty spreader or similar type equipment or leverman; Transit mix (8 c. y. or less)

Group 5: Dump or flatrack (6 axle); Transit mix (over 8 c. y. but less than 10.5 c. y.); Rock truck (i.e. Dart, Euclid and other similar type end dumps, single unit) less than 16 c. y.))

Group 5A: Oil tanker or spreader and/or boatman, returtman or leverman

Group 6: Transit mix (over 10.5 c. y. but less than 14 c. y.); Ross Carrier fork lift or lift truck; Hydro lift, Swedish Crane Iowa 300 and similar types, Concrete pump (when integral part of transit mix truck); Dump or flatrack (7 axle)

Group 7: Dump or Flatrack (8 axles)

Group 8: Off-Highway Equipment Driver including but not limited to: 2 or 4 wheel power unit, i.e., Cat DW Series, Euclid, International and similar type equipment, transporting material when top loaded or by external means including pulling water tanks, fuel tanks or other applications under Teamster Classifications; Rock trucks (Dart, Euclid, or other similar end dump types) 16 c. y. and over; Ejectalls; Dumptor or dumpster (16 c. y. and over); Dump or flatrack (9 axles)

Group 8A: Heavy duty mechanic/welder; Body and fender man

Group 8B: Field Equipment serviceman or fuel truck driver

Group 8C: Heavy duty mechanic/welder helper

SUPERSEDEAS DECISION

STATE: Arizona COUNTY: Pima
DECISION NUMBER: AZ77-5060 DATE: Date of Publication
Supersedes Decision No. AZ76-5111 dated November 26, 1976, in 41 FR 52204
DESCRIPTION OF WORK: Residential Construction (consisting of single family homes and garden type apartments up to and including 4 stories)

Group 8B:	10.64	.85	.85		.06
Group 8C:	8.75	.85	.85		.06

LABORERS

Group 1: All Helpers not herein separately classified; Cesspool Diggers and installers; Chat Box Man; Checker, tool dispatcher; Concrete dump manbelt, pipe and/or hoseman; Dumpman and/or spotter; Fence builder, guard rail builder highway; Form strippers; Labor, general or construction; Landscape gardener and nurseryman; Packing rod steel and pans; Rip rap stoneman; Astro turf layer; Cleanup, Bull gang; Trackman-railroad

Group 2: Cement finisher tender; Concrete curer (impervious membrane); Cutting torch operator; Fine grader (highway, engineering and sewer work only); Kettleman - Tarman; Power type concrete buggy

Group 3: Bander; Chucktender (except tunnel); Creosote tieman; Guinea chaser; Powderman helper; Rip-rap stone paver; Sandblaster (pot tender); Spiker and wrenchers

Group 4: Cement dumpers (Skip-type mixer or handling bulk cement); Chain saw machines (on clearing and grubbing); Concrete vibrating machines; Cribber and shorer (except tunnel); Floor sanders concrete; Hydraulic jacks, and similar mechanical tools not separately classified herein; Operators and tenders of penumatic and electric tools; Pipe caulker and/or backup man (pipeline); Pipe wrapper; Pneumatic gopher; Rigger/Signalman (pipeline)

Group 5: Air and water wash-out nozzleman; Asphalt rakers and ironers; Driller; Grade setter (pipeline); Hand guided trencher and similar operated equipment; Jackhammer and/or pavement breakers; Pipelayers (including but not limited to non-metallic, transite and plastic pipe, water pipe, sewer pipe, drain pipe, underground tile and conduit); Rock slinger; Scaler (using Bos'ns chairs or safety belt); Tampers (mechanical - all types); Precast manhole erector

Group 6: Concrete Cutting Torch; Concrete saw (hand guided); Driller, (core, diamond, wagon or air track); Drill doctor and/or air tool repairman; Gunman and mixerman (gunite); Sandblaster (nozzleman)

Group 7: Concrete Road Form Setter; Gunite nozzleman or rodman; Drillers, Joy Mustang, PR 143, 220 Gardner-Denver, Hydrasonic; Powderman; Scaler (drillers); Welders and/or pipelayers installing process piping; Form setter and/or builder

POWER EQUIPMENT OPERATORS
(Except Piledriving and Steel Erection)

Group 1: Air compressor operator; Field equipment servicemen helper; Heavy duty repair helper; Heavy duty welder helper; Oiler; Pump operator

Group 2: Conveyor operator; Generator operator - portable; Power grizzly operator; Self-propelled chip spreading machine - conveyor operator; Watch fireman; Welding machine operator - gasoline and diesel power

Group 3: Concrete mixer operator - skip type; Dinky operator - (under 20 tons wt.); Driver-moto paver, Slurry seal machine, and similar type equipment; Motor crane driver; Power sweeper operator - self-propelled; Ross carrier or fork lift operator; Skip loader operator - all types with rated capacity 1-1/2 cu. yds. or less; Wheel type tractor operator (Ford, Ferguson, or similar type) with attachments such as fresno, push blade, post hole auger, mower, etc., excluding compacting equipment

Group 4: A-Frame boom truck or winch truck operator; Asphalt plant firemen; Elevator hoist operator (including Tuskey hoist or similar types); Grade checker (excluding civil engineer); Multiple power concrete saw operator; Pavement breaker, mechanical compactor operator, power propelled; Roller operator - all types - except as otherwise classified; Screed operator; Self-propelled chip spreading machine operator (including Slurry seal machine operator) Stationary pipewrapping and cleaning machine operator; Tugger operator

Group 5: Aggregate plant operator (including crushing, screening and sand plants, etc.); Asphalt plant mixer operator; Beltcrete machine; Boring machine operator; Concrete mechanical tamping, spreading or finishing machine (incl. Clary, Johnson, or similar types); Concrete pump operator; Concrete batch plant operator, all types and sizes; Conductor, brakeman, or handler; Drilling machine, including water wells; Elevating grader operator - all types and sizes (except as otherwise classified); Field equipment serviceman; Highline cableway signalman; Kolman belt loader operator or similar, w/belt width 48" or over; Locomotive engineer (incl. Dinky-20 tons wt. and over); Moto-paver and similar type equipment operator; Operating engineer rigger; Pneumatic-tired scraper operator (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment) up to and including 12 cu. yds.; Power jumbo form setter operator; Pressure grout machine operator (as used in heavy engineering construction); Road Oil mixing machine operator; Roller operator-on all types asphalt pavement; Self-propelled compactor, with blade; Skip loader operator-all types with rated capacity over 1-1/2 but less than 4 cu. yds.; Slip form operator (power driven lifting device for concrete forms); Soil cement road mixing machine operator - single pass type; Stationary Central generating plant operator-rated 300 k.w. or more; Surface heater and planer operator; Traveling pipewrapping machine operator

Group 5-A: Heavy duty mechanic and/or welder; Pneumatic tired scraper, all sizes and types over 12 cu. yds. up to and incl. 45 cu. yds. MRC (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment); Tractor operator (Pusher,

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Bulldozer, Scraper) up to 400 net horsepower rating; Trenching machine operator

Group 6: Auto-Grade Machine (CMI and similar equipment); Boring machine operator (including Mole, Badger and similar type); Concrete mixer operator-paving type, and mobile mixer; Concrete pump operator with boom attachment (Truck mounted); Crane operator-crawler and pneumatic type, under 100 ton capacity MRC; Crawler type tractor operator - with boom attachment; Derrick operator; Forklift operator for hoisting personnel; Grade-all operator; Helicopter hoist; Highline cableway operator (less than 20 tons rated capacity); Mass excavator operator (150 Bucyrus Erie and similar types); Mechanical hoist operator (two or more drums); Motor grade operator - any type power blade; Motor grade operator, with elevating grader attachment; Mucking machine operator; Overhead crane operator; Piledriver engineer (portable, stationary or skid rig); Pneumatic-tired scraper operator - all sizes and types (Turnapull, Euclid, Cat, D-W, Hancock & similar equipment over 45 cu. yds., MRC); Power driven ditch lining or ditch trimming machine operator; Skip loader operator - all types with rated capacity 4 cu. yds., but less than 8 cu. yds.; Slip form paving machine operator (including Gunnert, Zimmerman & similar types); Specialized power digger operator- attached to wheel-type tractor; Tower crane (or similar type) operator; Tractor operator (Pusher, Bulldozer, Scraper (400 net horsepower and over; Tugger operator (two or more); Universal equipment operator-Shovel, Backhoe, Dragline, Clamshell, etc., up to 8 cu. yds.

Group 7: Crane operator - pneumatic or crawler (100 ton hoisting capacity and over MRC rating); Helicopter pilot - FAA qualified when used in construction work; Highline cableway operator, over 20 ton rated capacity and using traveling head and tail tower; Remote control earth moving equipment operator; Skip loader operator - all types with rate capacity of 8 cu. yds. or more; Universal equipment - Shovel, backhoe, dragline, clamshell, etc., 8 cu. yds. and over

TRUCK DRIVERS

Group 1: Teamsters; Pickups; Station Wagons; Manhaul driver

Group 2: Dump or flatrack (2 or 3 axle); Water truck (under 2500 gals.); Buggymobile (1 c. y. or less); Tireman; Bus drivers, ambulance driver, self-propelled street sweeper; Warehouseman

Group 3: Dump or flatrack (4 axle); Dumptor or dumpster (less than 7 c. y.); Water truck (2500 gals. but less than 4000 gals.)

Group 4: Dumptor or dumpster (7 c. y. but less than 16 c. y.); Dump or flatrack (5 axle); Water truck (4000 gals. and over); Slurry type equipment or leverman; Flaherty spreader or similar type equipment or leverman; Transit mix (8 c. y. or less)

Group 5: Dump or flatrack (6 axle); Transit mix (over 8 c. y. but less than 10.5 c. y.); Rock truck (i.e. Dart, Euclid and other similar type end dumps, single unit) less than 16 c. y.))

Group 5A: Oil tanker or spreader and/or bootman, retortman or leverman

Group 6: Transit mix (over 10.5 c. y. but less than 14 c. y.); Moss Carrier fork lift or lift truck; Hydro lift, Swedish Crane Iowa 300 and similar types; Concrete pump (when integral part of transit mix truck); Dump or flatrack (7 axle)

Group 7: Dump or Flatrack (8 axles)

Group 8: Off-Highway Equipment Driver including but not limited to: 2 or 4 wheel power unit, i.e., Cat DW Series, Euclid, International and similar type equipment, transporting material when top loaded or by external means including pulling water tanks, fuel tanks or other applications under Teamster Classifications; Rock trucks (Dart, Euclid, or other similar end dump types) 16 c. y. and over; Eject-alls; Dumptor or dumpster (16 c. y. and over); Dump or flatrack (9 axles)

Group 8A: Heavy duty mechanic/welder; Body and fender man

Group 8B: Field Equipment serviceman or fuel truck driver

Group 8C: Heavy duty mechanic/welder helper

SUPERSEDEAS DECISION

STATE: NEVADA COUNTY: Clark County (does not include the Nevada Test Site)

DECISION NUMBER: NV77-5061 DATE: Date of Publication

Supersedes Decision No. NV77-5022 dated March 18, 1977, in 42 FR 15273.

DESCRIPTION OF WORK: Residential Construction consisting of single family homes and garden type apartments up to and including 4 stories.

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
ASBESTOS WORKERS	$12.11	.85	$ 1.10

LABORERS

Group 1: Debris Handler; Dry Packing of Concrete and Filling of Form-bolt Holes; Dumpman; Gas and Oil Pipeline Laborers; Demolition Laborers; General or construction laborers; Spotter; Window cleaner

Group 2: Cutting Torch Operator (Demolition); Tarman and Mortarman

Group 3: Guinea Chaser

Group 4: Fine Grader, highway and street paving, airport, runways and similar type heavy construction; Landscape Gardener and Nursery-man

Group 5: Laborers - packing rod steel and pans

Group 6: Underground Laborers including Caisson Bellowers

Group 7: Chucktender (except tunnels); Scaler; Septic Tank Digger and Installer (leadman); Tank Scaler and Cleaner

Group 8: Cesspool Digger and Installer

Group 9: Concrete Curer-impervious Membrane and Oiler of all materials; Making and caulking of all non-metallic pipe joints; Riprap Stonepaver; Sandblaster (pot tender)

Group 10: Asphalt Ironer, Raker, Spreader; Buggymobile; Cement Dumper (on 1 yd. or larger mixers and handling bulk concrete); Cement Grinding machine operator; Concrete Core Cutter; Concrete Saw Man, excluding tractor type; Gas and Oil Pipeline Wrapper, Pot Tender and Form Man; Tree Climber, faller, Chain Saw Operator; Pittsburgh Chipper and similar type; Vibrators and all pneumatic gas, electric and similar mechanical tools not separately classified herein; Roto Scraper

Group 11: Rock Slinger; Scaler, using bosun chair, safety belt or power tools

Group 12: Driller and/or Pavement Breaker

Group 13: Laying of all non-metallic Pipe (including sewer pipe, drain pipe and underground tile)

Group 14: Gas and Oil Pipeline Wrapper - 6 inch pipe and over

Group 15: Cribber or Shorer; Powderman

Group 16: Steel Headerboard Man

Group 17: Driller (Core, Diamond or Wagon); Joy Driller Model TW-M-2A, Gardner-Denver Model DH-163 and similar drills; Sandblaster - Nozzleman

Group 18: Head Rock Slinger

	Basic Hourly Rates	Fringe Benefits Payments

Group 9	11.21	.95	2.00	.50	.04

POWER EQUIPMENT OPERATORS
(Except Piledriving and Steel Erection)

Group 1: Brakeman; Compressor Operator (less than 600 C.F.M.); Engineer Oiler; Generator Operator; Heavy Duty Repairman Helper; Pump; Signalman; Switchman

Group 2: Concrete Mixer Operator, Skip Type; Conveyor Operator; Fireman; Generator, Pump or Compressor (2-5 inclusive); Generator, Pump or Compressor Portable Units (over 5 units, 100 per hour for each additional unit up to nine units); Hydrostatic Pump; Oiler Crusher (Asphalt or Concrete Plant); Plant Operator, Generator, Pump or Compressor; Skip-loader - Wheel type up to 3/4 yd. w/o attachment; Soils Field Technician; Tar Pot Fireman; Temporary Heating Plant; Trenching Machine Oiler; Truck Crane Oiler; Rotary Drill Helper (oilfield)

Group 3: A-Frame or Winch Truck; Elevator Operator (inside); Equipment Greaser (rack); Ford Ferguson (with dragtype attachments); Helicopter Radioman (ground); Power Concrete Curing Machine; Power Concrete Saw; Power-driven Jumbo Form Setter; Ross Carrier (jobsite); Stationary Pipe Wrapping and Cleaning Machine

Group 4: Asphalt Plant Fireman; Boring Machine; Boxman or Mixerman (Asphalt or Concrete); Chip Spreading Machine; Concrete Pump (small portable); Bridge type Unloader and Turntable; Dinkey Locomotive or Motorman (up to and including 10 tons); Equipment Greaser (grease truck); Helicopter Hoist; Highline Cableway Signalman; Hydra-Hammer-Aero Stomper; Power Sweeper; Roller (compacting); Screed (Asphalt or Concrete); Trenching Machine (up to 6 ft.)

Group 5: Asphalt Plant Engineer; Backhoe Operator (up to and including 3/4 yd.); Batch Plant Operator; Bit Sharpener; Concrete Joint Machine Operator (canal and similar type); Concrete Planer Operator; Deck Engine Operator; Derrickman (oil field type); Drilling Machine Operator (including water wells); Forklift Operator (under 5 ton capacity); Machine Tool Operator; Maginnis Internal Full Slab Vibrator; Mechanical Berm, Curb or Gutter (concrete or asphalt); Mechanical Finisher (concrete - Clary-Johnson-Bidwell or similar); Pavement Breaker (truck mounted); Road Oil Mixing Machine; Roller Operator (asphalt or finish); Rubber-tired Earth Moving Equipment (single engine, up to and including 25 yd. struck); Self-propelled Tar Pipelining Machine; Slip Form Pump (power-driven Hydraulic Lifting Device for Concrete Forms); Tugger Hoist (1 drum); Tunnel Locomotive Operator (over 10 and up to and including 30 tons); Stinger Crane (Austin-Western or similar type); Skiploader (Crawler and wheel type over 3/4 yd. and up to and including 1½ yds.); Tractor - Bulldozer, Tamper, Scraper (single engine, up to 100 h.p., Flywheel and similar types up to and including D-5 and similar types)

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Group 6: Asphalt or Concrete Spreading (tamping or finishing); Asphalt Paving Machine (Barber Greene or similar type); BHL Lima Road Pactor, Wagner Pactor or similar; Bridge Crane; Pipe Laying Machine (cast-in-place); Combination Mixer and Compressor (gunite work); Concrete Pump (truck mounted); Concrete Mixer - paving; Crane (up to and including 25 ton capacity); Crushing Plant; Drill Doctor; Elevating Grader; Forklift (over 5 tons); Grade Checker; Gradeall; Grouting Machine; Heading Shield; Heavy Duty Repairman; Hoist (Chicago boom and similar type); Kolman Belt Loader and similar; LeTourneau Blob Compactor or similar type; Lift Slab Machine (Vagtborg and similar types); Lift Mobile; Loader (Athey, Euclid, Sierra and similar type); Material Hoist; Mucking Machine (¼ yd. - rubber-tired, rail or track type); Pneumatic Concrete Placing Machine (Hackley-Presswell or similar type); Pneumatic Heading Shield (tunnel); Pumpcrete Gun; Rotary Drill (excluding Caisson type); Rubber-tired Earth Moving Equipment Operator (single engine - Caterpillar, Euclid, Athey Wagon, and similar types with any and all attachments over 25 yds. and up to and including 50 cu. yds. struck); Rubber-tired Scraper (self-loading - Paddle Wheel type - John Deers, 1040 and similar single unit); Skiploader (Crawler and wheel type - over 1¼ yds., up to and including 6½ yds.); Surface Heaters and Planer; Rubber-tired Earth Moving Equipment, multiple engine (up to and including 25 yds. struck); Trenching Machine (over 6 ft. depth capacity, manufacturers' rating); Tower Crane; Tractor Compressor Drill Combination; Tractor (any type larger than D-5 - 100 flywheel HP and over or similar)(Bulldozer, Tamper, Scraper and Push Tractor, single engine); Tractor (boom attachments); Traveling Pipe Wrapping, Cleaning and Bending; Tunnel Locomotive (over 30 ton); Shovel, Backhoe, Dragline, Clamshell (over 3/4 yd. and up to 3 cu. yds. M.R.C.)

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Group 7: Crane (over 25 ton up to and including 100 ton M.R.C.); Derrick Barge; Dual Drum Mixer; Hoist, stiff legs, Guy Derrick or similar type, up to and including 100 tons; Monorail Locomotive (Diesel, gas or electric); Motor Patrol - Blade Operator (single engine); Multiple Engine Tractor Operator (Euclid and similar type except Quad 9 Cat); Rubber-tired Earth Moving Equipment (single engine over 50 yds. struck); Rubber-tired Earth Moving Equipment (multiple engine, Euclid, Caterpillar and similar) (over 25 yds. and up to 50 cu. yds. struck); Tractor Loader Operator (Crawler and Wheel type over 6½ yds.); Tower Crane Repairman; Shovel, Backhoe, Dragline, Clamshell Operator (over 5 cu. yds. M.R. C.); Woods Mixer and similar Pugmill Equipment; Heavy Duty Repairman - Welder Combination

Group 8: Auto Grader; Automatic Slip Form; Crane (over 100 tons); Hoist, Stiff Legs, Guy Derricks or similar types (capable of hoisting 100 tons or more); Mass Excavator (less than 750 cu. yds.); Mechanical Finishing Machine; Mobile Form Traveler; Motor Patrol (multi-engine); Pipe Mobile Machine; Rubber-tired earth moving equipment (multiple engine, Euclid, Caterpillar and similar type, over 50 cu. yds. struck); Rubber-tired self-loading Scraper (Paddle wheel - Auger type self-loading - 2 or more units); Rubber-tired Scraper (pushing one another without Push Cat, Push-Pull) (50¢ per hour additional); Tandem Equipment (2 units only); Tandem Tractor (Quad 9 or similar type); Tunnel Mole Boring Machine

Group 9: Canal Liner; Canal Trimmer; Helicopter Pilot; Highline Cableway; Remote Controlled Earth Moving Equipment ($1.00 per hour additional); Wheel Excavator (over 750 cu. yds.)

Group 4	9.67	.40	.65		
Group 5	9.85	.40	.65		
Group 6	10.35	.40	.65		

TRUCK DRIVERS

Group 1: Dump Trucks (less than 12 yds.); Trucks (legal payload capacity less than 15 tons); Water and Fuel Trucks (under 2500 gallons); Pickups; Service; Teamster Equipment (highest rate for dual craft operation); Repairman Helper; Drivers of busses (on jobsite used for transportation of up to 25 passengers)

Group 2: Dump Trucks (12 yds. but less than 18 yds.); Trucks (legal payload capacity between 15 and 20 tons); Truck Driver working on gas and oil pipeline (including Winch Truck and all sizes of trucks); Bootman; Water and Fuel Trucks (2500 to 4000 gallons); Truck Greaser; Drivers of busses (on jobsite used for transportation of more than 25 passengers)

Group 3: Transit-mix (less than 3 yds.); Dumpcrete (less than 6½ yds.); Warehouse Clerk; Tireman

Group 4: Dump Trucks (16 yds. up to and including 23 yds.); Trucks (legal payload capacity 20 tons but less than 30 tons); Euclid-type Spreader Trucks; Dumpster; Road Oil Spreader Truck, time spent spreading oil; Transit-mix (3 yds. but less than 6 yds.); Dumpcrete (6½ yds. and over); Fork Lift; Ross Carrier, highway; Water and Fuel Trucks (4000 gallons but less than 6000 gallons)

Group 5: Transit-mix (6 yds. and over); Truck Repairman; Dump Trucks (over 22 yds.); Trucks (legal payload capacity 38 tons and over); Water and Fuel Trucks (6000 gallons and over)

Group 6: D.W. and similar-type equipment, D.W. 10 and D.W. 20, Euclid-type equipment, LeTourneau Pulls, Terra Cobras and similar types of equipment, also PB and similar type trucks when performing work within Teamster jurisdiction, regardless of types of attachment, including power units pulling off-highway belly dumps in tandem

SUPERSEDEAS DECISION

STATE: NEW JERSEY

COUNTIES: ATLANTIC, BURLINGTON, CAMDEN, CAPE MAY, CUMBERLAND, GLOUCESTER, MERCER, MONMOUTH, OCEAN AND SALEM

DECISION NO.: NJ77-3079

DATE: DATE OF PUBLICATION

50¢ per hour on machines where "Cat Head" or "Sheave Point" is at least 100 feet above ground level and less than 140 feet; 75¢ per hour on machines where "Cat Head" or "Sheave Point" is 140 feet or over above ground level.

DECISION NO. NJ77-3079

CLASSIFICATION DEFINITIONS
POWER EQUIPMENT OPERATORS

GROUP 1 - Helicopters pilot/engineer.

GROUP 2 - Autograde-combination subgrader. base MTL spreader & base trimmer (CMI & similar type); autograde placer-trimmer-spreader-combination (CMI & similar types); autograde slip form paver (CMI & similar types); back hoes (all types, including all combination hoe loaders); central power plants (all types); concrete paving machines; cranes (all types, including overhead & straddle travelling type); cranes, gantry; derricks - land or floating (building & heavy construction rate only). drillmaster. quarry master (down the hole drill); draglines; elevator graders; engines, large diesel (1625 HP) and staging pump; front end loaders (5 yds & over); gradalls; grader, rapo; helicopters co-pilot and communication engineer; jacks, screw air hydraulic power operated unit or console type (not hand jack or pile load test type); locomotive (large); mucking machines; pavers (21E and over); paver, resinous. Broyhill; pavement and concrete breaker (i.e. superhammer); pavement breaker truck mounted; piledriver; scooper (loader and shovel) Koehring; shovels; treechopper with boom; trench machines.

GROUP 3 - Pump, staging.

GROUP 4 - A-frame, boom attachment on loaders; boring & drilling machines; brush chopper, chipper & shredder; cableways; carryalls; cherry pickers - 6 tons & under (over 6 tons - crane rate applies); concrete pump; concrete pump system, pumpcrete, squeezecrete & similar types; conveyors, 125' & over; economobiles (hilo, lull, hyster similar type equipment); forklifts; front end loaders (2yds but less than 5yds); groove cutting machines (ride or type); heater planer; hoist (Chicago Boom); Pans, LeTourneau, DW's, Ukes, pumpcrete-unit type; pumpcrete machines. squeezecrete & concrete pumping; scrapers-LeTourneau, DW's Ukes; side booms; squeezecrete; "straddle" carrier, Ross and similar types; winch trucks (hoisting).

DECISION NO. NJ77-3079

CLASSIFICATIONS DEFINITIONS
POWER EQUIPMENT OPERATORS (CONT'D)

GROUP 5 - Aerial platform (used as hoist); hoists all types except Chicago Boom type (building & heavy construction rate only); elevator or house cars (building and heavy construction rate only); roof hoists.

GROUP 6 - Asphalt spreaders; bridge deck finisher; grader, finish only; rollers-blacktop.

GROUP 7 - Asphalt curbing machines; asphalt plant engineer; autograde tube finisher & texturing machine (CMI & similar types); autograde curecrete machine (CMI & similar types); autograde curb trimmer & sidewalk shoulder, slipform (CMI & similar types); barbending machines (power); batchers, batching plant & crusher on site; bet convey or systems; boilers and steam jennies (building & heavy construction rate only); boom type skimmer machines (building & heavy construction rate only); car dumpers (railroad); compressor and blower type units; concrete breaking machines; concrete finishing machines; concrete saws & cutters (ride on type); concrete spreaders-hetzel, recomatic & similar types; concrete vibrators (highway, road, street & sewer construction rate only); conveyors, under 125 ft.; crushing machines; ditching machine, small (ditch witch or similar); drill doctor (duties include dust collector); dope pots (mechanical with or without pump); dumpsters; fine grade machine (large type); front end loaders (1 yd & over but less than 2 yds) - highway, road, street & sewer construction rate only; front end loaders (under 2 yds) - building and heavy construction rates only; generators; giraffe grinders; graders and motor patrols; gunnite machines (excluding nozzle); hammer vibratory (in conjunction with generator); hoppers; hopper doors (power operated); ladders (motorized) - building & heavy construction rate only; laddervator; lights, portable generating light plants; locomotive (dinky type); mechanic; mixers (excepting paving mixers); motor patrols & graders; pavers (under 21E); pavement breakers - small, self-propelled ride on type (also maintains compressor or hydraulic unit); pipe bending machine (power); pitch pump; plaster pump (regardless of size) - building & heavy construction rate only; post hole digger; rod bending machines (power); scales, power; seaman pulverizing mixer; silos; skimmer machines (boom type) - highway, road, street & sewer construction rate only; steam jennies and boilers; steel cutting machines, services & maintains; vibrating plants (used in conjunction with unloading); welder and repair mechanic

DECISION NO. NJ77-3079

CLASSIFICATIONS DEFINITIONS
POWER EQUIPMENT OPERATORS (CONT'D)

GROUP 8 - Compressors (2 or 3 within a total distance of 100' constitutes a battery) - building & heavy construction rate only; welding machines, gas or electric converters of any type - (2 or 3 in battery) - building and heavy construction rates only; welding system, multiple (rectifier transformer type) - building & heavy construction rate only.

GROUP 9 - Brooms & sweepers; bulldozer, D5 and over; firemen; sprinkler and water pump trucks (used on job site or in conjunction with jobsite); stone spreaders; sweepers & brooms; tractors, D8 & over; water and sprinkler trucks (used on job site or in conjunction with job site).

GROUP 10 - Compressors (2 or 3 within a total distance of 100' constitutes a battery) - highway, road, street and sewer construction rate only.

GROUP 11 - Front end loaders (under 1 yd.) - highway, road, street & sewer construction rate only.

GROUP 12 - Bulldozer under D5; rollers - grade fill or stone base; tractors, under D8.

GROUP 13 - Compressor (single); heaters (Nelson or other type including propane, natural gas or flow type units); pumps (4 inch suction & over including submersible pumps); pumps (2 of less than 4 inch suction including submersible pumps); pumps, diesel engine & hydraulic (immaterial of power) - highway, road, street & sewer construction rate only; temporary heating plant (Nelson or other type, including propane, natural gas or flow type units); welding machines, gas or electric converters of any type - single (building & heavy construction rate only); welding machines, gas or electric converters of any type (2 or 3 in battery) - highway, road, street & sewer construction rate only; wellpoint systems (including installation and maintenance).

DECISION NO. NJ77-3079

CLASSIFICATIONS DEFINITIONS
POWER EQUIPMENT OPERATORS (CONT'D)

GROUP 14 - Concrete spreaders, (small type) convey or loaders (not including elevator graders) - highway, road, street & sewer construction rate only; farm tractors (highway, road, street & sewer construction rate only); fertilizing equipment; fine grade machine (small type) - highway, road, street and sewer construction rate only; form line graders (small type) highway, road, street & sewer construction rate only; grease, gas, fuel and oil supply trucks; mixers, concrete small (highway, road, street and sewer construction rate only); mulching equipment; road finishing machines (small type) - highway, road, street and sewer construction only; seeding equipment; tamping machines, vibrating self-propelled; welding machines, gas or electric converters of any type-single (highway, road, street and sewer construction rate only).

GROUP 15 - Assistant engineer/oiler; mechanics helper; tire repair and maintenance.

GROUP 2 - Teamsters & Chauffeurs

GROUP 3 - Drivers on Tractors, Trailers, 10 wheel Flats and Dumps

GROUP 4 - Drivers on Euclids, 10 Wheel Tractors and Tractor Trailer Trucks, Low Beds and Pole Trailers

DECISION NO. NJ77-3079

TRUCK DRIVERS - ZONE 2

GROUP 1 - Ten wheel dump truck driver and trailer dump driver off site

GROUP 2 - Straight truck driver (helper)

GROUP 3 - Warehousemen, fork lift truck and part men

GROUP 4 - Straight truck driver including all "dual purpose" trucks, (straight), transit mix trucks, fuel trucks, seeding trucks, fertilizing trucks, dumpcrete trucks, mulching trucks, "A" frame (when transporting material), water sprinkler trucks, tanks, straight trucks with mechanical tailgates, asphalt distributor trucks, batch trucks and similar type of equipment and mechanics (helper), Pick-up trucks (only when transporting material), & flat bed trucks.

GROUP 5 - All truck towing

GROUP 6 -Winch straight tractor and trailer truck driver and Euclid trailer dump (not self-loading), fuel truck drivers and asphalt oil distributors on dump-crete trucks, transit - mixers, flat bed trucks, low bed trucks, tanks, water tanks, fuel tanks, euclid water sprinkler, asphalt distributor, pole trailer, winch trailer, I beam trucks, euclids (all), and similar type equipment

GROUP 7 - Mechanics

TRUCK DRIVERS - ZONE 3

GROUP 1 - Mechanic Helper

GROUP 2 - Drivers on the following type vehicles: Straight dumps, flats, floats, pick-ups, container haulers, fuel, water sprinkler, road oil, stringer, bead, hot pass, bus, dumpcrete, transit mixers, agitator mixer, half truck, winch truck, side-o-matic, dynamite, powder, X-Ray, welding, skid, jeep, station wagon, stringer, A-Frame, all dual purpose trucks, truck with mechanical tailgate, asphalt distributor, batch trucks, seeding, mulching, fertilizer, air compressor trucks (intransit), parts chaser, escort, scissor, Hi-lift, telescope, concrete breaker, gin pole, stone, sand, asphalt distributor and spreader, Nipper, fuel trucks (drivers on fuel trucks including handling of unit), skid truck (debris container - entire unit), concrete mobile trucks (entire unit), Expediter (parts chaser), beltcrete trucks, pumpcrete trucks, line truck, reel truck, wreckers, utility trucks, tack trucks, warehousemen, warehouse parts-men, yardmen, lift truck in warehouse, helper when required on lift truck in warehouse, warehouse clerk, parts man, material checkers, receivers, shippers, binning men (materials cardex man; helper when required on Broyhill coal tar epoxy truck and asphalt and bituminous distributor truck; drivers on the following type vehicles: Broyhill Coal tar epoxy trucks, Little-Ford Bituminous distributor, Slurry seal truck or vehicle, Thiokol trackmaster pick-up (swamp cat pickup), bucket loader dump truck and any rubber tired tractor used in pulling and towing farm wagons and trailers of any description, similar type vehicles; Off-site and on-site repair shop, team drivers, vacuum or vac-all trucks (entire unit)

DECISION NO. NJ77-3079

CLASSIFICATION DEFINITIONS
TRUCK DRIVERS - ZONE 3 (CONT'D)

GROUP 3 - Drivers on straight 3-axle materials: Truck & Floats

GROUP 4 - Drivers on all Euclid-Type Vehicle: Euclids, International Harvesters, Wabcos, Caterpillar, Koehring, Tractors, and wagons, Dumptors, Straight, Bottom, Rear and side dumps, Carryalls and scrapers (not self-loading - loading over the top), Water sprinkler, Trailers, Water pulls and similar types of vehicles; Drivers on tractors and trailer type vehicles: Flat, Floats, I-beam, Low beds, Water sprinkler, Bituminous transit mix, Road Oil, Fuel, Bottom, Dump Hopper, Rear Dump, Office Shanty, Epoxy, Asphalt, Agitator Mixer, Mulching, Stringer, Seeding, Fertilizing Pole Spread, Bituminous Distributor, Water Pulls, (entire unit) (Tractor Trailer), Reel Trailer and similar types of vehicles

GROUP 5 - Winch trailer drivers

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day

FOOTNOTES:

a. Paid Holidays: Washington's Birthday, Good Friday, Memorial Day; Independence Day; Presidential Election Day, Veterans Day or Thanksgiving Day.

b. Paid Holidays: A through F

c. Employer contributes 4% of the basic hourly rate for 5 years or more of service, or 2% of the basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

d. Paid Holidays: A through F, plus Washington's Birthday, Good Friday, Christmas Presidential Election Day providing the employee works on 3 days for the same employer within a period of 10 working days, consisting of 5 working days before and 5 working days after the day upon which the holiday falls or is observed as such.

DECISION NO. NJ77-3079

FOOTNOTES: (Cont'd)

e. Paid Holidays: A through F, plus Washington's Birthday, Good Friday, Christmas Eve, providing the employee has worked 30 full days for the employer during the 90 calendar days immediately prior to the holiday, and the employee works his regular scheduled work days immediately preceeding and following the holiday.

f. Paid Holidays: A through F, plus Washington's Birthday, Presidential Election Day and Veterans Day provided the employee works any of the 3 days in the 5 work days preceeding the holiday and the first work day after the recognized holiday.

g. $1.00 per week employer contribution to Life Insurance Fund per employee.

h. Employer contributes $2.30 per day per employee to Health and Welfare Funds.

i. Employer contributes $1.60 per day per employee to the Pension Fund.

j. One week vacation after one year's work; two weeks vacation after 3 year's work.

k. Paid Holidays: A through F, plus Washington's Birthday, Veterans' Day and Presidential Election Day provided the employee works 3 days in the week in which the holiday falls.

l. Employer contributes $28.50 per week per employee to the Health Welfare Fund.

m. Employer contributes $17.00 per week per employee to the Pension Fund

n. Employee who has worked or received pay for 90 days within a year prior to his anniversary date shall receive 56 hours straight time vacation pay; for 3 years but less than 8 years of service he will receive 100 hours of straight time vacation pay; more than 8 years but less than 15 years he will receive 125 hours of straight time vacation pay; 15 years or more he will receive 165 hours of straight time vacation pay.

o. Paid Holidays: A through F, plus Washington's Birthday, Presidential Election Day, Armistice Day, 2 Personal Holidays, Good Friday, and Christmas Eve afternoon (provided the employee works that morning) on the condition that the employee works or is available for work on at least 2 days in the week in which the holiday occurs.

DECISION NO. NJ77-3079

FOOTNOTES: (Cont'd)

p. Employees working or receiving pay for 80 days within a year receive one weeks paid vacation (40 hours); 125 days receive two weeks vacation (96 hours); 145 days receive 15 days (120 hours); 15 years seniority and 145 days receive 4 weeks vacation (160).

q. Paid Holidays: A through F,plus Lincoln's Birthday, Washington's Birthday, Good Friday, General Election Day, Columbus Day and Veterans' Day provided the employee has been assigned to work or "shapes" one day of the calendar week during which the holiday falls.

r. Paid Holidays: A through F plus Armistice Day and Washington's Birthday.

STATE: New Mexico COUNTY: Statewide
DECISION NO. NM77-4116 DATE: Date of Publication
Supersedeas Decision No. NM77-4074 dated April 8, 1977 in 42 FR 18825

DESCRIPTION OF WORK: Building and Heavy Construction (Heavy construction consists of modifications, addition, alterations or repairs on railroad construction projects, drainage project, aqueducts, irrigation projects, flood control projects, reclamation projects, reservoirs, water supply projects (exclusive of distribution lines and appurtenances & filtration plants earth dams(over 1 million yds) concrete dams, dikes, levees, revetments, channels, channel cutoffs, intakes, dredging projects, jetties, breakwaters, docks, harbors, excavation and disposals by contract or overburden and the excavation and loading of all material from which the overburden has been removed, open-pit strip mining, viaducts, pedestrian tunnels, piers, abutments and clearing and grubbing, incidental to such heavy construction projects (exclusive of such work in connection with highway, building and light construction projects), subways, tunnels, shafts, missile silos and missil projects. (Except buildings underground), hydroelectric power plant projects and power plant facilities in their entirety (exclusive of steam plants), electric transmission lines, and including the operation, maintenance and repair of all land and floating plant, equipment, vehicles and other facilities used in connection with and serving the aforementioned work and serviced incidental to such projects) (also, including Residential construction in Santa Fe, McKinley, Bernalillo, Rio Arriba, Taos, Sandoval, Valencia and San Juan Counties, but not on the Navajo Indian Reservation).

ELECTRICIANS-CABLE SPLICERS ZONE DEFINITIONS

ZONE I
AREA 1 - Bernalillo, Santa Fe, Torrance, DeBaca, Guadalupe, Quay, San Miguel, Mora, Harding, Union, Colfax, Taos Rio Arriba, Grant, Sandoval, Valencia, Socorro, Catron, McKinley, Sierra and all of San Juan County excluding the Navajo Indian Reservation.
AREA 2 - Chaves, Curry, Lincoln and Roosevelt Counties

AREAS 1-A & 2-A
From nearest basing point cities, towns and mileage from main post office in the following towns:
Albuquerque - 15 miles from main post office
Santa Fe - 15 miles from main post office
Las Vegas - 8 miles from main post office
Farmington - 8 miles from main post office
Raton - 6 miles from main post office
Tucumari - 6 miles from main post office
Aztec - 6 miles from main post office
Roswell - 12 miles from main post office
Ruidoso - 12 miles from main post office
Portales - 12 miles from main post office
Carrizozo - 12 miles from main post office
Clovis - 12 miles from main post office
Gallup - 10 miles from main post office
*Pojoaque - 2 miles from main post office
*All areas adjacent to Pojoaque that are over two (2) miles distant from the main post office in that town will be zoned out of Santa Fe.

AREAS 1-B & 2-B
Area 1-B and 2-B extending up to 30 miles beyond Area 1-A & 2-A
AREAS 1-C & 2-C
Area 1-C & 2-C extending up to 30 miles from Area 1-A & 2-A
AREAS 1-D & 2-D
Area 1-D & 2-D anything beyond 30 miles from Area 1-A & 2-A
ZONE II - Los Alamos County
ZONE III - Dona Ana, Otero, Luna, Hidalgo Counties
Zone 3-A - Within 10 miles radius from the post office in Las Cruces and within a 5 mile radius from the Post Office in Alamogordo.
Zone 3-B - Dona Ana, Otero, Luna, and Hidalgo Counties (except that area specified in Zone 3-A)
ZONE IV - Eddy and Lea Counties - the following zones shall be designated from the main post office of Artesia, Carlsbad, Hobbs and Lovington:
Zone 4-A - 0 - 12 miles from main post office
Zone 4-B - 12 to 22 miles from main post office
Zone 4-C - 22 to 40 miles beyond main post office
Zone 4-D - 40 miles and beyond main post office

ZONE V - Single or mutiple, family dwelling or apartments up to and including 26 units under one roof not exceeding two stories - Bernalillo, Santa Fe, Taos, Rio Arriba, Sandoval, Valencia and San Juan Counties, but not on the Navajo Indian Reservation

PAINTERS' ZONE AND CLASSIFICATION DEFINITIONS

PAINTERS:
ZONE I - San Juan, McKinley, Bernalillo, Torrance, Guadalupe, Quay, Catron, Socorro, Lincoln, DeBaca, Roosevelt, Chaves, Valencia, Sierra, Grant, Hidalgo, Curry, Lea and Eddy Counties, New Mexico.
Zone 1-A - Painters, roller and hand textures
Zone 1-B - Painters, spray, sandblasting, painter on steel bridges, tanks towers, pipe and structural
Zone 1-C - Paperhanger
Zone 1-D - Drywall finisher; ames tool operator
Zone 1-E - Hand finisher machine texture

ZONE II - Colfax, Harding, Los Alamos, Mora, Sandoval, San Miguel, Rio Arriba, Taos, Union and Santa Fe Counties.
Zone 2-A - Painters and roller
Zone 2-B - Paperhangers
Zone 2-C - Spray, sandblast, steel, special coating applicator
Zone 2-D - Vinyl hangers
Zone 2-E - Drywall finisher tool and machine texture
Zone 2-F - Hand texture
Zone 2-G - Hand finisher

ZONE III - Luna, Otero and Dona Ana Counties
Zone 3-A - Brush, tapers and rollers
Zone 3-B - Spray, sandblasting
Zone 3-C - Ames tool and steel brush after erection
Zone 3-D - Stripping machine
Zone 3-E - Radio towers, water tanks, smoke stack
Zone 3-F - Radio towers, water tanks, smoke stacks 50 to 75 feet
Zone 3-G - Radio towers, water tanks, smoke stacks 75 to 100 feet
Zone 3-H - Radio towers, water tanks, smoke stacks 100 to 200 ft
Zone 3-I - Radio towers, water tanks, smoke stacks 200 to 300 ft
Zone 3-J - Radio towers, water tanks, smoke stacks 300 to 400 ft.

ZONE IV -Residential Construction in Santa Fe, Sandoval, Rio Arriba & Taos Cos.
Zone 4-A - Brush and roller
Zone 4-B - Spray, parking lot striping
Zone 4-C - Paperhangers
Zone 4-D - Vinyl hangers
Zone 4-E - Drywall finishers - ames tool op., machine texture
Zone 4-F - Drywall finishers - hand finisher

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS (BUILDING & RESIDENTIAL)

GROUP I
Fireman, oiler, screedman, scale operator such as (Bin-A-Batch), rubber tired farm type tractor, tractors under 50 HP w/o attachments, breakman, concrete paving curing machine (bridge-type), helpers; mechanic, welder grease truck.

GROUP II
Roller, sheepsfoot or pneumatic self propelled w/o dozer, concrete conveyor, service truck operator (head oiler), air compressor (300 CFM and over), pumps (6" and over), screening plants, concrete mixers (under 1 CY), concrete saw or grinder-span type, 1 drum hoists, air tugger, elevating belt type loaders, forklift, lumber stacker, tractor-farm type (under 50 HP w/attachments), motorman and industrial locomotive operator, winch trucks, front end loader (under 2 CY), power plants which generate over 15 KW, welding machines

GROUP III
Bituminous distributors, boilers, retort and hot oil heaters, concrete mixers (1 CY and over), concrete paver-single drum, drilling equipment, motor graders (rough), shaft and tunnel equipment; (refrigeration, slusher, jumbo form), trenching machines (all types), pump crete and gunite machines, slipform paver, mechanical bullfloats, concrete slab spreading machine, concrete slab finishing machines, crushing plants.

GROUP IV
Front end loader (2 thru 10 CY), rollers, steel wheeled-all types, bulldozers, scrapers, (motor or towed), elevating graders, concrete batching plants, self propelled rollers equipped with dozer. Twin bowl scrapers and quad 8 or 9 pushers (35¢ over basic rate). Three bowl scrapers (60¢ over basic rate). Tractor (farm type w/hydraulic backhoes).

GROUP V
Hydraulic cranes with less than 50 feet of boom (20 tons and under). Concrete paver double drum. 2 drum hoist, auto fine grader, cat cranes, hysters, side and swingboom cats.

GROUP VI
Mucking machines, all types; motor grader, finish; mechanic, welder

GROUP VII
Steam engineers; loader (front end over 10 CY); concrete pump (snorkel type)

GROUP VIII
All shovel type equipment; cranes, draglines, backhoes, derricks, guy and stiff leg; pipemobile (No. 2 op.), pile driver, hydraulic cranes (20 tons and over), mine hoist, belt loader ("C.M.I." type), cranes & draglines, with booms and jib over 150 feet - 25¢ per hour additional.

GROUP IX
Shovel (wheel type), boring machine (tunnel or shaft mole), pipemobile

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS (HEAVY CONSTRUCTION)

GROUP I
Fireman, oiler, screedman, scale operator such as (bin-a-batch), rubber tired farm type tractor, tractors under 50 HP w/o attachments, breakman, concrete paving curing machine (bridge-type), helpers; (mechanic, welder), grease truck

GROUP II
Rollers, sheepsfoot or pneumatic self propelled w/o dozer, concrete conveyor, service truck operator (head oiler), air compressor (300 CFM and over), pumps, (6" and over), screening plants, concrete mixers (under 1 CY), concrete saw or grinder-span type, 1 drum hoist, air tugger, elevating belt type loaders, forklift, lumber stacker, tractor-farm type (under 50 HP w/attachment), motorman and industrial locomotive operator, winch truck front end loader (under 2 CY), power plants which generate over 15 KW, welding machines

GROUP III
Bituminous distributors, boilers, retort and hot oil heaters, concrete mixers (1 CY and over), concrete paver-single drum, drilling equipment, motor graders (rough), shaft and tunnel equipment, refrigeration, slusher, jumbo forms, trenching machines, (all types), pump crete and gunite machines, slipform paver, mechanical bullfloats, concrete slab spreading machine, concrete slab finishing machine, asphalt plants, bituminous finishing machines, crushing plants

GROUP IV
Front end loader (2 thru 7 CY), rollers steel wheeled (all types), bulldozers, scrapers, (motor or towed), elevating graders, concrete batching plants, self-propelled rollers, equipped with dozer, twin-bowl scrapers and quad 8 or 9 pushers (35¢ over basic rate), three bowl scrapers (60¢ over basic rate).

GROUP V
Front end loader (over 7 CY thru 10 CY), hydraulic cranes, with less than 50 feet of boom (20 tons and under), concrete paver, double drum, cat cranes, hysters, side and swingboom cats, 2 drum hoist, auto fine grader.

GROUP VI
Mucking machines,alltypes,motor grader (finish), mechanic, welder

GROUP VII
Steam engineers, loader (front end over 10 CY)

GROUP VIII
All shovel type equipment; cranes, draglines, backhoes, derricks, guy and stiff leg,pipemobile (NO. 2 operator), piledriver,hydraulic cranes (20 tons and over), mine hoist, belt loader ("C.M.I." Type)

GROUP IX
Shovel (wheel type), boring machine (tunnel or shaft mole), pipe mobile

TRUCK DRIVERS CLASSIFICATION DEFINITIONS (BUILDING, RESIDENTIAL AND HEAVY CONSTRUCTION.

GROUP I
Pickup 3/4 ton and under, service station, including lubrication, light tire repair and washer, swamper or riding helper, 2 or up

GROUP II
Bus or taxi driver, dump or batch truck under 8 C.W.L.C.: flat bed (bobtail) 2 ton and under; mechanic and welder helper; fork lift under 5 ton MRC.

GROUP III
Dump trucks (including all highway and off highway) 8 up to 16 C.Y.W.L.C.; water, fuel or oil trucks less than 3,000 gal., flat bed (bobtail) over 2 tons

GROUP IV
Distributor driver; heavy tire repairman; lumber carrier driver; young buggy or similar equipment, transit mix or agitator 2 or 3 axle bobtail equipment; scissor truck; bulk cement bobtail 2 or 3 axles; semi-trailer driver (flat-bed or van single axle); forklifts 5 ton and over MRC: field equipment servicemen.

GROUP V
Dumpster and dumpcrete driver; water, fuel or oil truck, 3,000 to 6,000 gal; lowboys and light equipment driver; euclid type tank wagon under 6,000 gal.

GROUP VI
Vacuum truck; dump trucks (including all highway and off-highway 16 up to 22 C.Y.W.L.C.

GROUP VII
Transit mix or agitator semi or 4 axle equipment driver; flaherty truck type spreader box driver; slurry truck driver; bulk cement driver; semi-doubles; 4 axle bobtail; winch truck and "A" frame; dump trucks (including all highway and off-highway) 22 CY up to 35 C.Y.W.L.C.; head field equipment servicemen.

GROUP VIII
Euclid diesel power turnarocker; terra coba-DW10--DW20--LeTourneau Pulls and similar diesel powered equipment when used to haul materials and assigned to a teamster--lowboy heavy equipment driver; water, fuel or oil trucks 6,000 gal. and over including tank wagon drivers, semi-trailer driver (flat-bed or van tandems); light equipment mechanic; dump trucks (including all highway and off-highway) 35 C.Y.W.L.C. and over; truck and trailer or semi-trailer (Flatbed); eject all

GROUP IX
Warehousemen including material checker; cardex man; lowboy (heavy equipment double gooseneck); heavy equipment mechanic; welder (body and fender men)

TEAMSTERS classifications not listed shall be paid a rate comparable to classifications listed.

LEAD BURNERS					
AREA I	$11.35	.63	1.42		.16
AREA II	11.85	.63	1.42		.16
AREA III	13.20	.63	1.42		.16
AREA IV	11.98	.63	1.42		.16

LEAD BURNERS BASING POINT & AREA DEFINITIONS

BASING POINT CITIES OR TOWNS:
Albuquerque, Alamogordo, Anthony, Artesia, Belen, Carlsbad, Clovis, Deming, Espanola, Farmington, Gallup, Grants, Hobbs, Las Cruces, Las Vegas, Lovington, Portales, Raton, Socorro, Roswell, Ruidoso, Santa Fe, Silver City, Santa Rosa, Taos, Tucumcari and Truth or Consequence.

AREA I
Shall include a distance of seven road miles inclusive beyond the city or town limits.

AREA II
Shall extend a distance of 4 road miles inclusive beyond the outer perimeter of area I.

AREA III
Shall apply to all areas not within areas 1 or 2, or not within the specific areas.

AREA IV (SPECIFIC AREA)
Los Alamos, White Rock, South Mesa, McGregor Range, White Sands Missile Range, and/or Proving Grounds.

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

FOOTNOTES:
a - Includes $0.07 contribution to the Occupational Health Fund.
b - 1st 6 months - none; 6 months to 5 years, 2¢; over 5 years, 4¢ of basic hourly rate.
c - Paid Holidays; A through F

PAID HOLIDAYS:
A- New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

SUPERSEDEAS DECISION

STATE: NEW YORK
COUNTIES: BRONX, KINGS, QUEENS, NEW YORK AND RICHMOND
DECISION NO.: NY77-3025
DATE: DATE OF PUBLICATION
Supersedes Decision No. NY76-3256 dated October 8, 1976 in 41 FR 44645
Description of Work: Building Construction (does not include single family homes and garden type apartments up to and including 4 stories), Heavy and Highway Construction.

	Basic Hourly Rates	Fringe Benefits Payments H & W	Pensions	Vacation	Education and/or Appr. Tr.

Welders-receive rate prescribed for craft performing the operation to which welding is incidental.

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:

a. Employer contributes $7.00 per day to an Annuity and Security Benefit fund.

b. Holidays: A through F, Columbus Day, Day after Thanksgiving, Election Day, and Employees Birthday.

c. Holidays: A through F, Columbus Day, Election Day, Lincoln's Birthday, Washington's Birthday, Armistice Day.

DECISION NO. NYTT-3025

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.

FOOTNOTES (CONT'D):

d. Employees with 6 months or more but less than 5 years service receive 2 weeks vacation, 5 or more years of service receive 3 weeks vacation.

e. Employer contributes $7.00 per day to an Annuity Fund.

f. Holidays: New Year's Eve and Christmas Eve provided the employee works a full half day preceeding the holiday.

g. Work on Christmas Eve and New Year's Eve will terminate at Noon, but employee will receive a full days pay.

h. Holidays: B,C, D, E, Election Day, Columbus Day, providing the employee works at least 1 day in the week in which the holiday occurs.

i. If men work the last regular work day before Christmas Day or the last regular day before New Year's Day, the work day will end at Noon, but men will be paid for a full 7 hour day; However, if men are required to work after Noon they will be paid an additional time and a half for the hours worked.

j. Holidays: A through F, Washington's Birthday, Christmas Eve, Good Friday, providing the employee has worked 30 full days during the 90 calendar days prior to the holiday, and regular scheduled work days immediately preceeding and following the holiday.

k. One half days pay for Labor Day.

l. Employer contributes $6.01 per day to an additional Security Benefit Fund.

m. Employees with 6 months or more but less than 5 years service recieve 2 weeks vacation, 5 or more years of service but less than 15 years service receive 3 weeks vacation, 15 or more years of service receive 4 weeks vacation.

n. Holidays: A through F, Lincoln's Birthday, Washington's Birthday, Election Day, Veteran's Day, provided the employee works 2 days in the calendar week in which the holiday falls and each remaining work day during such calendar week.

Class 2: Mine hoist, Cranes, etc, used as mine hoists.

Class 3: Gradeall, Yardstones, Cranes (with digging buckets including sand dock cranes, bridge cranes), Trenching machines.

Class 4: Rigs (under direction of a dockbuilder foreman), Derrick boats, Tunnel shovels, Piledrivers.

Class 5: Raise Bore Drill.

Class 6: Mucking machines, Back filling machines, Cranes, Power dual drums.

Class 7: Elevator (manuallly operated), Concrete pavers, Cableways, Land Derricks, Mixers, Power Houses (which contain low pressure units).

Class 8: Power Houses (other than above), Compressors (3 or more in battery), Stone Crusher, Double Drum Hoist, Concrete pumps, Well point pumps, Tugger machines (caissons), Drilled in caissons, Soil solidification equipment, Welding machines (used for steel erection), Concrete plant, Conveyor attachment, Well Drilling machine.

Class 9: River cofferdam pumps, Welding machines, Boilers, High pressure, Compressors (portable, single or two in a battery), not over 100' apart, Concrete breaking machines, Hoists, Single drum, Load Masters, Locomotives and Dinkies over 10 tons, Mixers (concrete with loading attachment), Push button machines.

Class 10: Long Boom Land Cranes:
a---100' to 149'
b---150' to 249'
c---250' to 349'
d---350' to 450'

Class 11: Junior engineers when operating loaders rubber-tired and/or tractor type with a manufacturer's minimum rated bucket capacity of 6 cubic yards and over.

DECISION NO. NY77-3025

POWER EQUIPMENT OPERATORS (CONT'D)
HEAVY AND HIGHWAY CONSTRUCTION

Class 12: Junior engineers when operating the following equipment and attachments: Scrapers, Turnapulls, Tugger hoists used exclusively for handling excavated material, Tractors (rubber tired and/or track type), Hysters and roustabout cranes, Back scratchers, Cherrypickers under 20 tons, Austin Western and machines of a similar nature, Bulldozers, Loaders rubber tired and/ or tractor type with a manufacturer's minimum rated bucket capacity or less than 6 cubic yards, Conveyors, Motor Graders, Curb and Gutter Pavers and machines of a similar nature.

Class 13: Junior engineers when operating the flowing pieces of minor equipment: Tractors, Locomotives 10 tons and under, Post hole diggers, Motor Generators, Road Finishing machines, Mixers 16S and under with or without loading devices, Rollers 5 tons and under, Tugger hoists, Dual purpose trucks, Fork lifts, Dumpster Dumpsters, Firemen tending to: Steam operated shovels, power boilers, steam operated piledrivers, steam operated derrick boats, steam operated water rigs.

Class 14: Apprentice engineers and oilers (all gasoline, electric, diesel, or air operated), Shovels, Cranes, Draglines, Backhoes, Keystones, Cradells, Pavers, Trenching machines, Concrete pumps, Gunite machines, Compressors (3 or more in a battery), Power Houses, there duties shall be to assist the engineer in oiling, greasing and repairing of all machines, giving signals when necessary, chaining buckets and scale boxes, driving truck cranes, driving and operating fuel and grease truck.

SUPERSEDEAS DECISION

STATE : NEW YORK

COUNTIES: BRONX, KINGS, NEW YORK, QUEENS, RICHMOND

DECISION NO.: NY77-3044

DATE: DATE OF PUBLICATION

Supersedes Decision No. NY77-3022 dated February 4, 1977 in 42 FR 7063

DESCRIPTION OF WORK: Residential Construction consisting of single family homes and garden type apartments up to and including 4 stories.

RESIDENTIAL CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.

Welders-receive rate prescribed for craft performing operation to which welding is incidental.

PAID HOLIDAYS:

A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day; G-Columbus Day; H-Day after Thanksgiving

FOOTNOTES:

a. Employer contributes $7.00 per day to an Annuity and Security Benefit Fund.

b. Paid Holidays: A through F.

c. Paid Holidays: A through G; Lincoln's Birthday, Washington's Birthday; Election Day; Armistice Day.

d. Employees with 6 months or more but less than 5 years service receive 2 weeks vacation, 5 or more years of service receive 4 weeks vacation.

e. Employees with 6 months or more but less than 5 years service receive 2 weeks vacatio 5 or more years but less than 15 years receive 3 weeks vacation, 15 or more years of service receive 4 weeks vacation.

f. Paid Holidays: ½ day's pay for Labor Day.

g. Paid Holidays: A through F; Washington's Birthday, Christmas Eve, Good Friday, providing the employee has worked 30 full days during the 90 calendar days prior to the holiday, and the regular scheduled worked days immediately preceeding and following the holiday.

h. Employer contributes $5.00 per day to an Annuity Fund.

i. Paid Holidays: New Year's Eve and Christmas Eve, providing the employee works a full half day preceeding the holiday.

j. Employer contributes $7.00 per day to an Annuity Fund.

k. Paid Holidays: A through G; Lincoln's Birthday, Washington's Birthday, Election Day, Veteran's Day, providing the employee works 2 days in the calendar week in which the holiday falls and each remaining work day during such calendar week.

l. For each 15 days within the contract year an employee will receive 1 days vacation with pay, with a maximum vacation of 3 weeks per year.

m. Paid Holidays: B,C,D,E,G,Election Day, providing the employee works at least 1 day i the week in which the holiday occurs.

n. Work on Christmas Eve and New Year's Eve will terminate at noon, but the employee will receive a full day's pay.

p. Employer contributes $6.01 per day to an additional Security Benefit Fund.

q. If men work the last regular work day before Christmas Day, or the last regular work day before New Year's Day, the work day will end at Noon but men will be paid for a full 7 hour day; however, if men are required to work after 12 Noon they will be paid additional time and one-half for the hours worked.

FOOTNOTES (CONT'D):

r. Employer contributes $4.50 per day to an Annuity Fund.

LABORERS (Area 2)
All Counties West of the 120th Meridian (except those enumerated in Areas 3 and 4)

Group 1: General Laborer; Nipper; Truck Spotter; Pitman; Brush Cutter; Choke Setter; Concrete and Monolithic Laborer; Pot Tender; Asphalt Laborer; Ditch Digger; Drierman; Concrete Form Stripper; Carpenter Helper; Track Laborer; Wellpoint; Header Laborer and Guardrail Erector

Group 2: Dumpman; Faller and Bucker, hand; Powderman's Helper; Sloper (over 20'); Wagon Driller and Air Trac Helper

Group 3: Groutman (pressure) including post tension beam; Power Tools (light duty) Chippers, Grinders, Tampers, and similar electric and air operated tools; Swinging Scaffold or Boatswain Chair over water or over 15' in height; Topman

Group 4: Concrete Saw Operator; Pipe Pot Tender; Power Wheel Barrow or Buggy; Power Tools (heavy duty); Jackhammer; Pavement Breaker, Vibrator Tampers (multiple and self-propelled); Railroad Spike Puller; Rakers-Asphalt

Group 5: Form Setter (steel forms); Grademan and Stake Hopper; Rodder; Nozzleman (concrete pump, green cutter when using combination of high pressure air and water on concrete and rock, sand blast, gunnite, shotcrete); Spreader (carries grade with Rodder)

Group 6: Faller and Bucker; Chain Saw; High Scaler; Mortarman and Hod Carrier; Pipe Layer and Caulker; Pipe Wrapper; Timberman Sewer; Wagon Driller and Air Track; Manhole Builder; Laser Beam Operator

Group 7: Cement Dumper - paving; Powderman

Tunnel Work

Group 8: Topman and Bull Gang

Group 9: Chuck Tender; Mucker and Laborer; Nipper; Brakeman

Group 10: Powderman's Helper

Group 11: Miner (including Monolithic work); Spader; Re-timberman; Maintenance Man; Laser Beam Operator

Group 12: Miner, Shaft and Raise

Group 13: Powderman

LABORERS (Area 4)

Those portions of Chelan, Douglas, Kittitas, Okanogan and Yakima Counties West of the 120th Meridian

Group 1: General Laborer; Carpenter Tender; Form Stripper; Track Laborer; Choker Setter; Fence Laborer

Group 2: Air Track and Wagon Drill Helper; Crusher Feeder; Dumpman; Powderman Helper; Sloper, over 20 feet, faller and bucker, hand

Group 3: Driller Chipper; Grinder, Tampers and similar light power tools; Grout Man (power); Top Man, Swinging Scaffold or Boatswain Chair over water or over 25' in height

Group 4: Asphalt Raker and Spreader; Cement Handler; Cask or Bulk; Dope Pot Tender; House Wreckers; Jackhammer; Pavement Breaker; Vibrator; Track Spike Puller; Concrete Saw and similar Heavy Power Tools; Power Buggy Tampers (multiple and self-propelled)

Group 5: Form Setter, Steel Forms; Grademan; Stake Hopper; Spreader, Rodder, Nozzleman: Concrete Pumps, Gunnite, Sand Blast, Shot-crete, Green Cutter when using combination of high pressure air and water on concrete and rock

Group 6: Air Track and Wagon Drill Operator: High Scaler; Pipe Layer and Caulker; Pipe Wrapper; Timber Man; Mortar Man and Hod Carrier; Faller and Bucker; Chain Saw

Group 7: Cement Dumpers - paving

Group 8: Tunnel Work:
- Class A: Topman and Bull Gang
- Class B: Chuck Tender; Mucker and Laborer; Nipper; Brakemen
- Class C: Powderman Helper
- Class D: Miner (including Monolithic Worker); Re-timberman; Maintenance Man; Spader; Laser Beam Operator
- Class E: Miner; Shaft and Raise
- Class F: Powderman

FRINGE BENEFITS:

Health & Welfare	$.80
Pensions	.90
Apprenticeship Training	.03

*ZONE 1: Within a 15 mile radius from the center of the following Cities: Moses Lake, Pasco, Spokane and Walla Walla in Washington - and Coeur d' Alene and Lewiston in Idaho

*ZONE 2: From a 15 to 45 mile radius from the center of the above named Cities, except Coeur d' Alene and Walla Walla which are limited to a 15 mile zone only

*ZONE 3: Over a 45 mile radius from the center of the above named Cities except Coeur d' Alene and Walla Walla which are limited to a 15 mile zone only.

POWER EQUIPMENT OPERATORS (Area 1)

All Counties and portions of Counties East of the 120th Meridian

Group 1: Bit Grinders; Bolt Threading Machine; Compressors, under 2,000 cu. ft. per minute gas, diesel or electric power; Crusher Feeder (mechanical); Deckhand; Driller's Helper; Fireman and Heater Tender; Grade Checker; Helper (mechanic or welder, H.D.); Oiler; Oiler and Cable Tender, Mucking Machine; Pumpman; Rollers, all types on subgrade (farm type, Case, John Deere and similar - or compacting or vibrator) except when pulled by dozer with operable blade; Steam Cleaner; Welding Machine

Group 2: A-Frame Truck (single-drum); Assistant Refrigeration Plant (under 1,000 tons); Assistant Plant Operator, Fireman or Pugmixer (asphalt); Bagley or Stationary Scraper; Batch Plant and Wet Mix Operator, single unit (concrete); Belt Finishing Machine; Bending Machine (pipeline); Blower Operator (cement); Cement Hot; Compressor (2,000 cu. ft. or over, 2 or more - gas, diesel or electric power); Concrete Saw (multiple cut); Distributor Leverman; Elevator Hoisting Materials; Dope Posts (power agitated); Fork Lift or Lumber Stacker, Hydra-lift and similar; Gin Trucks (pipeline); Hoist, single drums; Loader (bucker elevator and conveyors); Longitudinal Float; Mixer Post Hole Auger or Punch; Power Broom; Railroad Ballast Regulation Operator (self-propelled); Railroad Power Tamper Operator (self-propelled); Railroad Power Tamper Jack Operator (self-propelled); Spray Curing Machine (concrete); Spreader Jack Operator (self-propelled); Straddle Buggy (Ross and similar on construction job site); Tractor (farm type R/T with attachments except backhoe); Tugger Operator; Ditch Witch or similar

POWER EQUIPMENT OPERATORS (Area 1) (Cont'd)
All Counties and portions of Counties East of the 120th Meridian

Group 3: A-Frame Truck (2 or more drums); Assistant Refrigeration Plant and Chiller Operator (over 1,000 tons); Backfillers (Cleveland and similar); Beltcrete Conveyors with power pack or similar; Belt Loader (Kocal or similar); Blade Operator (motor patrol and attachments); Boat Operators; Boom Cats (side); Boring Machine (earth); Boring Machine (rock under 8" bit)(Quarry Master, Joy or similar); Bump Cutter (Wayne, Saginaw or similar); Canal Lining Machine (concrete); Chipper (without crane); Cleaning and Doping Machine (pipeline); Concrete Pumps (squeeze-crete, flow-crete, pump-crete, Whitman and similar); Drills (Churn, Core, Calyx, or Diamond); Elevating Belt-type Loader (Euclid, Barber Green or similar); Elevating Grader-type Loader (Dumor, Adams or similar); Equipment Serviceman, Greaser and Oiler; Generator Plant Engineers (diesel, electric); Gunite Combination Mixer and Compressor; Hoist (2 or more drums or tower hoist); Loader (Overhead and Front-end under 4 yards, R/T); Locomotive Engineer; Mixermobile; Mucking machines; Paver or Curb Extruder (asphalt and concrete); Pump (grout or jet); Rollerman (finishing pavement); Rubber-tired Scraper (one motor with one scraper, under 40 yards); Screed Operator, Soil Stabilizer (P & H or similar); Spreader Machine; Tractor (Crawler, including Dozer, Scraper, Drills, Booms, Rollers, etc.); Traverse Finishing Machine; Trenching Machines (under 7 feet depth capacity); Turnhead Operator; Vacuum Drill (reverse circulation drill, under 8")

Group 4: Asphalt Plant Operator; Crusher, Grizzle and Screening Plant Operator; H.D. Mechanic; H.D. Welder; Refrigeration Plant Engineer (under 1,000 ton); Rubber-tired Scraper, Multi-engine power, with one Scraper (Euclid, TS-24 and similar); Rubber-tired Scrapers, one motor with one scraper (40 yards and over); Surface Heater and Planer Machine; Turnhead (with re-screening)

POWER EQUIPMENT OPERATORS (AREA 1) Cont'd)
All Counties and portions of Counties East of the 120th Meridian

Group 5: Automatic subgrader (ditches and trimmers) (Autograde, ABC, M.A. Hansen and similar on grade wire); Backhoes (under 3 yards); Batch and Wet Mix Operator - multiple units (2 and including 4); Chipper (with crane); Clamshell Operator (under 3 yards); Concrete Slip Form Paver; Cranes all (under 3 yards); Drilling Equipment (8" bit and over) (Robbins' reverse circulation and similar); Loader Operator (Front end and Overhead 4 yards to 8 yards); Pile-driving Engineers; Paver (dual drum); Quad-track or similar equipment; Railroad Track Liner Operator (self-propelled); Rubber-tired Scrapers, multi-engine, power with one scraper (Euclid, TS-24 and similar); Push Pull or Help Mate in use; Rubber-tired Scrapers, multiple engines with tow scrapers; Shovels (under 3 yards); Refrigeration Plant Engineer (1,000 tons and over); Signalmen (Whirleys, Highline Hammerheads or similar); Trenching Machines (7 feet depth and over); Multiple Dozer units with single blade

Group 6: Backhoes (3 yards and over); Batch Plant (over 4 units); Cableway Controller - Dispatcher; Cableway Operator; Clamshell Operator (3 yards and over); Cranes, all - 65 gons and over; Derricks and Stifflegs (65 tons and over); Draglines (3 yards and over); Elevating Belt (Holland type); Loader 360 degrees revolving Koehring Scooper or similar); Loaders (overhead and Front-end over 8 to 12 yards); Rubber-tired Scrapers (multiple engine with three or more engines); Shovels (3 yards and over); Tower Crane; Whirlmys and Hammerheads (all)

Group 7: Helicopter Pilot; Loaders (Overhead and Front-end - over 12 yards)

POWER EQUIPMENT OPERATORS (Area 2)
All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County

Group 1: Mechanics' Helpers (heavy duty)

Group 2: Oilers, Grade Checkers and Stakemen and/or Brakemen

Group 3: Firemen; Firemen (drier and hot plant)

Group 4: Rollers, Tampers and Vibrators (other than plant, road mix or multi-lift materials); Tractor (farmall type, 60 h.p. and under); Compressor (excavating and general purposes)

Group 5: Oiler Driver on Truck Cranes (over 45 tons up to 100)

Group 6: Blower Distributors and Mulch Seeding Operator; Oil Distributors

Group 7: Locomotive (Dinkey-air, diesel, electric, gas, steam)

Group 8: Equipment Service Oiler; Oiler Driver on Truck Cranes (100 tons and over)

Group 9: Pump (water); Tractors (Farmall type, over 60 h.p.)

Group 10: Post Hole Diggers (mechanical)

Group 11: Brooms (power, Wayne, Saginaw and similar types); Bulldozers (under D9 or similar); Loaders (Fork Lifts or Lumber Stacker - on construction job site - Drott Travel Lift); Rollers, Tampers and Vibrators (twin engine); Saw (concrete); Scrapers (carry-all type, single)

Group 12: Batch Plant (batch and mixer, 200 yards per hour and under); Cranes ("A" Frame Trucks, single power drum); Conveyors; Crusher (rock); Washing and Screening Plants; Finishing Machine Operator, Concrete Paving; Hoists, Air Tuggers, Strato Tower Bucket, Elevators and Deck Winches (power); Loaders (Elevating-Athey, Barber Greene and similar types, and Overhead and Front-end, under 2½ yards); Mixers (asphalt up to 4 tons per batch, and concrete mixer and batch - 200 yards per hour and under); Power Plant Operators; Pumps (Fuller Kenyon and Concrete and Pumpcrete); Rollers, Tampers and Vibrators (on plant, road mix or multi-lifts materials); Screed Man; Spreaders (Blaw Knox, Cedarapids, Jaeger, Flarrety or similar types); Trenching Machine (under 16 inches)

POWER EQUIPMENT OPERATORS (Area 2) (Cont'd)
All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County

Group 13: Mechanics or Welder (heavy duty)

Group 14: Motor Patrol Graders (including Model 14 and similar); Tournapulls, Caterpillar, Euclid Scrapers and similar type equipment (25 yards and under)

Group 15: Compressor (steel erection including sandblasting, painting of the same); Hoists on steel erectinn, Air Tuggers and Towermobiles; Loaders (fork lifts with tower)

Group 16: Cement Hogs; Loaders (Elevating Grader type, Dumor and similar); Locomotive (geared or rod engine); Mixers (paving); Scraper (carryall type, double)

Group 17: Tractors (farmall type, used as Backhoes, Rubber-tired, Ford, Ferguson, Case and similar type 60 h.p. and under)

Group 18: Bull Dozer (D-9 or similar)

Group 19: Trenching Machines (16 inches and over)

Group 20: Bump Cutter (Concut, Christianson or similar types)

Group 21: Batch Plant (batch and mixer, over 200 yards per hour through 400 yards per hour); Conveyors (Beltcrete with power pack and similar types); Loaders (elevating belt type - Euclid and similar types); Mixer (asphalt, 4 tons and over, per batch, and concrete mixers and batch - over 200 yards per hour through 400 yards per hour, and paving dual)

Group 22: Bulldozer engaged in Yo Yo Operating (while clearing and scaling); Cableways (3 yards and under); Cranes ("A" Frame Trucks, double power drum: and Crawler, truck type, floating, Locomotive, Whirley, either 3 yards and under, or 150' of boom including jibs and under, or 45 tons and under: and Hydralifts, Hyster Cat Cranes and attachments and Chipper, wood with boom attachment); Derricks, all; Drilling Machine (Core, Cable Rotary and Exploration); Loader (fork lift with power boom and swing attachment, and overhead and front end, 2½ yards and up to 4 yards); Mixers (mobile type with hoist combination); Motor Patrol Graders (over Model 14 and similar); Mucking Machines (Mole, Tunnel Drill, and/or Shield); Paydozer and Linker Pusher (Quad-9 and similar); Piledriver Engineer, (L.B. Foster Puller or similar, Paving Breaker); Shovels (Crawler and truck types, all attachments, 3 yards and under); Sub Grader (Gurries, CMI and similar types); Tractors (Farmall type, used as Backhoes, Rubber-tired - Ford, Ferguson, Case and similar types - over 60 h.p.); Tournapulls, Caterpillar, Euclid Scrapers and similar type equipment over 25 yards through 40 yards

POWER EQUIPMENT OPERATORS (Area 2) (Cont'd)
All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County

Group 23: Loaders (overhead and front end, 4 yards up to 8 yards)

Group 24: Mixer (concrete mixers and batch over 400 yards per hour through 600 yards per hour)

Group 25: Tournapulls, Caterpillar, Euclid, Scrapers and similar type(over 40 yards through 55 yards)

Group 26: Cableways (over 3 yards); Crane (Crawler, truck type, floating, Locomotive, Whirley, either over 3 yards, or over 150' of boom including jibs or over 45 tons up to 100 tons: and, Tower Cranes, Pecco, Lorraine, Bucyrus and similar types); Helicopter Winch Operator; Remote Control Operator on Rubber-tired Earth Moving Equipment; Shovels (Crawler and truck type, all attachments, over 3 yards up to 6 yards); Slip Form Paver (Zimmerman, CMI and similar types)

Group 27: Tournapulls, Caterpillar, Euclid, Scrapers and similar type equipment (over 55 yards through 70 yards)

Group 28: Loaders (overhead and front end 8 yards and over)

Group 29: Tournapulls, Caterpillar, Euclid, Scrapers and similar type equipment (over 70 yards through 85 yards)

Group 30: Cranes (Crawler, Truck type, floating, Locomotive, Whirley, either 5 yards and over 200' of boom including jibs and over, or 100 tons and over); Shovel (Crawler and Truck type, all attachments, 6 yards and over)

Group 31: Tournapulls, Caterpillar, Euclid, Scrapers and similar type equipment (over 85 yards through 100 yards)

FRINGE BENFITS:

Health and Welfare	$ 1.00
Pension	1.00
Vacation	.50
Apprenticeship Training	.05

POWER EQUIPMENT OPERATORS (Area 3)
Clark, Cowlitz, Klickitat, Skamania, Wahkaikum and the Southern portion of Pacific, Counties

Group 1: Oiler, including Plant, Crane, Crusher, Guardrail equipment, and Trenching Machine; Assistant Conveyor Operator; Crusher Feederman; Deckhand; Self-propelled Scaffolding Operator; Guardrail Punch Oiler; Pump Operator, under 4"; Brakeman; Switchman; Parts Man (tool room)

Group 2: Blade Operator, pulled type; Truck Crane Oiler-driver, 25 ton capacity or over; Crane Fireman, (all equipment except floating); A-Frame Truck Operator, single drum; Tugger or Coffin type Hoist Operator; Driller Helper; Auger Oiler; Boatman; Fork Lift or Lumber Stacker Operator (on job site); Oiler, combination Guardrail Machines; Temporary Heating Plant Operator; Grade Oiler, required to check grade; Grade Checker; Tar Pot Fireman; Tar Pot Fireman (power agitated); H.D. Repairman Helper; Welder's Helper; Helicopter Radioman (ground); Roller Operator, grading of base rock (not asphalt)

Group 3: Asphalt Plant Fireman; Pugmill Operator (any type); Truck mounted Asphalt Spreader, with Screed; Compressor Operator (any power), under 2,250 cu. ft. total capacity; Conveyor Operator; Mixer Box Operator (C.T.B., Dry Batch, etc.); Cement Hog; Concrete Saw; Concrete Curing Machine (riding type); Wire Mat or Brooming Machine; Ross Carrier Operator (on job site); Bucket Elevator Loader, Barber-Greene and similar types; Hydraulic Pipe Press; Pump Operator (any power), 4" and over; Hydrostatic Pump; Motorman; Ballast Jack Tamper; Bell Boy phones, etc.; Tamping Machine, mechanical self-propelled; Hygrographic Seeder Machine, straw, pulp or seed; Broom Operator, self-propelled (on job site); Air Filtration Equipment; Welding Machine Operator

POWER EQUIPMENT OPERATORS (Area 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 4: Screed Operator; Compactor, including Vibratory; Compressor (any power) over 1,250 cu. ft. total capacity; Combination Mixer and Compressor, Gunnite work; Concrete Mixer Operator, single drum, under five bag capacity; Helicopter Hoist Operator; Floating Equipment Fireman; Lull Hi-lift Operator or similar type; Fork Lift, over 5 ton; Service Oiler (greaser); Hydra Hammer or similar types; Pavement Breaker; Pump Operator, more than 5 (any size); Locomotive, under 40 tons; Roller Operator, Oiling, C.T.B.

Group 5: Extrusion Machine; Wagner Factor or similar type (without blade); Concrete Batch Plant Quality Control Operator; Power Jumbo, Setting Slip Forms, etc. in tunnels; Slip Form Pumps, Power driven Hydraulic Lifting Device for concrete forms; Hoist, single drum; Elevator Operator; Pulvamixer or similar types; Chip Spreading Machine Operator; Lime Spreading (on job site); Sweeper (Wayne type) Self-propelled (on job site); Tractor, rubber-tired 50 H.P. Flywheel and under; Trenching Machine, maximum digging capacity 3 ft. depth

Group 6: Asphalt Burner and Reconditioner; Pavement Grinder and/or Grooving Machine (riding type); Cast-in-place Pipe Laying Machine; Maginnis Internal Full Slab Vibrator; Concrete Finishing Machine, Clary, Johnson, Bidwell, Burgess Bridge Deck or similar type; Curb Machine, Mechanical Berm, Curb and/or Curb and Gutter; Concrete Joint Machine; Concrete Planer; Concrete Paving Machine; Concrete Spreader; Loaders, rubber-tired type, 2¼ cu. yds. and under; Rock Spreaders, self-propelled.

Group 7: Roller(any asphalt mix); Beltcrete; Pumperete Operator (any type); Cement Pump, Fuller-Kenyon and similar; Concrete Pump; Grouting Machine; Concrete Mixer, single drum, five bag capacity and over; Tower Mobile Operator; A-Frame Truck double drum; Boom Truck; Churn Drill and Earth Boring Machine; Hydraulic Backhoe, wheel type 3/8 cu. yds. and under with or without front end attachments 2½ cu. yds. and under (Ford, John Deere, Case type); Elevating Grader, Tractor towed requiring operator or grader; Pot Rammer; Ballast Regulator; Ballast Tamper, Multiple-purpose; Track Liner; Tie Spacer; Shuttle Car; Locomotive, 40 tons and over

POWER EQUIPMENT OPERATORS (Area 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 8: Diesel-Electric Engineer, Plant, Crusher, Generator, Floating; Batch Plant and/or wet mix, one and two drum; Generator Operator; Hmlt Loaders, Holman and Ko Cal types; Asphalt Paver Operator

Group 9: Bulldozer; Drill Cat Operator; Side-boom Cat; Compactor, with blade; Concrete Cooling Machine; Chicago Boom and similar types; Lift Slab Machine; Boom type Lifting Device, 5 ton capacity or less; Cherry Picker or similar type Crane-hoist, 5 ton capacity or less; Grizzley Crusher; Crusher Plant; Drill Doctor; Boring Machine; Guard-rail Punch and Auger (all types); Surface Heater and Planer; Hydraulic Backhoe, track type 3/8 cu. yd.; Loader, front end and overhead, 2¼ cu. yds. and under 4 cu. yds.; Hammer Operator; Pipe Cleaning, Doping, Bending and Wrapping Machines; Bolt-threading Machine; Drill Doctor (bit grinder); H.D. Mechanic and Welder; Machine Tool Operator; Stationary Drag Scraper; Tractor, rubber-tired over 50 H.P. flywheel; Tractor with boom attachment; Trench Machine, maximum digging capacity over 3 ft. depth; Aspahlt Plant Operator

Group 10: Bulldozer, twin engine (TC12 and similar); Cable Flow (any type); Compactor, multi-engine; Jack Operator, Elevating Barges; Barge Operator, self-unloading; Combination H.D. Mechanic-Welder, when dispatched and/or when required to do both; Rubber-tired dozers and Pushers (Michigan, Cat, Hough type); Driller-Percussion, Diamond, Core, Cable, Rotary and similar type

Group 11: Mixer Mobile; Concrete Breaker; Crane Operator, 25 tons and under; Combination Guardrail Machines, i.e., Punch, Auger, etc.; Shovel; Dragline; Clamshell, Hoe, etc., under 1 cu. yd.; Grade-alls, under 1 cu. yd.; Mucking Machine (tunnel)

Group 12: Blade Operator; Batch Plant and/or Wet Mix, 3 units or more; Reinforced Tank Banding Machine (K-17 or similar); Hoist, two or more drums; Elevating Loader, Athey and similar; Piledriver (not crane type); Rubber-tired Scraper, single and twin engine, Single Scraper, with Push-pull attachments, self-loader, Paddle Wheel, Auger type; Blade mounted Spreaders, Ulrich and similar types; Shield Operator

POWER EQUIPMENT OPERATORS (Area 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 13: Blade Operator, finish; Blade, externally controlled by electronic, mechanical hydraulic means; Blade, Multi-engines; Concrete Paving Road Mixer; Derrick, under 100 tons; Hoist, Stiff Leg, Guy Derrick or similar, 50 tons and over; Cableway Operator 25 ton and over; Crane, over 25 ton and including 50 tons; Piledriver Operator; Floating Clamshell, etc. under 3 cu. yds.; Floating Crane (derrick barge), less than 30 ton; Elevating Grader, operated by tractor operator, Sierra, Euclid, or similar; Back Filling Machine; Shovel, etc. 1 cu. yd. and less than 3 cu. yds.; Grade-all, 1 cu. yd. and over; Bridge Crane Operator, Locomotive Crane, Gantry and Overhead

Group 14: Tower Crane Operator; Rubber-tired Scraper, with Tandem Scrapers, self-loading, Paddle Wheel, Auger type, Finish and/or 2 or more units

Group 15: Rock Hound Operator; Loader, 4 cu. yds., but less than 6 cu. yds.

Group 16: Autograder or "Trimmer"; Tandem Bulldozer, Quad-nine and similar; Automatic Concrete Slip Form Paver; Concrete Canal Line; Cableway, 25 ton and over; Crane, over 40 ton and including 100 ton; Whirley, 80 ton and under; Floating Clamshell, etc., 3 cu. yds. and over; Floating Crane (derrick barge) 30 ton but less than 80 ton; Loader, 6 cu. yds., but less than 12 cu. yds.; Rubber-tired Scraper, with Tandem Scrapers, Multi-engine; Shovel, etc., 3 cu. yds. but less than 5 cu. yds.; Wheel Excavator, under 750 cu. yds. per hour

Group 17: Crane over 100 ton and including 200 ton; Whirley over 80 ton and including 150 ton; Floating Crane (derrick barge) 80 ton less than 150 ton; Loader, 12 cu. yds. and over; Shovel, etc., 5 cu. yds. and over; Canal Trimmer

Group 18: Crane, over 200 ton; Whirley, 150 ton and over; Floating Crane 150 ton but less than 250 ton; Wheel Excavator, over 750 cu. yds. per hour; Band Wagons, in conjunction with Wheel Excavator

Group 19: Helicopter, when used in erecting work; Floating Crane 250 ton and over; Remote Controlled Earth Moving Equipment; Underwater Equipment, remote or otherwise

TRUCK DRIVERS (Area 1)
All Counties and portions of Counties East of the 120th Meridian

Group 1: Flat Bed Truck, single rear axle; Escort Driver; Fish Truck; Fork Lift, 3,000 pounds and under; Fuel Truck Driver (Steam Cleaner and Washer); Helper and Swamper; Leverperson loading Trucks at Bunkers; Pick-up hauling material; Seeder and Mulcher; Stationary Fuel Operator; Team Driver; Tractor (small rubber tired pulling trailer or similar equipment); Water Tank Truck 1,800 gallons.

Group 2: Bus Driver or Employeehaul Driver; Flat Bed Truck, dual rear axle; Power Boat hauling employees or material; Tireperson No. 1; Warehouseperson

Group 3: Buggy Mobile and similar; Bulk Cement Tanker; Oil Tank Driver; Power operated Sweeper; Semi-trailer, Low Bed, Truck and Trailer; Straddle Carrier (Ross Hyster and similar); Transit Mixers and Trucks hauling concrete (3 yards and under); Trucks, side, end, and bottom dump (under 6 yards); Water Tank Truck (1,801 - 4,000 gallons)

Group 4: Auto Crane - 2,000 pounds capacity; Bulk Cement Spreader; Dumptor (56 yards and under); Flaherty Spreader, Box Driver; Flat Bed Truck (using power take off); Fork Lift (over 3,000 pounds); Oil Distributor Driver (road, bootperson, leverperson helper); Rubber-tired tunnel jumbo; Scissor Truck; Slurry Truck Driver; Transit Mixers and Trucks hauling concrete (over 3 yards to 6 yards); Water Tank Truck (4,001 - 6,000 gallons); Wrecker and Tow Trucks

Group 5: Low Boy (under 50 tons); Service Greaser; Tireperson No. 2; Truck, side, end, and bottom dump (over 6 yards to 12 yards)

Group 6: A-Frame (Swedish Crane, Iowa 3,000, Hydrolift); Water Tank Truck (6,001 - 8,000 gallons)

Group 7: Dumptor (over 6 yards); Transit Mixers and Trucks hauling concrete (6 yards to 10 yards); Trucks, side, end, and bottom dump (over 12 yards including 20 yards)

TRUCK DRIVERS (Area 1) (Cont'd)
All Counties and portions of Counties East of the 120th Meridian

Group 8: Low Boy (over 50 tons); Water Tank Truck (8,001 - 10,000 gallons); Tractor with Steer Trailer

Group 9: Transit Mixers and Trucks hauling concrete (10 yards to 15 yards); Trucks, side, end and bottom dump (over 20 yards including 30 yards); Water Tank Truck (10,001 - 12,000 gallons)

Group 10: Mechanic, Field

Group 11: Tournarocker, D.W.'s and similar, with 2 or 4 wheel power tractor with trailer, gallonage or yardage scale, which is greater; Transit Mixers and Trucks hauling concrete (15 yards to 20 yards); Trucks, side, end and bottom dump (over 30 yards to 40 yards); Water Tank Truck (12,001 - 14,000 gallons)

Group 12: Transit Mixers and Trucks hauling concrete (over 20 yards); Trucks, side, end and bottom dump (over 40 yards to 50 yards)

Group 13: Truck, side, end and bottom dumps (over 50 yards to 100 yards)

Group 14: Helicopter Pilot hauling employees or material; Trucks, side, end and bottom dump (over 100 yards)

TRUCK DRIVERS (Area 2)
All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County and including all of Kittitas and Yakima Counties

Group 1: Leverman and Loaders at bunkers and batch plants; Pickup Truck, Escort or Pilot Car; Warehouseman and Checkers

Group 2: Team Drivers

Group 3: Bull Lifts and similar equipment used in loading and unloading trucks, transporting materials on job site, warehousing; Dumpsters, and similar equipment (including Tournarockers, Tournawagon, Turna-trailer, Cat DW series, Terra Cotra, LeTourneau, Westinghouse, Athey Wagon, Euclid, two and four-wheeled power tractor with trailer and similar top-loaded equipment transporting materials: Dump Trucks - side, end and bottom dump, including Semi-trucks and Trains or combinations thereof) - up to and including 5 yards; Flatbed, single rear axle; Fuel Truck; Grease Truck; Greaser, Battery Service Man and/or Tire Service Man; Scissor Truck; Spreader, Flaherty; Tractor (small, rubber-tired); Vacuum Truck; Water Wagon and Tank Truck (up to 1,600 gallons); Winch Truck, single rear axle; Wrecker, tow truck and similar equipment

Group 4: Flatbed, dual rear axle

Group 5: Buggymobile; Hyster Operators; Straddle Carrier (Ross, Hyster, and similar equipment); Water Wagon and Tank Truck, 1,600 gallons to 3,000 gallons)

Group 6: Transit-mix, 0 to and including 41 yards

Group 7: Dumpsters and similar equipment (as listed in Group 3) - over 5 yards to and including 12 yards; Explosive Truck (field mix) and similar equipment; Lowbed and Heavy Duty Trailer, under 50 tons gross; Road Oil Distributor Driver; Slurry Truck; Sno-go and similar equipment; Winch Truck, dual rear axle

Group 8: Dumpster and similar equipment (as listed in Group 3) - over 12 yards to and including 16 yards

Group 9: Bulk Cement Tanker; Dumpsters and similar equipment (as listed in Group 3) - over 16 yards to and including 20 yards; Water Wagon and Tank Truck, over 3,000 gallons

TRUCK DRIVERS (Area 2) (Cont'd)
All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County and including all of Kittitas and Yakima Counties

Group 10: Bull Lifts or similar equipment used in loading or unloading trucks transporting materials on job site, other than warehousing

Group 11: Transit-mix, over 4½ yards to and including 6 yards

Group 12: "A" Frame or Hydralift Trucks or similar equipment

Group 13: Dumpsters and similar equipment (as listed in Group 3) - over 20 yards to and including 30 yards; Lowbed and Heavy Duty Trailer, over 50 tons gross to and including 100 tons gross

Group 14: Transit-mix, over 6 yards, to and including 8 yards

Group 15: Dumpsters and similar equipment (as listed in Group 3) - over 30 yards to and including 40 yards; Lowbed and Heavy Duty Trailer, over 100 tons gross

Group 16: Transit-mix, over 8 yards to and including 10 yards

Group 17: Dumpsters and similar equipment (as listed in Group 3) - over 40 yards to and including 55 yards

Group 18: Transit-mix, over 10 yards to and including 12 yards

Group 19: Transit-mix, over 12 yards to and including 16 yards

Group 20: Transit-mix, over 16 yards to and including 20 yards

Group 21: Transit-mix, over 20 yards

TRUCK DRIVERS (Area 3)
Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 1: Battery Rebuilders; Bus or Manhaul Driver; Concrete Buggies (power operated); Dump Trucks, side, end and bottom dumps, including Semi-trucks and Trains or combinations thereof: 6 cu. yds. and under, Lift Jitneys, Fork Lifts (all sizes in loading, unloading and transporting material on job site); Loader and/or Leverman on concrete dry batch plant (manually operated); Pilot Car; Solo Flat Bed and misc. Body Trucks, 0-10 tons; Truck Helper; Truck Mechanic Helper; Warehouseman (warehouse parts, tool men and parts chaser, checkers and receivers); Water Wagons (rated capacity) - up to 1,600 gallons

Group 2: "A" Frame of Hydra-lift Truck with load bearing surface; Lubrication Man, Fuel Truck Driver, Tireman, Wash Rack, Steam Cleaner or combinations; Team Drivers

Group 3: Dump Trucks, side, end and bottom dumps, including Semi-trucks and Trains or combinations thereof: over 6 cu. yds. and including 10 cu. yds.; Slurry Truck Driver or Leverman; Transit Mix, and wet or dry mix trucks: 5 cu. yds. and under; Tireman (full-time basis); Water Wagons (rated capacity) - 1,600 to 3,000 gallons

Group 4: Flaherty Spreader Driver or Leverman; Lowbed Equipment, Flat Bed Semi-trailer, Truck and Trailers of doubles transporting equipment or wet or dry materials; Lumber Carrier Driver - Straddle Carrier (used in loading, unloading and transporting of materials on job site); Oil Distributor Driver or Leverman; Water Wagons (rated capacity) - 3,000 to 5,000 gallons

Group 5: Dumpsters of similar equipment, all sizes; Transit Mix and wet or dry trucks, over 5 cu. yds. and including 7 cu. yds.

Group 6: Dump Trucks, side, end and bottom dumps, including Semi Trucks and Trains of combinations thereof: over 10 cu. yds. and including 20 cu. yds.; Transit Mix and wet or dry mix truck, over7 cu. yds. and including 9 cu. yds.; Truck Mechanic-Welder - Body Repairman; Water Wagons (rated capacity 5000 to 7000 gallons

TRUCK DRIVERS (Area 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 7: Dump Trucks, side, end and bottom dumps, including Semi Trucks and Trains or combinations thereof: over 20 cu. yds. and including 30 cu. yds.; Transit Mix and wet or dry mix trucks, over 9 cu. yds. and including 11 cu. yds.; Water Wagons (rated capacity), over 7000 gallons to 10,000 gallons

Group 8: Dump Trucks, side, end and bottom dumps, including Semi Trucks and Trains or combinatins thereof: over 30 cu. yds. and including 40 cu. yds.; Transit Mix and wet or dry mix trucks, over 11 cu. yds. and including 15 cu. yds.; Water Wagons (rated capacity), over 10,000 gallons to 15,000 gallons

Group 9: Dump Trucks, side, end and bottom dumps, including Semi Trucks and Trains or combination thereof: over 40 cu. yds. and including 50 cu. yds.; Transit Mix and wet or dry mix trucks, over 13 cu. yds. and including 15 cu. yds.

Group 10: Dump Trucks, side, end and bottom dumps, including Semi Trucks and Trains or combinations thereof: over 50 cu. yds. and including 60 cu. yds.

Group 11: Dump Trucks, side, end and bottom dumps, including Semi Trucks and Trains or combinations thereof: over 60 cu. yds. and including 70 cu. yds.

Group 12: Dump Trucks, side, end and bottom dumps, including Semi Trucks and Trains or combinations thereof: over 70 cu. yds. and including 80 cu. yds.

Group 13: Dump Trucks, side, end and bottom dumps, including Semi Trucks and Trains or combinations thereof: over 80 cu. yds. and including 90 cu. yds.

Group 14: Dump Trucks, side, end and bottom dumps, including Semi Trucks and Trains or combinations thereof: over 90 cu. yds. and including 100 cu. yds.

Drivers and Helpers (handling sacked cement - add $.15 per hour)

Winch Truck - takes classification of Truck on which Winch is mounted.

To authorize additional appropriations for the Department of State for fiscal year 1977. (June 15, 1977; 91 Stat. 221.) Price: $.35

H.R. 6774..... Pub. L. 95–43
To make certain technical and miscellaneous amendments to provisions relating to higher education contained in the Education Amendments of 1976. (June 15, 1977; 91 Stat. 213.) Price: $.35

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register
Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

1977 PRICE AND ALLOCATION INTERPRETATIONS

AGENCY: Federal Energy Administration.

ACTION: Notice of Interpretations.

SUMMARY: Attached are ten Interpretations issued recently by the General Counsel of the Federal Energy Administration (FEA).

FOR FURTHER INFORMATION CONTACT:

Laura Holtz, Office of General Counsel, Federal Building, 12th and Pennsylvania Avenue NW., Room 7132, Washington, D.C. 20461 (202–566–2085).

SUPPLEMENTARY INFORMATION: FEA Interpretations issued pursuant to 10 CFR Part 205, Subpart F, are published in the FEDERAL REGISTER from time to time in accordance with the editorial and classification criteria set forth in 42 FR 7923, February 8, 1977.

FEA Interpretations depend for their authority on the accuracy of the factual statement used as a basis for the Interpretation (10 CFR 205.84(a)(2)) and may be rescinded or modified at any time (§ 205.85(d)). Only the persons to whom Interpretations are addressed and other persons upon whom Interpretations are served are entitled to rely on them (§ 205.85(c)). An Interpretation is modified by a subsequent amendment to the regulation(s) or ruling(s) interpreted thereby to the extent that the Interpretation is inconsistent with the amended regulation(s) or ruling(s) (§ 205.85(e)). In addition, Interpretations are subject to appeal. The Interpretations appended hereto are published today only for general guidance in accordance with the reasons set forth in the FEA Notice cited above.

Issued in Washington, D.C., June 11, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

INTERPRETATION 1977—7

To: State of Alaska.

Date: April 27, 1977.

Rules Interpreted: § 211.63, Ruling 1974–22.

Code: GCW—AI—December 1 Rule.

This is in response to your request dated March 23, 1977, on behalf of the State of Alaska for an interpretation of 10 CFR 211.63 of the Mandatory Petroleum Allocation Regulations (10 CFR Part 211) of the Federal Energy Administration ("FEA").

FACTS

In 1963, the State of Alaska (the "State") entered into lease agreements with several parties granting them rights to explore for, develop, produce, process and market oil and gas from lands owned by the State in the vicinity of Prudhoe Bay, located in the northernmost area of Alaska. These leases provide that the State may take royalty payments on production in either value or in kind, and that the State may, on six months' notice, elect to change from one form of royalty payment to the other.

Although Alaska plans initially to elect to receive its royalties in value, the State is desirous of maintaining the options contained in the Prudhoe Bay leases to take its royalty oil in kind at a time of its choosing. It has thus asked the lessees of the Prudhoe Bay field to enter into supplemental written agreements in which the producers assent, in light of the provisions of 10 CFR 211.63, to Alaska's exercise of its option to receive its royalty payment in kind, provided the State does so in compliance with the time and notice provisions of the original leases. The proposed agreements further provide that the lessees will obtain similar consents to such an election by Alaska from any party with whom they enter into agreements for the sale, exchange or other disposition of the Prudhoe Bay crude oil.

ISSUE

The issue presented for interpretation is whether 10 CFR 211.63 would prevent the operation of certain provisions of agreements proposed to be entered into by the State of Alaska, its lessees for the Alaska North Slope crude oil, and the further purchasers, exchange partners, or recipients of crude oil from these lessees, which provisions will have the effect of waiving the provisions of 10 CFR 211.63 so as to permit termination of deliveries of crude oil in the event that the State of Alaska elects to take the crude oil in kind, as its royalty payment.

INTERPRETATION

The crude oil supplier/purchaser rule (the "rule") was first set forth in 10 CFR 211.64 (39 FR 1924; January 15, 1974). The rule was adopted to further the general objectives of the Emergency Petroleum Allocation Act of 1973 ("EPAA"), in particular the objectives set forth in Section 4(b)(1) of the EPAA:

(T)o preserve the competitive viability of independent refiners, small refiners * * * (to provide for) the allocation of suitable types, grades, and quality of crude oil to refineries in the United States to permit such refineries to operate at full capacity; (and the) equitable distribution of crude oil (and) residual fuel oil * * * among all * * * sectors of the petroleum industry.

The rule as originally adopted provided basically that all contracts for sales, purchases and exchanges of domestic crude oil that were in effect on December 1, 1973, had to be maintained for the duration of the allocation program. The purpose of the rule was to maintain intact the national distribution system for domestic crude oil as it existed on December 1, 1973, thus assuring small and independent refiners continued access to crude oil supplies in the face of the Arab oil embargo in the fall of 1973. The rule was particularly important to this sector of the petroleum industry, since, although in December 1973 the major integrated refiners were still selling substantial amounts of their domestic crude oil production to small and independent refiners, the integrated companies were in the process of terminating these arrangements in light of the crude oil shortages in the world markets.

The rule was amended in 1974 and renumbered as 10 CFR 211.63. On February 12, 1976 (41 FR 7386, February 18, 1976), the rule was further amended to incorporate changes mandated by the Energy Policy and Conservation Act ("EPCA"), Pub. L. 94–163. In the notice of proposed rulemaking (41 FR 2830, January 20, 1977) preceding the February 1976 amendment, FEA stated that, "the rationale for the original adoption of the (supplier/purchaser) rule is still valid in most respects, and requires that the rule be continued in effect with certain modifications" (41 FR at 2831). These modifications generally conformed the rule to the new pricing provisions of the EPCA, and changed the December 1, 1973 reference date to January 1, 1976. The more current reference date still served to maintain in effect those relationships which were frozen as of December 1, 1973, so that small and independent refiners could continue to be certain of an adequate crude supply.

Therefore, the primary reason that the rule has been maintained to date is to assure that small and independent refiners continue to receive an adequate crude supply. The principal supply relationships upon which small and independent refiners are dependent are those which have been "frozen" since December 1, 1973, and it is these

relationships to which the crude oil supplier/purchaser rule is primarily directed.

With reference to the supplemental agreements proposed by the State of Alaska for execution by its lessees, the FEA, in applying its regulations, has consistently held that the relationship which exists between a lessor and a lessee as a result of the lessor's election to take royalty payments in value rather than kind is a relationship which is subject to § 211.63. See Ruling 1974–22: California State Lands Commission, 2 FEA ¶ 80,507 (1975). The Alaska North Slope production would be subject to the provisions of the rule under 10 CFR 211.63 (b)(2) thereof, which provides that once the first sale of domestic crude oil is made from a property from which domestic crude oil was not produced and sold prior to January 1, 1976, a supplier/purchaser relationship between the seller and purchaser is established as though it had been in effect on January 1, 1976.

The agreements which Alaska is asking its lessees to enter into contain the consent of the lessees to Alaska's exercise of its option to take its royalty payments in kind, an action which would terminate the supply of crude flowing to the lessees, and their purchasers or exchange partners. The rule sets forth in 10 CFR 211.63(d) the ways in which a supplier/purchaser relationship may be terminated, including by the consent of the purchaser as provided in 10 CFR 211.63 (d)(1)(i). That section provides, in part, that:

Any supplier/purchaser relationship established under paragraph (b) of this section may be terminated as follows:

(i) At the option of the purchaser, as evidenced by its written consent thereto together with notice of the termination date given to the producer, provided all subsequent purchasers of the crude oil involved have consented to such termination in writing * * *.

If the provisions of 10 CFR 211.63(d) are not complied with, the purchaser has the right to insist that its supply of crude oil be continued without interruption. By entering into the proposed agreements, the Prudhoe Bay lessees will be consenting in advance to a termination at the option of the State of Alaska and waiving in advance the rights that they could otherwise assert under 10 CFR 211.63.

As discussed above, the main purpose for the promulgation and continuation of the rule has been to preserve in effect the domestic distribution pattern as it existed on December 1, 1973, at which time small and independent refiners were receiving a substantial amount of domestic crude oil from other companies. In the situation presented here, the crude oil subject to the proposed supplemental agreements will begin flowing for the first time in the summer of this year. The FEA believes that it would in no way serve the policy behind the rule to hold that parties having full knowledge of the terms of 10 CFR 211.63 and the rights arising thereunder may not waive those rights prior to the initial purchase of new domestic crude oil production. A "freezing" of the relationships which will initially come into being as to Alaska's royalty oil from the Prudhoe Bay field would in no way relate to preserving the December 1, 1973, national distribution system, nor would such a result, in our view, serve the statutory objectives that the rule was designed to further.

Rather than viewing the proposed waivers as contrary to the policies behind its regulatory programs, the FEA believes these waivers will be beneficial for a number of reasons. First, they will provide flexibility to a portion of the domestic crude market and offer the possibility for sales being made to a greater number of companies.

In addition, the proposed waivers will further the policy of Section 4(b)(F) of the EPAA in a way that might not otherwise be possible. Alaska has stated that it is interested in maintaining its lease option so that, among other reasons, Alaska's royalty crude oil could be kept for sale and processing within the State. Such use would further the purpose of "equitable distribution of crude oil * * * at equitable prices * * * among all * * * areas of the United States." The Prudhoe Bay oil may prove to be the most feasible means in the future of fulfilling Alaska's needs for petroleum products.

With respect to the legal validity of waivers of statutory rights, the United States Supreme Court has held since the 1873 case of *Shutte v. Thompson*, 15 Wall. 151, that, "A party may waive any provision, either of a contract or of a statute, intended for his benefit" (p. 159). Although the waiver provisions of the proposed supplemental agreements are waivers of rights which arise pursuant to regulation rather than statute, the Supreme Court has also held that a regulation, especially one mandated by statute (as is the case with 10 CFR 211.63), is one and the same with the statute:

Here the statute is not complete by itself, since it merely declares the range of its operation and leaves to its progeny the means to be utilized in the effectuation of its command. * * * Once promulgated, these regulations, called for by the statute itself, have the force of law * * * just as if all the details had been incorporated into the congressional language. *United States* v. *Mersky*, 361 U.S. 431, 437–38 (1960).

Since it has long been held that a right conferred by statute may be waived, it follows from the Mersky case that a right conferred by a regulation promulgated to implement a statute may also be waived.

Further support is offered by *Brooklyn Savings Bank* v. *O'Neil*, 324 U.S. 697 (1945). In Brooklyn the Court held that:

Where a private right is granted in the pubic interest to effectuate a legislative policy, waiver of a right so charged or colored with the public interest will not be allowed where it would thwart the legislative policy which it was designed to effectuate. (p. 704)

The converse of the above holding is evident, i.e., that waiver of a right charged with the public interest will be allowed where it would not thwart legislative policy. 10 CFR 211.63 confers a right upon private parties, in this case crude oil purchasers, to insist upon the continuation of their supplies. The policy behind the rule, assurance to small and independent refiners of an adequate supply of crude oil, is supported by the freezing of the December 1, 1973 domestic crude oil relationships, and is not frustrated by the waivers in the proposed supplemental agreements for Alaska's royalty share of the Prudhoe Bay production.

Based on the foregoing, it is our opinion that the provisions of 10 CFR 211.63 do not prevent the operation of the provisions of agreements proposed to be entered into by the State of Alaska, its lessees for the Alaska North Slope crude oil and the further purchasers, exchange partners or recipients of crude oil from these lessees, which provisions will have the effect of waiving the provisions of 10 CFR 211.63 so as to permit termination of deliveries of crude oil in the event that the State of Alaska elects to take the crude oil in kind as its royalty payment.

INTERPRETATION 1977—8

To: R.C. Fresh, et al.

Date: May 11, 1977.

Rules Interpreted: §§ 210.62, 211.1(a), 211.9 (a), 211.31, and 212.31, Subpart F.

Code: GCR(IV)—AI, PI—Commission Agents or Consignees, Definition of Reseller, Normal Business Practices.

This is in response to your request for an interpretation, dated August 13, 1976, filed on behalf of R. C. Fresh, M. L. Strong, G. P. Summers and J. C. Vain, who are distributors of Texaco products, including gasoline.

FACTS

The above-named distributors ("petitioners") as individuals, executed agreements on Texaco Form S–82 for the distribution of gasoline with Texaco, Inc. ("Texaco"). Each distributor at some separate point in time also executed Texaco Forms S–368B, which amended the original consignment agreement. Petitioners indicate that all agreements were finalized on Texaco Standard Forms S–82 and S–368B, identical to those attached as Exhibit 1 to this request for interpretation. Pursuant to the agreements executed on Forms S–368, petitioners have historically received "by-pass" or "standby" commissions on deliveries made directly by Texaco to certain named service stations, with the stipulation that petitioners be prepared to make such deliveries should Texaco be unable to deliver. Texaco designates this arrangement as one for a "supervisory commission." Copies of the amendments providing for "by-pass," "standby" or "supervisory" commissions are found in Exhibits 3 through 7 of petitioners' request for interpretation. All of the "by-pass" or "standby" amending agreements are dated prior to or during 1972 except for one S–368B form which was executed between Texaco and Mr. M. L. Strong on April 1, 1973, covering a customer located at 303 West Gordon Avenue, Valdosta, Georgia.

Texaco notified petitioner, Mr. R. G. Fresh, of termination of "by-pass" or "standby" commissions to be effective April 30, 1976, for one location and June 30, 1976, for all other affected locations. Texaco notified all other petitioners that all Forms S–368B arrangements would be terminated effective August 31, 1976.

ISSUE

The issue presented for interpretation is whether Texaco is violating 10 CFR §§ 210.62 and 211.9 by unilaterally terminating these "by-pass," "standby" or "supervisory" commission agreements with petitioners.

INTERPRETATION

In delivering product to customers of Texaco in accordance with their respective agreements, each petitioner acts as Texaco's consignee-agent. Petitioners at no time take title to the product, have no say in the selling price afforded to the purchasers and collect payment on behalf of Texaco. Commissions for their services are paid directly to petitioners by Texaco subsequent to payment to Texaco for the products.

In interpretations issued by FEA, as noted by Exhibits 1 and 2 to petitioners' request for interpretation, consignee-agents have been held to be subject to FEA allocation regulations. An interpretation issued on April 24, 1975, (Exhibit 1) to Mr. Fred B. Causey defined the relationship created by a base period Form S–82 agreement. That interpretation indicated that petitioners herein are protected under FEA allocation regulations. Ten CFR § 211.51 expressly contemplates consignee-agents:

"Supplier" means any firm or any part or subsidiary of any firm other than the Department of Defense which presently, during the base period, or during any period between the base period and the present supplies, sells, transfers or otherwise furnished *(as by consignment)* any allocated product or crude oil to wholesale purchasers or end-users including, but not limited to, refiners, natural gas processing plants or fractionating plants, importers, resellers, jobbers and retailers. (Emphasis supplied.)

Therefore, any attempt of Texaco to reduce the actual adjusted base period volume to petitioners would be in violation of 10 CFR § 211.9. However, the petitioners' receipt of "standby" commissions in the base period would not give rise to an allocation entitlement for the volumes of motor gasoline giving rise to those commisions, since the petitioners performed no distribution functions with respect thereto.

Further, Part 212 has no recognition of consignee-agents as being subject to refiner or reseller price rules. Ten CFR § 211.1(a) indicates that Part 212 rules are for:

"* * * firms engaged in the *production and sale* of covered products * * *" (Emphasis added.)

Ten CFR § 212.2 indicates that Part 212 applies to each sale or purchase of a covered product in the United States. Methods for computation of lawful prices are provided for refiners (10 CFR § 212.83) and resellers (10 CFR § 212.93). Since it is clear that petitioners are not refiners, we must turn to the definition of "reseller" for pricing purposes found in 10 CFR § 212.31 to determine whether they fall into this category:

"Reseller" means a firm (other than a refiner or retailer) or that part of such a firm which carries on the trade or business of purchasing covered products, and reselling them without substantially changing their form to purchasers other than ultimate consumers.

Indeed, in the preamble to the amendment to the regulation which added this definition of Part 212, it was made clear that commissions of consignee-agents were unaffected by the reseller price rule of § 212.93:

Consignee-agents perform much the same function in the distribution of covered products as do jobbers, who buy covered products and resell them. Jobbers and consignee agents have experienced increases in nonproduct costs. The FEO has amended its price rules with respect to resellers, and this has permitted jobbers to make specified price increases with respect to certain covered products in order to recover increased nonproduct costs. In the case of consignee agents, however, the sale price of the products they distribute and the commission they receive with respect to sales made through them are determined by the refiner. *Accordingly, the FEO's reseller price rules have no applicability to the consignee agent's commission* (39 F.R. 12012, April 2, 1974). (Emphasis supplied.)

It is conclusive that petitioners are not "purchasing covered products and reselling them." Petitioners simply deliver Texaco's product to customers and collect payment for Texaco. Thus, petitioners fit the definition of "consignee-agent" found in 10 CFR § 211.-31:

"Consignee-agent" means a firm which distributes covered products to purchasers pursuant to a contractual arrangement with a refiner under which the refiner retains title to the covered product and specified the prices to be paid by the purchaser and under which the refiner pays the consignee-agent a commission based on the volume of covered products distributed by the consignee-agent.

Since FEA price regulations pertain to prices charged in sales of gasoline, the absence of gasoline ownership by petitioners and the retention of ownership and control of the pricing of the product by suppliers means that FEA price regulations apply to the prices charged by suppliers in sales of gasoline, even where such sales are made through commission agents. FEA price regulations do not directly control commissions paid to petitioners for distributing those products.

Petitioners are compensated by Texaco pursuant to the terms of contracts between the parties, as amended. There is no "sale" of product and, thus, no product price is established between Texaco and the petitioners which could be subject to FEA price regulations. The price regulations only govern the maximum lawful prices the seller may charge in sales made through commission agents.

Ten CFR § 210.62 is a general regulation concerning "purchasers of an allocated product" and does not govern the consignee-agent relationships which are the subject of this interpretation; therefore, 10 CFR § 210.62 does not operate to prevent termination of the "by-pass" or "standby" commission historically paid to petitioners by Texaco.

Again, should Texaco fail to continue to provide petitioners with the same historical base period volume, as adjusted, such failure would be a violation of 10 CFR 211.9(a).

INTERPRETATION 1977–9

To: Hicks Oil Co.

Date: May 12, 1977.

Rule Interpreted: § 212.31.

Code: GCR(V)—PI—Definition of Covered Products.

Your request for an Interpretation on behalf of Hicks Oil Company regarding the definition of "Covered products" contained in 10 CFR 212.31 has been reviewed by this Office. Based upon all the information available, the Interpretation follows:

FACTS

Hicks Oil Company ("Hicks") sells gasoline, distillates, and "blended oils." In its sales of "blended oils," which are the subject of this request, Hicks blends residual fuel oil with "waste oils" (waste crank case oil (motor oil), waste used transformer oils, and waste used solvents). This blended product is sold in various proportions as No. 5 oil for use by Hicks' customers in fuel burning installations.

ISSUE

The issue presented is whether the No. 5 oil which results from Hicks' blending of residual fuel oil and "waste oils" is a covered product for purposes of the Mandatory Petroleum Price Regulations.

INTERPRETATION

It is the opinion of this Office that the No. 5 oil which results from blending residual fuel oil and "waste oils" as done by Hicks is either residual fuel oil or an other covered product for purposes of the Mandatory Petroleum Price Regulations, depending on the covered product that constitutes the major proportion of the particular blend.

The definition of "covered product" originated in the Phase IV Subpart L Petroleum Price Regulations promulgated by the Cost of Living Council in August 1973:

"Covered product" means a product described in the 1972 edition, Standard Industrial Classification Manual, Industry Code 1311 (except natural gas), 1321, or 2911. (6 CFR 150.352, 38 FR 22536 at 22538, August 22, 1973.)

This definition was adopted by FEO on January 15, 1974, and the regulatory definition of "covered product" retained its reference to the Standard Industrial Classification Manual, 1972 edition, (SIC Manual), until April 3, 1974 when it was changed to read:

"Covered products" means crude oil, residual fuel oil and refined petroleum products (10 CFR 212.31, 39 FR 12353, April 5, 1974.)

On January 10, 1975, the definition was amended to set forth a more comprehensive listing of covered products:

"Covered products" means aviation fuels, benzene, butane, crude oil, gas oil, gasoline, greases, hexane, kerosene, lubricant base oil stocks, lubricants, naphthas, natural gas liquids, natural gasoline, No. 1 heating oil and No. 1–D diesel fuel, No. 2 heating oil and No. 2–D diesel fuel, No. 4 fuel oil and No. 4–D diesel fuel, propane, residual fuel oil, special naphthas (solvents), toluene, unfinished oils, xylene, and other finished products. A blend of two or more particular covered products is considered to be that particular covered product constituting the major proportion of the blend.

The definition of covered products was subsequently amended to delete "residual fuel oil" (effective June 1, 1976, 41 FR 13896, April 1, 1976) and other covered products (effective September 1, 1976, 41 FR 30096, July 22, 1976) as these covered products were exempted from the FEA Mandatory Petroleum Price Regulations. Subsequent references in this interpretation to specific "covered products" should be understood to refer to the period of time before which the specific covered product was exempted from FEA price regulations.

Hicks has presented basically two arguments in support of its interpretation that its "blended oils" have not at any time constituted covered products for purposes of the price regulations. First, Hicks maintains that the "waste oils" that it blends with residual fuel oil—Hicks does not maintain that residual fuel oil was not a covered product—have never been covered products under CLC, FEO, and FEA regulations. Accordingly, Hicks argues, the blend which results from a covered and an exempt product is also exempt. We do not reach the question of blending exempt and covered products, because each of the "waste oils" used for blending by Hicks was a covered product under CLC, FEO, and FEA regulations. In fact, Hicks does not dispute the fact that in its "clean" state, each of the three waste oils was a covered product. (Hicks does appear to argue that transformer oil is not a lubricant, and therefore not a covered product. Without additional information, we are unable to determine the proper characterization of transformer oil as a particular covered product. However, to the extent that it was refined from crude oil, it would likely be characterized as an "other finished product.") Rather, Hicks argues that by virtue of these products having been used—and the possibility that they would have been discarded if not further used by Hicks—the once-covered products become exempt.

However, the fact that these covered products have been used does not, in itself, render them exempt. There is no dispute that each of these particular oils has been refined from crude oil and as such each is a refined petroleum product for purposes of FEA price rules: crankcase oil is a "lubricant," solvents are "special naphthas," and transformer oil is likely an "other finished product." Their having been previously used before purchased by Hicks does not change this significant characteristic. To the contrary, these waste oils were originally refined from crude oil and should have been sold as covered products, and they remain covered products even though having been used before they are purchased by Hicks. To the extent that Hicks blends any or all of these covered products with other products, viz., residual fuel oil, the resulting covered product is properly characterized as the particular covered product which constitutes the major proportion of the blend.

Hicks second argument relates to the use, by CLC and FEO of SIC Manual Classifications in early definitions of covered products. In the SIC Manual, Classifications 1311 and 1321 referred to Crude Petroleum and Natural Gas and Natural Gas Liquids respectively and therefore are not at issue

herein. SIC Manual, Classification 2911 in its general description states in part:

Establishments primarily engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, lubricants and other products from crude petroleum and its fractionation products, through straight distillation of crude oil, redistillation of unfinished petroleum derivatives, cracking or other processes. * * * Those manufacturing lubricating oils and greases by blending and compounding purchased materials are included in Industry 2992. Establishments primarily re-refining used lubricating oils are classified in Industry 2992.

Hicks argues that since its operation involves blending, compounding, and filtering (as described in SIC Manual, Classification 2992), the product which it sells is therefore not a covered product under the price regulations. This reasoning is not persuasive. The reference in the CLC and FEO definitions of covered products to SIC Manual Classifications was intended only to describe the products which were subject to price regulation rather than to describe the types of establishments subject to those regulations. Accordingly, the price regulations were specifically applicable to "sales of products described in the 1972 Industrial Classification Manual, Industry Code 1311 (except Natural Gas), 1321, or 2911," without regard to the type of establishment making the sale. Types of establishments, on the other hand, have generally been subject to different regulatory schemes (e.g., Subpart D to Producers of Crude Oil, Subpart E to Refiners, etc.) without regard to the types of products sold.

Hicks by its own admission blends and sells No. 5 oil for use by "* * * road contractors who burn it as a source of heat * * * and operators of small boilers who find that this blend is atomized more readily and burns more easily than ordinary residual fuel * * *" (Request for Interpretation, page 2). Hicks cuts "* * * the residual fuel not only to save the customers money but to make the heavy residual fuel thin enough to burn properly in the customer's burners." (Hicks submission, page 1.) Hicks has consistently and historically sold the product, which is normally comprised predominantly of residual fuel oil, as No. 5 oil for use as residual fuel oil. It is clear that Hicks blends and sells residual fuel oil. (In those few instances in which the blended product is comprised predominantly of one of the waste oils, the blended product is properly characterized as that particular oil.)

Prior to the time that residual fuel oil was exempted from price regulations it was at all times a covered product for purposes of CLC, FEO and FEA price regulation. Similarly, the other oils which Hicks uses for blending have always been covered products before their exemption. Accordingly, the "blended oils" sold by Hicks should have been treated by Hicks as a covered product under CLC, FEO, and FEA price regulations.

INTERPRETATION 1977—10

To: Exxon Corp.

Date: May 28, 1977.

Rules Interpreted: § 212.31.

Code: GCW–PI–Class of Purchaser.

This is in response to your letter of November 11, 1976, in which you requested an interpretation on behalf of Exxon Co., U.S.A., in connection with FEA's class of purchaser regulations as they apply to refiners.

FACTS

1. Exxon Co., U.S.A., is a division of Exxon Corp. ("Exxon"). Exxon is a refiner subject to the price rules applicable to refiners in 10 CFR Part 212, Subpart E (§ 212.82, et seq.).

2. During the period January 1, 1972, until on or about December 5, 1972, Exxon supplied gasoline to Merry Twins, Inc. ("Merry Twins"), an independent branded retail dealer.

3. Effective December 5, 1972, Merry Twins severed its gasoline supply arrangement with Exxon and entered into a new supply arrangement with a distributor of Texaco products. The Texaco supply contract provided for the payment to Merry Twins by the distributor of a dealer "commission" of xxx cents on every gallon of regular gasoline and xxx cents on every gallon of premium gasoline purchased by Merry Twins.

4. On or about March 1, 1974, Exxon resumed supplying gasoline to Merry Twins as a base period supplier pursuant to 10 CFR 211.9. Exxon placed Merry Twins in its retail dealer class of purchaser—i.e., began charging Merry Twins the same prices which Exxon charges to the members of the class of purchaser consisting of retail dealers.

5. On June 29, 1976, Merry Twins filed suit against Exxon for alleged price violations. Merry Twins takes the position that it should be treated by Exxon as belonging to a separate class of purchaser of which it is the sole member, based on the existence of the *x* and *x* cent per gallon discounts or rebates which it received from the Texaco distributor on the base date of May 15, 1973. In other words, Merry Twins contends that Exxon is obligated under FEA regulations to charge Merry Twins its dealer tankwagon price less the *x* and *x* cent per gallon "commission" Merry Twins received from the Texaco distributor on May 15, 1973.

ISSUE

Are class of purchaser determinations based on the seller's customary pricing differentials or upon the prices available to the buyer from other sellers on the base date?

INTERPRETATION

Class of purchaser determinations are generally based on the seller's own customary price differentials. The only exception to this rule concerns acquisition of an entity or component of an entity under § 212.111(c), a situation not present in this case.

The general price rule applicable to refiners is stated in § 212.83(a)(1) as follows:

A refiner may not charge to any class of purchaser a price for a covered product in excess of the maximum allowable price * * *.

The "maximum allowable price" applicable to the product and class of purchaser concerned is defined in § 212.82 as:

* * * the weighted average price at which the covered product was lawfully priced in transactions with the class of purchaser concerned on May 15, 1973, * * * plus increased product costs and increased nonproduct costs incurred between the month of measurement and the month of May, 1973.

"Class of purchaser" is defined in § 212.31 to mean:

* * * purchasers to whom a person has charged a comparable price for comparable property or service pursuant to customary price differentials between those purchasers and other purchasers.

Finally, "customary price differential" is defined in § 212.31 as including:

* * * a price distinction based on a discount, allowance, add-on, premium, and an extra based on a difference in volume, grade, quality, or location or type of purchaser, or a term or condition of sale or delivery.

FEA and its predecessor agencies have always interpreted the foregoing provisions (or their equivalent antecedents) as requiring the seller concerned to make class of purchaser determinations based on his own customary pricing patterns. For example, in Interpretation 1976–6, issued May 28, 1976 (42 FR 7923, February 8, 1977; affirmed on appeal, 4 FEA ¶ 80,544, October 1, 1976) FEA stated as follows (emphasis added):

"Customary" price differentials are those pricing patterns *of the seller concerned* which were well established on or before May 15, 1973, which reflect the fact that the same product is sold by that seller at different price levels to different groups of customers * * * *[A] seller is not required to reform its classes of purchaser to take into account discretionary pricing practices which it did not customarily follow in its own pricing behavior* * * * The validity of a seller's class of purchaser determinations is measured *not with reference to industry practices generally but with reference to that seller's own customary pricing patterns* * * *.

That class of purchaser determinations are made by a seller based on his own customary pricing differences is shown by FEA's definition of "maximum allowable price," quoted above. The "maximum allowable price" consists, essentially, of what the Cost of Living Council generally referred to under the Economic Stabilization Program as the seller's "base price," plus increased costs which the seller has incurred and are allowable. The equivalent of the "base price" under current regulations is that part of the definition of "maximum allowable price" which refers to "the weighted average price at which the covered product was lawfully priced *in transactions with the class of purchaser concerned* on May 15, 1973 * * *." (Emphasis added.)

The "transactions" referred to are obviously transactions between the seller concerned and individual members of a particular class of purchaser (or a single purchaser, if the class of purchaser consists of only one member). If the "transactions" referred to included industry transactions generally, or transactions of other sellers with their purchasers, it would be extremely difficult, if not impossible, for individual sellers to determine their own "base prices," and hence their maximum allowable prices, with any certainty. In order to assure clarity and consistency of ceiling price determinations by sellers and availability of adequate price and cost records for FEA audit purposes, FEA price regulations are based on the seller's own price experience in the base period.

In the present case, the applicable "base price," and resulting maximum allowable price, is determined with reference to the appropriate class of purchaser of Exxon's into which Merry Twins, as a later-acquired customer, falls. (It may also be noted in this connection that FEA regulations required Exxon, as the base period supplier, to make supplies available to Merry Twins, but did not require Merry Twins to purchase from Exxon if Merry Twins wished to arrange to acquire gasoline from another supplier.) The applicable rule is that new purchasers (purchasers with whom Exxon did not have FEA-regulated sales until after the base period) must be placed in the appropriate pre-existing class of purchaser of the seller's (see Interpretation 1975–31, issued August 20, 1975; Interpretation 1976–7, issued July 6, 1976). New classes of purchaser may not be formed to accommodate new purchasers except to the extent that the seller enters a "new market" pursuant to § 212.111 (see Interpretation 1976–7).

This Interpretation should not be construed as confirming that Exxon's retail dealer class of purchaser reflects a "customary price differential" or otherwise constitutes a proper class of purchaser determination under FEA regulations. This Interpretation only confirms that FEA regulations do not require a seller to form classes of purchaser based on price distinctions in

transactions during the base period between purchasers and other sellers.

INTERPRETATION 1977—11

To: National Airlines, Inc.

Date: May 28, 1977.

Rules Interpreted: § 210.62(c), Rulings 1975–4 and 1975–11.

Code: GCW–PI—Normal Business Practices, Class of Purchaser.

This is in response to your letter of September 7, 1976, in which you requested an interpretation of certain FEA price regulations as they apply to retail sales of aviation fuel by Texaco, Inc. ("Texaco") to National Airlines, Inc. ("National") at Norfolk Municipal Airport, Norfolk, Virginia ("Norfolk").

FACTS

1. Texaco is a refiner-marketer of various petroleum products, including aviation fuels, and as such is subject to FEA price rules in 10 CFR Part 212, Subpart E.

2. National is a large domestic air carrier which purchases aviation fuels as an ultimate consumer at Norfolk and at various other airports in the United States. National is not subject to FEA price regulations except to the extent that 10 CFR 212.10 prohibits purchasers from paying a price which exceeds the maximum price at which the product concerned may be sold to the class of purchaser concerned.

3. Texaco furnishes aviation fuels to National at Norfolk and has done so since at least July 1, 1966. Texaco determines its classes of purchaser for retail sales of aviation fuels on a locational (airport-by-airport) basis and according to the size characteristics of the customer (e.g., national "trunk" lines, regional carriers, and supplemental airlines).

4. Texaco's "Aviation Fuel Agreement of Sale" with National at Norfolk has provided since at least July 1, 1966, for "into-storage" delivery of aviation fuels (title passes on delivery into designated storage facilities and the air carrier assumes responsibility for transfer of fuel from storage to its aircraft) rather than delivery on an "into-plane" basis. However, linked to this supply contract is an agreement designated "Automotive Equipment Lease," dated August 17, 1966, under which two Texaco-owned fueling trucks are leased to National at a monthly rental fee. The trucks may be used only for the storage, handling, transportation, dispensing and distribution of petroleum products purchased from Texaco. The lease is subject to automatic termination upon the termination of the Aviation Fuel Agreement of Sale between Texaco and National.

5. The Automotive Equipment Lease terminated concurrently with the expiration of the Aviation Fuel Agreement of Sale on June 30, 1976. Texaco continued to supply aviation fuel to National at Norfolk under FEA price and allocation regulations subsequent to that date, but offered to continue the truck lease arrangement only under certain modified terms, including rental fees increased from approximately $0.0013 per gallon under the 1966 lease to approximately $0.0029 per gallon, using the same base period volumes.

6. National contests Texaco's authority to increase these fees, contending that the rental arrangement merely reflects a term or condition of sale or delivery and that the rental fees constitute an integral "part of the overall aviation fuel bargain." Under National's view, Texaco's increased costs relating to the lease of its equipment at Norfolk cannot be passed through in the form of equipment rent increases but should be included among Texaco's general non-product cost increases to be passed through under the equal application rules of § 212.83 (c) and (h) to all of Texaco's purchasers of aviation fuels nationwide, in much the same manner as though Texaco's sales to National had been on an "into-plane" basis.

ISSUE

This issue in this case is whether FEA regulations prohibit Texaco from increasing rental charges for trucks leased to National for "into-plane" services at Norfolk.

INTERPRETATION

Under the facts in this case, it is our interpretation that FEA regulations do not prohibit Texaco from increasing the rental charges under the Automotive Equipment Lease to reflect increased costs associated with the lease of fuel trucks to National at Norfolk.

In its reply of October 6, 1976, to the interpretation request, Texaco cited the decision of the Temporary Emergency Court of Appeals in *Shell Oil Co.* v. *FEA*, 527 F. 2d 430 (November 11, 1975), in which the court enjoined FEA from enforcing its gasoline service station rent regulations upon Shell Oil Co. on the ground that those regulations, as applied to rentals charged by Shell, were beyond the scope of FEA's statutory authority (FEA subsequently revoked its rent regulations effective November 11, 1975). Texaco takes the position that the Emergency Petroleum Allocation Act of 1973 ("EPAA")—does not provide FEA with the statutory authority to regulate automotive equipment lease rents any more than it provided FEA with the authority to regulate service station rents.

In our view, the decision in the *Shell* case does not necessarily preclude a degree of control by FEA over rental charges for equipment used in connection with delivery of products the sale of which is regulated by FEA, charges separately stated for services in connection with delivery of such products, or other delivery terms, if necessary to achieve the goals of the EPAA. The extent to which it may be necessary to exercise control over delivery terms, prices charged for ancillary services or delivery-related equipment rentals, in order to assure that price controls on the sale of petroleum products are not circumvented, depends upon the extent to which such items are inseparably related to delivery of petroleum products and the extent to which circumvention of regulations concerning price or allocation of petroleum products appears to be involved.

FEA regulations have long provided general rules which prohibit sellers from modifying normal business practices in order to circumvent price or allocation regulations. Generally, the same credit or delivery terms extended to purchasers during the base period are required to be maintained by sellers under § 210.62(a). Under § 210.62(c), it is unlawful to impose terms or conditions not customarily imposed upon the sale of a covered product, to fail to provide the same services in connection with such sales, or to engage in other practices which constitute a means to obtain a price higher than is permitted by FEA price or allocation controls. These provisions make it clear that there is a "penumbral" area in which activities closely related to the sale or allocation of petroleum products may be controlled or supervised by FEA, including, but not limited to, prices charged for ancillary services or equipment rentals.

The validity of FEA authority in this respect was recently affirmed by the Temporary Emergency Court of Appeals in the case of *Marathon Oil Co.* v. *FEA* (TECA No. 6–11, December 6, 1976; cert. den., 45 U.S.L.W. 3704 (1977)), in which the court reversed and remanded a decision by the U.S. district court, which held § 210.62(a), to the extent that it regulates the credit terms which the supplier of petroleum products may apply to the purchaser, to be invalid as beyond the scope of FEA's authority. The Temporary Emergency Court of Appeals said that the district court had not sufficiently recognized the distinction between power to regulate credit terms per se (which FEA has never claimed) and power to regulate such items as necessary and proper means of more effectively regulating the pricing and allocation of petroleum products to achieve the objectives for which price and allocation authority was expressly granted by the EPAA.

Even in the case of gasoline service station rentals, where the rent control regulations were revoked by FEA following the *Shell* decision, FEA retains authority to challenge service station rent increases which appear to circumvent FEA's gasoline price regulations. It was the view of the appeals court in the *Shell* case itself that § 210.62(c) provides a valid regulatory basis for challenging what appear to be gasoline price increases "hidden" in rent increases. For further discussion of this matter, see 42 FR 22374, May 3, 1977.

Section 210.62(c) has been interpreted and applied in various ways, depending upon the nature of the particular industry practice at issue. FEA may issue specific regulations or rulings governing a widely-used practice related to the sale of petroleum products or it may make a determination in individual cases by interpretation or through its compliance procedures. For example, in Ruling 1975–4, 40 FR 19635, May 6, 1975, FEA considered whether propane marketers could increase above the level of May 15, 1973, the rental rate on propane storage tanks leased to propane customers on condition that they could be filled only by the marketer or upon the marketer's authorization. Under the facts presented in that Ruling, the May 15, 1973, rental for the storage tanks was stated separately from the price of propane but FEA found that a "tie-in arrangement" within the meaning of § 210.62 (c) nevertheless resulted because the lessee-purchaser was required to fill the tank only in accordance with the lessor-marketer's instructions.

Section 210.62(c) provides, in relevant part, as follows:

Any practice which constitutes a means to obtain a price higher than is permitted by the regulations * * * or to impose terms or conditions not customarily imposed upon the sale of an allocated product is a violation of these regulations. Such practices include * * * tie-in agreements * * * or failure to provide the same services and equipment previously sold.

In construing § 210.62(c), FEA took the position in Ruling 1975–4 that tie-in agreements are not necessarily prohibited under FEA regulations, and may, in fact, be permitted to continue where the supplier customarily imposed a tie-in requirement as a condition of the purchase of the product concerned. However, FEA pointed out that alteration of the terms of a tie-in arrangement may constitute "a means to obtain a price higher than that permitted by the regulations" in violation of § 210.62(c).

In order to insure that the price regulations applicable to the sale of propane were not circumvented, FEA ruled that marketers could not, as a general rule, increase above the May 15, 1973, level the rental charged to lessees-purchasers for propane storage tanks. FEA also ruled that increased costs incurred in connection with rental of storage tanks could be passed through as nonproduct cost increases in the form of propane price increases, subject to the limita-

tions applicable to the pass-through of such cost increases.

In Ruling 1975–11, 40 FR 40827, September 4, 1975, FEA modified Ruling 1975–4 to a certain extent. Under Ruling 1975–11, the rental for new storage tanks, where the cost of new storage tanks had increased substantially, could be increased as long as the increase was applied only to customers receiving new tanks and as long as the increased rental charge fairly reflected the increased cost of the new tanks spread over their reasonable life. In addition, increased cost of new storage tanks recouped in this manner could not be included as non-product cost incerases for purposes of justifying higher prices for propane or other petroleum products.

FEA's explanation in Rulings 1975–4 and 1975–11 of how FEA would apply § 210.62(c) is limited to cases of "tie-in" propane storage tank rental agreements between resellers/retailers and their customers. These rulings are, therefore, not directly applicable to the present case. However, certain principles set forth in these rulings may be applied to the situation presented by the interpretation request.

Under Rulings 1975–4 and 1975–11, the fact that the storage tank rentals were "separately stated" on May 15, 1973—i.e., were the subject of a separate written or oral agreement and not included as part of the propane sales price—was not considered conclusive with respect to whether a "tie-in agreement" was present. On the other hand, Ruling 1975–4 appears to take the position that a "tie-in agreement" within the meaning of § 210.62(c) is not present unless it is "imposed" as a "requirement" or "condition of the purchase of product." Under that ruling the marketer supplied storage tanks upon the condition that the tanks be filled only by the marketer or upon the marketer's authorization.

In the present case, the interpretation request makes it clear that aviation fuel is normally supplied "to civil air carriers like National by refiner-suppliers like Texaco" either under "into-storage" terms (where title passes on delivery into the carrier's storage facilities and the carrier assumes responsibility for transferring the fuel from storage into its aircraft) or under "into-plane" terms (where title passes when fuel is transferred into the carrier's aircraft either by the refiner-seller or by a service organization, such as a fixed base operator, under contract with the refiner-seller). Thus, the special or "modified" terms in this case, whereunder Texaco delivers fuel to National on an "into-storage" basis and leases Texaco-owned trucks to be used by National to perform its own "into-plane" services, represents an unsual rather than typical industry practice.

This deviation from what appears to be typical industry practice suggests that the truck-leasing arrangement in this case was not "imposed" by Texaco as a customary precondition to the sale of aviation fuel on an "into-storage" basis. The documents attached to the interpretation request indicate that Texaco does not seek to insist upon continuation of the truck leasing agreement as a requirement to continuation of aviation fuel sales to National at Norfolk Airport. On the contrary, Texaco's letter to National dated August 2, 1976, states as follows:

In [the] event you should elect to provide your own refuelers [i.e., trucks], or to take service from an outside third party such as A.S.I., there would not be an adjustment of your Fuel Contract Price. The decision to lease equipment from Texaco at Norfolk is made by National, and in [the] event you should elect at some future date to provide you own equipment, or have an interest in purchasing two (2) units [trucks] from Texaco, we would be very happy to endeavor to work out a program to your satisfaction.

While the Automotive Equipment Lease effective July 1, 1966, provided for automatic termination of the lease simultaneously with termination of the sales agreement and restricted the use of lease equipment to handling of Texaco products, the lease did not by its terms require National to continue to lease equipment from Texaco for as long as Texaco remained National's supplier or otherwise limit National's right to cancel the equipment lease and make other arrangements for into-plane transfer of Texaco-supplied products. The restrictive covenants therefore appear to be normal lease provisions concerning proper use of leased equipment under a lease of indefinite duration.

Moreover, the situation with respect to the lease of propane storage tanks is distinguishable on the ground that storage tanks are a necessary feature of propane use and large numbers of residential end-users of propane normally have little alternative but to use storage tanks rented or sold by the propane distributor. Because National is a large national air carrier, it cannot be assumed that National has ever been under any economic disadvantage that would, as a practical matter, require it to perform its "into-plane" refueling operations at Norfolk Airport only through means of trucks leased from Texaco. National could purchase two fueling trucks for this purpose or hire third-party "into-plane" services (we understand such third party services are available at Norfolk).

We also note in passing that National has not disputed Texaco's allegation that its rental increases are cost-justified based on the use of 1975-model vehicles compared with 1959 and 1960-model vehicles under the 1966 lease.

Based on all the foregoing considerations, it appears in this case that the truck leasing agreement does not represent a "tie-in agreement" within the meaning of § 210.62(c) and does not otherwise constitute per se a means to obtain a price for aviation fuel in excess of that permitted under FEA regulations in violation of § 210.62(c). The truck leasing agreement appears to be an independent and non-obligatory contract for ancillary services rather than a term or condition of sale or delivery of aviation fuels. Thus, we are unable to conclude, as a matter of legal interpretation, that FEA regulations prohibit Texaco from increasing charges for the rental of trucks to National at Norfolk, in the circumstances set forth above.

The interpretation request also asks that FEA determine, as a matter of legal interpretation, that National is a member of a separate class of purchaser based on the price differential represented by the total "economic" price of aviation fuel plus the equipment rental fees at Norfolk. In view of the foregoing Interpretation that the truck rental lease represents a separate and optional contract concerning post-delivery services and that increases in rental fees are not prohibited per se under § 210.62(c), we are unable to accede in this request. The class of purchaser determination affecting National must in this case be based on Texaco's customary price differentials without regard to post-delivery services.

This Interpretation should not be construed, however, as confirming the validity of Texaco's class of purchaser determinations in any other respect. As we pointed out in Interpretation 1976–6, dated May 28, 1976 (42 FR 7923, February 8, 1977), a firm ordinarily makes its own class of purchaser determinations based on the record of its historic pricing practices. Questions raised concerning the validity of a firm's class of purchaser determinations are usually factual questions which can only be resolved by audit of the firm's pricing records and other accounting data through FEA's complaint and compliance procedures. Thus, if National seeks to raise factual questions concerning the validity of Texaco's class of purchaser determinations, nothing in this Interpretation bars pursuit by National of complaint procedures and remedies under 10 CFR Part 205, Subpart N

INTERPRETATION 1977—12

To: Phillips Petroleum Co.

Date: May 28, 1977.

Rules Interpreted: § 212.72.

Code: GCW—PI—BPCL.

This is in response to your letter of March 16, 1976, on behalf of Phillips Petroleum Company, requesting an Interpretation of 10 CFR 212.72 (Definition of "base production control level") for purposes of the Mandatory Petroleum Price Regulations applicable to domestic crude oil. After consideration of all the information contained in your request, and all relevant authorities, we have concluded that the appropriate Interpretation is the one that follows.

FACTS

As we understand the facts, Phillips Petroleum Company ("Phillips") is the owner and/or operator of several crude oil producing properties. With respect to one such property, the Smackover Nacatoch Sand Unit ("the property"), Phillips makes use of a steam injection production technique. From the period May 1971 to January 1975, crude oil produced from the property was consumed on the property as "lease fuel" for the equipment required to generate steam for injection into the crude oil reservoir.

In determining the property's base production control level ("BPCL") Phillips has included as volumes of crude oil "produced and sold" from the property, the volumes produced and consumed on the property each month as lease fuel. Phillips now requests the interpretation that such crude oil volumes produced and consumed as lease fuel should have been excluded in determining the property's BPCL.

ISSUE

Based upon the facts contained in Phillips' request, the issue for our consideration is whether volumes of crude oil produced from a property and consumed on the property are considered "produced and sold" from the property so that such volumes should be included in determining the property's BPCL.

INTERPRETATION

The definition of base production control level is contained in 10 CFR 212.72, and provides:

"Base production control level" means: (1) with respect to months ending prior to February 1, 1976:

(A) if crude oil was *produced and sold* from the property concerned in every month of 1972, the total number of barrels of domestic crude oil *produced and sold* from that property in the same month of 1972;

(B) if crude oil was not *produced and sold* from the property concerned in every month of 1972, the total number of barrels of crude oil *produced and sold* from that property in 1972, divided by 12;

(2) with respect to months commencing after January 31, 1976, except as provided in § 212.76, either:

(A) the total number of barrels of old crude oil *produced and sold* from the property concerned during calendar year 1975, divided by 365, multiplied by the number of days in the month in 1975 which corresponds to the month concerned; or

(B) if the producer elects to certify crude oil sales for 1972 in accordance with § 212.131 (a)(1), the total number of barrels of crude oil *produced and sold* from the property concerned during the calendar year 1972, divided by 366, multiplied by the number of days during the month in 1972 which corresponds to the month concerned. (Emphasis added.)

In connection with the first stage rulemaking proceeding to implement the crude oil pricing policy of the Energy Policy and Conservation Act (Pub. L. 94–163), FEA made it clear that crude oil produced from and subsequently consumed on a property is to be considered "produced and sold" for purposes of Subpart D:

FEA believes that in crude oil production, as in crude oil refining (*see, e.g.*, Ruling 1974–27, 39 FR 44415, December 24, 1974), *the internal* or affiliated transfer or *transformation of a product has economic value.* As such, a "sale" for purposes of FEA price rules may be considered to have occurred, even though money and goods were not actually exchanged. Additionally, FEA believes that both the transfer of crude oil by a producer to a refiner pursuant to processing agreements whereby the producer receives value for the crude oil (*i.e.*, refined product[)], and the *consumption of crude oil by the producer as lease fuel*[] constitute transfers for value and, therefore, "sales" for the purpose of application of Subpart D. This conforms with typical accounting practices, which require valuation of all production from the lease without regard to its intended disposition. *Crude oil that is produced from and subsequently consumed on a lease,* or refined product returned to the lease for consumption or resale, *is similarly accounted for and assigned an appropriate value.* This historic method of production accounting further supports the treatment of these transfers as "sales" for purposes of Subpart D. (Emphasis added, 41 FR 4934, February 3, 1976.)

In fact, Phillips' own accounting method was consistent with this result, inasmuch as volumes of crude oil produced from and consumed on the property were originally included by Phillips in determining the property's BPCL.

Accordingly, it is our conclusion that Phillips' original inclusion of volumes consumed as lease fuel in the property's BPCL was correct and may not be modified. This result is consistent with that reached by FEA in Tenneco Oil Company, FEA–0904, a copy of which is enclosed, in which FEA concluded that volumes of crude oil produced from and consumed as fuel on the Tenneco property should have been considered as volumes that were "produced and sold" and therefore included in determining the property's BPCL.

INTERPRETATION 1977–13

To: Atlantic Richfield Co.

Date: May 28, 1977.

Rules Interpreted: § 211.63.

Code: GCW—AI—December 1 Rule.

By letter dated August 6, 1976, you requested an interpretation on behalf of Atlantic Richfield Company ("ARCO") of the Mandatory Petroleum Allocation Regulations of the Federal Energy Administration ("FEA") concerning the termination by ARCO of a crude oil supplier/purchaser relationship in effect pursuant to 10 CFR 211.63 with Shell Oil Company ("Shell"). By letter dated August 18, 1976, Shell provided FEA with its comments on ARCO's request.

FACTS

On January 1, 1976, ARCO was supplying certain volumes of stripper well crude oil to Shell. In July 1976, ARCO notified Shell that it had elected to terminate that supply relationship effective August 1, 1976, and to sell that crude oil to a small refiner. In its request ARCO states that the crude oil previously supplied to Shell would not be processed by that small refiner, but would be processed by a third party that would obtain the crude oil pursuant to an exchange agreement with the small refiner. The small refiner would process crude oil received in exchange for the volumes previously sold to Shell.

ISSUE

The issue presented for interpretation is whether a supplier/purchaser relationship involving stripper well crude oil in effect under contract on January 1, 1976 may be terminated pursuant to 10 CFR 211.63(d)(1)(ii) by the seller (ARCO) where the crude oil is sold to a small refiner, which thereafter exchanges the crude oil for other crude oil that is processed in its refinery.

INTERPRETATION

FEA's crude oil supplier/purchaser rule (the "rule"), set forth at 10 CFR 211.63, generally provides that supplier/purchaser relationships in effect under contracts for sales, purchases and exchanges of domestic crude oil on January 1, 1976 are required to remain in effect for the duration of FEA's Mandatory Petroleum Allocation Program. The rule permits terminations of crude oil relationships in certain enumerated circumstances. Specifically, 10 CFR 211.63(d)(1)(ii) provides that such relationships may be terminated:

By a producer with respect to any crude oil produced from a stripper well lease (as defined in § 212.74 of Part 212 of this chapter), provided that the production from a stripper well lease is upon termination immediately sold or sold for resale to any small refiner and continuously thereafter supplied to that small refiner purchaser for processing by that small refiner * * *

This particular termination provision first became effective on June 11, 1976 (41 FR 24338, June 16, 1976), based on a previous notice of proposed rulemaking (41 FR 16662, April 21, 1976). Among the changes to the rule proposed in the April 1976 proposal was a provision that would have permitted termination of supplier/purchaser relationships by a seller, provided the crude oil involved was immediately upon termination supplied to a small refiner with a refinery capacity not in excess of 50,000 barrels per day. A public hearing on the proposal was held on May 6, 1976, and FEA received many comments opposing the provision as excessively broad and detailing the possible widespread supply disruptions within domestic crude oil markets that could result therefrom.

Based on these comments and further consideration of the potential impact that an excessively broad termination provision could have upon the domestic crude oil markets in general, and upon small refiners in particular, FEA limited the provision as adopted on June 11, 1976, to stripper well production and added the express requirement that the crude oil be sold to a small refiner "for processing by that small refiner", to prevent terminations involving a small refiner for volumes of crude oil in excess of the small refiner's processing capacity. Thus, § 211.63(d)(1)(ii) expressly requires that the crude oil which is the subject of the termination must be "continuously thereafter supplied to that small refiner purchaser for processing by that small refiner." This express requirement and the fact that no reference is made to exchanges in this provision reinforces FEA's conclusion that the termination contemplated by ARCO would not comport with the provisions of § 211.63(d)(1)(ii).

Based on the foregoing, it is our opinion that 10 CFR 211.63(d)(1)(ii) only permits termination by a producer of crude oil from a stripper well lease where the crude oil is continuously thereafter supplied to a small refiner which actually processes that crude oil in its own refinery.

INTERPRETATION 1977–14

To: State of California.

Date: May 28, 1977.

Rules Interpreted: §§ 211.63, 212.74(c).

Code: GCW—AI, PI—December 1 Rule, Crude Oil Ceiling Price Rules, Retroactive Increase.

This is in response to your request for interpretation on behalf of the State of California dated October 7, 1975 concerning the application of FEA allocation and price rules to the State of California's sales of certain royalty crude oil, taken in kind from two offshore oil and gas leases, to two independent marketers. This interpretation is given after review of submissions by the State of California and those materials filed by all interested parties with the U.S. District Court for the Central District of California in the case of *California* v. *Zarb*, No. CV75–854WPG. It is our understanding that action in that case has been stayed pending your receipt of this interpretation. On October 31, 1975, USA Petroleum Corporation ("USA") submitted its comments with respect to the State's request which have been taken into consideration in the interpretation rendered by this office.

FACTS

The State of California (the State) owns royalty interests in certain crude oil produced from offshore oil and gas leases. Under the terms of the leases, this royalty crude oil may be taken in kind or the operator may pay cash to the State in lieu of the royalty share of crude oil due the State. Signal Oil and Gas Company (Signal), a subsidiary of Burmah Oil, Ltd. is the lessee of two such offshore oil and gas leases (PRC 425.1 and E 392.1). On December 1, 1973, Signal was receiving the royalty crude oil produced on the leaseholds since the State had elected to take its royalty share in cash.

In November of 1973, the State had offered the royalty crude oil produced by these two leaseholds and seven others for sale to any interested parties. Pursuant to that offering, the State accepted bids by two firms other than Signal (an unsuccessful bidder)—USA (formerly U-Save Automatic Corporation) and World Oil Company (World). Under the terms of the acceptance, the State was to deliver to these firms for a five year period royalty shares of crude oil from these leases commencing on May 1, 1974. The price paid for the royalty crude oil by the two firms was specified as the lesser of the posted price for oil exempt from FEA price restrictions plus a specified bonus, or the maximum price permitted by price controls so long as they were in effect. Further, the bidders retained the option to terminate their purchase contracts if the posted price for exempt crude oil exceeded the September 26, 1973 posted price for such oil.

On May 1, 1974, the State began delivering crude oil to World and USA pursuant to its contracts. (The State submitted monthly invoices to USA and World, pricing "new" and "released" oil at the then-current prices for exempt oil plus the bonus called for by the contract. USA has refused to pay the bonuses on such exempt oil.) The two companies have continued to receive royalty crude oil produced from these leases to date.

On May 17, 1974, the Office of the General Counsel of FEA rendered an interpretation in which it determined that the provisions

of 10 CFR 211.63 required the State to continue to supply crude oil produced from PRC 425.1 and E 392.1 to Signal. On January 17, 1975, FEA's Office of Exceptions and Appeals affirmed the interpretation in all respects. See *California State Lands Commission* No. FEA–0135, 2 FEA ¶80,507. (The Interpretation and appeals decision are enclosed.)

On March 7, 1975, the State filed a complaint in the U.S. District Court for the Central District of California, seeking judicial review of the FEA decision.

According to information submitted by the State in its October 7, 1975 request for interpretation, the State and Burmah, Ltd. (Signal's parent) entered into a formal agreement on April 21, 1975 whereby they "mutually agreed to retroactively terminate their supplier/purchaser relationship with respect to the royalty crude oil from PRC 425.1 and E 392.1 effective May 1, 1974."

ISSUE

The issues presented for consideration by the State's October 7, 1975 request are:

1. Did the State-Burmah agreement of April 21, 1975, terminate the crude oil supplier/purchaser relationship between them effective May 1, 1974 and thus remove FEA's objection to the sale of the involved crude oil production to USA and World?

2. Assuming a lawful termination of the 10 CFR 211.63 supplier/purchaser relationship between the State and Burmah, may the State charge and collect the bonus on all uncontrolled oil taken by USA prior to February 1, 1976 under the sales contract?

INTERPRETATION

A. *Termination of the Supplier/Purchaser Relationship*

On May 1, 1974, 10 CFR 211.64(a)[1] provided for the termination of crude oil supplier/purchaser relationships in the following manner:

(a) All supplier/purchaser relationships in effect under contracts for sales, purchases, and exchanges of domestic crude oil on December 1, 1973 shall remain in effect for the duration of this program except purchases and sales made to comply with this program: *Provided, however,* That (1) *any contract or agreement for the sale, purchase, or exchange of domestic crude oil may be terminated by the mutual consent of both parties;* (2) the provisions of this paragraph do not apply to the first sale of crude oil pursuant to § 210.32 of this chapter; and (3) the provisions of this paragraph shall not apply to the seller of any crude oil if the present purchaser of such crude oil refuses, after notice by the seller, to meet any bona fide offer made by another purchaser to buy such crude oil at a lawful price above the price paid by the present purchaser. (Emphasis added.)

Although the provisions of 10 CFR 211.63 have been modified as the allocation regulations have been amended, the termination of a supplier/purchaser relationship by the mutual consent of both parties has been permitted throughout the program. As we understand the facts of this case, such a mutual termination of the supplier/purchaser relationship with respect to leases PRC 425.1 and E 392.1 effective May 1, 1974 has occurred by written agreement between Burmah and the State. The State urges this office to affirm the effectiveness of such a termination. However, in its written submission, USA seeks to have this office interpret 10 CFR 211.63 to also permit the State to treat its supplier/purchaser relationship between the State and Standard Oil of California (Socal) as to crude oil production from another lease (PRC 3095.1) as terminated effective May 1, 1974. Although both the State and USA request that this interpretation reconcile their respective positions with the January 17, 1975 FEA appeals decision, the lack of any documented basis for an express or implied termination of the State's supplier/purchaser relationship with Socal prevents reconciliation of USA's position with FEA regulations or the aforementioned appeal decision.

It is our conclusion that the entry into a written agreement on April 21, 1975 to terminate, effective May 1, 1974, the supplier/purchaser relationship between Burmah and the State as to production from PRC 425.1 and E 392.1 constitutes a lawful termination of that relationship, albeit retroactive, and eliminates FEA's objection to the sales of such crude oil to USA and World. We further conclude that the apparent absence of any similar lawful termination of the supplier/purchaser relationship between the State and Socal results in the continued preservation of that relationship under the terms of 10 CFR 211.63.

While USA argues in its written submission that such a conclusion produces an unwanted and inconsistent result with respect to USA's contracts with the State, FEA concludes that the allocation regulations require the observance of the freeze on such crude oil supplier/purchaser relationships in the absence of a lawful termination of that relationship.

B. *Operation of the State-USA Contract*

Having concluded that the Burmah-State supplier/purchaser relationship was retroactively terminated on May 1, 1974, we further conclude that sales of production from PRC 425.1 and E 392.1 leases made to USA and World pursuant to those contracts entered into on November 29, 1973 were permitted to the extent that prices charged in such sales were in conformance to applicable FEA price regulations.

Since May 1, 1974 (the date of the beginning of sale of crude oil from PRC 425.1 and E 392.1) and until February 1, 1976, FEA price regulations governing the first sale of domestic crude oil provided a ceiling price for "old" oil, i.e., crude oil produced and sold from a property in amounts that did not exceed that property's 1972 production and sale. (10 CFR 212.73, 39 FR 1921, January 15, 1975.)

"New" crude oil, representing a property's crude oil production and sale in excess of 1972 levels, was permitted to be sold without regard to the ceiling price. An equivalent amount of such a property's base production control level was also permitted to be sold at exempt prices. (10 CFR 212.74, 39 FR 1924, January 15, 1974.) To the extent that crude oil produced and sold from PRC 425.1 and E 392.1 prior to February 1, 1976 qualified as new or released crude oil, prices charged for such oil were not subject to the ceiling price limitations imposed on old oil. As a result, the contract provisions calling for the State to receive a price for such oil which consisted of the then-current average posted price plus a bonus was not in conflict with then-existing FEA price regulations. Accordingly, it is the conclusion of this office that USA's refusal to pay such a bonus from May 1, 1974 can not be justified by application of FEA price regulations.

Nor is the State's present attempt to collect bonus payments from USA which were charged on each invoice a retroactive increase in price so as to come within the proscription of 10 CFR 212.74(c) which provides in relevant part:

"• • • No producer may charge or accept a retroactive increase in price for crude oil. • • • Retroactive increase in price means any price charged or offered after the close of the calendar month in excess of the highest price prevailing for that grade of crude oil, in first sales between the producer and the purchaser of the domestic crude oil, during the calendar month in which it was produced and sold."

Since the State consistently and on a current basis billed USA for the full amount called for by the contract, the State's claim for those monies due to it because of USA's failure to pay the entire amount cannot be considered either a retroactive action or an increase in its prices. Therefore, it is the conclusion of this office that USA may not rely on FEA price rules prior to February 1, 1976 in order to refuse payment of the full contract prices to the State.

INTERPRETATION 1977—15

To: Husky Oil Co. of Delaware.

Date: May 28, 1977.

Rules Interpreted: § 211.63.

Code: GCW–AI—December 1 Rule.

This is in response to your December 15, 1975, request for an interpretation of the crude oil supplier/purchaser rule set forth at 10 CFR 211.63 as it relates to the termination of the supply of a particular crude oil to Husky Oil Company. In connection with your request, comments were submitted on behalf of Adolph Coors Company, Kenneth Luff, Inc. and Tesoro Crude Oil Company.

FACTS

Husky Oil Company ("Husky") and Adolph Coors Company ("Coors") were parties to an exchange agreement dated July 25, 1973 (the "Husky-Coors Exchange Agreement"), which provided that Coors agreed to sell to Husky, for each barrel of crude oil purchased from Husky under an agreement known as the Burton-Hawks Agreement, a barrel of crude oil from the Denver-Julesburg Basin. On December 11, 1973, the Husky-Coors Exchange Agreement was amended, effective retroactively to July 25, 1973, whereby Husky agreed to accept crude oil from the Luff-Patrick Draw, Sweetwater County, Wyoming from Coors under the Husky-Coors Exchange Agreement. The December 11, 1973 amendment arose as a result of a Purchase Agreement, dated November 1, 1973 (the "Luff-Coors Purchase Agreement"), between Coors and Kenneth Luff, Inc. ("Luff"), whereby Luff agreed to sell Patrick Draw crude to Coors. The term of this agreement was from November 1, 1973, through December 31, 1974, and continuing thereafter until written termination notice by either party. The Husky-Coors Exchange Agreement was supplemented on January 11, 1974, effective retroactively to November 1, 1973, and Husky thereby received the option to purchase Luff-Patrick Draw crude oil from Coors in excess of the volumes called for under the Husky-Coors Exchange Agreement.

In conversations with counsel for Coors and Husky concerning their written submissions, it was confirmed that Husky began purchasing Luff-Patrick Draw crude oil from Coors in November 1973. On April 21, 1975, Coors terminated the Luff-Coors Purchase Agreement, and Coors notified Husky of the termination on April 22, 1975. Luff then commenced to sell the Luff-Patrick Draw crude oil to Tesoro Crude Oil Company of San Antonio, Texas ("Tesoro").

ISSUE FOR INTERPRETATION

The issue presented for interpretation is whether the voluntary termination by Coors of its supplier/purchaser relationship with Luff under the Luff-Coors Purchase Agreement without the consent of Husky was permissible under 10 CFR 211.63.

INTERPRETATION

On April 22, 1975, the date of the termination of the Luff-Coors Purchase Agreement, FEA's crude oil supplier/purchaser rule, set forth at 10 CFR 211.63 (the "rule"), generally provided that supplier/purchaser relationships in effect under contracts for sales, purchases and exchanges of domestic crude oil on December 1, 1973 were required to remain in effect for the duration of FEA's Mandatory Petroleum Allocation Program. FEA has consistently held that the principal purpose of the rule is to protect the supply sources of small and independent refiners. See *Basin, Inc.* v. *Federal Energy Administration*, Docket No. 5–21 (Em. App., March 7, 1977) (2 Fed. Energy Guidelines ¶26,071).

At the time of the termination of the Luff-Coors Purchase Agreement, 10 CFR 211.63 (a)(1) provided that any supplier/purchaser relationship under the rule "• • • may be terminated by the mutual consent of both parties; • • •" In light of the underlying purpose of the rule, it is clear that, under the rule as then in effect, such an agreement for termination could not adversely affect the rights of further purchasers of the crude oil involved. Refiners such as Husky in many cases purchase crude oil from resellers or marketers such as Coors, which in turn purchase the crude oil from a producer. In some cases, there is more than one reseller or marketer in the supply chain. If the rule as in effect at the time of the termination of the Luff-Coors Purchase Agreement were interpreted to permit a reseller to consent to a termination of a supplier/purchaser relationship with a producer, without obtaining the consent of the next marketer in the chain or the downstream refiner, the principal purpose underlying adoption of the rule clearly would be frustrated.

Supplier/purchaser relationships existed on December 1, 1973 between Luff and Coors and Coors and Husky as to the Luff-Patrick Draw production by virtue of the Luff-Coors Purchase Agreement and the Husky-Coors Exchange Agreement, as amended. The supplier/purchaser relationship between Coors and Husky as to the Luff-Patrick Draw production necessarily was dependent on the supplier/purchaser relationship between Coors and Luff as to this crude oil. If for reasons beyond the control of Coors, the Luff-Patrick Draw production was no longer being supplied to Coors, the supplier/purchaser relationship with Husky as to this production would have necessarily been terminated. However, Coors' voluntary termination of its supplier/purchaser relationship with Luff had the indirect effect of terminating Coors' corresponding relationship with Husky, without the latter's consent. It is this very result which 10 CFR 211.63 was designed to prevent.

This interpretation was expressly confirmed by the adoption of the present § 211.63(d)(1)(i) (41 FR 24336, June 16, 1976), which requires that, prior to the purchaser consenting to any termination, all subsequent purchasers of the crude oil involved shall have consented to such termination in writing.

Based on the foregoing, it is our conclusion that under 10 CFR 211.63 the supplier/purchaser relationship in effect between Coors and Husky as to the Luff-Patrick Draw production precluded Coors from voluntarily relinquishing by consent given to Luff its source of such production without the consent of Husky.

INTERPRETATION 1977—16

To: Mobil Oil Corp.

Date: May 28, 1977.

Rules Interpreted: §§ 211.67(d)(2), 212.53(a).

Code: GCW–AI, PI—Definition of Export Sales, Export Sales Deduction.

This is in response to your request for interpretation dated December 16, 1976 regarding the applicability of the export sales deduction requirement under FEA's domestic crude oil allocation program (the "entitlements program"), set forth at 10 CFR 211.67(d)(2), to sales of cargoes of aviation fuel to the Department of Defense ("DOD") for shipment to and use at United States military bases in foreign countries.

FACTS

Mobil Oil Corporation ("Mobil") has sold and intends to continue selling to DOD at Mobil's United States refineries cargoes of aviation fuel for shipment to and use at United States military bases in foreign countries.

ISSUE FOR INTERPRETATION

Are cargo volumes of aviation fuel sold by Mobil to DOD for shipment to and use at United States military bases in foreign countries export sales under 10 CFR 212.53(a) and as such required to be deducted from Mobil's crude oil runs to stills under 10 CFR 211.67(d)(2)?

INTERPRETATION

It is our opinion that Mobil's sales of aviation fuel to DOD in the circumstances indicated do not constitute export sales under 10 CFR 212.53(a), and therefore the volumes sold are not required to be deducted from Mobil's crude oil runs to stills under 10 CFR 211.67(d)(2).

10 CFR 211.67(d)(2) provides that the volume of a refiner's crude oil runs to stills in a particular month for purposes of the calculations for the national domestic crude oil supply ratio "shall be reduced by that refiner's volume of export sales under § 212.53 of Part 212 of this chapter in that month of refined petroleum products (including aviation fuels as defined in § 211.142 of this part • • •)• • •." 10 CFR 212.53(a) exempts "export sales" from FEA's price regulations but does not define the term "export sales".

A purpose of the export sales exemption in 10 CFR 212.53(a) is to allow exports, which will produce revenues from foreign sources, to be sold at the highest possible prices. Since Mobil's sale of cargoes of aviation fuel to DOD will not produce such revenues, such sales would not be considered export sales for the purpose of 10 CFR 212.53(a). This interpretation is consistent with a ruling of the Cost of Living Council ("CLC") under an analogous regulatory provision.[2] In CLC Phase IV Price Ruling 1974–3, issued March 14, 1974 (39 FR 10152, March 18, 1974), the CLC held that sales of products to United States military commissaries and base exchanges located outside the United States did not qualify as exempted exports for purposes of the CLC's price freeze rules because the sales were primarily to United States citizens and thus did not produce revenues from foreign sources.

Further, treatment of Mobil's sales of aviation fuel to DOD as not constituting export sales is in accord with the policies underlying the provisions for entitlement loss for export sales as set forth in 10 CFR 211.67(d)(2). As expressed in the preamble to the amendment to 10 CFR 211.67(d)(2) issued on March 29, 1976 (41 FR 13899, April 1, 1976), the purpose of the deduction provision is to ensure that cost equalization benefits under the entitlements program are not granted to a refiner for sale of products made into the world market at uncontrolled prices and that the benefits of the entitlements program and domestic crude oil price controls are retained within the domestic economy. Since the cargoes of aviation fuel in question are not sold into the world market, but rather are sold to DOD at Mobil's United States refineries and are consumed by DOD in connection with its maintenance of United States military bases in foreign countries, any entitlement benefits associated with the production of the fuel would be retained within the domestic economy.

"§ 150.54 Certain price adjustments.

• • • • •

(d) *Exports, imports, ocean shipping rates, and foreign air transportation.* (1) The prices charged for export sales including the sale of products to a domestic purchaser who certifies that the product is for export are exempt."

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 77–GL–13; Amdt. 39–2923]

PART 39—AIRWORTHINESS DIRECTIVES

Champion Spark Plug Company Part Numbers CH48108 and CH48109 Oil Filters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This airworthiness directive (AD) requires that Champion Part Numbers (P/N's) CH48108 and CH48109 oil filters identified by a specific manufacturing date code be removed from service. These oil filters may contain defects that could lead to internal failure of the filter and possible interruption of the engine lubricating oil flow.

DATE: Effective date—June 24, 1977. Compliance schedule—Compliance required before further flight, unless already accomplished, except that the airplane may be flown in accordance with FAR 21.197 to a base where the removal can be performed.

FOR FURTHER INFORMATION CONTACT:

William Ashworth, Engineering and Manufacturing Branch, Flight Standards Division, AGL–214, Federal Aviation Administration, 2300 E. Devon Avenue, Des Plaines, Illinois 60018, telephone 312–694–4500, extension 308.

SUPPLEMENTARY INFORMATION: There recently have been three instances of internal bypass valve failure on certain Part Number CH48108 and CH48109 oil filters. All three failures were detected before being installed on aircraft, however, it has been determined that this

type of failure could lead to complete blockage of the oil flow, resulting in oil starvation and subsequent engine failure.

Investigations revealed that, in each instance, the most probable cause of these failures was a manufacturing defect which caused the bypass valve to become separated from the internal structure of the filter and fall into the oil outlet flow path.

Since this condition is likely to exist or develop in other oil filters of this type design and manufacturing date an airworthiness directive is being issued to remove these filters from service.

In accordance with Departmental Regulatory Reform, dated March 23, 1976, we have determined that the expected impact of this final rule is so minimal that it does not warrant an evaluation.

DRAFTING INFORMATION

The principal authors of this document are W. Ashworth, Flight Standards Division, Great Lakes Region, and J. Hacker, Office of the Regional Counsel, Great Lakes Region.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following Airworthiness Directive:

CHAMPION SPARK PLUG COMPANY. Applies to Part Numbers CH48108 and CH48109 oil filters as installed in aircraft certificated in all categories, identified by the following manufacturing date code, 1A7E and 2A7C for the Part Number CH48108 filter and 1A7G and 1A7I for the Part Number CH48109 filter. The manufacturing date code is located on the outside of the filter housing adjacent to the filter installation instructions.

Compliance required before further flight, unless already accomplished, except that the airplane may be flown in accordance with FAR 21.197 to a base where the removal can be performed.

To preclude possible oil filter malfunction resulting from internal bypass valve failure, remove all applicable filters from service.

This amendment becomes effective June 24, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Illinois on June 10, 1977.

LEON C. DAUGHERTY,
Acting Director,
Great Lakes Region.

[Docket No. 76-GL-21, Amdt. 39-2922]

PART 39—AIRWORTHINESS DIRECTIVES

Hartzell Compact Series Propellers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which replaces AD 70-16-3, AD 73-10-3, AD 74-15-02, and AD 75-07-05, and which requires periodic inspection and rework of all "Y" shank blades, including pressure rolling of the retention radius, and change of the operating limitations on some models, to detect and prevent cracks which might result in complete blade separation. In addition, the AD accelerates compliance time for modification of the pitch change mechanism on those compact propellers remaining in service which have not incorporated this change, in order to prevent failure of the mechanism and loss of propeller control. This action is considered necessary due to blade shank cracks and propeller malfunctions which have continued to occur in service.

DATE: Effective date: June 24, 1977. Compliance schedule.—As prescribed in the body of the AD.

ADDRESSES: Copies of Hartzell Bulletins No. 101D and 118A and Service Letters 61B and 69 may be obtained from Hartzell Propeller, Inc., 350 Washington Avenue, Piqua, Ohio 45356.

Copies of the service information incorporated in this AD are contained in the Rules Docket, Office of the Regional Counsel, 2300 E. Devon Avenue, Des Plaines, Illinois 60018; and Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

M. J. Walker, Engineering and Manufacturing Branch, Flight Standards Division, AGL-214, Federal Aviation Administration, 2300 E. Devon Avenue, Des Plaines, Illinois 60018, telephone 312-694-4500, extension 309.

SUPPLEMENTARY INFORMATION: In order to minimize operation in regions of high propeller vibratory stress and reduce the occurrence of blade shank cracks, a proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring extension of the propeller operating limitations for certain Hartzell compact series propellers having Hartzell manufactured "Y" shank blades was published in 41 FR 49829, November 11, 1976. After publishing this notice and receiving comments, the FAA determined that additional measures were necessary to prevent blade failures of other propellers of "Y" shank design due to the initiation of fatigue cracks following shot peening in the radius of the bearing retention area. Accordingly the notice was supplemented to propose an airworthiness directive that would incorporate those measures described uner "Summary" above. The supplementary notice was published in 42 FR 11249, February 28, 1977.

Numerous comments were received objecting to the wording of the proposed propeller operating placards, marking of the engine tachometer, the use of red arcs as proposed, and to the operating restrictions themselves. The wording has been changed to avoid ambiguity and a provision for marking the tachometer bezel was added as an alternative to marking the face, which requires disassembly. The suggested use of yellow tachometer marking instead of red to indicate precautionary regions is not consistent with either CAR 3.759 or FAR 23.1549(d) which require that each engine speed range that is restricted because of excessive vibration be marked with a red arc.

Two comments were received suggesting that the propeller r.p.m. operating restrictions be noted in the flight manual as an alternative to instrument panel placards. Experience has shown that some pilots do not consult the airplane flight manual adequately; also the flight manual is not required for all aircraft. In view of the inherent hazard involved, it is considered that both the tachometer markings and placards are necessary to bring the operating restrictions to the pilot's attention in the most direct manner.

It was pointed out that propeller blades which were modified and properly metal stamped on the blade butt would not be identifiable without propeller disassembly. It was established that such blades also would carry externally visible inkstamped identification and the AD was changed accordingly. A note indicating equivalent compliance by incorporation of serialized or otherwise identified blades was placed at the beginning of for AD for clarification.

One commenter requested that F7666-2R blades be noted as meeting the AD modification requirements, since this blade was recently approved for installation on an aircraft. These blades are being supplied only with the new processes and are so designated by serialization. Therefore, all F7666-2R blades are effectively identified as having met the AD requirements.

One manufacturer submitted three additional aircraft series which were affected by the AD and recommended identification of Bulletin 118A as Hartzell Bulletin 118A throughout. Both comments were incorporated. Issuance of the AD was coordinated with the availability of parts and equipment as recommended by one commenter.

Continuing investigation has disclosed that most probable causes of propeller blade shank cracking are discontinuities in the shot peened surface of the bearing seating surface which may initiate metal fatigue, and continued operation in regions which produce high propeller stresses in some installations. Failure of the blade shank could result in loss of a propeller blade, while loss of pitch control could result from failure of the mechanism.

Since these conditions are likely to exist or develop in other propellers of similar design, an airworthiness directive is being issued which requires rework of the shank bearing seat of all "Y" shank blades in service, extension of the restricted operating range of certain installations, and modification to strengthen the pitch change mechanism of those propellers not previously modified.

In accordance with Departmental Regulatory Reform dated March 23, 1976, we have determined that the expected impact of this final regulation is so minimal that it does not warrant an evaluation.

DRAFTING INFORMATION

The principal authors of this document are M. J. Walker, Flight Standards Division, Great Lakes Region, and J. McLaughlin, Office of the Regional Counsel, Great Lakes Region.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

HARTZELL PROPELLERS. Applies to the Model HC-()()Y() and ()HC()()Y() compact series constant speed or feathering propellers with Hartzell manufactured "Y" shank blades, used on but not limited to Aero Commander 200B and 200D, Aerostar 600, Beech 24, 35, 36, 45, 55, 56TC, 58, 60, and 95, Bellanca 14 and 17 series, Britten Norman BN-2, BN-2A, and BN-2A-6, Cessna 182 and 188, Embraer EMB-200A, Maule M5, Mooney M20 and M22, Piper PA-23, PA-24, PA-28, PA-30, PA-31, PA-32, PA-34, PA-36, and PA-39, Pitts S-1T and S-2A, Sial Marchetti S-208, and Rockwell 112, 114, 200, 500, and 685 series aircraft.

Compliance required as indicated for both initial and repetitive procedures unless already accomplished. To detect blade shank cracks and prevent possible blade failure, accomplish the following:

GENERAL

Propellers with all blades serial D47534 or above, or with all blades identified with the letters "PR" or "R" ink-stamped on the camber side and "SP" and "RD" metal stamped on the blade butt, or with all blades model F7666A-()P are considered to be in compliance with the initial inspection and rework requirements only of this AD where specified by reference to Hartzell Bulletin 118A dated February 15, 1977.

(a) Models HC-()()Y() and ()HC()()Y() Compact Series "Y" Shank Propellers.

(1) All propellers not specified in paragraphs (b), (c), or (d) of this AD with 1000 or more hours time in service, or whose time in service is unknown; remove, inspect and rework, or replace if necessary in accordance with Hartzell Bulletin 118A dated February 15, 1977 within the next 300 hours or one year in service after the effective date of this AD, whichever occurs first. Reinspect and, if necessary, rework in accordance with Hartzell Bulletin 118A at intervals specified in Hartzell Service Letter 61B (Overhaul Periods for Hartzell Propellers) dated September 10, 1976, or later FAA approved revision(s).

(2) Propellers subjected to momentary overspeed greater than 10 percent above rated r.p.m. or continuous overspeed totaling one hour or more at greater than 5 percent above rated r.p.m.; remove, inspect and rework, or replace if necessary in accordance with Hartzell Bulletin 118A before further flight.

(3) Propellers subjected to ground or object strike; remove, inspect and rework, or replace if necessary in accordance with Hartzell Bulletin 118A before further flight.

(b) Propeller Models HC-E2YR-2()()()C8475-().

Propeller Models HC-E2YR-2()()/()C8475-() installed on Piper PA-31 series aircraft; remove, inspect and rework, or replace if necessary in accordance with Hartzell Bulletin 118A within the next 50 hours in service after the effective date of this AD. Reinspect and, if necessary, rework in accordance with Hartzell Bulletin 118A at intervals specified in Hartzell Service Letter 61B, or later FAA approved revision(s).

(c) Propeller Models ()HC-C2YK-()()()/()()7666A-() and HC-C2YK-()()/()()7666A-().

(1) Propeller Models ()HC-C2YK-()()()/()()7666A-() which have not been inspected and reworked as specified by AD 75-07-05, installed on, but not limited to Pitts S-2A, Piper PA28-180 (STC SA2213WE), PA28R-180, PA28R-200, PA34-200, and Mooney M20() series aircraft; remove, inspect and rework or replace if necessary in accordance with Hartzell Bulletin 118A within the next 100 hours or one year in service after the effective date of this AD, whichever occurs first. Reinspect and, if necessary, rework in accordance with Hartzell Bulletin 118A at intervals specified in Hartzell Service Letter 61B, or later FAA approved revision(s).

(2) Propeller Models ()HC-C2YK-()()()/()()7666A-() which have been inspected and reworked as specified by AD 75-07-05; remove, inspect and rework, or replace if necessary in accordance with Hartzell Bulletin 118A within 500 hours from the date of compliance with AD 75-07-05. Reinspect and, if necessary, rework in accordance with Hartzell Bulletin 118A at intervals specified in Hartzell Service Letter 61B, or later FAA approved revision(s).

(3) Propeller Model HC-C2YK-()()/()()7666A-() installed on aircraft with undampered 200 h.p. Lycoming IO-360 series engines, including but not limited to Mooney M20E and F and Piper PA28R-200 type normal category aircraft and Pitts S-1T and S-2A acrobatic aircraft; within the next 100 hours time in service after the effective date of this AD accomplish the following:

(i) Remove the present propeller vibration placard, if installed, and on the instrument panel near the engine tachometer affix a new placard and revise the tachometer markings as follows:

(A) Placard for normal category aircraft: "Avoid continuous operation: Between 2000 and 2350 r.p.m. Above 2600 r.p.m. in full throttle level flight."

(B) Placard for utility and acrobatic aircraft: "Avoid continuous operation: Between 2000 and 2350 r.p.m. Above 2600 r.p.m. in acrobatic and full throttle level flight."

(C) Remark the engine tachometer face or bezel with a red arc for each restricted engine speed range, i.e., between 2000 and 2350 r.p.m. and between 2600 and 2700 r.p.m. (red line).

(ii) Upon compliance with paragraph (c)(1) or (c)(2) above, the restrictions against operation above 2600 r.p.m. in full throttle level flight only may be removed and the placards and tachometer markings revised as follows:

(A) Placard for normal category aircraft: "Avoid continuous operation: Between 2000 and 2350 r.p.m."

(B) Placard for utility and acrobatic aircraft: "Avoid continuous operation: Between 2000 and 2350 r.p.m. Above 2600 r.p.m. in acrobatic flight."

(C) Tachometer marking for normal category aircraft: Red arc between 2000 and 2350 r.p.m.

(D) Tachometer marking for utility and acrobatic aircraft: No change; same as (i)(C) above.

(d) Propeller Models HC-C2YK-()()/8475()-() or 8477()-(), and ()HC-C2YK-()()()/()()8475()-() or ()()8477()-().

(1) Propeller Models HC-C2YK-()()/8475()-() or 8477()-() installed on, but not limited to Piper PA-32-260, PA-32-300, and Sial Marchetti 208, which have not been inspected and reworked as specified in AD 74-15-02, accomplish the following within the next 50 hours in service after the effective date of this AD:

(i) Remove propeller from aircraft, modify pitch change mechanism and replace blades with equivalent model blades prefixed with letter "F" in accordance with Hartzell Service Letter 69 revised November 30, 1971 and Bulletin 101D dated December 19, 1974, or later FAA approved revision(s).

(ii) Inspect and repair or replace if necessary, in accordance with Hartzell Bulletin 118A. Reinspect and, if necessary, rework in accordance with Hartzell Bulletin 118A at intervals specified in Service Letter 61B, or later FAA approved revision(s).

(2) Propeller Models ()HC-C2YK-()()()/F()8475()-() or F()8477()-() used on but not limited to Aero Commander 200B and 200D, Aerostar, Mooney M22, Britten Norman BN-2, BN-2A, and BN-2A-6, Bellanca 17-31, Embraer EMB-200A, Piper PA32-260 and PA32-300, and Sial Marchetti S-208 series aircraft with 1000 or more hours time in service, or whose time in service is unknown; remove, inspect and repair, or replace if necessary in accordance with Hartzell Bulletin 118A within the next 300 hours or one year in service after the effective date of this AD, whichever occurs first. Reinspect and, if necessary, rework in accordance with Hartzell Bulletin 118A at intervals specified in Service Letter 61B, or later FAA approved revision(s).

Upon request of the operator, a FAA Maintenance Inspector, subject to approval of the Chief, Engineering and Manufacturing Branch, Great Lakes Region, may adjust the repetitive inspection intervals specified in this AD if the request contains satisfactory substantiating data to justify the adjustment for that operator.

The manufacturer's specifications and procedures identified in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Hartzell Propeller, Inc., 350 Washington Avenue, Piqua, Ohio 45356. These documents also may be examined at the FAA Great Lakes Region, 2300 East Devon Avenue, Des

Plaines, Illinois 60018 and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. 20591. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C. and at the Great Lakes Region.

This supersedes Amendment 39–1049 (35 FR 12325), AD 70–16–3, as amended by Amendment 39–1341; Amendment 39–1637 (38 FR 12325), AD 73–10–3; Amendment 39–1896 (39 FR 25644), AD 74–15–02; and Amendment 39–2136 (49 FR 12772), AD 75–07–05, as amended by Amendment 39–2216.

This amendment becomes effective June 24, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Des Plaines, Illinois, on June 10, 1977.

LEON C. DAUGHERTY,
Acting Director,
Great Lakes Region.

NOTE.—The incorporation by reference provisions in this document was approved by the Director of the Federal Register on June 19, 1967.

[Docket No. 15854; Amdt. 39–2926]

PART 39—AIRWORTHINESS DIRECTIVES

Hawker Siddeley Aviation, Ltd. Model DH/BH–125 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) which requires the installation of new knife edges in the brake control valve or of valves incorporating such edges, and the repetitive replacement of knife edges or valves, on Hawker Siddeley Model DH/BH–125 airplanes. This action is necessary to prevent a failure of the brake control valve which could result in complete loss of braking on one side of the airplane with no advance warning to the flight crew.

DATES: Effective—July 20, 1977. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: The applicable service bulletin may be obtained from Hawker Siddeley Aviation, Ltd., Hatfield, Hertfordshire, England, AL109TL, Attention: Technical Manuals Distribution Center.

A copy of the service bulletin is contained in the Rules Docket, Rm. 916, 800 Independence Ave. SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU–100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, Tel. 513.38.30.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring the installation of new knife edges in the brake control valve or of valves incorporating such edges, and the repetitive replacement of knife edges or valves, on Hawker Siddeley Model DH/BH–125 airplanes was published in the FEDERAL REGISTER at 41 FR 26578. As a result of a failure of a brake control valve of a design similar to that used on the Model DH/BH–125 airplanes, Hawker Siddeley Aviation, Ltd. conducted fatigue tests on the Model DH/BH–125 brake control valve. Based on these tests, the FAA has determined that the Model DH/BH–125 brake control valve is susceptible to a failure of a knife edge. A failure of this type could result in complete loss of braking on one side of the airplane with no advance warning to the flight crew.

Interested persons have been afforded an opportunity to participate in the making of the amendment. No objections were received. Accordingly, the proposal is adopted without change.

The principal authors of this document are Mr. F. J. Karnowski, Europe, Africa, and Middle East Region; Mr. F. H. Kelley, Flight Standards Service; and Mr. K. May, Office of the Chief Counsel.

ADOPTION OF AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following Airworthiness Directive:

HAWKER SIDDELEY AVIATION, LTD. Applies to Model DH/BH–125 airplanes, all series, certificated in all categories.

Compliance is required as indicated.

To prevent the failure of the knife edges of the brake control valve, P/N AC. 61520, and the possible complete loss of braking on one side of the airplane with no advance warning to the flight crew, accomplish the following.

(a) Comply with paragraph (b) or (c) of this AD as follows, and, thereafter, continue to comply with paragraph (b) or (c) of this AD at intervals not to exceed 4,500 landings since last compliance:

(1) For airplanes having brake control valve knife edges that have accumulated less than 4,300 landings on the effective date of this AD, compliance is required prior to the accumulation of 4,500 landings.

(2) For airplanes having brake control valve knife edges that have accumulated 4,300 or more landings, but less than 5,900 landings, on the effective date of this AD, compliance is required prior to the accumulation of an additional 200 landings.

(3) For airplanes having brake control valve knife edges that have accumulated 5,900 or more landings on the effective date of this AD, compliance is required prior to the accumulation of 6,100 landings or an additional 100 landings whichever occurs later.

(4) For airplanes for which no records exist that indicate the number of landings the brake control valve knife edges have accumulated, compliance is required prior to the accumulation of 100 landings after the effective date of this AD.

(b) Replace the knife edges with new parts, P/Ns ACO. 34629, ACO. 34630, and ACO. 36133, in accordance with Paragraph A, of Section 2, titled "Accomplishment Instructions," of Hawker Siddeley Aviation, Ltd. Service Bulletin 32–166, dated January 27, 1976, or an FAA-approved equivalent.

(c) Replace the brake control valve, P/N AC. 61520, with a valve of the same part number that incorporates knife edges having part numbers specified in paragraph (b) of this AD in accordance with Paragraph B, of Section 2, titled "Accomplishment Instructions," of Hawker Siddeley Aviation, Ltd. Service Bulletin 32–166, dated January 27, 1976, or an FAA-approved equivalent.

This amendment becomes effective July 20, 1977.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C., on June 10, 1977.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[FR Doc.77–17420 Filed 6–17–77;8:45 am]

[Docket No. 76–SO–25; Amdt. 39–2919]

PART 39—AIRWORTHINESS DIRECTIVES

Grumman American Aviation Corp., Models G–159 and G–1159

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new Airworthiness Directive (A.D.) applicable to Grumman Model G–159 and G–1159 airplanes which requires installation of a placard prohibiting occupancy of the jumpseat during taxi, takeoff, or landing; or modifications which can be accomplished to eliminate the need for the placard. This action is necessary to preclude injury of a jumpseat occupant in the event of nose landing gear failure.

EFFECTIVE DATE: June 21, 1977. Compliance required within 10 hours time in service after the effective date of this A.D.

ADDRESSES: Grumman American Aviation Corporation Aircraft Service Change No. 226 may be obtained from Grumman American Aviation Corporation, P.O. Box 2206, Savannah, Georgia 31402, telephone 912–964–3000. A copy of the Service Change is contained in the Rules Docket, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Gerald E. Goodblood, Aerospace Engineer, Engineering and Manufacturing Branch, FAA, Southern Region, P.O. Box 20636, Atlanta, Georgia 30320, telephone 404–763–7407.

SUPPLEMENTARY INFORMATION: Over the years there have been nine cases of drag strut penetration of the cockpit floor (five on the Model G–159 and four on the Model G–1159). The last two G–1159 drag strut penetrations struck the jumpseat, one of which was occupied. No injuries resulted.

Since a hazardous condition exists, the following actions were taken: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring modification of the nose landing gear structure on Grumman Model G–159 and G–1159 airplanes was published in 41 FR 14895.

In connection with its investigation of a Grumman G–1159 accident involving nose landing gear drag strut penetration of the cockpit floor in the vicinity of the jumpseat, the National Transportation Safety Board recommended (A–76–89) that jumpseat occupancy be prohibited during taxi, takeoff, and landing by placarding until appropriate nose landing gear modifications are made.

Interested persons were afforded an opportunity to participate in the making of the amendment, nineteen of whom responded.

All commentators endorsed the need for corrective action; however, they recommended that operators be allowed the option of placarding the jumpseat against occupancy during taxi, takeoff, and landing, or modifying their aircraft. They also requested that the airworthiness directive compliance time be delayed at least until modification kits would be available. The FAA concurs that corrective action is needed and considers a permanent placard installation acceptable.

The principal authors of this document are Gerald E. Goodblood, Engineering and Manufacturing Branch, Flight Standards Division, and Ronald R. Hagadone, Office of the Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320.

ADOPTION OF AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended effective June 21, 1977, by adding the following new airworthiness directive:

GRUMMAN AMERICAN AVIATION CORPORATION (GAAC): Applies to Grumman American Aviation Corporation, Model G–159, all serial numbers, and Model G–1159, serial numbers 1 through 208 and 775, airplanes certificated in all categories.

Compliance required within 10 hours time in service after the effective date of this A.D., unless already accomplished.

To prevent injury to an occupant of any jumpseat located between fuselage stations 119 and 169 on Grumman American Aviation Corporation Models G–159 and G–1159 airplanes, accomplish one of the following:

(a) Install a placard either on the bulkhead adjacent to the jumpseat or at any equivalent location approved by the Federal Aviation Administration utilizing a minimum of $\frac{3}{16}$ inch high letters with the wording: "Jumpseat Occupancy During Taxi, Takeoff, or Landing Prohibited," or

(b) Modify in the following manner:

1. The Model G–159 nose landing gear drag strut fused or bulkhead modification in accordance with GAAC Aircraft Service Change No. 226, Part I or II, or later FAA approved revision, or in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, FAA, Southern Region.

2. The Model G–1159 nose landing gear wheel well bulkhead is modified to eliminate drag strut penetration in accordance with GAAC Aircraft Service Change No. 226, Part II, or later FAA approved revision, or in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, FAA, Southern Region.

When either of the modifications described in paragraph (b)1 or (b)2 are accomplished, the required placard of paragraph (a) may be removed.

This amendment becomes effective June 21, 1977.

(Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958 as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655 (c), 14 CFR 11.89).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in East Point, Georgia, on June 7, 1977.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.77–17475 Filed 6–17–77;8:45 am]

[Docket No. 77–NW–14–AD; Amdt. 39–2924]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 747

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment requires removal of ITT General Controls fuel valve actuator assemblies installed on Boeing Model 747 airplanes, and replacement with reworked or new actuator assemblies incorporating properly heat-treated motor armature shafts. The shafts to be removed were not heat treated to the proper hardness prior to assembly by the actuator manufacturer. There have been failures of fuel shutoff valves caused by excessive wear of the armature shaft gear teeth.

DATES: Effective date: June 20, 1977. Compliance schedule: As prescribed in the body of the A.D.

ADDRESSES: Federal Aviation Administration, Engineering and Manufacturing Branch, Northwest Region, FAA Building, Boeing Field, 9010 East Marginal Way South, Seattle, Washington 98108. ITT General Controls Service Bulletins, specified in this directive, may be obtained upon request to ITT General Controls, Aerospace Products, 1200 South Flower Street, Burbank, California 91502. These documents may also be examined at the Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

FOR FURTHER INFORMATION CONTACT:

Thomas F. Curran, Propulsion Section, ANW–214, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108 (206–767–2520).

SUPPLEMENTARY INFORMATION: An unknown quantity of ITT General Controls D.C. motor assemblies, P/N 107728A101, were manufactured with improperly heat treated armature shafts and installed on Model 747 airplane fuel valve actuators, Boeing P/N 60B92406–27 and P/N 60B92406–28, during years 1975, 1976, and 1977. Shafts with low hardness are subject to excessive wear which will cause early failure of the valve actuators. It is estimated that the earliest in-service failure occurred at 1,000 cycles which equates to airplane time-in-service of approximately 2,300 hours. Laboratory testing of an annealed shaft has confirmed that premature failure can occur at less than 1,000 cycles and is accounted for in the compliance schedule. A failed tank-to-engine fuel shutoff valve actuator assembly in the open position will prevent isolation of fuel flow to the engine fire zone in the event of a fire caused by ignition of fuel from a ruptured fuel line between the fuel tank and the engine fuel control. Also, a failed tank shutoff or cross feed actuator assembly in the open or closed position would prevent proper fuel system management and distribution of the fuel load within approved operating limits.

This rule was coordinated with The Boeing Company and the operators through the Air Transport Association (ATA) prior to issuance.

DRAFTING INFORMATION

The principal authors of the document are Thomas F. Curren, Engineering and Manufacturing Branch, FAA Northwest Region, and Jonathan Howe, Regional Counsel, FAA Northwest Region.

To prescribe the compliance intervals required by this A.D. under the usual notice and public procedures followed by the agency within the time period the agency has determined is required in the interest of safety, would necessarily result in a reduction of the time available to the operator for compliance. This could possibly leave operators with insufficient time to schedule airplanes for A.D. compliance.

Therefore, the FAA has determined that a situation exists in which notice and public procedure are impracticable and that good cause exists for making this amendment effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, 39.13 of the Federal Aviation Regulation (14 CFR 39.13) is amended, by adding the following new Airworthiness Directive:

BOEING: Applies to Model 747 airplanes certificated in all categories and equipped with fuel valve actuator assemblies, Boeing P/N 60B92406-27 (ITT General Controls P/N MA11A1173, serial numbers H78442 through H98252 and J00047 through J34689) or Boeing P/N 60B92406-28 (ITT General Controls P/N MA11A1174, serial numbers H95059 through H95074 and J04218 through J37314) installed or maufactured between April 30, 1975, and April 1, 1977. Compliance required as indicated.

To prevent loss of control of fuel shutoff, crossfeed and required fuel management capability, accomplish the following:

A. Within 145 days or 1,300 hours time in service after the effective date of this Airworthiness Directive, whichever occurs first, remove fuel valve actuator assembly, Boeing P/N 60B92406-27 (ITT General Controls P/N MA11A1173) or Boeing P/N 60B92406-28 (ITT General Controls P/N MA11A1174) from the No. 1, 2, 3, and 4 engine fuel shutoff valves, and

(1) Replace with actuator assembly Boeing P/N 60B92406-32 (ITT General Controls P/N MA11A1173-1) or Boeing P/N 60B92406-33 (ITT General Controls P/N MA11A1174-1); or

(2) Replace with an actuator assembly which has been inspected and reworked to incorporate a properly heat treated armature shaft in accordance with ITT General Controls Service Bulletins MA11A1173-24-01 or MA11A1174-24-01, both dated March 30, 1977, and 107728A101-24-01, dated June 10, 1977, or an equivalent method approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

B. Within 1 year or 3,200 hours time in service after the effective date of this Airworthiness Directive, whichever occurs first, replace or rework the actuator assemblies Boeing P/N 60B92406-27 (ITT General Controls P/N MA11A1173) or Boeing P/N 60B92406-28 (ITT General Controls P/N MA11A1174) which are installed on the No. 1, 2, 3, and 4 crossfeed valves, the No. 1 and 4 reserve tank gravity transfer valves, the center wing tank fuel jettison valves and, if installed, the No. 2 and 3 reserve tank gravity transfer valves in accordance with A.(1) or A.(2) above.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to ITT General Controls, Aerospace Products, 1200 South Flower Street, Burbank, California 91502. These documents may also be examined at the Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

This amendment becomes effective June 20, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423), and Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)), and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Seattle, Washington, on June 9, 1977.

NOTE.—The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

C. B. WALK, Jr.,
Director, Northwest Region.

[FR Doc.77-17421 Filed 6-17-77;8:45 am]

[Docket No. 77-CE-11-AD; Amdt. 39-2918]

PART 39—AIRWORTHINESS DIRECTIVES

Certain 1976 and 1977 Cessna Model Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new Airworthiness Directive (AD) applicable to certain 1976 and 1977 Cessna model airplanes which requires testing, and if necessary correction, of the optionally installed external electrical ground power receptacle wiring. Unwanted starter operation that will result in propeller rotation may be experienced when ground power is applied though a miswired circuit to the optional ground power receptacle. This condition could result in injury to ground personnel.

EFFECTIVE DATE: June 27, 1977.

Compliance required at next use of the external electrical ground power receptacle, but not later than September 15, 1977.

ADDRESSES: Cessna Service Letters SE76-11, dated May 10, 1976, SE77-1, dated January 17, 1977, and SE77-1, (Supplement No. 1), dated May 2, 1977, applicable to this AD, may be obtained from Cessna Aircraft Company, Marketing Division, Attention: Customer Service Department, Wichita, Kansas 67201; telephone (316) 685-9111. A copy of the service bulletin cited above is contained in the Rules Docket, Room 916, 800 Independence Avenue, S.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Earsa L. Tankesley, Aerospace Engineer, Engineering and Manufacturing Branch, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106; telephone (816) 374-3446

SUPPLEMENTARY INFORMATION: There have been reports of unwanted starter operation on certain 1976 and 1977 Cessna model airplanes when external power was applied through the electrical ground power receptacle. This condition occurs because two wires may be improperly installed on the split bus relay diode printed circuit board connected to the external ground power receptacle. Since this condition is likely to exist in other airplanes of the same type design an AD is being issued requiring testing, and if necessary correction, of the external electrical ground power receptacle wiring. This AD was coordinated with the aircraft manufacturer prior to its issuance. The FAA has determined that there is an immediate need for a regulation to provide for the safe operation of the affected airplanes. Therefore, notice and public procedure under 5 U.S.C. 553(b) is impracticable and contrary to the public interest and good cause exists for making this amendment effective in less than thirty (30) days after the date of publication in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal authors of this document are Earsa L. Tankesley, Flight Standards Division, Central Region, and John L. Fitzgerald, Jr., Office of the Regional Counsel, Central Region.

ADOPTION OF THE AMENDMENT

Accordingly and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

CESSNA. Applies to the following models and serial numbers of airplanes equipped with external electrical ground power receptacles:

Models	*Serial numbers*
172M	17265685 through 17267584.
172N	17267585 through 17268080.
R172K	R1722000 through R1722-109.
177B	17702314 through 17702374, 17702376 through 17702395, 17702397, 17702398, 17702400, 17702401, 17702403, 17702404, 17702405, and 17702407 through 17702409.
177RG	177RG0799 through 177RG0822, 177RG0824 and 177RG0826.
180J	18052621 through 18052770.
180K	18052771 through 18052777.
182P	18264296 through 18265175.
182Q	18265176 through 18265220.
A185F	18502839 through 18503165.
U206F/TU206F	U20603021 through U2060-3521.
U206G/TU206G	U20603522 through U2060-3547.
207/T207	20700315 through 20700362.
207A/T207A	20700363 through 20700365.
210L/T210L	21061040 through 21061573.
337G	33701672 through 33701748.
T337G	P3370226 through P3370-257.

Compliance: Required as indicated, unless already accomplished.

To prevent unwanted propeller rotation, at the next use of the external ground power receptable, but not later than September 15, 1977, accomplish the following:

(A) Test the aircraft's electrical starter system by applying power to the external electrical ground power receptacle. If the propeller does not rotate, make a maintenance record entry indicating that this AD has been accomplished.

If the propeller rotates, modify the electrical system in accordance with Cessna Service Letters SE76-11, dated May 10, 1976, SE77-1, dated January 17, 1977, and SE77-1 (Supplement No. 1), dated May 2, 1977, or later approved revisions, as applicable.

NOTE.—When performing this test take adequate precautions to assure that no person or object will be struck by the propeller if rotation occurs.

(B) Any equivalent method of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

This amendment becomes effective June 27, 1977.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655 (c)); Sec. 1189 of the Federal Aviation Regulations (14 CFR 11.89).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Kansas City, Missouri, on June 9, 1977.

C. R. MELUGIN, Jr.,
Director, Central Region.

[FR Doc.77-17422 Filed 6-17-77;8:45 am]

[Airspace Docket No. 76-EA-88]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area: Chesterfield, Virginia

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Chesterfield, Va., Transition Area, by changing the direction of the northwest extension by one degree and widening the extension by approximately ½ mile on each side of the radial. It also increases the length by 2½ miles. These changes result from a revision of the instrument approach procedure for Chesterfield County Airport.

EFFECTIVE DATE: 0901 GMT August 11, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the Chesterfield, Va., Transition Area. The NPRM was published in the FEDERAL REGISTER on January 6, 1977 (42 FR 1270). The proposal resulted from a change to the instrument approach procedure.

The NPRM received objections from the Board of Supervisors of Powhatan County, Virginia, as to the proposed size of the altered transition area. A review of their objections and the proposal permitted a reduction in the size of the area so that it is by total measurement slightly larger than its former size.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT August 11, 1977, as follows:

1. Amend § 71.161 of Part 71, Federal Aviation Regulations by deleting the description of the Chesterfield, Va., Transition Area and by inserting the following in lieu thereof:

That airspace extending upward from 700 feet above the surface within a 5.5-mile radius of the center, 37°24'25'' N., 77°31'18'' W., of Chesterfield County Airport, Chesterfield, Va.; within 3 miles each side of the Flat Rock, Va., VORTAC 116° radial, extending from the 5.5-mile radius area to 10 miles southeast of the VORTAC; within 1.5 miles each side of a 322° bearing from the Happy Hill, Va., RBN (37°20'00'' N., 77°27'15'' W.) extending from the 5.5-mile radius area to 0.5 mile northwest of the RBN.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, New York, on June 3, 1977.

WILLIAM E. MORGAN,
Director, Eastern Region.

[FR Doc.77-17423 Filed 6-17-77;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 77-WE-5]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area; Yuma, Arizona

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes controlled airspace (Transition Area) to provide protection to aircraft executing the new instrument approaches to the Yuma Marine Corps Air Station/Yuma International Airport, Yuma, Arizona.

EFFECTIVE DATE: August 11, 1977.

ADDRESSES: Copies of this final rule may be obtained from: Federal Aviation Administration, Air Traffic Division Chief, Airspace and Procedures Branch, AWE-530, 15000 Aviation Boulevard, Lawndale, California 90261.

FOR FURTHER INFORMATION CONTACT:

Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone 213-536-6182.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to designate additional controlled airspace for the Yuma, Arizona 1200 foot Transition Area. A Notice of Proposed Rulemaking (NPRM) was published in the FEDERAL REGISTER on April 28, 1977. (42 FR 21620.)

Interested parties were given 30 days in which to submit comments on the proposal. There were no objections to the NPRM.

DRAFTING INFORMATION

The principal authors of this document are Thomas W. Binczak, Air Traffic Division and Richard G. Wittry, Esquire, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT, August 11, 1977, as follows:

§ 71.181 [Amended]

1. By amending § 71.181 (42 FR 440) of Part 71 of the Federal Aviation Regulations by designating additional 1200 foot Transition Area Airspace as follows:

YUMA, ARIZONA

Following "* * * to the United States/Mexico border." Add: "within six miles each side of the Yuma VORTAC 211° radial, extending from the VORTAC to the United States/Mexico border. * * *."

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)), and of sec: 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Inflationary Impact Statement under Executive Order 11821 and OMB Circular A-107.

Issued in Los Angeles, California, on June 7, 1977.

M. C. BEARD,
Acting Deputy Director, Western Region.

[FR Doc.77-17417 Filed 6-17-77;8:45 am]

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

[Docket No. 16943; Amdt. No. 1077]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), (DOT).

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For examination—1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For purchase—Individual SIAP copies may be obtained from: 1. FAA Public Information Center (APA–430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By subscription—Copies of all SIAPs, mailed weekly, may be ordered from Superintendant of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The current annual subscription price is $150; add $30 for each additional copy mailed to the same address.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS–730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 9) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA forms are identified as FAA Forms 8260–3, 8260–4 and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the FEDERAL REGISTER expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective on the dates specified, as follows:

1. By amending § 97.23 VOR–VOR/DME SIAPs identified as follows:

Effective August 11, 1977.

Lawrence, MA—Lawrence Muni., VOR Rwy 23, Amdt. 5
Cheyenne, WY—Cheyenne Municipal, VOR–A, Amdt. 5

Effective July 28, 1977.

Muscatine, IA—Muscatine Muni., VOR/DME–A, Amdt. 2
Sanford, ME—Sanford Muni., VOR Rwy 25, Amdt. 8
Humboldt, NE—Humboldt Muni., VOR/DME–A, Original
Scottsbluff, NE—Scotts Bluff County, VOR Rwy 23, Amdt. 8
Mt. Vernon, OH—Mt. Vernon, VOR–A, Amdt. 4
Corry, PA—Lawrence, VOR Rwy 32, Original
Kenedy, TX—Karnes County, VOR/DME–A, Amdt. 2
Wichita Falls, TX—Wichita Valley Airport, VOR/DME–C, Original

2. By amending § 97.25 SDF–LOC–LDA SIAPs identified as follows:

Effective August 11, 1977.

Lawrence, MA—Lawrence Muni., LOC Rwy 5, Amdt. 2

Effective July 28, 1977.

Scottsbluff, NE—Scotts Bluff County, LOC BC Rwy 12, Amdt. 3

3. By amending § 97.27 NDB/ADF SIAPs identified as follows:

Effective August 11, 1977.

Lawrence, MA—Lawrence Muni., NDB Rwy 5, Original
Great Barrington, MA—Great Barrington, NDB–A, Amdt. 3
Plymouth, MA—Plymouth Muni., NDB Rwy 6, Amdt. 2
Cheyenne, WY—Cheyenne Municipal, NDB Rwy 26, Amdt. 9

Effective July 28, 1977.

Muscatine, IA—Muscatine Muni., NDB Rwy 5, Amdt. 4
Cozad, NE—Cozad Muni., NDB Rwy 13, Amdt. 1
Lexington, NE—Lexington Muni., NDB Rwy 14, Amdt. 1
Scottsbluff, NE—Scotts Bluff County, NDB Rwy 12, Amdt. 3

June 23, 1977.

Oxford, CT—Waterbury-Oxford, NDB Rwy 18, Original

The FAA published an amendment in Docket No. 16773, Amdt. No. 1073 to Part 97 of the Federal Aviation Regulations (42 FR 26204; May 23, 1977) under section 97.27 effective June 16, 1977, which is hereby amended as follows: Miami, FL—Dade-Collier training and transition, NDB Rwy. 9, Amdt. 9. Change effective date to August 11, 1977.

4. By amending § 97.29 ILS–MLS SIAPs identified as follows:

Effective August 11, 1977.

Cheyenne, WY—Cheyenne Municipal, ILS Rwy 26, Amdt. 29

Effective July 28, 1977.

Scottsbluff, NE—Scotts Bluff County, ILS Rwy 30, Amdt. 5

Effective June 23, 1977.

Chicago (Wheeling), IL—Pal-Waukee, ILS Rwy 16, Amdt. 1

Effective June 3, 1977.

Gainesville, FL—Gainesville Muni., ILS Rwy 26, Amdt. 4

The FAA published an amendment in Docket No. 16773 Amdt. No. 1073 to part 97 of the Federal Aviation regulations (42 FR 26204; May 23, 1977) under section 97.29 effective June 16, 1977, which is hereby amended as follows: Miami FL—Dade-Collier training and transition ILS Rwy 9 Amdt. 9. Change effective date to August 11, 1977.

5. By amending § 97.33 RNAV SIAPs identified as follows:

Effective July 28, 1977.

Scottsbluff, NE—Scotts Bluff County, RNAV Rwy 30, Amdt. 1

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. § 1348, 1354 (a), 1421, and 1510); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); Delegation: 25 FR 6489 and Paragraph 802 of Order FS P 1100.1, as amended March 9, 1973.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C., on June 10, 1977.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on May 12, 1969.

JAMES M. VINES,
Chief,
Aircraft Programs Division.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER D—MISCELLANEOUS EXCISE TAXES

[T.D. 7489]

PART 54—PENSION EXCISE TAXES

Election To Pay an Excise Tax for Certain Pre-1975 Prohibited Transactions

Correction

In FR Doc. 77–15527, appearing at page 27882 in the issue of Wednesday, June 1, 1977, the second line of the paragraph preceding § 54.4975–14 should read, "lations. Accordingly, 26 CFR 141.4975–14".

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 77–065]

PART 1—GENERAL PROVISIONS

Fees for Merchant Mariner's Documents

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amendment updates the table of fees for Coast Guard records to include a price for documents reproduced from microfiche and to increase the price for an original Certificate of Seaman's Service.

EFFECTIVE DATE: This amendment is effective on June 20, 1977.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G–CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590 (202–426–1477).

The principal persons involved in drafting this rule are: Commander L. C. Burger, Project Manager, and Lieutenant Edward J. Gill, Jr., Project Attorney.

SUPPLEMENTARY INFORMATION: Since this amendment relates to agency procedure, it is exempted from notice of proposed rulemaking and public procedure thereon by 5 U.S.C. 553(b), and it may be made effective in less than 30 days after publication in the FEDERAL REGISTER, because 5 U.S.C. 553(d) does not apply.

Accordingly, Part 1 of Title 33 of the Code of Federal Regulations is amended as follows:

By revising Table 1.25–40(b) to read as follows:

§ 1.25–40 Fees for services for the public.

* * * * *

(b) * * *

TABLE 1.25–40(b)—FEES FOR COAST GUARD RECORDS

Item:	Fee
(1) Certificate of seaman's service—(a) Compiled on Form CG 723:	
(i) First page	$10.00
(ii) Each additional page	5.00
(b) Hard copy of all certificates of service contained in file	10.00
(2) Duplicate merchant mariner's document	10.00
(3) Duplicate continuous discharge book	10.00
(4) Duplicate certificate of registry as staff officer	10.00
(5) Certificate of service issued in accordance with sec. 701 of the Soldiers' and Sailors' Civil Relief Act of 1940 (54 Stat. 1190, as amended; 50 U.S.C. App., 581)	2.50

NOTE.—Hard copy of certificates of service will be provided unless form CG 723 is specifically requested.

* * * * *

(Title V, 65 Stat. 268, 290, sec. 6(b)(1), 80 Stat. 937, 31 U.S.C. 483a, 49 U.S.C. 1655(b)(1); 49 CFR 1.46(b).)

Dated June 13, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard,
Commandant.

CHAPTER II—CORPS OF ENGINEERS

[ER 1105–2–82]

PART 266—PROJECT DEAUTHORIZATION REVIEW PROGRAM

Planning

AGENCY: Corps of Engineers, DOD.

ACTION: Amendment.

SUMMARY: This amendment to 33 Part 266 implements section 157, Pub. L. 94–587, which changes the Congressional review period for projects recommended for deauthorization from 180 to 90 days, and extends the submission of deauthorization recommendations from field operating agencies from September 1 to October 1.

EFFECTIVE DATE: January 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert D. Wolff, HQDA (DAEN–CWP–A), Washington, D.C. 20314, telephone 202–693–7187.

SUPPLEMENTARY INFORMATION:

NOTE.—The U.S. Army Corps of Engineers has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: May 27, 1977.

RUSSELL J. LAMP,
Colonel, Corps of
Engineers, Executive.

Part 266 of Title 33 is amended as follows:

§ 266.12 [Amended]

1. Section 266.12(a) is revised to indicate amendment to referenced section 12, Pub. L., to read as follows: "Section 12, Pub. L. 93–251, 'Water Resources Development Act of 1974' (88 Statute 16), dated March 7, 1974 (Appendix A), as amended by section 157, Pub. L. 94–587 (90 Stat 2933), dated October 22, 1976."

§ 266.16 [Amended]

2. Section 266.16(c) is amended to change the submission date from "September" to "October."

3. Section 266.16(e) is amended to change the Congressional review period for projects recommended for deauthorization from "180" to "90" days.

Title 37—Patents, Trademarks, and Copyrights

CHAPTER I—PATENT AND TRADEMARK OFFICE, DEPARTMENT OF COMMERCE

PART 3—FORMS FOR PATENT CASES

Correction

In FR Doc. 77–15348, appearing at page 27883 in the issue of Wednesday, June 1, 1977, the following should be inserted between lines six and seven of the paragraph beginning, "SUPPLEMENTARY INFORMATION:" "voked on July 2, 1971, by revising § 3.11,"

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 587–2]

PART 86—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Selective Enforcement Auditing Procedures

Correction

In FR Doc. 76–21433, appearing at page 31472, in the issue for Wednesday, July

28, 1976 make the following corrections:

1. On page 31473, in the second column, change the first sentence of the last paragraph to read as follows: "After the sample has been drawn, the next step is to choose the type of statistical analysis to be performed on it to predict the characteristics of the parent population."

2. On page 31475, in the second column, at the bottom of the page, change the designation "Table ID" appearing at the end of the next to last sentence, to read: "(Table II)."

3. Also on page 31475, in the first paragraph of the third column, change the word "quality", appearing in the 3rd line, to read: "equality".

4. On page 31480, third column, change the third sentence of the second full paragraph to read: "It requires instead that notice of "either the terms or substance of the proposed rule or a description of the subjects and issues involved" shall be given.".

5. On page 31481, in the last paragraph of the second column, change the code citation "16 CFR 3.4" to read "16 CFR 3.14".

6. On page 31483, paragraphs (a) (13) through (16) of § 86.602 were inadvertently omitted, they read as follows:

§ 86.602 Definitions.

(9) * * *

(13) "Vehicle" means any new production light duty motor vehicle or any new production light duty truck as defined in Subpart A of this part.

(14) "Test Vehicle" means a vehicle in a test sample.

(15) "Low-Mileage Emissions Target" for a particular pollutant is the value in grams per mile resulting from the division of the emission standard by the applicable engine family deterioration factor derived from the certification process performed under Subparts A or B of this part for the applicable model year.

(16) "In the Hands of the Manufacturer" means that vehicles are still in the possession of the manufacturer and have not had their bills of lading transferred to another person for the purpose of transporting.

Title 41—Public Contracts and Property Management

CHAPTER 9—ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

[ERDA-PR Temporary Regulation No. 34]

PART 9-5—SPECIAL AND DIRECTED SOURCES OF SUPPLY

Prison-Made and Blind-Made Products

Correction

In FR Doc. 77-16493, appearing on page 29873 in the issue for Friday, June 10, 1977, William A. Parker's title, now reading "Acting Director of Procurement," should be "Deputy Director of Procurement."

Title 46—Shipping

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 76-189]

ORGANIZATION, GENERAL COURSE, AND METHODS GOVERNING MARINE SAFETY FUNCTIONS, SUSPENSION AND REVOCATION PROCEEDINGS, AND GREAT LAKES PILOTAGE REGULATIONS

National Transportation Safety Board Appeal Authority Description

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is revising the description of procedures for appeals to the National Transportation Safety Board (NTSB) by licensed officers or holders of certificates of service who are appealing the suspension or revocation of licenses, certificates, documents, or registers; and the description of appeals to the NTSB by registered pilots of the Great Lakes who are appealing revocation or suspension of Certificates of Registration. These revisions are necessary because the Transportation Safety Act removed the authority of the NTSB to delegate its appeal authority to the Commandant in suspension cases.

EFFECTIVE DATE: This amendment is effective on June 20, 1977.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590 (202-426-1477).

SUPPLEMENTARY INFORMATION: Since these amendments revise a description of Coast Guard procedure and make an editorial change, the notice of proposed rule making and public procedure requirements in 5 U.S.C. 553(b) do not apply. Since they impose no substantive burden upon any person, they may be made effective in less than 30 days after publication in the FEDERAL REGISTER under 5 U.S.C. 553(d)(3).

DRAFTING INFORMATION

The principal persons involved in drafting this rule are: Lieutenant Commander Robert O'Pezio, Project Manager, Office of Merchant Marine Safety, and Lieutenant Edward J. Gill, Jr., Project Attorney, Office of the Chief Counsel.

DISCUSSION OF CHANGES

Sections 5.30-30(a) and 401.650 (d) and (e) are revised and § 5.30-30(d) is deleted to reflect the changes in the law and NTSB procedures. Section 1.23 is deleted because it only repeats the contents of paragraphs 5.30-30 (a) and (d) and is therefore unnecessary.

Section 5.30-30(a) is further revised to change the citation to the NTSB's procedures. These procedures were in 14 CFR Part 425, but are now in 49 CFR Part 825.

Subpart F of Part 401 is revised throughout to insert the term "administrative law judge" in lieu of the term "Examiner."

In consideraion of the foregoing, Parts 1, 5, and 401 of Title 46, Code of Federal Regulations, are revised as follows:

PART 1—ORGANIZATION, GENERAL COURSE, AND METHODS GOVERNING MARINE SAFETY FUNCTIONS

§ 1.23 [Removed]

1. Section 1.23 is deleted.

PART 5—SUSPENSION AND REVOCATION PROCEEDINGS

§ 5.30-30 [Amended]

2. The first sentence of paragraph (a) of § 5.30-30 is revised by inserting the words "suspension or" after the words "sustaining orders of" and by deleting the words "14 CFR Part 425" and substituting the words "49 CFR Part 825" in their place.

3. Paragraph (d) of § 5.30-30 is deleted.

PART 401—GREAT LAKES PILOTAGE REGULATIONS

Subpart F—[Amended]

4. Subpart F of Part 401 is amended by striking the word "Examiner" wherever it appears and inserting in its place the words "administrative law judge."

5. Section 401.650 is amended by adding a sentence at the end of paragraph (d) and revising paragraph (e) to read as follows:

§ 401.650 Review of examiner's initial decision.

* * * * *

(d) * * * There is no other administrative remedy within the Department of Transportation.

(e) When the Commandant has sustained an order of suspension or revocation of a registration, the respondent may appeal to the National Transportation Safety Board under 49 CFR 825.5 within ten (10) days after service of the Commandant's decision.

(5 U.S.C. 552, 14 U.S.C. 633, 46 U.S.C. 216b, 239, and 239b, 49 U.S.C. 1655(b)(1); 49 CFR 1.46 (a) and (b).)

Dated: April 21, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard Commandant.

SUBCHAPTER B—REGULATIONS AFFECTING MARITIME CARRIERS AND RELATED ACTIVITIES

[General Order 29, Amdt. 2, Docket No. 72-43]

PART 549—REGULATIONS GOVERNING LEVEL OF MILITARY RATES

Miscellaneous Amendments

AGENCY: Federal Maritime Commission.

ACTION: Discontinuance of proceeding/revocation of certain rules.

SUMMARY: The Federal Maritime Commission is revoking certain regulations on the use of a Uniform Capacity Utilization Factor in determining cargo unit costs in connection with carrier bids for the carriage of military cargo. Deletion of these provisions is necessary in light of evidence that Uniform Capacity Utilization Factor has rarely affected bidding and the burden of Uniform Capacity Utilization Factor reporting is extreme in comparison to its utility. This action relieves carriers from Uniform Capacity Utilization Factor reporting requirement. The proceeding relating to these rules is discontinued.

EFFECTIVE DATE: June 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Joseph C. Polking, Acting Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573 (202-523-5725).

SUPPLEMENTARY INFORMATION: Upon remand from the United States Court of Appeals for the District of Columbia, the Commission referred this proceeding to an Administrative Law Judge to determine whether the Uniform Capacity Utilization Factor "specified in Section 549.5(b) of the Commission's Rules should be amended or revoked as an arbitrary, unreasonable and discriminatory device for allocating per unit costs for military cargo bidding purposes; * * *"

Hearing Counsel have now filed a Motion to Dismiss this proceeding, seeking the elimination of UCUF on the grounds that UCUF has affected rate bidding only in the rarest instances and that the burden of carrier compliance with the UCUF reporting requirements is extreme by comparison to UCUF's utility. By Order served April 20, 1977, Administrative Law Judge Stanley M. Levy granted Hearing Counsel's motion and recommended "that the Commission issue an appropriate order revoking Section 549.5(b) of its rules," and dismiss the proceeding. We determined to review the Presiding Officer's ruling.

Upon consideration of Hearing Counsel's motion; the replies filed by American President Lines, Ltd., the Military Sealift Command, and Sea-Land Service, Inc., in support thereof; and the Presiding Officer's ruling; it is our opinion that there exists a sufficient and proper basis for discontinuing the proceeding and revoking the UCUF provisions.

We are not, however, revoking paragraph 549.5(b) in its entirety, as the Presiding Officer has recommended, albeit apparently unintentionally, but only those provisions relating directly to UCUF. Thus, subparagraphs (1), (3), and everything following the first sentence in subparagraph (2) relates to the implementation of UCUF and will be revoked. However, the first sentence in subparagraph (2), with the exception of the limitation to RFP "700, Second Cycle, only", and subparagraph (4) remain applicable and operative notwithstanding the the elimination of the UCUF provisions and will accordingly be retained.[1]

Therefore, it is ordered, That, except as indicated above, the Presiding Officer's April 20, 1977, order issued in this proceeding is hereby adopted.

Further, it is ordered, That pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 503) and section 43 of the Shipping Act, 1916 (46 U.S.C. 841a), Part 549 of Title 46, Code of Federal Regulations, is amended as set forth below:

1. Subparagraphs 549.5(b) (1) and (3) are hereby revoked.

2. Subparagraph 549.5(b)(2) is amended by deleting the words "700 Second Cycle, only" in the first sentence and revoking everything following the first sentence in subparagraph 549.5(b)(2). Paragraph (b)(2) is also redesignated as (b)(1) and (b)(4) is redesignated as (b)(2).

As amended and redesignated, paragraph 549.5(b) will read as follows:

§ 549.5 General principles.

* * * * *

(b) *Utilization factor.* (1) For the purposes of tendering bids in response to RFPs each carrier's cargo unit costs will be determined on the basis of the actual number of cargo units carried.

(2) Where no data on the actual number of cargo units carried is available, i.e., when a carrier is entering a bid for a route not presently served by it, cargo carryings shall be based upon 75-percent utilization.

* * * * *

Finally, it is ordered, That this proceeding be, and hereby is, discontinued.

By the Commission.

JOSEPH C. POLKING,
Acting Secretary.

[FR Doc.77-17478 Filed 6-17-77;8:45 am]

[1] The first sentence in subparagraph (2) established that for purposes of tendering bids in response to RFPs a carrier's cargo unit costs will be determined on the basis of the actual number of cargo units carried. Subparagraph (4) applies to a carrier entering a bid for a route not presently served by it, and the 75 percent utilization factor provides a basis for the calculation of cargo unit costs for that initial bid.

Title 49—Transportation

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 73-31; Notice 02]

PART 567—CERTIFICATION

PART 568—VEHICLES MANUFACTURED IN TWO OR MORE STAGES

Combined Axle Weight Ratings

AGENCY: National Highway Traffic Safety Administration.

ACTION: Final rule.

SUMMARY: The National Highway Traffic Safety Administration's Certification regulations for motor vehicles are amended to allow gross axle weight ratings to be combined on the certification label in the case of consecutive axles that have identical weight ratings. The amendment results from a suggestion from the Trailmobile Company and reflects the view that a separate listing for each GAWR can cause unnecessarily long certification labels that are more difficult to understand than labels containing combined axle weight ratings.

EFFECTIVE DATE: June 20, 1977.

ADDRESSES: Requests for reconsideration should refer to the docket number and be submitted to: Docket Section, Room 5108, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. David Fay, Motor Vehicle Programs, National Highway Traffic Safety Administration, Washington, D.C. 20590 (202-426-2817).

SUPPLEMENTARY INFORMATION: Part 567 of NHTSA regulations (49 CFR Part 567, Certification) requires, among other things, a listing of the gross axle weight rating (GAWR) for each axle of the certified vehicle (§§ 567.4(g)(4), 567.5(a)(6)).

A manufacturer of trailers urged that a separate listing for each GAWR can, on many-axled vehicles, cause unnecessarily lengthy certification labels that are more difficult to understand than labels containing combined axle weight ratings. The NHTSA agreed and subsequently proposed an amendment of Part 567 to allow GAWR's to be combined on the certification label for consecutive axles that have identical weight ratings (38 FR 33775, December 7, 1973). Each of the eight comments on the proposal supported the concept of combined GAWR ratings, and the NHTSA makes final the amendment essentially in the form proposed.

In response to a Ford question, the option of combining axle ratings as long as the tire designation is listed does not require that axle-by-axle listings also be accompanied by the tire designation.

For clarification, the illustration of combined ratings is titled "Examples of Combined Ratings."

International Harvester pointed out that the incomplete vehicle document provided to assist final-stage manufacturers should also be amended to permit the optional listing of combined GAWR listings. The agency agrees that such parallelism is logically justified and accordingly adds the option to the requirements of § 568.4 of Part 568.

International Harvester's understanding that the new language would permit a set of tandem axles to be listed together as the total value of the two separate GAWR's is incorrect. The agency only proposed a new method for statement of the GAWR, which is a concept applicable only to separate axle systems, not combinations of axle systems. It is noted that neither example appended to the proposed language would have suggested the incorrect understanding advanced by International Harvester.

The agency has also clarified that the new means of stating values is optional, by adding the phrase "at the option of the manufacturer" to the second sentence following the word "may."

In consideration of the foregoing, the following amendments are made in Chapter V of Title 49, Code of Federal Regulations:

I. Part 567, Certification, is amended as follows:

1. Section 567.4(g)(4) is amended to read:

§ 567.4 Requirements for manufacturers of motor vehicles.

* * * * *

(g) * * *

(4) "Gross Axle Weight Rating" or "GAWR," followed by the appropriate value in pounds, for each axle, identified in order from front to rear (e.g., front, first intermediate, second intermediate, rear). The ratings for any consecutive axles having identical gross axle weight ratings when equipped with tires having the same tire size designation may, at the option of the manufacturer, be stated as a single value, with the label indicating to which axles the ratings apply.

EXAMPLES OF COMBINED RATINGS

GAWR: (a) All axles—4080 with 7.00 x 15 LT(D) tires.
(b) Front—12,000 with 10.00 x 20(G) tires.
First intermediate to rear—15,000 with 12.00 x 20(H) tires.

2. Section 567.5(a)(6) is amended to read:

§ 567.5 Requirements for manufacturers of vehicles manufactured in two or more stages.

(a) * * *

(6) "Gross Axle Weight Rating" or "GAWR", followed by the appropriate value in pounds for each axle, identified in order from front to rear (e.g., front, first intermediate, second intermediate, rear). The ratings for any consecutive axles having identical gross axle weight ratings when equipped with tires having the same tire size designation may, at the option of the manufacturer, be stated as a single value, with the label indicating to which axles the ratings apply.

EXAMPLES OF COMBINED RATINGS

GAWR: (a) All axles—4080 with 7.00 x 15 LT(D) tires.
(b) Front—12,000 with 10.00 x 20(G) tires.
First intermediate to rear—15,000 with 12.00 x 20(H) tires.

NOTE.—The economic and inflationary impacts of this rulemaking have been evaluated in accordance with OMB Circular A-107, and an Economic Impact Statement is not required.

Because the amendment provides an option and does not create additional obligations for any person, the agency finds that the amendment may become effective immediately.

The program official and lawyer principally responsible for this amendment are David Fay and Tad Herlihy, respectively.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegation of authority at 49 CFR 1.50.)

Issued on June 13, 1977.

JOAN CLAYBROOK,
Administrator.

[Docket No. 74-11, Notice 19; Docket No. 73-19, Notice 16]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Bumper Requirements

AGENCY: National Highway Traffic Safety Administration.

ACTION: Final rule.

SUMMARY: This notice amends Standard No. 215, Exterior Protection, to permit compliance with the requirements of either Standard No. 215, the currently effective bumper standard, or Part 581, the bumper standard that becomes effective September 1, 1978. This amendment would permit manufacturers to begin without delay production of vehicles with soft exterior surfaces.

EFFECTIVE DATE: June 20, 1977.

FOR FURTHER INFORMATION CONTACT:

Guy Hunter, Motor Vehicle Programs, National Highway Traffic Safety Administration, Washington, D.C. 20590 (202-426-9511).

SUPPLEMENTARY INFORMATION: On March 4, 1976, the National Highway Traffic Safety Administration (NHTSA) published a notice (41 FR 9374) proposing that vehicle manufacturers be given the option of continuing to comply with the currently effective requirements of Standard 215 (49 CFR 571.215) or of complying with the requirements of Part 581, which does not become effective until September 1, 1978. The proposal was based upon the agency's conclusion that the prohibition in Standard 215 against contact with planes A and B of the pendulum test device was unduly restrictive of development of new types of bumper systems—specifically those using soft materials. Since Part 581 allows contact with planes A and B of the test device, adoption of the proposal would enable manufacturers to begin without delay to produce vehicles with soft exterior surfaces.

Comments to the proposal were submitted by General Motors, Chrysler, and American Motors, all of whom were in favor of permitting contact with the test device planes at the earliest possible date. The National Motor Vehicle Safety Advisory Council did not take a position on the proposal. American Motors and Chrysler, however, urged that Standard 215 be amended to permit contact with planes A and B. The NHTSA has already considered such an amendment and rejected it for reasons described in the March 4, 1976, proposal. To briefly reiterate those reasons, Standard 215 only prohibits damage to vehicle safety components. If contact with the pendulum planes were allowed, even with a specified force limitation, the agency has concluded that the vehicle would be susceptible to extensive damage. In contrast, the comprehensive damage criteria of Part 581 assure that the vehicle will not sustain damage to its exterior surfaces when planes A and B are contacted at the prescribed force level. On this basis, Chrysler and American Motors' requests are denied.

General Motors, whose petition for rulemaking served as the basis for the decision to permit contact with planes A and B of the test device, supported immediate adoption of the proposal to permit compliance with Part 581 in lieu of Standard 215.

The NHTSA has concluded, based upon the comments, that manufacturers want the design flexibility to explore the technology of soft-face bumper systems. In order not to impede unreasonably the ability of manufacturers to develop systems that are composed of soft materials, the agency hereby adopts the March 4, 1976, proposal to allow manufacturers the choice of continuing to comply with Standard 215 until September 1, 1978, or of complying with the requirements of Part 581. Although the proposal would have amended both Standard 215 and Part 581, it has been determined that the same end can be accomplished in a clearer and more concise fashion by amending only Standard 215. The effect of this amendment is identical to that proposed on March 4, 1976.

In accordance with recently enunciated Department of Transportation policy encouraging adequate analysis of the costs and other consequences of regulatory actions (41 FR 16201, April 16, 1976), the NHTSA has evaluated the economic and other consequences of this amendment on the public and private sectors and has concluded that it will provide passenger car manufacturers with the opportunity to produce bumper systems that are lighter in weight and less costly than currently manufactured bumper systems. This should result in cost and fuel savings.

The principal authors of this notice were Guy Hunter, Motor Vehicle Programs, and Karen Dyson, Office of Chief Counsel. Because this amendment imposes no additional burden on any person and provides flexibility that some manufacturers consider highly desirable, it is found for good cause shown that an immediate effective date is in the public interest.

In consideration of the foregoing, Standard No. 215, Exterior Protection (49 CFR 571.215), is amended by revising S5.2 and adding an S5.2.3 to read as follows:

§ 571.215 Standard No. 215, exterior protection.

* * * * *

S5.2 *Vehicles manufactured on or after September 1, 1973.*

Except as provided in S5.2.1, S.5.2.2, and S5.2.3, each vehicle manufactured on or after September 1, 1973, shall meet the protective criteria of S5.3.1 through S5.3.7 during and after impacts by a pendulum-type test device in accordance with the procedures of S7.1 and S7.2 followed by impacts into a fixed collision barrier that is perpendicular to the line of travel of the vehicle, while traveling longitudinally forward at 5 mph and while traveling longitudinally rearward at 5 mph under the conditions of S6.

* * * * *

S5.2.3 Each vehicle manufactured in conformity with the requirements of 49 CFR Part 581 need not comply with the provisions of Standard No. 215.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegation of authority at 49 CFR 1.50.)

Issued on June 13, 1977.

JOAN B. CLAYBROOK,
Administrator.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Ex Parte No. MC 96]

BROKERS' SPECIAL LICENSING PROCEDURES, FEES, LIST OF FORMS, AND SURETY BONDS AND POLICIES OF INSURANCE

Extension of Time

AGENCY: Interstate Commerce Commission.

ACTION: Filing date for petitions for reconsideration, and effective date of regulations extended (49 CFR Parts 1045A, 1002, 1003, and 1043).

SUMMARY: Pursuant to a request from the National Tour Brokers Association, the time for filing petitions for reconsideration in this proceeding has been extended to July 8, 1977. In order to allow the Commission sufficient time properly to evaluate the evidence expected to be submitted by parties on reconsideration, the effective date of these regulations has been delayed from August 29, 1977, to September 29, 1977.

EFFECTIVE DATE: Petitions for reconsideration now due July 8, 1977. Effective date of regulations is now September 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg, Assistant Deputy Director, Section of Operating Rights, Interstate Commerce Commission, Washington, D.C. 20423 (202-275-7292).

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc.77-17553 Filed 6-17-77;8:45 am]

[Amdt. 6 to S.O. No. 1200]

PART 1033—CAR SERVICE

Missouri Pacific Railroad Co. and Union Pacific Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Amendment No. 6 to Service Order No. 1200).

SUMMARY: This amendment extends Service Order No. 1200 for six months. Service Order No. 1200 authorizes the Missouri Pacific to operate over 4.8 miles of Union Pacific tracks between South Omaha and Omaha, Nebraska. Rerouting of Missouri Pacific trains over these Union Pacific trains eliminates numerous daily train movements over street crossings at grade in downtown Omaha, thus contributing to public safety and reducing interference with vehicular and pedestrian traffic on these streets.

DATES: Effective 11:59 p.m., June 15, 1977. Expires 11:59 p.m., December 15, 1977.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, Telephone 202-275-7840, TLX 89-2742.

SUPPLEMENTARY INFORMATION: The order is reprinted in full below.

MISSOURI PACIFIC RAILROAD CO. AUTHORIZED TO OPERATE OVER TRACKS OF UNION PACIFIC RAILROAD CO.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 13th day of June 1977.

Upon further consideration of Service Order No. 1200 (39 FR 38103, 40 FR 2990, 30268, 41 FR 2644, 29387, and 42 FR 3309) and good cause appearing therefore:

It is ordered, That:

Service Order No. 1200 be, and it is hereby, amended by substituting the following paragraph (d) for paragraph (d) thereof:

§ 1033.1200 Service Order No. 1200.

* * * * *

(d) Expiration date: The provisions of this order shall expire at 11:59 p.m., December 15, 1977, unless otherwise modified, changed, or suspended by order of this Commission

* * * * *

Effective date: This amendment shall become effective at 11:59 p.m., June 15, 1977.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911 49 U.S.C. 1(10-17), 15(4), and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member John R. Michael not participating.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc.77-17470 Filed 6-17-77;8:45 am]

[Amdt. 1 to S.O. No. 1268]

PART 1033—CAR SERVICE

Regulations for Return of Trailers

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Amendment No. 1 to Service Order No. 1268).

SUMMARY: This Amendment extends Service Order No. 1268 until June 30, 1977. Service Order No. 1268 directs the return to Seaboard Coast Line (SCL), Louisville and Nashville (L&N), and Richmond Fredericksburg and Potomac (RFP) of insulated trailer-on-flat car (TOFC) trailers owned or leased by Seaboard Coast Line and affiliated lines. Named railroads are prohibited from furnishing insulated TOFC trailers except for transportation of freight requiring protection from heat. L&N and RFP are directed to deliver surplus insulated trailers to SCL. There is a shortage of insulated TOFC trailers on SCL in Florida for transporting shipments of watermelons, potatoes, and other perishable commodities.

DATES: Effective 12:01 a.m., June 15, 1977. Expires 11:59 p.m., June 30, 1977.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, Telephone 202–275–7840, TLX 89–2742.

SUPPLEMENTARY INFORMATION: The order is reprinted in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 13th day of June 1977.

Upon further consideration of Service Order No. 1268 (42 FR 26657 and 27247) and good cause appearing therefor:

It is ordered, That:

Service Order No. 1268 be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

§ 1033.1268 Regulations for return of trailers.

* * * * *

(e) Expiration date: The provisions of this order shall expire at 11:59 p.m., June 30, 1977, unless otherwise modified, changed, or suspended by order of this Commission.

* * * * *

Effective date: This amendment shall become effective at 11:59 p.m., June 15, 1977.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17 (2). Interprets or applies Secs. 1(10–17), 15 (4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17 (2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board members Joel E. Burns, Robert S. Turkington, and John R. Michael.

H. GORDON HOMME, JR.,
Acting Secretary.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket C–2887]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

American Consumer Service, Inc., et al.

AGENCY: Federal Trade Commission.

ACTION: Order to cease and desist.

SUMMARY: This consent order, among other things, requires a Carmel, Indiana, buying club to cease misrepresenting and/or failing to disclose relevant information regarding benefits, shopping assistance, and savings experienced by club members; misrepresenting, in sales personnel recruitment, the size and true nature of their business, types of jobs offered, and potential earnings of sales personnel. The order further requires the firm to maintain specific files and to furnish prospective customers a 120-day cancellation period in membership agreements.

DATES: Complaint and order issued May 23, 1977.[1]

FOR FURTHER INFORMATION CONTACT:

Stephanie W. Kanwit, Director, Chicago Regional Office, Federal Trade Commission, 55 East Monroe St., Suite 1437, Chicago, Ill. 60603. (312) 353–4423.

SUPPLEMENTARY INFORMATION: On Wednesday, March 16, 1977, there was published in the FEDERAL REGISTER 42 FR 14784, a proposed consent agreement with analysis In the Matter of American Consumer Service, Inc., et al., for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR, are as follows:

Subpart—Advertising Falsely or Misleadingly: § 13.15 Business status, advantages or connections; 13.15–195 Nature; 13.15–245 Prospects; 13.15–280 Unique or special status or advantage; § 13.50 Dealer or seller assistance; § 13.60 Earnings and profits; § 13.75 Free goods or services; § 13.135 Nature of product or service; § 13.143 Opportunities; § 13.155 Prices; 13.155–35 Discount savings; 13.155–95 Terms and conditions; § 13.205 Scientific tests; § 13.260 Terms and conditions; § 13.280 Unique nature or advantages. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533–20 Disclosures; 13.533–45 Maintain records. Subpart—Misrepresenting Oneself and Goods—Business Status, Advantages or Connections: § 13.1405 Direct dealing advantages; § 13.1490 Nature; § 13.1533 Purchasing methods; § 13.1553 Services; § 13.1570 Unique status or advantages.—Goods: § 13.1608 Dealer or seller assistance; § 13.1625 Free goods or services; § 13.1670 Jobs and employment; § 13.1697 Opportunities in product or service; §13.1710 Qualities or properties; § 13.1740 Scientific or other relevant facts; § 13.1747 Special or limited offers; § 13.1760 Terms and conditions; 13.1760–50 Sales contract.—Promotional Sales Plans: § 13.1830 Promotional sales plans. Subpart—Neglecting, Unfairly or Deceptively, to Make Material Disclosure: § 13.1870 Nature; §13.1892 Sales contract, right-to-cancel provision; § 13.1895 Scientific or other relevant facts; § 13.1905 Terms and conditions; 13.1905–50 Sales contract. Subpart—Offering Unfair, Improper and Deceptive Inducements to Purchase or Deal: § 13.1935 Earnings and profits; § 13.1955 Free goods; § 13.2015 Opportunities in product or service; § 13.2045 Sales assistance; § 13.2063 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45.)

JOHN F. DUGAN,
Acting Secretary.

[FR Doc.77–17474 Filed 6–17–77;8:45 am]

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

PART 1201—ARCHITECTURAL GLAZING MATERIALS

Amendment to Standard

AGENCY: Consumer Product Safety Commission.

ACTION: Final amendment to rule.

SUMMARY: The Commission amends the Safety Standard for Architectural Glazing Materials to extend the effective date as it applies to persons who incorporate architectural glazing materials into the architectural products subject to the standard (fabricators) and to retailers and distributors of architectural products subject to the standard. The amendment allows the fabrication and sale of noncomplying glazing that conforms to a voluntary standard through July 5, 1978. The amendment does not apply to manufacturers of glazing materials. The Commission believes the amendment is necessary because there will be insufficient supplies of complying glazing available to fabricators and sellers on the effective date and thus consumers may be unable to obtain architectural products incorporating glazing materials. In addition fabricators and sellers may suffer undue economic loss in disposing of the noncomplying glazing they have in inventory.

DATES: The standard remains generally effective on July 6, 1977. The amendment is effective the same day.

FOR FURTHER INFORMATION CONTACT:

Alan H. Schoem, Office of the General Counsel, Consumer Product Safety Commission, Washington, D.C. 20207, telephone 202–634–7770.

SUPPLEMENTARY INFORMATION: On May 12, 1977, the Commission Product Safety Commission published in the FEDERAL REGISTER (42 FR 24067) a proposed amendment to the effective date of its Safety Standard for Architectural Glazing Materials (42 FR 1428 (16 CFR Part 1201)). The proposed amendment would extend the effective date of the standard one year for persons who assemble or fabricate architectural products subject to the standard that incorporate glazing materials (or who incorporate glazing materials into architectural products subject to the standard). The proposed amendment would allow fabricators to use in architectural products subject to the standard, glazing materials permanently labeled or certified to indicate that they conform to ANSI Z97.1–1972 or 1975, "American National Standard. Safety Performance Specifications and Methods of Test for Safety Glazing Material Used in Buildings," through July 5, 1978. Such glazing materials, however, must have been manufactured prior to July 6, 1977, the general effective date of the Architectural Glazing Materials Standard.

The reasons for the proposed extension are explained in the proposal document (42 FR 24067). Basically, the Commission recognized that since manufacturers of glazing materials are not required under the Architectural Glazing Materials Standard to begin producing conforming glazing materials until July 6, 1977, persons who incorporate glazing materials into architectural products subject to the standard (fabricators) might not have glazing material in stock on July 6 that is certified to conform to the Commission's standard. Thus, without a change in the effective date of the standard as it applies to fabricators, fabricators might not have available complying glazing materials to incorporate into the architectural products subject to the standard. This could lead to shortages of these architectural products at the consumer level. In addition, fabricators would likely be left with inventories of noncomplying glazing materials that were manufactured before the effective date of the standard but that could not be incorporated into architectural products subject to the standard after the effective date. Thus, the Commission noted that fabricators might suffer adverse economic effects in disposing of the noncomplying glazing.

The Commission, in proposing the amendment, also recognized that glazing materials that conform to ANSI Z97.1–1972 or 1975 would meet a minimal level of safety and would be generally safer than ordinary annealed glass in the same sizes. Therefore, the Commission included the requirement that the glazing materials incorporated into architectural products during the extension must conform to the ANSI voluntary standard.

DISCUSSION OF COMMENTS

The Commission received four comments on the proposed amendment to the standard.

Three commentors request a clarification of the proposed amendment affirming the right to sell as well as to fabricate architectural products incorporating technically non-complying glazing materials during the one year "grace period." The comments point out that there is no economic or safety-related justification for permitting fabricators to use non-complying safety glazing while not affording others in the chain of distribution the privilege of depleting their inventories of fabricated products with non-complying glazing during the "grace period."

The Commission agrees that clarification regarding the amendment is necessary. While the Commission intended that all parties in the distribution process would be afforded the same rights with respect to architectural products incorporating technically noncomplying glazing, this may not be entirely clear from the language of the proposal. Therefore, the Commission stresses that the amendment applies to retailers and distributors as well as to fabricators. Distributors and retailers, thus, may distribute and sell, without any time restriction, architectural products manufactured between July 6, 1977 and July 5, 1978 that incorporate glazing that conforms to ANSI Z97.1–1972 or 1975. Since fabricators are allowed to manufacture architectural products with glazing that conforms to ANSI Z97.1–1972 or 1975 between July 6, 1977 and July 5, 1978, it follows that retailers and distributors must be allowed to distribute and sell those products in order to accomplish the purpose of the amendment. This clarification is reflected in the amendment to the effective date of the standard below, at section 1201.7.

The amendment does not affect glazing materials or architectural products incorporating glazing materials manufactured prior to July 6, 1977. As indicated in the standard at § 1201.1(b), the standard applies only to glazing materials and architectural products incorporating glazing materials manufactured after the effective date, July 6, 1977. Thus, distributors and retailers may distribute and sell, without restriction, architectural glazing materials and architectural products incorporating glazing materials manufactured prior to July 6, 1977.

One commentor, the Glass Tempering Association, urged that the period within which tempered glass complying with ANSI Z97.1 may be fabricated and distributed be expanded to two years. The Glass Division of the Ford Motor Company suggested a 3 year period would be appropriate. In support of their requests, the commentors pointed to the fact that customers generally purchase tempered glass in large quantities and that therefore, depletion of existing inventories could not be accomplished within a one year period. In addition, the commentors stated that tempered glass cannot be cut or further fabricated after it is manufactured, thereby limiting the uses to which inventories may be applied.

The Commission declines to grant this request at this time. Fabricators who have ordered large quantities of tempered glass can conduct their own "reasonable testing programs" on the glazing that would allow them to certify the glazing as conforming to the Commission's standard. (Section 14(a) of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2063) requires manufacturers of products subject to a consumer product safety standard to certify that products comply with the standard). Moreover, the manufacturers of the tempered glazing may also be able to certify the glazing as conforming to the Commission's standard based upon their own reasonable testing program. If they are able to do so, they could send written notice to their customers certifying particular glazing as conforming to the standard. The Commission also notes that it is difficult to predict just how large the inventories of tempered glass will be after July 5, 1978. If, however, the inventories are not substantially depleted by that date, the tempered glass industry may submit another request for a modification, and the Commission will consider it at that time.

The final amendment set forth below is issued under the authority of section 9(e) of the CPSA, 15 U.S.C. 2058(e) and 5 U.S.C. 553 (the Administrative Procedure Act). The Commission points out that the change in the effective date does not affect persons who manufacture glazing materials (including persons who laminate or temper or otherwise process materials to produce glazing) for use in the architectural products subject to the standard. They must, effective July 6, 1977, manufacture such glazing materials to conform to the Commission's standard and such glazing must be certified in accordance with section 14(a) of the CPSA to conform to the Commission's standard. In regard to this certification, manufacturers of the glazing materials must develop and use their own reasonable testing program to certify that glazing materials conform to the Commission's standard until the Commission prescribes, by rule, under section 14(b) of the CPSA, the testing program that must be used by all manufacturers.

After consideration of the effect of the current effective date of the Standard for Architectural Glazing Materials, the Commission concludes that the standard should be amended as set forth below. Therefore, pursuant to provisions

[1] Copies of the Complaint and the Decision and Order filed with the original document.

of Pub. L. 92-573, 86 Stat. 1215; U.S.C. 2058(e), the Commission amends the standard for architectural glazing materials by adding a new § 1201.2(d) and by revising § 1201.7 to read as follows:

§ 1201.2 Definitions.

* * * * *

(d) Test methods and recommended practices published by the American National Standards Institute (ANSI) and referred to in this Part 1201, are hereby incorporated by reference into this Part 1201.

* * * * *

§ 1201.7 Effective date.

The effective date of this Part 1201 shall be July 6, 1977 except:

(a) For glazing materials used in doors or other assemblies subject to this Part 1201 and intended to retard the passage of fire, when such doors or other assemblies are required by a federal, state, or local or municipal fire ordinance, the effective date shall be January 6, 1980.

(b) Architectural glazing materials manufactured before July 6, 1977 may be incorporated into architectural products listed in § 1201.1(a) through July 5, 1978, if

(1) The architectural glazing material conforms to ANSI Z97.1-1972 or 1975, and

(2) The architectural glazing material is permanently labeled to indicate it conforms to ANSI Z97.1-1972 or 1975 or is accompanied by a certificate certifying conformance to ANSI Z97.1-1972 or 1975.

(c) Architectural products manufactured between July 6, 1977 and July 5, 1978 incorporating glazing material in accordance with § 1201.7(b), may be distributed and sold without restriction.

Because the amendment to the standard for architectural glazing materials grants an exemption from the standard, and because it is essential that the amendment take effect at the same time as the standard in order to avoid disruption of the marketplace, publication of the amendment in the FEDERAL REGISTER 30 days before its effective date is not required. 5 U.S.C. 553(d) (1) and (3).

Dated: June 16, 1977.

RICHARD RAPPS,
Secretary, Consumer Product Safety Commission.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 2]

MISCELLANEOUS AMENDMENTS

Extension of Public Comment Period

AGENCY: Nuclear Regulatory Commission.

ACTION: Extension of period for public comment on proposed rule.

SUMMARY: The Nuclear Regulatory Commission extends until July 5, 1977 the period for public comment on the proposed amendments of certain sections of its "Rules of Practice" to facilitate public participation in its facility license application review and hearing process, to improve coordination with States, counties and municipalities, and to make certain other improvements, that appeared in the FEDERAL REGISTER on May 2, 1977 (42 FR 22168).

DATE: Extended comment period expires on July 5, 1977.

ADDRESS: Written comments should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

FOR FURTHER INFORMATION CONTACT:

Mr. Marc R. Staenberg, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, 301-492-7437.

SUPPLEMENTARY INFORMATION: On May 2, 1977 the Nuclear Regulatory Commission published proposed amendments to certain sections of its regulation "Rules of Practice," 10 CFR Part 2, to facilitate public participation in its facility license application review and hearing process to improve coordination with States, counties, and municipalities, and to make certain other improvements. Interested persons were invited to submit to the Secretary of the Commission by June 16, 1977, written comments for consideration in connection with the proposed amendments.

The Commission has received requests that the comment period be extended. It has been decided to extend the comment period to provide additional time for submitting comments. Accordingly, pursuant to 10 CFR 2.808(b) the period for public comment is hereby extended to July 5, 1977.

Dated at Washington, D.C. this 15th day of June, 1977.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

FARM CREDIT ADMINISTRATION

[12 CFR Parts 611, 614, 615]

ORGANIZATION; LOAN POLICIES AND OPERATIONS; FUNDING AND FISCAL AFFAIRS

Miscellaneous Amendments

SUMMARY: The Farm Credit Adminis-

ACTION: Proposed rule.

SUMMARY: The Farm Credit Administration (FCA), by its Federal Farm Credit Board, has under consideration proposed amendments to its regulations pertaining to amendments to charters of the associations of the Farm Credit System, loan policies of the banks for cooperatives, and certain funding aspects of the banks of the Farm Credit System. The changes in the regulations covering amendments to association charters are being made to clarify certain existing rules. In view of a study by the Capital and Credit Committee of the Banks for Cooperatives, the regulations covering loan policies are being made more responsive to the changing financial posture of the banks. The regulations on funding are redefined to more accurately reflect the ratio requirements of the banks of the Farm Credit System. In addition, the funding regulations are being amended to provide for the issuance of a Farm Credit Systemwide consolidated bond in book entry form only and to parrallel regulations issued by the Treasury Department.

DATES: Written comments must be received on or before July 15, 1977.

ADDRESSES: Submit any comments or suggestions in writing (10 copies) to Donald E. Wilkinson, Governor, Farm Credit Administration, Washington, D.C. 20578. Copies of all communications received will be available for examination by interested persons in the Office of Director, Information Division, Office of Administration, Farm Credit Administration.

FOR FURTHER INFORMATION CONTACT:

Jon F. Greeneisen, Deputy Governor, Office of Administration, Farm Credit Administration, 490 L'Enfant Plaza, S.W., Washington, DC 20578, 202-755-2181.

SUPPLEMENTARY INFORMATION: The Farm Credit Administration, by its Federal Farm Credit Board, has under consideration proposed amendments to its regulations which would: (1) In a transfer of territory from one association to another, require prompt notification to all stockholders and borrowers whose operations are located in the adjusted territories; (2) provide for adjusting the lending limits of the banks for cooperatives semiannually instead of annually; (3) redefine the debt to capital ratio requirements of the banks of the Farm Credit System; (4) prescribe the form and denominations of consolidated bonds, consolidated Systemwide notes, and consolidated Systemwide bonds issued by Farm Credit banks; (5) reflect the liability of each bank of the Farm Credit System in connection with the issuance of consolidated or Systemwide obligations made on its behalf; (6) define the terms used in the subpart on issuance of book entry and definitive Farm Credit securities; (7) set forth the authority of Reserve Banks to issue and otherwise handle book entry Farm Credit securities; (8) describe the scope and effect of the book entry procedure; (9) describe the transfer or pledge of book entry Farm Credit securities; (10) describe the procedure for withdrawal of Farm Credit securities from a Reserve Bank; (11) clarify the liability of the Federal Reserve Banks in connection with book entries of Farm Credit securities; (12) specify the authority of the Federal Reserve Banks to maintain book entry Farm Credit securities for member banks; (13) set forth the requirements for identification of book entry accounts; (14) clarify the procedures for servicing book entry Farm Credit securities; (15) make the regulations of the Treasury Department and the U.S. statutes governing lost, stolen, destroyed, mutilated or defaced U.S. Securities applicable to Farm Credit Systemwide obligations; (16) provide for restrictive endorsement of Farm Credit Systemwide obligations; (17) provide for loss from payment of spurious consolidated obligations to be shared by the 12 Federal Intermediate Credit Banks; and (18) clarify the requirements under which Farm Credit securities may be illustrated in informational and educational materials.

Chapter VI of Title 12 of the Code of Federal Regulations is proposed to be amended by revising §§ 611.1120 (b) (1) and 614.4354; renumbering §§ 615.5106, 615.5107, 615.5108, and 615.5109 to be §§ 615.5495, 615.5496, 615.5497, 615.5498 respectively; revising § 615.5220; deleting § 615.5230; renumbering §§ 615.5450, 615.5455, 615.5460, 615.5465, 615.5470, 615.5475, 615.5480 to be §§ 615.5460, 615.5465, 615.5470, 615.5475, 615.5480, 615.5485, 615.5494 respectively; adding

new §§ 615.5450, 615.5451, 615.5452, 615.-5453; revising §§ 615.5460, 615.5465, 615.-5470, 615.5475, 615.5480, 615.5485; adding new §§ 615.5490, 615.5492; and revising §§ 615.5494, 615.5495, 615.5496, 615.5497, 615.5498 as follows:

PART 611—ORGANIZATION

1. Section 611.1120(b)(1) is revised as follows:

§ 611.1120 Amendments of association charters.

* * * * * *

(b) Other charter amendments. (1) Territorial adjustments may be made among like associations subject to the approval of the bank board and the Farm Credit Administration, provided, however, that the Governor shall have the power to direct at any time such changes in a charter as he finds necessary for the accomplishment of the purposes of the Farm Credit Act of 1971. All stockholders and all borrowers whose operations are located in the adjusted territories shall be informed in writing of the change and notified that their loans are being transferred to and related equities exchanged for equities of like kinds and amounts in the transferee association. At that time, each stockholder shall also be informed that the latest association financial and related information will be made available for review upon the stockholder's written request. The Agreement of Transfer of Territory and the notice to stockholders shall provide for a 60-day period from date of stockholder notification during which they may, by written notice to either association, decline to accept the equities of the transferee association and elect to remain with the transferor association for normal servicing until the current loan is paid. Any application by the borrower for renewal or additional credit shall be made to the transferee association, except for those applications permitted under § 614.4070.

* * * * *

PART 614—LOAN POLICIES AND OPERATIONS

2. Section 614.4354(a) (3) and (4) and (d)(1) is revised as follows:

§ 614.4354 Banks for cooperatives.

(a) District banks. Loans outstanding at any one time to any one borrower, exclusive of participations sold to others shall be limited to the following percentages of the net worth of a district bank as of the preceding June 30 or December 31, whichever is more recent or at an interim date determined by the Farm Credit Administration as a result of material changes in a bank's net worth.

* * * * *

(3) Net worth for the calculation of lending limits at December 31 shall exclude 20 percent of the bank's undistributed earnings and shall not include any portion of Central Bank for Cooperative's undistributed earnings.

(4) Loans made within the established lending limits that become excessive because of a subsequent decrease in the bank's net worth shall be reduced to the lending limits in an orderly manner over a reasonable period.

* * * * *

(d) * * *

(1) Determine its balance sheet net worth total as of the preceding June 30 or December 31, whichever is more recent, or at any interim date determined by the Farm Credit Administration as a result of material changes in the bank's net worth.

* * * * *

PART 615—FUNDING AND FISCAL AFFAIRS

3. Part 615 is amended as follows:

(a) Sections 615.5106, 615.5107, 615.-5108 and 615.5109 are renumbered §§ 615.5495, 615.5496, 615.5497 and 615.-5498 respectively;

(b) Sections 615.5450, 615.5455, 615.-5460, 615.5465, 615.5470, 615.5475, and 615.5480 are renumbered §§ 615.5460, 615.5465, 615.5470, 615.5475, 615.5480, 615.5485, and 615.5494 respectively;

(c) Section 615.5220 is revised as follows:

§ 615.5220 Ratio requirements.

(a) A bank shall not incur aggregate liabilities exceeding 20 times its capital and surplus, except with the specific written approval of the Farm Credit Administration. Such approval shall not be granted if the consolidated ratio for all like banks will exceed 20 to 1. When such an exception occurs, all other like banks shall be notified by the Farm Credit Administration. A bank shall notify the Farm Credit Administration whenever its aggregate liabilities exceed 18 times its capital and surplus.

(b) An issue of notes, bonds, debentures, or other siimlar obligations by a bank or banks shall not be approved by the Farm Credit Administration if such issue together with the aggregate of all other liabilities exceeds 20 times the capital and surplus of the bank or banks which will be primarily liable on the proposed issue. If more than one bank will be primarily liable on the proposed issue, and capital and surplus of the banks involved shall be calculated on a consolidated basis.

(c) The term "capital and surplus," as used in this section, represents total net worth including undistributed earnings or losses but excluding valuation reserves and libability reserves. The term "aggregate liabilities," as used in this section, represents all amounts owed to others.

§ 615.5230 [Deleted]

d. Section 615.5230 is deleted.

e. New sections 615.5450, 615.5451, 615.5452 and 615.5453 are added as follows:

Subpart O—Issuance of Book Entry and Definitive Farm Credit Securities

§ 615.5450 Consolidated bonds.

(a) The 12 Federal Land Banks issue consolidated bonds in definitive or book entry form in denominations of $1,000, $5,000, $10,000, $50,000, $100,000 and $500,000.

(b) The 12 Federal Intermediate Credit Banks issue consolidated bonds in definitive or book entry form in denominations of $5,000, $10,000, $50,000, $100,000, and $500,000.

(c) The 13 Banks for Cooperatives issue consolidated bonds in definitive or book entry form in denominations of $5,000, $10,000, $50,000, $100,000, and $500,000.

§ 615.5451 Consolidated Systemwide notes.

The 12 Federal Land Banks, the 12 Federal Intermediate Credit Banks, and the 13 Banks for Cooperatives issue consolidated Systemwide notes only in bearer definitive form in denominations of $50,000, $100,000, and $1,000,000.

§ 615.5452 Consolidated Systemwide bonds.

The 12 Federal Land Banks, the 12 Federal Intermediate Credit Banks, and the 13 Banks for Cooperatives issue consolidated Systemwide bonds only in book entry form in denominations of $1,000 for issues with an original maturity over 1 year and 1 month and $5,000 for issues with an original maturity of under 1 year and 1 month.

§ 615.5453 Liability.

Each bank of the Farm Credit System is primarily liable for the portion of any issue of consolidated or Systemwide obligations made on its behalf and is jointly and severally liable for the payment of any additional sums as called upon by the Farm Credit Administration in order to make payments of interest or principal which any bank primarily liable therefore shall be unable to make. Such calls shall be made first upon the other banks operating under the same title of the Farm Credit Act of 1971 as the defaulting bank, and second upon banks operating under other titles of the Act, taking into consideration the capital, surplus, bonds, debentures, or other obligations which each may have outstanding at the time of such assessment.

f. Sections 615.5460, 615.5465, 615.-5470, 615.5475, 615.5480, and 615.5485 are revised as follows:

§ 615.5460 Definition of terms for book entry issuance of Farm Credit Securities.

In this subpart, unless the context otherwise requires or indicates:

(a) "Reserve Bank" means a Federal Reserve Bank and its branches acting as agent for the banks of the Farm Credit System and, where indicated, acting in its individual capacity.

(b) "Banks of the Farm Credit System" means the 12 Federal Land Banks, the 12 Federal Intermediate Credit Banks, the 13 Banks for Cooperatives, or all of them.

(c) "Farm Credit securities" means consolidated notes, bonds, debentures, or other similar obligations of the 12 Federal Land Banks, the 12 Federal Intermediate Credit Banks, or the 13 Banks for Cooperatives, and Systemwide notes, bonds, debentures, or similar obligations of the 37 banks of the Farm Credit System, issued under the Farm Credit Act of 1971, the completion and delivery of which is undertaken by a Reserve Bank as agent of the banks of the Farm Credit System.

(d) "Definitive Farm Credit security" means a Farm Credit security issued in engraved or printed form by the Federal Reserve Bank of New York as agent of the banks of the Farm Credit System.

(e) "Book entry Farm Credit security" means a Farm Credit security issued in the form of an entry made as prescribed in this subpart on the records of a Reserve Bank.

(f) "Convertible" means a definitive Farm Credit security convertible into a book entry Farm Credit security or vice versa.

(g) "Pledge" includes a pledge of, or any other security interest in, Farm Credit securities as collateral for loans or advances or to secure deposits of public monies or the performance of an obligation.

(h) "Member bank" means any national bank, or State bank, or other bank or trust company which is a member of a Reserve Bank.

§ 615.5465 Authority of Reserve Banks.

Each Reserve Bank is hereby authorized in accordance with the provisions of this subpart to:

(a) Issue book-entry Farm Credit securities by means of entries on its records, which shall include the name of the bank's depositor, the latter's employer identification number, where appropriate, and the amount, maturity date and CUSIP number of each loan.

(b) Effect conversions between book-entry Farm Credit securities and definitive Farm Credit securities, if convertible.

(c) Otherwise service and maintain book-entry Farm Credit securities.

(d) Issue a confirmation of transaction in the form of an advice (serially numbered or otherwise), which specifies the amount, maturity date, and CUSIP number of the loan as well as the date of the transaction.

§ 615.5470 Scope and effect of book-entry procedure.

(a) A Reserve Bank as agent for the banks of the Farm Credit System may apply the book-entry procedure provided for in this subpart to any Farm Credit securities which may be issued either in book-entry or definitive form, which have been or are hereafter deposited for any purpose, or maintain Farm Credit securities which may only be issued in book-entry form, in accounts with it in its individual capacity under terms and conditions which indicate that the Reserve Bank will continue to maintain such deposit accounts in its individual capacity notwithstanding application of the book-entry procedure to such securities. This paragraph shall be applicable but not limited to Farm Credit securities deposited or maintained:

(1) As collateral pledged to a Reserve Bank (in its individual capacity) for advances by it.

(2) For a member bank for its sole account.

(3) For a member bank held for the account of its customers.

(4) In connection with deposits in a member bank of funds of States, municipalities, or other political subdivisions.

(5) In connection with the performance of an obligation or duty under Federal, State, municipal, or local law, or judgments or decrees of courts.

The application of the book-entry procedure or the maintenance of book-entry Farm Credit securities under this paragraph shall not derogate from or adversely affect the relationships that would otherwise exist between a Reserve Bank in its individual capacity and the entities for which accounts are maintained. Whenever the book-entry procedure is applied to such Farm Credit securities, the Reserve Bank is authorized to take all action necessary in respect of the book-entry procedure to enable such Reserve Bank in its individual capacity to perform its obligations as depository with respect to such Farm Credit securities.

(b) A Reserve Bank as agent of the banks of the Farm Credit System shall apply the book-entry procedure to Farm Credit securities deposited as collateral pledged to the United States under Treasury Department Circulars Nos. 92 and 176; both as revised and amended, and may apply the book-entry procedure, with the approval of the Secretary of the Treasury, to any other Farm Credit securities deposited with a Reserve Bank as Fiscal Agent of the United States.

(c) Any person having an interest in Farm Credit securities which are deposited with a Reserve Bank (in either its individual capacity or as agent of the banks of the Farm Credit System) for any purpose shall be deemed to have consented to their conversion to book-entry Farm Credit securities pursuant to the provisions of this subpart and in the manner and under procedures prescribed by the Reserve Bank.

(d) No deposit shall be accepted under this section on or after the date of maturity or call of the Farm Credit securities.

§ 615.5475 Transfer or pledge.

(a) Reserve Bank records. A transfer or a pledge of book-entry Farm Credit securities to a Reserve Bank, or to any transferee or pledgee eligible to maintain an appropriate book-entry account in its name with a Reserve Bank under this subpart, is effected and perfected, notwithstanding any provision of law to the contrary, by a Reserve Bank making an appropriate entry in its records of the Farm Credit securities transferred or pledged. The making of such an entry in the records of a Reserve Bank shall:

(1) Have the same effect as the delivery of Farm Credit securities in bearer definitive form;

(2) Have the effect of a taking of delivery by the transferee or pledgee;

(3) Constitute the transferee or pledgee a holder;

(4) If a pledge, effect a perfected security interest therein in favor of the pledgee. A transfer or pledge of book-entry Farm Credit securities effected under this paragraph shall have priority over any transfer, pledge, or other interest, theretofore or thereafter effected or perfected under paragraph (b) of this section or in any other manner.

(b) Member banks and others. A transfer or a pledge of book-entry Farm Credit securities, or any interest therein, maintained by a Reserve Bank (in its individual capacity or as agent of the Farm Credit banks) in a book-entry account under this subpart, including Farm Credit securities in book-entry form under § 615.5470(a)(3), is effected, and a pledge is perfected, by any means that would be effective under applicable law to effect a transfer or to effect and perfect a pledge of Farm Credit securities, or any interest therein, if the securities were maintained by the Reserve Bank in bearer definitive form. For purposes of transfer or pledge hereunder, book-entry Farm Credit securities maintained by a Reserve Bank shall, notwithstanding any provision of law to the contrary, be deemed to be maintained in bearer definitive form. A Reserve Bank maintaining book-entry Farm Credit securities, either in its individual capacity or as agent of the Farm Credit banks, is not a bailee for purposes of notification of pledges of those securities under this paragraph, or a third person in possession for purposes of acknowledgment of transfers thereof under this paragraph. Where Farm Credit securities are recorded on the books of an entity for account of the pledgor or transferor thereof and such securities are on deposit or are maintained with a Reserve Bank in a book-entry account hereunder, such entity shall, for purposes of perfecting a pledge of such securities or effecting their delivery to a purchaser under applicable provisions of law, be the bailee to which notification of the pledge of the securities may be given or the third person in possession from which acknowledgment of the holding of the securities for the purchaser may be obtained. A Reserve Bank will not accept notice or advice of a transfer or pledge effected or perfected under this paragraph, and any such notice or advice shall have no effect. A Reserve Bank may continue to deal with its depositors in accordance with the provisions of this subpart, notwithstanding any transfer or pledge effected or perfected under this paragraph.

(c) Filing and recording unnecessary. No filing or recording with a public recording office or officer shall be necessary or effective with respect to any transfer

or pledge of book-entry Farm Credit securities or any interest therein.

(d) Conversion. A Reserve Bank shall, upon receipt of appropriate instructions, convert book-entry Farm Credit securities into definitive Farm Credit securities, if convertible, and deliver them in accordance with such instructions. No such conversion shall affect existing interests in such Farm Credit securities.

(e) Transfer by Reserve Banks. A transfer of book-entry Farm Credit securities within a Federal Reserve Bank shall be made in accordance with the procedure established by the Bank not inconsistent with this subpart. The transfer of book-entry Farm Credit securities by a Federal Reserve Bank may be made through a telegraphic transfer procedure.

(f) Timeliness of requests. All requests for transfer, withdrawal or any authorized transaction, must be received prior to the maturity or date of call of the security.

§ 615.5480 Withdrawal of farm credit securities.

(a) A depositor of book-entry Farm Credit securities may withdraw them, if convertible, from a Reserve Bank by requesting delivery of like definitive Farm Credit securities to itself or on its order to a transferee.

(b) Farm Credit securities which can be delivered upon withdrawal will be issued in bearer form only.

§ 615.5485 Delivery of farm credit securities.

A Reserve Bank which has received Farm Credit s ecurities and effected pledges, made entries regarding them, or transferred or delivered them according to the instructions of its depositor is not liable for conversion or for participation in breach of fiduciary duty even though the depositor had no right to dispose of or take over action in respect of the securities. A Reserve Bank shall be fully discharged of its obligations under this subpart by the transfer or delivery of Farm Credit securities in book-entry or definitive form to its depositor or upon the order of such depositor. Customers of a member bank or other entity (other than a Reserve Bank) may obtain Farm Credit securities in definitive form if convertible only by causing the depositor of the Reserve Bank to order the withdrawal thereof from the Reserve Bank.

g. New sections 615.5490 and 615.5492 are added as follows:

§ 615.5490 Classes of accounts.

Reserve Banks are authorized to maintain book-entry Farm Credit securities for member banks for securities the member banks hold for their own account, or hold for the account of their customers, and as otherwise specified in § 615.5470. Purchasers of book-entry Farm Credit securities, on original issue or otherwise, may have such securities maintained at member banks, or in accounts maintained at entities providing securities safekeeping services for customers (e.g., nonmember banks or thrift institutions, or securities dealers) which have related accounts at member banks.

§ 615.5492 Identification of accounts.

Book-entry accounts may be established in such form or forms as customarily permitted by the entity e.g., member bank, or other banking or thrift institution, or a securities dealer) maintaining them, except that each account should include data to permit both customer identification by name, address and taxpayer identifying number, as well as a determination of the Farm Credit securities being held in such account by amount, maturity date and CUSIP number, and of transactions relating thereto.

h. Sections 615.5494, 615.5495, 615.5496, 615.5497 and 615.5498 are revised as follows:

§ 615.5494 Servicing book-entry Farm Credit securities; payment of interest, payment at maturity or upon call.

Interest becoming due on book-entry Farm Credit securities shall be charged to the appropriate Farm Credit bank account at the Federal Reserve Bank of New York on the interest-due date and remitted or credited in accordance with the instructions from the member bank or other Reserve Bank depositor for whose account the securities shall have been maintained.

Book-entry Farm Credit securities shall be redeemed and charged to the appropriate Farm Credit bank account at the Federal Reserve Bank of New York and the redemption proceeds, principal, and interest shall be disposed of in accordance with the instructions from the member bank or other Reserve Bank depositor for whose account the securities shall have been maintained.

§ 615.5495 Lost, stolen, destroyed, mutilated or defaced Farm Credit securities, including coupons.

(a) Basis of relief. The statutes of the United States, now or hereafter in force, and the regulations of the Treasury Department, now or hereafter in force, governing relief on account of the loss, theft, destruction, mutilation or defacement of U.S. securities, and the regulation of the Treasury Department, now or hereafter in force, governing the payment of mutilated or defaced coupons of U.S. securities, insofar as such statutes and regulations may be applicable, and as modified to relate to the consolidated or Systemwide obligations of the Farm Credit banks and coupons of such obligations shall govern the granting of relief on account of lost, stolen, destroyed, mutilated or defaced consolidated or Systemwide obligations of the Farm Credit banks and mutilated or defaced coupons of such obligations.

(b) Claims and proof of loss. Claims shall be presented to the Claims Branch of the Division of Securities Operations, Bureau of the Public Debt, Washington, D.C. 20226, and proof shall be made to the Bureau of Public Debt, by applicants for relief on account of the loss, theft, destruction, mutilation or defacement of consolidated or Systemwide obligations of the Farm Credit banks and the mutilation or defacement of coupons of such obligations, in accordance with the statutes of the United States, now or hereafter in force, and the regulations of the Treasury Department, now or hereafter in force, with respect to securities of the United States, and coupons of such securities.

§ 615.5496 Restrictive endorsement of bearer securities.

When consolidated and Systemwide obligations of the Farm Credit banks are being presented to Federal Reserve banks or branches, for redemption, exchange, or conversion to book entry, such obligations may be restrictively endorsed. The restrictive endorsement shall be placed thereon in substantially the same manner and with the same effects as prescribed in United States Treasury Department regulations, now or hereafter in force, governing like transactions in United States bonds; and consolidated or Systemwide obligations of the Farm credit banks so endorsed shall be prepared for shipment and shipped in the manner prescribed in such regulations for United States bonds. (See 31 CFR 328.1–328–6.)

§ 615.5497 Loss from payment of spurious debentures.

Each of the 12 Federal intermediate credit banks agreed, by resolution adopted by its board of directors, to share in any loss resulting from the payment of counterfeit, forged, or unauthorized consolidated obligations. The agreement provides that such loss shall be shared by the 12 Federal intermediate credit banks in the same ratio as their respective participations in such obligations issued during the 12 months preceding the date of payment of such counterfeit, forged, or unauthorized obligations.

§ 615.5498 Farm Credit securities as illustrations.

Illustrations of Farm Credit securities may appear in information and educational materials if printed in black and white, but not in color, and must be less than ¾ actual size or more than 1½ times the actual size of the original security. Motion picture and microfilms and slides of such securities are permitted in black and white or color for projection on a screen or for use in telecasting.

(Secs. 5.9, 5.12, 5.18, 85 Stat. 619, 620, 621.)

DONALD E. WILKINSON,
Governor,
Farm Credit Administration.

[FR Doc.77-17339 Filed 6-17-77;8:45 am]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Airworthiness Docket No. 77-SW-24]

AIRWORTHINESS DIRECTIVES

Bell Models 206A, 206B, 206A-1, and 206B-1 Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rule Making (NPRM).

SUMMARY: This notice proposes to amend Part 39 of the Federal Aviation Regulations (14 CFR Part 39) to add an Airworthiness Directive that would require a one-time magnetic particle inspection of the main rotor hub trunnion, P/N 206-011-113-1, within 100 hours on all Bell Models 206A, 206B, 206A-1, and 206B-1 helicopters to preclude possible fatigue failure of the trunnion that could result in loss of the helicopter.

DATES: Comments must be received by July 22, 1977. Proposed effective date of the AD will be September 12, 1977.

ADDRESSES: Send comments on this proposal in triplicate to: Regional Counsel, ASW-7, Attn. Docket 77-SW-24, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101.

FOR FURTHER INFORMATION CONTACT:

Tom A. Dragset, Airframe Section, Engineering and Manufacturing Branch, ASW-212, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas, telephone number (817) 624-4911, Extension 517.

SUPPLEMENTARY INFORMATION: There has been one reported failure of a main rotor hub trunnion on a Bell Model 206B that resulted in loss of the main rotor blades. The failure was reportedly due to a fatigue crack and fracture which had originated in the radius of the trunnion bearing journal as a result of machine grinding burns. Both bearing journals reportedly had grinding burns. The inspection of this trunnion conducted 380 hours prior to the failure failed to disclose evidence of a crack even though traces of Proseal were found in the crack. The National Transportation Safety Board has recommended that the agency issue an Airworthiness Directive to require an immediate one-time magnetic particle inspection of all Bell main rotor hub trunnions, P/N 206-011-113-1, in accordance with the Bell Helicopter published maintenance and overhaul procedures, to detect machining deficiencies, surface irregularities, and cracks.

The agency has received only the one report of a trunnion crack or failure for approximately 2,000 Bell Model 206 series helicopters. Since other Model 206 series main rotor trunnions may have cracks in the bearing journals, the proposed Airworthiness Directive would require a one-time inspection of the main rotor hub trunnion to detect machining deficiencies, surface irregularities, and cracks, and replacement, as necessary, on Bell Model 206A, 206B, 206A-1 and 206B-1 helicopters.

Bell Helicopter Textron Operations Safety Notice OSN 206-77-2 dated March 2, 1977, pertains to the reported trunnion failure.

Interested persons are invited to participate in the development of the final rule by submitting written and oral comments as they desire. All comments will be recorded and considered by the Director before taking final action, and the proposal may be changed as a result of the comments received. All comments will be available for examination before and after the closing date for comments in the Office of the Regional Counsel, FAA, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas.

DRAFTING INFORMATION

The principal authors of this document are Tom A. Dragset, Aerospace Engineer, Flight Standards Division, and James O. Price, General Attorney, Southwest Region, FAA.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

BELL: Applies to Model 206A, 206B, 206A-1, and 206B-1 helicopters certificated in all categories.

Compliance required within the next 100 hours' time in service after the effective date of this AD unless already accomplished.

To prevent possible failure of the main rotor hub trunnion, P/N 206-011-113-1, as a result of a crack, accomplish the following:

(a) Remove the main rotor hub trunnion, P/N 206-011-113-1, in accordance with the procedures in Section II of the Bell Model 206A/206B Helicopter Maintenance and Overhaul Manual.

(b) Inspect for cracks in the relief radius of each bearing seat journal using magnetic particle inspection methods or an equivalent method approved by the Chief, Engineering and Manufacturing Branch, Flight Standards Division, Southwest Region, FAA.

(c) If cracks are found, replace the trunnion before further flight.

(d) If no cracks are found, install the trunnion in accordance with the procedures in Section II of the Bell Model 206A/206B Helicopter Maintenance and Overhaul Instructions.

(Sec. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423; Section 6(c)), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11).)

The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Texas, on June 6, 1977.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc.77-17462 Filed 6-17-77;8:45 am]

[14 CFR Part 39]

[Docket No. 77-EA-3]

AIRWORTHINESS DIRECTIVES

Martin Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt an Airworthiness Directive that will update and replace AD 75-26-08 applicable to Martin 404 type airplanes. It will relate some of the calendar time to hours in service and require an initial inspection within a 5-year period or 10,000 hours of the effective date of the amendment. Inspections under AD 75-26-08 disclosed the presence of cracks and the deficiencies were a product of a combination of calendar time and service time.

DATES: Comments must be received on or before July 21, 1977.

FOR FURTHER INFORMATION CONTACT:

L. Lipsius, Airframe Section, AEA-212, Engineering and Manufacturing Branch, Flight Standards Division, FAA, Federal Building, J. F. K. International Airport, Jamaica, New York 11430; Tel. 212-995-2875.

SUPPLEMENTARY INFORMATION: AD 75-26-08 was published in 1975 to require an inspection for corrosion at station 187 of the wings of the Martin 404 type airplane. The inspection was premised in some instances on calendar time only. The proposal will relate the calendar time to service time and also require an inspection for cracks as well as corrosion.

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, Federal Building, J. F. K. International Airport, Jamaica, New York 11430. All communications received on or before July 21, 1977, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Engineering and Manufacturing Branch, AEA-210, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling 212-995-2875.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

DRAFTING INFORMATION

The principal authors of this document are L. Lipsius, Airframe Section Flight Standards Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

It has been determined that the expected impact of the proposed regulation is so minimal that the proposal does not warrant an evaluation.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) by redesignating and amending AD 75-26-08 as follows:

MARTIN: Applies to all Martin 404 Aircraft Certificated in all categories.

Compliance required as indicated.

(a) For airplanes without wing spar chord splice joint fittings at wing station 187, accomplish the following:

(1) Within the next three months or 500 hours in service, whichever occurs first, after the effective date of this AD, unless accomplished within five years or 10,000 hours in service preceding the effective date, remove the left and right outer wing panels and visually inspect the wing spar chord splice joints for corrosion at wing station 187.

(2) Repeat the inspection specified in (a)(1) at intervals not to exceed 10,000 hours in service or five years, whichever occurs first, for left wings, and 12,000 hours in service or six years, whichever occurs first, for right wings.

(b) For airplanes with wing splice fittings installed in accordance with STC SA328SO, accomplish the following without wing removal:

(1) Visually inspect the left and right wing panels at wing station 187 for corrosion within the next 12 months or 2000 hours in service, whichever occurs first, after the effective date of this AD, unless accomplished within 48 months or 8000 hours in service preceding the effective date by

(i) Stripping all sealant from the spar splice joints.

(ii) Removing any two vertical large attachment bolts and the two end horizontal tension bolts from each "Hayes" fitting.

(2) Perform a dye penetrant inspection or an FAA approved equivalent inspection for cracks at the same time as the corrosion inspection specified in (b)(1).

(i) At the accessible areas of the spars and

(ii) In the four bolt holes of each "Hayes" fitting as noted in (b)(1)(ii)

(3) Perform the inspection in (b)(1)(ii) which requires removal of the horizontal bolts even though any two vertical large attachment bolts have been removed for bolt hole inspection within the past 48 months or 8000 hours in service.

(4) Repeat the inspection specified in (b)(1) at intervals not to exceed 10,000 hours in service or five years, whichever occurs first.

(5) Remove both wing outer panels; conduct a corrosion inspection of the wing structure and fittings, and a dye penetrant inspection for cracks on all affected parts at intervals not to exceed 20,000 hours in service or ten years, whichever occurs first, beyond the inspection in (b)(1).

(c) Repair corroded parts before further flight in accordance with an FAA approved repair or replace cracked parts before further flight with serviceable or equivalent parts approved by the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

(d) Upon submission of substantiating data by an owner or operator through an FAA Maintenance Inspector, the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region, may adjust the inspection interval specified in this AD.

(Sec. 313(a), 601, and 603, Federal Aviation Act of 1958, 49 U.S.C. 313(a), 1421, and 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c).)

NOTE.—The Federal Aviation Administration has determined that this document contains a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107 and certifies that an Economic Impact Statement has been prepared.

Issued in Jamaica, N.Y., on June 7, 1977.

L. J. CARDINALI,
Acting Director,
Eastern Region.

[FR Doc.77-17463 Filed 6-17-77;8:45 am]

[14 CFR Part 39]

[Airworthiness Docket No. 77-SW-23]

AIRWORTHINESS DIRECTIVES

Rockwell International Models 112, 112TC, and 114 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making (NPRM).

SUMMARY: An airworthiness Directive (AD) is being proposed to increase the strength of the front seats and seat belt attachments on Rockwell Models 112, 112TC, and 114 airplanes due to the failure of the seats or seat belt attachments during emergency situations on two occasions.

DATES: Comments must be received on or before: July 21, 1977. Proposed effective date of this AD will be: September 5, 1977.

ADDRESSES: Send comments in triplicate to: Regional Counsel (ASW-7), Attention Docket SW-77-23, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Forth Worth, Texas 76101.

FOR FURTHER INFORMATION CONTACT:

James L. Patras, Airframe Section, Engineering and Manufacturing Branch, ASW-212, Federal Aviation Administration, P.O. Box 1689, Forth Worth, Texas, telephone number (817) 624-4911, Extension 516.

SUPPLEMENTARY INFORMATION: On two occasions, seats and/or seat belt attachments have failed during emergency landing situations occurring after loss of engine power. In both cases, occupants were severely injured during sudden stoppage of the aircraft.

While actual seat loads met the requirements of the regulations at the time of certification, subsequent evaluation indicated that the standards applied to seat manufacturers would have resulted in greater strength. This modification and subsequent retesting assures a greater margain of occupant safety during an emergency landing situation.

Therefore, the proposed AD would require the increased strength modification specified in Rockwell Service Bulletins No. 112-45 and 114-5.

Interested persons are invited to participate in the development of the final rule by submitting written and oral comments as they desire. All comments will be recorded and considered by the Director before taking final action, and the proposal may be changed as a result of comments received. All comments will be available for examination before and after the closing date for comments in the Office of the Regional Counsel, FAA, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas.

The principal author of this document is James L. Patras, Flight Standards Division with assistance by James O. Price, Office of the Regional Counsel.

Accordingly, the Federal Aviation Administration proposes to amend Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

ROCKWELL: Applies to Rockwell Model 112, S/N 3 through 499; Model 112TC, S/N 13000 through 13149; and Model 114, S/N 14000 through 14149 certified in all categories.

Compliance required as indicated.

Within 100 hours' time in service after the effective date of this AD or at the next annual inspection whichever occurs first, modify the front seats and belt attachments in accordance with Rockwell Service Bulletins No. 112-45 dated January 28, 1977, and No. 114-5 dated January 28, 1977, or later approved revisions or in accordance with an equivalent method approved by the Chief, Engineering and Manufacturing Branch, Flight Standards Division, Southwest Region, Federal Aviation Administration, Fort Worth Texas.

(Sections 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354 (a), 1421, and 1423); Section 6(c), Department of Transportation Act (49 U.S.C. 1655 (c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Forth Worth, Texas, on June 3, 1977.

HENRY L. NEWMAN,
Director, Sonthwest Region.

[FR Doc.77-17425 Filed 6-17-77;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 77-WA-11]

ALTERATION OF TERMINAL CONTROL AREA

Atlanta, Ga.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: The FAA proposes to alter the Atlanta, Ga., Terminal Control Area (TCA) by adding additional TCA airspace where required, and by revoking TCA airspace which is no longer required; and to retain as a permanent addition to the Atlanta TCA the temporary expansion ring made two years ago of that airspace with a 35 mile radius of Atlanta from 8,000 feet MSL to 12,500 feet MSL. The proposal is made as a result of close observation of the current operational requirements for handling traffic in the Atlanta terminal area. If adopted, the proposal would provide the appropriate configuration of the Atlanta TCA to handle current and anticipated operational requirements.

DATES: Comments must be received on or before August 4, 1977. The proposed effective date is October 6, 1977.

ADDRESSES: Send comments on the proposal in triplicate to:

Director, FAA Southern Region, Attention: Chief, Air Traffic Division, Docket No. 77-WA-11, FAA, P.O. Box 20636, Atlanta, Ga. 30320.

The official docket may be examined at the following location:

FAA Office of the Chief Counsel, Rules Docket, (AGC-24), Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Wray McClung, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: (202) 426-8530.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before August 4, 1977 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart K of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the lateral and vertical dimensions of the Atlanta TCA. The original Atlanta TCA became operational on June 25, 1970. Since that time, the addition of a new runway and revision to instrument approach procedures has required past changes to the TCA configuration. Profile descent procedures have been instituted this year at Atlanta. These procedures were designed to minimize the amount of time high performance aircraft (turbojet and turboprop aircraft weighing more than 12,500 pounds) operate in and around terminal areas. Profile descent procedures have as goals increased safety by reducing exposure time between controlled and uncontrolled aircraft at lower altitudes around airports, reduction of aircraft noise in the proximity of airports, conservation of aviation fuel, and standardization of air traffic control arrival procedures. Alteration of the Atlanta TCA is required to assure that the flight paths of large turbine engine powered airplanes on profile descent procedures operate at or above the designated floors while within the lateral limits of the terminal control area. For the sake of simplicity, it is proposed to base the center of the TCA on the Atlanta VORTAC rather than the center of the airport. This will cause slight shifts of area boundaries. In addition, the floors of the TCA airspace would be raised where not required, so that visual flight rule (VFR) aircraft may have additional operating airspace underneath/outside TCA airspace. A sincere attempt is being made to only add TCA airspace where required and to revoke it where not required. The proposal is to keep essentially the same lateral dimensions of the TCA, but to increase the vertical extent of approximately 460 square miles of TCA airspace, while decreasing the vertical extent of approximately 1,700 square miles of TCA airspace. The net overall effect of the proposal would be a substantial reduction in the extent of Atlanta TCA airspace.

The second portion of the proposal pertains to the temporary expansion above 8 000 feet MSL. On April 24, 1975, the well publicized test expansion of the Atlanta TCA became effective which added a ring within a 35 mile radius from 8,000 feet MSL to 12,500 feet MSL. Since all aircraft operating in controlled airspace above 12,500 feet MSL are now required to have a transponder with a Mode 3/A 4096 code capability and Mode C automatic altitude reporting capability, the TCA expansion from 8,000 feet MSL to 12,500 feet MSL would permit containment of jet aircraft within protected airspace during the transition into and out of Atlanta. This expansion has provided additional safety for terminal jet aircraft operations without unacceptable hindrance to aircraft wishing to bypass Atlanta between 8,000 feet MSL and 12,500 feet MSL. It is therefore proposed to make this expansion permanent.

An Atlanta Terminal Area Airspace Study Group was formed to evaluate mutual air traffic control problems in the Atlanta terminal area, and to make recommendations to the Chief, Air Traffic Division of the Southern Region. This Study Group was comprised of representatives from all segments of aviation as well as concerned air traffic control facilities. The Study Group has completed its evaluation and has recommended to the Southern Air Traffic Division the Atlanta TCA configuration that is proposed herein. This includes the proposed alterations at and below 8,000 feet MSL and the permanent expansion of the ring above 8,000 feet MSL.

Subpart K of Part 71 was republished in the Federal Register on January 3, 1977 (42 FR 642), and the Atlanta TCA was amended (41 FR 56789, 42 FR 14861).

DRAFTING INFORMATION

The principal authors of this document are Wray McClung, Air Traffic Service, and Jack P. Zimmerman Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.401 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 642) and amended (41 FR 56789, 42 FR 14861), to redescribe the Atlanta, Ga., Terminal Control Area as follows:

PRIMARY AIRPORT

Atlanta Airport (Lat. 33°38'31" N., Long. 84°25'34" W.)

Area A. That airspace extending upward from the surface to an including 12,500 feet MSL, bounded on the east and west by a seven-mile radius of the Atlanta VORTAC, on the south by a line four miles south of and parallel to the Runway 09R/27L localizer courses, and on the north by a line four miles north of and parallel to the Runway 08/26 localizer courses; excluding the Charlie Brown County Control Zone.

Area B. That airspace extending upward from 2,500 feet MSL to and including 12,500 feet MSL, bounded on the east and west by

a 12-mile radius of the Atlanta VORTAC, on the south by a line four miles south of and parallel to the Runway 09R/27L localizer courses, and on the north by a line four miles north of and parallel to the Runway 08/26 localizer courses; excluding the Charlie Brown County Control Zone and that airspace contained in Area A.

Area C. That airspace extending upward from 3,500 feet MSL to and including 12,500 feet MSL, bounded on the east and west by a 20-mile radius of the Atlanta VORTAC, on the south by a line eight miles south of and parallel to the Runway 09R/27L localizer courses, and on the north by a line eight miles north of and parallel to the Runway 08/26 localizer courses; excluding that airspace contained in Areas A and B.

Area D. That airspace extending upward from 6,000 feet MSL to and including 12,500 feet MSL within a 25-mile radius of the Atlanta VORTAC; excluding that airspace clockwise between the Atlanta VORTAC 138 and 218 radials south of a line 12 miles south of and parallel to the Runway 09R/27L lo-calizer courses, that airspace clockwise between the Atlanta VORTAC 323 and 031 radials north of a line 12 miles north of and parallel to the Runway 0826 localizer courses, and that airspace contained in Areas A, B, and C.

Area E. That airspace extending upward from 8,000 feet MSL to and including 12,500 feet MSL within a 29-mile radius of the Atlanta VORTAC; excluding that airspace contained within Areas A, B, C, and D.

Area F. That airspace extending upward from 10,000 feet MSL to and including 12,500 feet MSL within a 35-mile radius of the Atlanta VORTAC; excluding that airspace contained in Areas A, B, C, D, and E.

(Sec. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive 11949, and OMB Circular A-107.

Issued in Washington, D.C., on June 10, 1977.

EDWARD J. MALO,
Acting Chief, Airspace and Air Traffic Rules Division.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

[29 CFR Part 1601]

706 AGENCIES

AGENCY: Equal Employment Opportunity Commission.

ACTION: Proposed Designation.

SUMMARY: The Equal Employment Opportunity Commission proposes to amend its regulations on designation of certain State and local agencies so that they may handle employment discrimination charges filed with the Commission. Proposed are three local agencies that requested deferral designation as provided under the authority of the Civil Rights Act of 1964, as amended. The proposal would authorize the agencies listed to process charges deferred to them by the Commission.

DATES: Comments must be received on or before July 5, 1977. Proposed effective date July 6, 1977.

ADDRESS: Comments should be sent to: Equal Employment Opportunity Commission, Office of Compliance Programs, Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT:

Paul Lindsay, 202-634-6040, Desk Officer, Equal Employment Opportunity Commission, State and Local Division, Office of Compliance Programs, 2401 E Street NW., Room 4050, Washington, D.C. 20506.

SUPPLEMENTARY INFORMATION: Pursuant to § 1601.12(i), Title 29, Chapter 14 of the Code of Federal Regulations as revised and published in the FEDERAL REGISTER, 40 FR 3210M, January 20, 1975, the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) proposes that the agencies listed below be designated as "706 Agencies" (§ 1601.12(c)). There are three (3) purposes for such designation: First, that the agencies receive charges deferred by the Commission pursuant to Section 706 (c) and (d) of Title VII of the Civil Rights Act of 1964, as amended; second, that the Commission accord "substantial weight" to the final findings and orders of those agencies pursuant to § 1601.19b(e); and third, to commence the 15-day period within which any person or organization may file written comments as provided for under § 1601.12(i)(1). At the expiration of the 15-day period, the Commission may effect designation of each of the agencies by publishing them as amendment to § 1601.12(m).

The proposed "706 Agencies" are as follows:

[1] Howard County (Maryland) Human Rights Commission
Orlando (Florida) Human Relations Department
Prince George's County (Maryland) Human Relations Commission

[1] The Howard County (Maryland) Human Rights Commission qualifies for 706 designation for all charges except those against agencies of Howard County, in which case it shall be deemed a Notice Agency. Written filed with the Commission on or before July 5, 1977.

Signed at Washington, D.C., this 7th day of June 1977.

ELEANOR HOLMES NORTON,
Chair, Equal Employment Opportunity Commission.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 747-7]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

New Mexico

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: This action proposes approval of New Mexico Regulations 100, 705, and 706. The changes to Regulations 100 and 705 are considered minor revisions which serve to update the State Implementation Plan (SIP), and the new Regulation 706 designates Air Quality Maintenance Areas (AQMAs) in the State.

FOR FURTHER INFORMATION CONTACT:

Oscar Cabra, Jr., Air Program Branch, Environmental Protection Agency, Region VI, Dallas, Texas 75270 (214-749-3837).

SUPPLEMENTARY INFORMATION: On November 6, 1975, after adequate notice and public hearing, the Governor of New Mexico submitted revisions to Regulations 100 and 705, and a new Regulation 706. In the revision to Regulation 100, entitled "Definitions", definitions are added for new and existing petroleum processing facilities, petroleum refineries, natural gas processing plants, and gasification plants. "Schedules of Compliance", Regulation 705, was changed by replacing the date of adoption with the effective date as the key date for compliance. Regulation 706, entitled "Air Quality Maintenance Areas", is a new regulation which designates AQMAs for the State identical to the designations promulgated by EPA on June 2, 1975 (40 FR 23755).

NON-CRITERIA POLLUTANTS

A revision to Regulation 201 and new Regulations 623, 626, 628, 673, 674, 675, and 677 were also included with the Governor's submittal. All of these regulations pertain to non-criteria pollutants such as ammonia, hydrogen sulfide, and hydrogen chloride. EPA does not have authority to require or approve regulations designed to control pollutants other than those identified under Section 109 of the Clean Air Act. Therefore, no action is being taken on these regulations.

Interested persons may participate in this proposed rulemaking by submitting written comments to the Environmental Protection Agency, Region VI, 1201 Elm Street, Dallas, Texas 75270. Copies of the State's submittal are available for inspection at this address and at the Environmental Protection Agency, Public Information Reference Unit, Room 2922, EPA Library, 401 M Street, SW., Washington, D.C. 20460. All comments received on or before July 21, 1977.

This notice of proposed rulemaking is issued under the authority of Section 110(a) of the Clean Air Act, as amended, 42 U.S.C. 1857c-5(a).

Dated: May 25, 1977.

JOHN C. WHITE,
Regional Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40 of the Code of Federal Regulations as follows:

Subpart GG—New Mexico

1. In § 52.1620, paragraph (c) is amended by adding paragraph (9) as follows:

§ 51.1620 Identification of Plan.

* * * * * * *

(c) * * *

(9) Revisions to Regulation 100, Definitions, Regulation 705, Schedules of Compliance, and a new Regulation 706, Air Quality Maintenance Areas, were submitted by the Governor on November 6, 1975.

§ 52.1633 [Revoked]

2. Section 52.1633 is revoked.

[FR Doc.77-17472 Filed 6-17-77;8:45 am]

Financial Responsibility for Oil Pollution

Correction

In FR Doc. 77-16953 appearing at page 30584 in the issue for Wednesday, June 15, 1977 the deadline for the receipt of comments now given as "June 30, 1977" should have been "July 5, 1977".

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 43]

[Docket No. 21265; FCC 77-369]

UNIFORM SETTLEMENT RATES ON PARALLEL INTERNATIONAL COMMUNICATIONS ROUTES

Memorandum Opinion and Proposed Rule

AGENCY: Federal Communication Commission.

ACTION: Notice of rulemaking.

SUMMARY: A settlement rate is the total amount of money which corresponding foreign administrations and/or carriers divide among themselves for a specified measure of international communciations service. The Commission has long had a policy of requiring uniform settlement rates. However, thirty years have past since the wisdom of that policy has been examined. It may no longer serve the public interest. Accordingly, the proposed rulemaking looks toward authorizing departures from uniform settlement rate agreements on parallel routes when in the public interest.

DATES: Comments must be received on or before August 11, 1977, and reply comments on or before September 12, 1977.

ADDRESS: Send comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James S. Blaszak, Common Carrier Bureau, 632-6910.

SUPPLEMENTARY INFORMATION:

Adopted: May 26, 1977.

Released: June 13, 1977.

BACKGROUND

1. On January 2, 1976, TRT Telecommunications Corporation (TRT) filed tariff revisions which reduced its rates for telex calls from the United States to the United Kingdom from $2.55 per minute to $2.00 per minute. TRT stated that the rate reduction was made possible by a reduced settlement rate which it negotiated with the British Post Office (BPO). TRT and the BPO agreed to lower the settlement rate for telex traffic between the U.S. and the U.K. from $2.25 per minute to $1.70 per minute.

2. A settlement rate is the total amount of money which corresponding international communications administrations and/or carriers divide among themselves for a specified measure of international communications service. Settlement rates may and do vary from the tariff rates which carriers collect from their customers. For instance, the tariff rate, also known as the collection rate, for telex calls to the United Kingdom from the United States was $2.55 per minute prior to the TRT filing and the settlement rate was $2.25 per minute. Inasmuch as the settlement rate is divided evenly in this instance, the sending IRC and the BPO each retain $1.125 of the $2.25. The IRC, however, retained a total of $1.425 per minute for each eastbound call because of the $.30 disparity between the $2.55 collection rate and the $2.25 settlement rate. TRT and the BPO reportedly had agreed to an evenly divided (50%-50%) $1.70 settlement rate. Thus, the pay-outs between TRT and the BPO would have decreased from $1.125 (50% of $2.25) to $.85 (50% of $1.70). TRT accordingly proposed a reduced rate of $2.00 per minute for telex service to the United Kingdom. This rate would have enabled it to retain more than 50 percent of its collections because the $.30 disparity between the revised collection rate of $2.00 and the proposed settlement rate of $1.70 would have allowed TRT to keep $1.15 per minute. The $.275 per minute savings ($1.125 less $.85) resulting from the renegotiated settlement rate constituted one-half of TRT's proposed rate reduction.

3. ITT World Communications Inc. (ITT), RCA Global Communications, Inc. (RCA), and Western Union International, Inc. (WUI) requested rejection or suspension of TRT's telex rate reduction. They argued that TRT's renegotiated settlement rate with the BPO violated a long standing Commission policy which requiries IRCs to maintain uniform settlement agreements for the division of tolls with foreign administrations on parallel routes.

4. On January 30, 1976, the Chief, Common Carrier Bureau, acting pursuant to delegated authority, found that there is a Commission policy which requires uniform settlement agreements between IRCs and foreign correspondents on parallel routes. He noted that this policy was of long duration and existed because:

> The Commission realized that competing carriers on parallel routes may be at an undue competitive disadvantage when dealing with foreign correspondents.[1]

The disadvantage arises because:

> Foreign correspondents can utilize their monopoly status to play one carrier against the other carriers, and thus possibly gain significant concessions and benefits from the U.S. international carriers to the detriment of the American ratepayer.[2]

5. As a consequence of concluding that a Commission policy exists which requires uniform settlement rates on parallel routes, the Chief, Common Carrier Bureau ordered TRT not to implement the renegotiated settlement agreement with the BPO. However, he permitted TRT's telex rate reduction to go into effect. ITT, RCA, and WUI subsequently matched TRT's reduced rates for telex service to the United Kingdom. The Bureau Chief also noted that a considerable period of time had elapsed since the Commission last considered within a general proceeding the wisdom of its policy requiring uniformity with respect to settlement rate agreements. Accordingly, all interested persons were afforded the opportunity to submit briefs and reply briefs discussing the wisdom of and jurisdictional basis for the Commission's uniformity policy with respect to settlement rate agreements. Those briefs are now before us for consideration.

6. This proceeding raises two basic issues:

(a) Is it in the public interest for the Commission to adhere to a policy which requires uniform settlement agreements between U.S. international record carriers (IRCs) and foreign telecommunications administrations on routes served by more than one IRC (parallel routes)?

[1] *Memorandum Opinion and Order* (TRT Telecommunications Corporation) adopted by Chief, Common Carrier Bureau on January 30, 1976, para. 9.

[2] *Id.* Within the context of foreign telecommunications, this phenomenon is known as whipsawing.

(b) If the Commission concludes that a policy requiring uniform settlement agreements between U.S. international record carriers and foreign telecommunications administrations on parallel routes is in the public interest, does the Commission have jurisdictional authority to impose that policy on U.S. communications common carriers?

CONTENTIONS OF PARTIES

7. ITT, RCA, and WUI (hereinafter referred to as Proponents) argue that the Commission's policy of requiring uniform settlement rate agreements on parallel routes serves the public interest and that the Commission should affirm its commitment to the policy. They assert that without the policy foreign telecommunication administrations could use their monopoly status to play one IRC against the other IRCs and thus whipsaw the IRCs into accepting settlement agreements which would disserve United States ratepayers.

8. The Proponents point to TRT's negotiations with the BPO regarding telex settlement rates as an example of the dangers inherent in permitting an IRC to negotiate separately with foreign telecommunications administrations. TRT and the BPO purportedly gladly agreed to a lower telex settlement rate. Currently TRT only sends telex traffic to the United Kingdom; it does not receive telex traffic from the U.K. to the U.S. Consequently, a reduced settlement rate simply means that TRT's costs for providing telex service to the U.K. decrease as its pay-out to the BPO decreases. Since TRT receives no traffic from the U.K. it is not hurt by a decreased payout from the BPO. Any IRC seeking to penetrate a foreign market for the first time would be in the same position as TRT. Also, an IRC attempting to increase a small market share may be similarly motivated even though the IRC receives messages from the foreign administration because, while the foreign administration's pay-out per unit of traffic may decrease, the total payouts to the IRC may increase as a result of the IRC obtaining a larger share of the U.S. bound traffic. The increase in total payouts may more than compensate for the reduced payout per unit of traffic.

9. An industry wide reduction of telex setlement rates currently is in the BPO's best interest. To the extent that the BPO's U.S. bound telex traffic exceeds the Proponents' U.K. bound telex traffic, the BPO makes a pay-out to the Proponents. If the telex settlement rate is lowered, the BPO's pay-out to the Proponents decreases, and thus its retained revenues increase. If TRT had been allowed to implement the renegotiated settlement agreement, the BPO would have been in a position to whipsaw the remaining IRC's into also accepting lower telex settlement rates currently is in the BPO's If the telex settlement rate is lowered, settlement rates. Whipsawing was possible according to the Proponents because the BPO could have routed a significant share of the U.S. bound telex traffic to TRT. The Proponents suggest that the BPO had agreed to do just that in return for TRT agreeing to lower settlement rates. In order to avoid losing an even larger share of this market, the Proponents may have been compelled also to agree to a lower telex settlement rate.

10. Conversely, lower telex settlement rates are not to the advantage of the Proponents because they currently receive more telex traffic from the U.K. than they send to the U.K. Under present circumstances, lowering the telex settlement rate results in a corresponding loss in the Proponents' retained revenues. The Proponents maintain that such a reduction in their retained revenues may deprive United States telex users of rate reductions or may cause rate increases, and thus is not in the United States public interest. They conclude that the Commission's policy of requiring uniform settlement agreements on parallel routes prevents such alleged undesireable results.

11. ITT and WUI urge the Commission to retain the uniformity policy and not to modify it in any way. RCA, however, recommends that the Commission rearticulate the policy to provide that a United States carrier may not change the settlement rate on a parallel route if the change affects the revenue retentions of other United States carriers providing a similar service on the same route, and thus affects the rates for that service, without first securing Commission approval of the settlement rate change.

12. The Proponents and TRT do not disagree that the Commission clearly has jurisdiction to impose the uniformity policy on United States communications common carriers.

13. Although TRT does not question the Commission's jurisdiction to impose the uniformity policy on United States carriers, it argues that, to the extent settlement rates comprise part of the cost of providing international communications services and thus affect the collection rates, rigid application of the uniformity policy impedes competitive rate reductions. Moreover, it asserts that the Bureau Chief's order prohibiting TRT from implementing the renegotiated settlement rate with the BPO effectively imposes a $137,500 penalty on TRT in 1976 because TRT anticipated reducing its costs for telex service to the United Kingdom by that amount in 1976. As previously noted, TRT maintains that its reduced tariff rate for telex service to the U.K. was directly related to the lower settlement rate. Since telex service to the U.K. is competitively offered by the IRCs, the Proponents matched TRT's lower tariff rate. The combined rate reductions reportedly will produce savings for United States telex users of between $5,000,000 to $7,000,000 in 1976. TRT believes that similar rate reductions are not likely in the future because a rigid application of the uniformity policy prevents individual IRCs from reducing their costs by agreeing to lower settlement rates; and thus, in TRT's opinion, the policy disserves the public interest.

14. Additionally, TRT contends that a uniformity policy which stiffles competitive rate reductions is inconsistent with the antitrust component of the public interest, as well as the Commission's responsibility to make communications services available at reasonable charges.[3] TRT notes that the courts have recognized an antitrust component in the statutory standard of public convenience, interest, and necessity. *NARUC* v. *F.C.C.*, 525 F.2d 630 (D.C. Cir. 1976). The courts, according to TRT, consistently have directed administrative agencies to consider positively the benefits that competition can bring to regulated industries.[4] A rigid application of the uniformity policy supposedly forecloses such consideration.

15. TRT also maintains that prior Commission orders do not articulate a rigid policy of uniformity with respect to settlement rates. Instead, TRT reads previous Commission decisions as reflecting a flexible- case-by-case approach to settlement rate agreement negotiations. Pursuant to TRT's interpretation of Commission precedent, the Commission should be concerned with settlement rate agreements only in cases involving serious prejudice or serious detriment to individual carriers or to the industry as a whole.

16. TRT concedes that whipsawing can occur, and that the Commission should maintain careful scrutiny of settlement rate agreements, but argues that the Commission should not adopt a rigid policy of requiring uniform settlement rate agreements on parallel routes. TRT believes that the Commission should articulate a policy which will permit nonuniform settlement rate agreements on parallel routes when: (a) The renegotiated agreement results in a reduction of the collection rate which is at least equal to the reduction in the settlement rate, and (b) the renegotiated agreement does not result in the foreign correspondent receiving more than 50 percent of the tolls. In TRT's opinion, such a policy will permit competitive rate initiatives by the IRCs; protect the U.S. users from the adverse affects of possible whipsawing; and thus serve the public interest.

[3] Section 1 of the Communications Act of 1934, as amended, 47 U.S.C. 151, charges the Commission with making,

[a]vailable, so far as possible, to all the people of the United States a rapid, efficient, Nationwide and worldwide wire and radio communications service with adequate facilities at reasonable charges * * *.

[4] TRT cites the following cases to support the foregoing proposition: *Bowman Transportation, Inc.* v. *Arkansas-Best Freight System*, 419 U.S. 281, 298 (1974); *Gulf States Utilities Co.* v. *FPC*, 411 U.S. 747 (1973); *FMC* v. *Aktiebolaget Svenska Amerika Linien*, 390 U.S. 239 (1968); *Silver* v. *New York Stock Exchange*, 358 U.S. 344 (1959); *Chesapeake O.R. Co.* v. *United States*, 283 U.S. 35 (1931).

DISCUSSION

17. This Commission has long had a policy of preventing whipsawing of U.S. carriers by foreign telecommunications administrations, because of its possible adverse effects upon U.S. rate-payers. The Bureau Chief's decision with respect to TRT's attempt to implement a renegotiated settlement agreement with the BPO properly relied upon those cases in which the Commission prohibited U.S. carriers from effectuating settlement agreements which carried the potential for harmful whipsawing. And, we note that in *TRT Telecommunications Corp.*, 46 FCC 2d 1042 (1974), in authorizing TRT to provide direct message telegram service to the U.K., we imposed on the authorization a condition precedent requiring TRT to submit to the Commission "an operating agreement with the BPO which is consistent with similar agreements in effect between the BPO and other carriers." 46 FCC 2d 1042, 1056 (1974). Thus, essentially uniform settlement agreements on parallel routes have been utilized to maintain a proper United States posture for dealing with monopoly (usually governmental) telecommunications entities in other nations. TRT has failed to point to any instance where the Commission chose not to apply the uniformity policy.

18. The possibility of whipsawing which is harmful to U.S. ratepayers is as real today as it was when the Commission first articulated its concern. Competition has increased on international routes, and the number of routes on which whipsawing is possible also has increased. Moreover, we have no reason to believe that the basic interests of foreign telecommunications administrations have changed since we made the following observation in *Mackay Radio and Telegraph Company, Inc.*, 2 FCC 592 (1936), aff'd *Mackay Radio and Telegraph Co.* v. *FCC*, 97 F. 2d 641 (1938):

Inasmuch as the telegraph administration controls every word of outgoing radiotelegraph traffic, the competing American radio companies would be dependent upon it for their traffic . . . . Each would be interested in increasing its share of the total traffic. To expect the telegraph administration to play the competing companies against each other is simply to expect that the administration will be headed by good business men, loyal to their national interests. To rely upon companies which are bitter competitors not to make concessions to the administration which controls all outgoing radiotelegraph traffic is to provide an exceedingly tenuous basis upon which to rest public interest.

19. Therefore, we see no reason to depart from the basic policy of protecting the American ratepayer by restricting the contractual freedom of U.S. international carriers to the extent necessary. A settlement by a U.S. carrier for any particular division of international communications tolls may be of no concern so long as no more is involved. The same may be true of a consequent acceptance by other carriers on the same route of a like division of tolls. Nevertheless, as we have often recognized, manipulation of the settlement rate by a carrier in an effort to secure for itself a larger share of the traffic, particularly if followed by similar agreements by its competitors trying to maintain their positions, may substantially disserve the interests of United States ratepayers where the settlement rate is too low to fully compensate the U.S. carriers for the costs incurred in handling the traffic. Resulting higher tariff rates for U.S. ratepayers, attempted cross-subsidizations by the U.S. carriers, or a gradual financial weakening of the U.S. carriers, would clearly be consequences of substantial concern.

20. In this situation, uniform settlement rate agreements may also be fully consistent with the antitrust component of the public interest, convenience, and necessity standard which guides the Commission. Of course, this agency is obligated to consider the fundamental national economic policy which is expressed in the antitrust laws in its regulation of interstate and foreign communication by wire and radio.[5] Indeed, the Commission has recognized the importance of competition in the setting of rates,[6] and in the provision of specialized private line services[7] and terminal equipment.[8] However, we may not automatically assume that competition in all circumstances necessarily promotes the public interest.[9] The test is essentially a pragmatic one of public benefit in terms of efficient service at low rates.

21. In addition to the considerations set forth above concerning the possible harmful effects of non-uniform settlement agreements, and in light of the basic public interest entrusted to our care, we must, however, recognize that not all non-uniform settlements are necessarily disadvantageous to the ratepayer. We agree with TRT that a rigid application of a uniformity policy may not always be in the public interest. Capital costs, operating costs, and settlement rates affect the tariff rate for international services. Thus, renegotiation of a settlement rate may result in a lower tariff rate, and although some IRCs may experience a diversion or loss of revenues as a result of a lower settlement rate, the savings to the public may well outweigh this possible diversion or loss. For example, without rehearing the particular TRT settlement agreement which led to this proceeding we note TRT's claim that although the lower telex settlement rate might have caused about a $1,000,000 diversion of revenues to the BPO, the U.S. ratepayer would save between $5,000,000 to $7,000,000 because of the concomitant lowering of the tariff rate. Competitively motivated rate reductions may well be in the public interest.

22. Our objective is to promote that freedom in arriving at international settlements which may facilitate international service rate reductions related to lower settlement rates, while also protecting the American ratepayer from the potentially harmful consequences of whipsawing. We propose, to that end, to consider on a case-by-case basis objections which may be made to proposed individual departures from uniform settlement agreements on parallel routes. We propose to amend our rules to require for the submission of objections to such proposed agreements. [Moreover, we propose to amend our rules to provide that, where a prima facie case is presented that the U.S. ratepayer will realize savings accompanying any proposed settlement rate reduction, due to the concomitant lowering to the tariff rate, those opposing such settlement rate reductions must carry the burden of proving that such reductions are not in the public interest.] We request comment on the most effective and expeditious method of determining whether a proposed nonuniform settlement agreement will have adverse public consequences which outweigh ostensible public benefits, and on such questions as whether we should require particular information to accompany the submissions and objections, whether any material should be accepted on a confidential basis, and what time limits should be prescribed.

23. The proposed amendments to the rules are issued pursuant to the authority contained in Sections 4(i), 201 (a) and (b), 205(a), and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), and 201 (a) and (b), 205 (a), and 303(r).

24. Pursuant to applicable procedures set forth in Section 1.415 of the Commission's Rules, 47 CFR 1.415, interested persons may file comments on or before August 11, 1977, and reply comments on or before September 12, 1977. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may also take account of other relevant information before it, in addition to the specific comments invited by this Notice.

25. In accordance with § 1.419 of the rules, 47 CFR 1.419, an original and 5 copies of all pleadings shall be furnished to the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

ACTION

FOSTER GRANDPARENT AND SENIOR COMPANION PROGRAMS

Income Eligibility Level

This notice revises the schedule of income eligibility levels for individuals and families for the Foster Grandparent Program and the Senior Companion Program published in the FEDERAL REGISTER of January 24, 1977 (42 FR 4159). The revised schedule is based on poverty figures effective May 25, 1977, obtained from the Community Services Administration Income Poverty Guidelines. The amounts include state supplements to the Federal Supplemental Security Income (SSI) Program, effective August 9, 1976.

These ACTION programs are authorized pursuant to Section 211 of the Domestic Volunteer Service Act of 1973, Pub. L. 93–113, 87 Stat. 402. Pursuant to Section 421(4) of Pub. L. 93–113, 87 Stat. 414, the income eligibility levels are determined by the currently applicable guideline published by the Community Services Administration (CSA) pursuant to Section 625 of the Economic Opportunity Act of 1974, as amended (42 U.S.C. 2971(a)), and increased by the amounts individual states supplement the Federal Supplement Security Income (SSI) Program, permitting ACTION, in accordance with Sec. 421(4)) of Pub. L. 93–113, to take into consideration existing poverty guidelines as appropriate to local situations. Section 625 permits the CSA poverty guideline to be adjusted for cost-of-living changes.

The income eligibility levels will be reviewed at least once a year, and similar schedules will be prepared to reflect any changes required as a result of that review.

Pursuant to Section 420 of Pub. L. 93–113, this policy will become effective on June 20, 1977.

Action schedule of income eligibility levels for foster grandparents or senior companions

State	Individuals	Family of 2	Family of 3

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

GRAIN STANDARDS

Tennessee Grain Inspection Point

Statement of considerations. The Chattanooga Grain Inspection Department, Chattanooga, Tennessee, has requested that its designation under section 7(f) of the U.S. Grain Standards Act as amended (7 U.S.C. 79(f)) to operate as an official agency at Chattanooga, Tennessee, be canceled. Accordingly, the Federal Grain Inspection Service proposes to cancel the designation of the Chattanooga Grain Inspection Department to operate as an official agency at Chattanooga.

Mr. Richard G. Lyons has applied for designation pursuant to section 7(f)(1)(A) of the amended Act (7 U.S.C. 79(f)(1)(A)), and section 26.96 of the regulations (7 CFR 26.96) to operate the official agency at Chattanooga, Tennessee. This application does not preclude other interested persons from making similar application.

As a point of clarification, it should be noted that the United States Grain Standards Act (7 U.S.C. 71 et seq.), hereinafter referred to as the "Act," has been amended by Pub. L. 94–582, effective November 20, 1976, to extensively modify the official inspection system. The amended Act provides that the Administrator of the newly-created Federal Grain Inspection Service (FGIS), after conducting investigations and other studies, will designate official agencies at the various interior points. In implementing these provisions, FGIS is currently in the process of reviewing the designations of all agencies or persons presently designated to provide official inspection services. The amended Act further provides that existing agencies may continue to operate without a designation under the new law until the Administrator either grants or denies such designation to them or sets a period of time for their termination, not to exceed two years from the effective date of the amended Act, provided such agencies pay any required fees to FGIS.

Accordingly, this new designation would, if approved by the U.S. Department of Agriculture, be on an interim basis and continue until the Administrator of FGIS either grants or denies an official designation under the amended Act to the applicant or sets a period of time for its termination.

Other interested persons are hereby given opportunity to make application for designation to operate as an official agency at Chattanooga, Tennessee, pursuant to the requirements set forth in section 7(f)(1)(A) of the amended Act (7 U.S.C. 79(f)(1)(A)), and section 26.96 of the regulations (7 CFR 26.96).

NOTE.—Section 7(f) of the Act (7 U.S.C. 79(f)) generally provides that not more than one official agency shall be operative at one time for any geographic area as determined by the Administrator.

Any interested persons who wish to submit views and comments are requested to include the name of the person or agency which they recommend to be designated to operate as an official agency at Chattanooga, Tennessee.

All such views and comments should be submitted in writing to the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250. All materials submitted should be in duplicate and mailed to the Hearing Clerk not later than July 20, 1977. All materials submitted pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)). Consideration will be given to the views and comments so filed with the Hearing Clerk and to all other information available to the U.S. Department of Agriculture before final determination is made with respect to this matter.

Done in Washington, D.C., on June 14, 1977.

WILLIAM T. MANLEY,
Interim Administrator.

NATIONAL SCIENCE FOUNDATION

SUBPANEL FOR SCIENCE FOR CITIZENS PROGRAM

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting:

NAME: Subpanel for Science for Citizens Program of the Advisory Panel on Science Education Projects.

DATE: July 8 and 9, 1977.

PLACE: Rooms 628 and 611, 1800 G Street NW., Washington, D.C. 20550.

CONTACT PERSON: Ms. Rachelle Hollander, Acting Program Manager, Science for Citizens Program, Office of Science and Society, Room W–664, National Science Foundation, Washington, D.C. 20550, Telephone 202–282–7770.

TYPE OF MEETING: Closed.

PURPOSE OF SUBPANEL: To provide advice and recommendations concerning support for research in the Science for Citizens Program.

AGENDA: Review and evaluate research proposals as part of the selection process for awards.

REASON FOR CLOSING: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

AUTHORITY TO CLOSE MEETING: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

CIVIL AERONAUTICS BOARD

[Order 77–6–24,[1] Dockets 30635, 28966]

COCHISE AIRLINES, INC.

Certificate of Public Convenience and Necessity; Correction

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 7th day of June, 1977.

Ordering paragraph 1(e.) on page 7 of Order 77–6–24, June 7, 1977, inadvertently omitted the cities of Kingman, Prescott and Winslow, and should read:

e. Do the public convenience and necessity require the deletion or suspension, with or without conditions, of the authority of Hughes Air Corp. d/b/a Hughes Airwest and/or Frontier Airlines, Inc., at Yuma, Grand Canyon, Flagstaff, Page, Kingman, Prescott, Winslow, Arizona, Blythe and El centro, California?

By the Civil Aeronautics Board:

Dated: June 13, 1977.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77–17543 Filed 6–17–77; 8:45 am]

[Order 77–6–55, Docket 27573, Agreement C.A.B. 26653 R–1 through R–3]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Specific Commodity Rates

Issued under delegated authority June 10, 1977.

[1] Published at 42FR(30225) 6–13–77.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the Resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA), and adopted pursuant to the provisions of Resolution 590 dealing with specific commodity rates.

The agreement names two additional specific commodity rates under existing commodity descriptions and adds one new rate with a new specific commodity description as set forth below, reflecting reductions from general cargo rates; and was adopted pursuant to unprotested notice to the carriers and promulgated in IATA letters.

Agreement CAB	Specific commodity item No.	Description and rate[1]
26653:		
R–1	9512	Handicraft, excluding wearing apparel, diamonds and precious stones, 289 c per kg,[3] minimum weight 500 kg., Johannesburg to New York.
R–2	2195	Yarn, thread and/or fibres, 262c per kg, minimum weight 200 kg. Bankok to New York.
R–3	6907	Plastic Foils and/or sheets[2] 106c kg,[4] minimum weight 1,000 kg, Auckland to Los Angeles.

[1] Subject to applicable currency conversion factors as shown in tariffs.
[2] Expires Dec. 31, 1977.
[3] New description.
[4] Expires June 30, 1978.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the subject agreement is adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions hereinafter ordered.

Accordingly, *It is ordered*, that: Agreement C.A.B. 26653 be and hereby is approved, provided that (a) approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board unless within such a period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-17544 Filed 6-17-77;8:45 a.m.]

[Docket 77-6-57, Docket 29123, Agreement C.A.B. 26649, R-1 through R-29]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Passenger Fares

Issued under delegated authority June 10, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of Traffic Conference 2 of the International Air Transport Association (IATA). The agreement was adopted at the Reconvened Meeting of Traffic Conference 2 held in Geneva during January 1977 and has been assigned the above C.A.B. agreement number.

Proposing a new fare structure to apply in the Europe-Africa market through March 1978, the submission is a limited agreement as set forth in the Provisions for the Regulation and Conduct of IATA Traffic Conferences and therefore is not binding upon certain conference members until they so declare. Inasmuch as Trans World Airlines, Inc. has declared itself bound by the agreement, it has been submitted for Board action. We will approve those resolutions which involve fares that are combinable with fares to/from the United States and thus have indirect application in air transportation as defined by the Act. Jurisdiction will be disclaimed on those resolutions involving fares not similarly combinable.

Pursuant to authority duly delegated by the Board in the Board's Regulations 14 CFR 385.14:

1. It is not found that the following resolutions, which are incorporated in Agreement C.A.B. 26649 as indicated and which have indirect application in air transportation as defined by the Act, are adverse to the public interest or in violation of the Act:

Agreement CAB	IATA No.	Title	Application
26649:			
R-1	LA3	TC2 Limited Agreement Europe-Africa (New)	2
R-2	001b	TC2 Special Effectiveness Resolution (Tie-in)	2
R-3	001mm	Special Escape for TC2 Supersonic Fares (New)	2
R-4	001w	Special Escape for TC2 Agreements	2
R-5	001ww	Special Emergency Escape for Europe/Middle East-Africa Agreement	2
R-6	002	Special Adoption Resolution	2
R-7	052	TC2 First Class Fares	2
R-8	052a	TC2 Supersonic Fares (Adopting and Amending)	2
R-9	062	TC2 Economy Class Fares	2

2. It is not found that the following resolutions, incorporated in Agreement C.A.B. 26649 as indicated, affect air transportation as defined by the Act:

Agreement CAB	IATA No.	Title	Application
26649:			
R-10	070L	TC2 75 Day Excursion Fares between Europe/Middle East and Africa, (Adopting and Amending).	2
R-11	070LL	TC2 30, 45 and 75 Day Excursion Fares between Europe/Middle East and Africa, (Adopting and Amending).	2
R-12	071g	TC2 30 Day Excursion Fares, Madrid-Malabo/Bata, (Adopting and Amending).	2
R-13	071h	TC2 75 Day Excursion Fares East Africa/Mauritus and Seychelles to Europe, (Adopting and Amending).	2
R-14	071s	TC2 25 and 35 Day Excursion Fares West and West Central Africa-Europe, (Adopting and Amending).	2
R-15	071v	South Africa-United Kingdom/Ireland Advance Purchase Excursion Fares, (Adopting and Amending).	2
R-16	072b	TC2 Creative Fares Except Europe, (Adopting and Amending)	2
R-17	075j	TC2 120 Day Group Excursion Fares, Mauritius-London, (Adopting and Amending).	2
R-18	075kk	TC2 120 Day Group Excursion Fares, Seychelles to London, (New)	2
R-19	076t	Affinity Group Fares—Johannesburg-Europe, (Adopting and Amending)	2
R-20	076ww	Incentive Group Fares from Europe to Africa, (Adopting and Amending)	2
R-21	080	TC2 45 Day Individual Inclusive Tour Fares—Europe/Middle East to Africa, (Adopting and Amending).	2
R-22	080dd	Delayed Effectiveness Inclusive Tours from Federal Republic of Germany and West Berlin to Points in Africa (New).	2
R-23	081rr	TC2 7/14 Day Group Inclusive Tour Fares—Southern Africa to Greece (New).	2
R-24	081s	TC2 One Month Group Inclusive Tour Fares—Southern and Central Africa to Europe/Middle East (Adopting and Amending).	2
R-25	081ww	TC2 One Month Group Inclusive Tour Fares—Southern Africa to Europe (Adopting and Amending).	2
R-26	084ss	TC2 One Month Group Inclusive Tour Fares—Europe/Middle East to Africa, (Adopting and Amending).	2
R-27	084ss	TC2 One Month Group Inclusive Tour Fares—Europe/Middle East to Africa (Amending).	2
R-28	084tt	One Month Group Inclusive Tour Fares—Europe to Eastern Africa, Somalia and Djibouti (Adopting and Amending).	2
R-29	084tt	One Month Group Inclusive Tour Fares—Europe to Eastern Africa, Somalia and Djibouti and from London to Seychelles (Amending).	2

Accordingly, it is ordered that:

1. Those portions of Agreement C.A.B. 26649 set forth in finding paragraph one above be and hereby are approved; and

2. Jurisdiction is disclaimed with respect to those portions of Agreement C.A.B. 26649 set forth in finding paragraph two above.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50 may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-17545 Filed 6-17-77;8:45 am]

[Order 77-6-59, Docket 27573; Agreement C.A.B. 26657, R-1 and R-2]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Specific Commodity Rates

Issued under delegated authority June 10, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA). The agreement was adopted at the Composite Cargo Traffic Conference held in Vancouver on May 26, 1977 and has been assigned the above C.A.B. agreement number.

The agreement names two additional specific commodity rates under existing commodity descriptions as set forth below, reflecting reductions from general cargo rates.

Agreement CAB	Specific commodity item No.	Description and rate [1]
26657:		
R-1	2199	Yarn, thread, fibres, textiles, textile manufactures, wearing apparel 85 c/kg,[2] minimum weight 100 kg, Rarotonga to Honolulu
R-2	9512	Handicraft, excluding wearing apparel diamonds and precious stones, 85c/kg,[2] minimum weight 100 kg, Rarotonga to Honolulu.

[1] Subject to applicable currency conversion factors as shown in tariffs.
[2] Expires Sept. 30, 1977.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the subject agreement is adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions hereinafter ordered.

Accordingly, *It is ordered*, That:

Agreement C.A.B. 26657, R-1 and R-2, be and hereby is approved, provided that (a) approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board unless within such a period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

ENVIRONMENTAL PROTECTION AGENCY

[PF123; FRL 748-2]

FOOD ADDITIVE PETITION

Filing

Elanco Products Co., a division of Eli Lilly and Co., P.O. Box 1750, Indianapolis, IN 46206, has submitted a petition (FAP 7H5165) to the Environmental Protection Agency (EPA) which proposes to amend 21 CFR 561 by establishing a food additive regulation permitting the use of the fungicide tricyclazole [5-methyl-1,2,4-triazole (3,4-*b*)-benzothiazole in a proposed experimental program involving application of the fungicide to growing rice with a tolerance limitation of 7 parts per million in rice hulls, bran, polishings, and straw for residues of the fungicide tricyclazole and its metabolite 1,2,4-triazole (3,4-*b*)-benzothioazole-5-methanol.

Notice of this submission is given pursuant to the provisions of Section 409(b)(5) of the Federal Food, Drug, and Cosmetic Act. Interested persons are invited to submit written comments on the petition referred to in this notice to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. The comments should be submitted as soon as possible and should bear a notation indicating the petition number "FAP 7H5165." Comments may be made at any time while a petition is pending before the Agency. All written comments will be available for public inspection in the office of the Federal Register Section for 8:30 a.m. to 4 p.m., Monday through Friday.

Dated: June 9, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

STATE OF ARIZONA

Submission of Plan for Certification of Pesticide Applicators

In accordance with the provisions of Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136 et seq.) and 40 CFR Part 171 (39 FR 36446 (October 9, 1974) and 40 FR 11698 (March 2, 1975)), the Honorable Raul H. Castro, Governor of the State of Arizona, has submitted a State Plan for the Certification of Commercial and Private Applicators of Restricted Use Pesticides to the Environmental Protection Agency (EPA) for approval on a contingency basis. Contingency approval is being proposed pending promulgation of regulations implementing existing legislation. An amendatory letter to the Arizona State Plan was submitted on January 21, 1977, to clarify some additional points on the proposed regulations and the State plan. Copies of the amendatory letter, legislation, and proposed regulations are attached to the plan.

Notice is hereby given of the intention of the Regional Administrator, EPA, Region IX, to approve the plan on a contingency basis.

A summary of the plan follows. The entire plan, together with all attached appendices (except sample examinations) may be examined during normal business hours at the following locations:

Board of Pesticide Control, 2538 E. University Drive, Suite 135, Phoenix, AZ 95034 (602)-275-3578).
Room 360, 100 California Street, San Francisco, CA 94111 (Pesticides Branch, Air and Hazardous Materials Division, EPA, Region IX (415)-556-3352).
Room 401, East Tower, Waterside Mall, 401 M Street SW., Washington, D.C. 20460 (Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA (202)-755-4854).

SUMMARY OF ARIZONA STATE PLAN

The Board of Pesticide Control has been designated as the State lead agency for the administration, coordination, and enforcement of the pesticide applicator certification program.

The cooperating agencies in the certification program include the Structural Pest Control Board and the University of Arizona-Tucson, Cooperative Extension Service, Council for Environmental Studies. The Board of Pesticide Control and the Structural Pest Control Board will assist the Cooperative Extension Service in the development of a training program for Arizona applicators and will coordinate the subject matter to be presented to ensure that training and competency examinations are properly oriented.

The Structural Pest Control Board is responsible for certifying structural pest control applicators. The certificates are issued by the Structural Pest Control Board to qualified operators who successfully pass the Board's written examination.

Legal authority for the program is contained in the following statutes and regulations: Arizona Revised Statutes, Article 6.1, Sections 3-391 through 3-399; Article 4, Sections 32-2331 through 32-2339; and Arizona Compilation of Rules and Regulations, proposed regulations R3-10-50, R3-10-82, R4-29-26.

The Plan indicates that the State lead agency and the cooperating agencies expect to have sufficient qualified personnel

and funds necessary to carry out the programs.

Arizona estimates that 2,800 commercial and 1,000 private applicators will need to be certified. The certificates to be issued to the applicators will include the type of certification and certification numbers.

The Board of Pesticide Control will submit an annual report to EPA by April 1 of each year and other reports as required by the Administrator.

The commercial applicator categories and standards of competence proposed are those which are described in 40 CFR 171.3. No new categories were added, and categories 9 and 10 were deleted.

The State of Arizona plans to certify commercial applicators by means of written examinations which will cover both the Federal general standards or "core" material and the specific standards as described in 40 CFR 171.4 and 171.6. Commercial applicators will be recertified every odd calendar year by written examinations.

Private applicators will be certified by a written examination, oral examination, or completion of a training course approved by EPA and the Board of Pesticide Control which includes an examination. The examinations will cover the standards of competency as specified in 40 CFR 171.5 and 171.6.

Oral examinations will be used for private applicators who are unable to read the label. Certification of such private applicators will be related and limited to the use and handling of each individual pesticide for which such person desires certification at the time; and the applicator will be authorized to use only the pesticides for which he had demonstrated competence. The oral examination will be designed to assure that such person has knowledge of the following:

(a) Understanding of the label and labeling information, and

(b) Sources of advice and guidance necessary for the safe and proper use of each pesticide related to his certification.

The State indicates that a determination on the subjects of reciprocity, the Government Agency Plan, and certification on Indian lands will be made at a later date and they will notify the Regional Administrator, Region IX at that time. A final decision on continued demonstration of competency after initial certification for private and commercial applicators will be made at a later date once the program becomes operational. The state indicates that training will be available to individuals who need it.

Other regulatory activities listed in the Arizona State Plan which will supplement the certification program are the licensing of custom applicators and structural pest control applicators, special grower and seller permits, equipment licenses, pest control advisor licenses, and regulation of pesticide use, storage, and application.

Maintenance of the State plan including monitoring and spot checking of certified applicators and pesticide use will be done by the Board of Pesticide Control and the Structural Pest Control Board. They will investigate suspected violations, and perform other regulatory functions as necessary to carry out the State's certification program.

PUBLIC COMMENTS

Interested persons are invited to submit written comments on the proposed State Plan for the State of Arizona to the Chief, Pesticides Branch, Air and Hazardous Materials Division, Region IX, Environmental Protection Agency, Room 360, 100 California Street, San Francisco, California 94111. The comments must be received within thirty days after publication of this notice and should bear the identifying notation (OPP-42045). All written comments filed pursuant to this notice will be available for public inspection at the above-mentioned locations from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: June 2, 1977.

SHEILA M. PRINDIVILLA,
Acting Regional Administrator,
Region IX.

PESTICIDE PETITIONS

Withdrawal

On January 31, 1975, the Environmental Protection Agency (EPA) gave notice (40 FR 4676) that Diamond Shamrock Chemical Co., 1100 Superior Ave., Cleveland, OH 44114, had filed a petition (PP5F1572). This petition proposed the establishment of tolerances (40 CFR 180) for the combined residues of the herbicide cisanilide (*cis*-2,5-dimethyl-*N*-phenyl-1-*pyrrolidinecarboxamide*) and its phenyl urea containing metabolites (calculated as cisanilide) in or on the raw agricultural commodities field corn fodder and forage at 1 part per million (ppm), field corn grain at 0.1 ppm (negligible residue), and in eggs, milk, and the meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep at 0.05 ppm (negligible residue).

Diamond Shamrock Chemical Co. has withdrawn this petition without prejudice in accordance with the regulations (40 CFR 180.8 pertaining to Section 408 of the Federal Food, Drug and Cosmetic Act 346a(d)).

Dated: June 9, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21049, (RM-2749)]

COMMERCIAL TELEVISION NETWORK PRACTICES

Order Extending Time for Comments and Reply Comments on "Petition for Declaratory Ruling"

Adopted: June 13, 1977.

Released: June 15, 1977.

1. The Commission has before it a "Petition for Declaratory Ruling", filed June 1, 1977, by the Motion Picture Association of America, Inc. and seven major producers of television programming (filing jointly). The Petition seeks Commission interpretation of § 73.658 (j)(1)(ii) of the Commission's Rules so as to prohibit certain alleged network practices in the acquisition of television programming.

2. On June 2, 1977, the Commission announced in a press release (Report No. 13019) that the deadline for comments on the "Petition" would be June 13 and for replies, June 20, 1977.

3. The American Broadcasting Companies, Inc. (ABC) asked the Commission on June 10 to set the same deadline for comments on the "Petition" as for the reply comments in the overall proceeding, noting that the two matters are closely related and urging the Commission to avoid bifurcation of the inquiry. In the alternative, ABC requested a four-day extension until June 17, 1977. The National Broadcasting Company, Inc. (NBC) also filed a request on June 10, 1977, seeking an extension until June 20 for comments and July 1 for replies. The Petitioner has agreed to the extension requested by NBC. An extension as requested in the first instance by ABC would be excessive, but a shorter extension will not introduce substantial delay in the expeditious conduct of the overall inquiry.

4. In view of the foregoing, *It is ordered*, That the deadline for comments on the above-referenced "Petition for Declaratory Ruling" IS EXTENDED, to and including June 20, 1977, and July 1 for reply comments.

This action is taken pursuant to authority contained in § 4(i), 5(d)(1) and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's Rules.

WALLACE E. JOHSON,
Chief, Broadcast Bureau.

[FR Doc.77-17524 Filed 6-17-77;8:45 am]

LEWELL BROADCASTING, INC.

[FCC 77-372, Docket No. 21267,
File No. BRH-1362]

Order and Notice of Apparent Liability

Adopted: May 26, 1977.

Released: June 15, 1977.

1. The Commission has before it for consideration the captioned application and its inquiries into the operation by Lewel Broadcasting Inc., of Station WDRK(FM), Greenville, Ohio.

2. Information before the Commission raises serious questions concerning whether the captioned applicant possesses the qualifications to be or to remain a licensee of the captioned station. In view of these questions, the Commission is unable to find that a grant of the renewal application would serve the public interest, convenience and necessity, and must, therefore, designate the application for hearing. A competing application of Korvin Broadcasting, Inc., (BPH-10244) has been accepted for filing by the Commission. Once processing has been completed, it will be consolidated into the present proceeding.

3. Accordingly, *It is ordered*, That the captioned application is designated for hearing pursuant to Section 309(e) of the Communications Act of 1934, as amended, at a time and place specified in a subsequent Order, upon the following issues:

(a) To determine whether the applicant has failed to satisfy operator requirements in the operation of Station WDRK(FM), in violation of Section 73.265(a) of the Rules;

(b) To determine whether the licensee has failed to maintain adequate program and/or operating logs for Station WDRK(FM) in violation of Sections 73.281(a) and 73.282(a)(2) of the Rules;

(c) To determine whether the employees of Radio Station WDRK(FM) were instructed by management or principals of the licensee to falsify and/or to fabricate entries in the station's program and/or operating logs;

(d) To determine whether, and if so the extent to which, entries in the WDRK(FM) program and/or operating logs were falsified and/or fabricated;

(e) To determine whether, in light of the evidence adduced under issues (a) through (d) above, the licensee made misrepresentations to the Commission or was lacking in candor regarding preparation and/or maintenance of adequate program and operating logs and/or compliance with the operator requirements of Section 73.265(a) of the Rules;

(f) To determine whether, in light of the information adduced under the preceding issues, the licensee possesses the requisite qualifications to be or to remain a licensee of the Commission, and whether a grant of the captioned application would serve the public interest, convenience and necessity.

4. *It is further ordered*, That the Chief, Broadcast Bureau, is directed to serve upon the captioned applicant within thirty (30) days of the release of this Order, a Bill of Particulars with respect to Issues (a), (b), (c) and (d).

5. *It is further ordered*, That, if it is determined that the hearing record does not warrant an order denying the captioned application for renewal of license for Station WDRK(FM) it shall also be determined whether the applicant has willfully or repeatedly violated Sections 73.265(a), 73.281(a) and 73.282(a)(2) of the Commission's Rules.[1] If so, it shall also be determined whether an Order of Forfeiture pursuant to Section 503(b) of the Communications Act of 1934, as amended, in the amount of $10,000 or some lesser amount, should be issued for violations which occurred within one year preceding the issuance of the Bill of Particulars in this matter.

6. *It is further ordered*, That, this document constitutes a Notice of Apparent Liability for forfeiture for violation of Sections 73.265(a), 73.281(a) and 73.282(a)(2) of the Commission's Rules. The Commission has determined that, in every case designated for hearing involving revocation or denial of renewal of license for alleged violations which also come within the purview of Section 503(b) of the Act, it shall, as a matter of course, include this forefeiture notice so as to maintain the fullest possible flexibility of action. Since the procedure is thus a routine or standard one, we stress that inclusion of this Notice is not to be taken as in any way indicating what the initial or final disposition of the case should be; the judgment is, of course, to be made on the facts of each case.

7. *It is further ordered*, That the Broadcast Bureau proceed with the initial presentation of the evidence with respect to Issues (a) through (f) and the applicant then proceed with its evidence and have the burden of establishing that it possesses the requisite qualifications to be a licensee of the Commission and that a grant of its application would serve the public interest, convenience and necessity.

8. *It is further ordered*, That to avail itself of the opportunity to be heard, the applicant herein, pursuant to Section 1.221 of the Commission's Rules, in person or by attorney, shall file with the Commission, within twenty (20) days of the mailing of this Order, a written appearance in triplicate, stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

9. *It is further ordered*, That the applicant herein, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and Section 1.594 of the Commission's Rules, shall give notice of the hearing within the time and in the manner perscribed in such Rule and shall advise the Commission thereof as required by Section 1.594(g) of the Rules.

10. *It is further ordered*, That the Secretary of the Commission send a copy of this Order by Certified Mail—Return Receipt Requested to Lewel Broadcasting, Inc., licensee of WDRK(FM), Greenville, Ohio.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

CANADA-U.S.A. FM BROADCASTING AGREEMENT OF 1947

Amendment of Table A

MAY 19, 1977.

Pursuant to exchange of correspondence between the Department of Communications of Canada and the Federal Communications Commission, Table A of the Canada-U.S.A. FM Broadcasting Agreement has been amended as set forth in the attached list. It is to be noted that those representing assignments will indicate call signs plus parameters.

Further additions, changes, and deletions will be issued as reported to the Commission by the Canadian Department of Communications.

Copies of the basic Table of Assignments and Allocations may be obtained from Downtown Copy Center, 1730 K Street NW., Washington, D.C. 20036, telephone 202-452-1422.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

FEDERAL ENERGY ADMINISTRATION

STATE ENERGY CONSERVATION PLANS

Negative Determination of Environmental Impact; North Carolina, North Dakota and Colorado Conservation Plans

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by the States of North Carolina, North Dakota and Colorado, of their State Energy Conservation Plans. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of these plans, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for any of these plans.

Single copies of the environmental assessments of the State Plans for North Carolina, North Dakota and Colorado are availaoble upon request from the FEA Office of Communications and Public Affairs, Room 3138, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessments will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the State Plans are available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views or arguments with respect to the environmental assessments to Executive Communications, Box NH, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment (Name of State) Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by June 27, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., June 14, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

INDEPENDENT OCEAN FREIGHT FORWARDER LICENSE

Applicants

Notice is hereby given that the following applicants have filed with the Federal Maritime Commission applications for licenses as independent ocean freight forwarders pursuant to Section 44(a) of the Shipping Act, 1916, (Stat. 522 and 46 U.S.C. 841(b)).

Persons knowing of any reason why any of the following applicants should not receive a license are requested to communicate with the Director, Bureau of Certification and Licensing, Federal Maritime Commission, Washington, D.C. 20573.

Martin & Merrell (Richard P. Martin, d.b.a.), 501 SE 24th Street, Fort Lauderdale, FL 33316.

La Rosa Del Monte Express Inc., 1133-35 Tiffany Street, Bronx, NY 10459. Officer: Hiram Rodriguez, President.

Panalpina Air Freight, Inc., 175-11 148th Road, Jamaica, NY 11430. Officers: Emil E Zurcher, Director/President; Walter Schneider, Director; Alfred Rohner, Director; James J. Jacoby, Director; Peter Michaelsen, Executive Vice President; Edward Blattner, Vice President; Robert Schumann, Vice President.

Fracht Fwo Inc., 26 Broadway, Room 1537, New York, NY 10004. Officers: Rudolf Reisdorf, Chairman; Wolfram Uckert, Vice President/Treasurer; Paul Moskowitz, Vice President.

Cargoship International Corporation, 1800 K Street, NW., Washington, D.C. 20006. Officers: Richard H. Babayan, Chairman of the Board; Lawrence B. Rohde, President; Donald B. Tyson, Vice President-Traffic; Michael Patrick George, Secretary; David R. Melincoff, Director.

Luciano S. Soto, 10,000 John Saunders Rd., San Antonio, TX 78216.

Superior Service Freight Forwarding, Inc., 516 NW 57th Avenue, Miami, FL 33144. Officers: Roberto A. Vinas, President; Daisy Garcia, Vice President; Rita Cabrera, Secretary.

Trans-World Impex Fwdg. Ltd. (Robert Stettner), 8510 34th Avenue, Jackson Heights, NY 11372.

I.N.A. Freight Forwarding Service (Ernst A. Fransz, d.b.a.), 1540 West 9th Street, Long Beach, CA 90813.

Hansen Shipping Agency, Inc., 21 Ross Avenue, Spring Valley, NY 10977. Officers: Anna Hansen, President; Axel F.W. Hansen, Vice President; Irwin Lehrman, Secretary.

Universal Freight Forwarders, Ltd., 9 South Mass Street, Seattle, WA 98134. Officers: Phillip Lew, President/Director; Warren Razore, Secretary/Treasurer; Paul R. Cressman Director.

Atlas International Shippers, Inc., 854 Eagle Drive, Bensenville, IL 60106. Officers: Connie Kottis, President; Dimitrios Kouklakis, Secretary; Nick Drakakis, Treasurer.

Freight-Base, Inc., 2720 Deeplaines Avenue, Suite 132, Des Plaines, IL 60018. Officers: Peter R. Allen, President; Charles W. Davis, Vice President; Stephen M. Lewis, Secretary.

International Associated Cargo Carrier (George E. Toomey, d.b.a.), 2250 North Loop West, Suite 108, Houston, TX 77092.

Mover's International, Inc., 18800 Highway 99, Suite 110, Lynwood, WA 98036. Officers: Robert H. Johnson, President/Director; Betty A. Johnson, Secretary; Richard Cabrera, Director; Harold J. Johnson, Director.

FEDERAL RESERVE SYSTEM

CAPRICE CORP.

Acquisition of Bank

Caprice Corporation, Red Lake Falls, Minnesota, has applied for the Board's approval under Section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 93.33 percent of the voting shares of Plummer State Bank, Plummer, Minnesota. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than July 12, 1977.

Board of Governors of the Federal Reserve System, June 14, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-17490 Filed 6-17-77;8:45 am]

FIRST TEXAS BANCORP, INC.

Acquisition of Bank

First Texas Bancorp, Inc., Georgetown, Texas, has applied for the Board's approval under Section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares of First National Bank, Copperas Cove, Texas. The factors that are considered in acting on the application are set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than July 13, 1977.

Board of Governors of the Federal Reserve System, June 13, 1977.

FEDERAL POWER COMMISSION

[Docket Nos. G-2570, et al.]

AMINOIL DEVELOPMENT, INC. (SUCCESSOR TO BURMAH OIL DEVELOPMENT, INC.) AND AMINOIL USA, INC. (SUCCESSOR TO BURMAH OIL AND GAS CO.

Corporate Name Change

JUNE 1, 1977.

On August 26, 1976, Burmah Oil Development, Inc., filed with the Commission a change in its corporate name to Aminoil Development, Inc. On the same date, Burmah Oil And Gas Company filed a change in its corporate name to Aminoil USA, Inc. Each applicant has also filed certificates from the Secretary of the State of Delaware certifying the changes in corporate names.

Aminoil USA, Inc. has requested that certain certificates (Docket Nos. G-3058, CI67-1243, CI69-720, CI64-1028, CI66-979, CI73-700, and CI74-166) and the related rate schedules (Burmah rate schedule numbers 12, 13, 18, 22, 23, 36, and 37, respectively) be amended. In each instance such request is moot because either the certificate and rate schedule have been redesignated the name of a successor-in-interest or the sales have been abandoned or the authorization was a limited-term certificate with pregranted abandonment which has expired.

All other certificates and the rate schedules as listed in the attached appendices are redesignated to reflect the appropriate corporate name change from Burmah Oil Development, Inc. to Aminoil Development, Inc. and from Burmah Oil and Gas Company to Aminoil USA, Inc.

KENNETH F. PLUMB,
Secretary.

APPLICATIONS FOR CERTIFICATES, ABANDONMENT OF SERVICE AND PETITIONS TO AMEND CERTIFICATES [1]

JUNE 9, 1977.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before July 8, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[Docket No. CP77-437, R-386]

COLUMBIA GULF TRANSMISSION CO., ET AL

Request for Waiver and Extension

JUNE 15, 1977.

On May 31, 1977, Columbia Gulf Transmission Company, (Columbia Gulf), Natural Gas Pipeline Company of America (Natural) and Trunkline Gas Company (Trunkline), jointly referred to as petitioners, filed for waiver and extension pursuant to Section 157.22 (18 CFR 157.22) of certain temporary acts and operations undertaken under the latter section.

On March 8, 1977, petitioners, after having commenced transporting certain volumes of off-shore Louisiana gas, filed a statement pursuant to § 157.22 of the Commission's Regulations under the Natural Gas Act.[1] The latter statement related to an agreement for the transportation of gas by Columbia Gulf for Natural and Trunkline from Block 616 West Cameron, offshore Louisiana, and contemplated the continuance of that transportation for the 60-day period provided for in § 157.22. The aforementioned statement provided that this transportation would in no event continue beyond the date that Stingray Pipeline Company (Stingray), a partnership composed of Natural and Trunkline would complete construction of a pipeline to said Block 616 or September 1, 1977, whichever is earlier. Construction of the Stingray pipeline to Block 616, West Cameron Area, offshore Louisiana, has not yet been completed. The only way that Block 616 gas belonging to Trunkline and Natural can be brought onshore is through the facilities of Columbia Gulf.

Petitioners discontinued this transportation on May 21, 1977.[2] Presently all of the gas being purchased from Block 616 by Trunkline and Natural from Exxon U.S.A., Inc., is being retained by Columbia Transmission. However, Columbia Transmission is unable to continue on this basis and the parties have been unsuccessful in their attempts to make other exchange or banking arrangements for the movement of this gas while awaiting the completion of the Stingray facilities. Petitioners express concern over their capability of protecting their customers and of maintaining existing levels of curtailment during the forthcoming 1977-1978 winter heating season without acquiring all the natural gas available to them.

Petitioners herein, therefore, request that the Commission extend and waive its provisions under Section 157.22 in order to permit them to transport volumes of gas currently available to them from Block 616 until September 1, 1977.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 23, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-17492 Filed 6-17-77;8:45 am]

[1] Such transportation commenced on February 23, 1977.

[2] Petitioners indicate that due to an oversight that this transportation was continued beyond the sixty-day period. Evidently such transportation convened on February 23, 1977.

[Docket No. CP77-422]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Application

JUNE 10, 1977.

Take notice that on June 6, 1977, Transcontinental Gas Pipe Line Corporation (Applicant), Post Office Box 1396, Houston, Texas, 77001, filed in Docket No. CP77-422, an application pursuant to Section 7 of the Natural Gas Act, as amended, and the Rules and Regulations of the Federal Power Commission, for a certificate of public convenience and necessity authorizing Applicant to install and operate compression facilities in the South Marsh Island Block 48 field, offshore Louisiana, all as more fully set

forth in the application which is on file with the Commission and open to public inspection.

Specifically, Applicant proposes to install and operate, or cause to be installed and operated, 6660 H.P. of compressor facilities to increase deliverability and recovery of reserves from presently dedicated sources being produced from the "B", "C" and "E" platforms in South Marsh Island Block 48.

The total estimated cost of the proposed facilities is $3,675,000, to be financed initially through short-term loans and available cash.

Applicant states that the compressor units have been ordered and that installation is scheduled to commence in October, 1977.

Any person desiring to be heard or to make any protest with reference to said application, on or before July 1, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.0). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. RP77-65 et al.]

ALABAMA-TENNESSEE NATURAL GAS CO., ET AL.

Extension of Time

JUNE 10, 1977.

On June 7, 1977, El Paso Natural Gas Company filed a motion to extend the time in which to file the data required by Commission Order, issued May 11, 1977, in the above indicated dockets. The May 11, 1977, "omnibus order" instituted proceedings, established procedures and provided for hearings to evaluate the impact of natural gas shortages of interstate pipeline companies.

Upon consideration, notice is hereby given that the time for filing the data required by the May 11, 1977, Order is extended to and including July 1, 1977.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-17508 Filed 6-17-77;8:45 am]

[Docket No. ER77-422]

PUBLIC SERVICE CO. OF OKLAHOMA

Cancellations

JUNE 10, 1977.

Take notice that Public Service Company of Oklahoma (PSCO) on June 3, 1977, tendered for filing notice of cancellations of agreements between the United States of America, PSCO, and Oklahoma Gas & Electric Company (OGE).

PSCO gives notice that effective July 1, 1977, FPC Rate Schedules No. 119–A and No. 119–B, effective dates of July 13, 1950, and October 9, 1950, respectively, and filed with the Commission by PSCO, will expire on their own terms at midnight, June 30, 1977, and should be considered as canceled. According to PSCO notice of said proposed cancellation has been served upon the Southwestern Power Administration and OGE. PSCO requests waiver of the Commission's notice requirement that notice of cancellation be submitted at least thirty days prior to the date such cancellation is proposed to take effect, so that cancellation of said rate schedules may become effective as of June 30, 1977.

PSCO also gives notice, on behalf of OGE, that effective July 1, 1977, FPC Rate Schedules No. 17–A, as supplemented, and No. 17–B, as supplemented, effective dates of July 13, 1950, and October 9, 1950, respectively, and filed with the Commission by OGE, will expire on their own terms at midnight, June 30, 1977, and should be considered as cancelled. According to OGE, notice of said proposed cancellation has been served upon the Southwestern Power Administration. PSCO requests waiver of the Commission's notice requirement that notice of cancellation be submitted at least thirty days prior to the date such cancellation is proposed to take effect, so that cancellation of said rate schedules may become effective as of June 30, 1977.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before June 22, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-17509 Filed 6-17-77;8:45 am]

[Docket No. ER77-419]

CONNECTICUT LIGHT & POWER CO.

Proposed Amendment to Transmission Agreement

JUNE 10, 1977.

Take notice that on May 31, 1977, the Connecticut Light & Power Company (CL&P) tendered for filing a proposed Amendment to Transmission Agreement (Amendment) dated March 21, 1977, between (1) CL&P, the Hartford Electric Light Company (HELCO), and Western Massachusetts Electric Company (WMECO), and (2) Middleborough Gas and Electric Department (MGED).

CL&P states that the Amendment provides for an extension of the termination of the Transmission Agreement from October 31, 1977, to October 31, 1982, and increases the amount to be transmitted for the periods from April 1, 1977, to April 30, 1977, from 2,450 kilowatts to 3,450 kilowatts and from May 1, 1977, to October 31, 1977, from 700 kilowatts to 1,700 kilowatts and adds an additional entitlement for the period from November 1, 1977, to October 31, 1982, in the amount of 2,000 kilowatts.

CL&P requests that the Commission, in order to permit MGED to receive transmission service to wheel the MGED purchase, and allow CL&P, HELCO and WMECO to receive payment for such transmission service, waive the 30 day notice period, permitting the Amendment filed to become effective on April 1, 1977.

CL&P states that the monthly transmission charge is equal to one-twelfth of the estimated annual average unit cost of transmission service on the Northeast Utilities system determined in accordance with Section 13.9 (Determination of Amount of Pool Transmission Facilities (PTF) Costs) of the New England Power Pool (NEPOOL) Agreement and the uniform rules adopted by the NEPOOL Executive Committee multiplied by the number of kilowatts of winter capability which MGED is entitled to receive, reduced to give due recognition of the payments made by MGED for transmission service on Montaup Electric Company's system.

HELCO and WMECO have filed certificates of concurrence in this docket.

CL&P states that copies of this rate schedule have been mailed or delivered to CL&P, Hartford, Connecticut, HELCO, Hartford, Connecticut, WMECO, West Springfield, Massachusetts, and MGED, Middleborough, Massachusetts.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 22, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-17510 Filed 6-17-77;8:45 am]

[Docket No. RP77-98]

NATURAL GAS PIPELINE CO. OF AMERICA

Proposed Changes in Rates and Charges

JUNE 10, 1977.

Take notice that on May 31, 1977, Natural Gas Pipeline Company of America (Natural) tendered for filing proposed changes to the following tariff sheets to its FPC Gas Tariff, Third Revised Volume No. 1 and Second Revised Volume No. 2; to be effective July 1, 1977.

THIRD REVISED VOLUME NO. 1

Thirty-second Revised Sheet No. 5
Eighth Revised Sheet No. 5A
Fifth Revised Sheet No. 9
Fifth Revised Sheet No. 14
First Revised Sheet No. 108
Eighth Revised Sheet No. 119
Sixth Revised Sheet No. 120–A

SECOND REVISED VOLUME NO. 2

Tenth Revised Sheet No. 220
Fifth Revised Sheet No. 270
First Revised Sheet No. 390
Second Revised Sheet No. 407
Second Revised Sheet No. 433
First Revised Sheet No. 457
First Revised Sheet No. 653
First Revised Sheet No. 654
First Revised Sheet No. 668
First Revised Sheet No. 695
First Revised Sheet No. 710
First Revised Sheet No. 744
First Revised Sheet No. 1000

The proposed tariff sheet changes would produce increased jurisdictional revenues of $50.8 million above the revenue collected under rates presently in effect subject to refund at Docket No. RP76–106. The proposed rates represent a $112.6 million increase when compared with the proposed Docket No. RP76–106 settlement rates filed with the Commission under Company Motion of April 28, 1977. Both the subject to refund rates and the settlement rates used in the calculation of the indicated revenue increases were adjusted to reflect the cumulative PGA unit adjustment (excluding the surcharge for recovery of the Deferred Purchased Gas Cost Balance) effective March 1, 1977.

Natural states that the jurisdictional rates as filed were designed to enable Natural to recover its increased jurisdictional cost of service for the test period which is based on the twelve months ended February 28, 1977, adjusted to include the annualized effect of changes which are known and measurable with reasonable accuracy and which will become effective by November 30, 1977. Natural states that the principal increased costs result from a proposed increase in overall rate of return to 10.69 percent, which would permit a rate of return to equity of 15.50 percent, an increase in depreciation rate to 5.75 percent for production, gathering, storage and onshore transmission property, and 8 percent for all offshore property, and significant additional charges and increased costs for the transportation of gas by others from offshore and onshore gas supply sources.

Copies of this filing have been served on the customers of Natural, and interested public bodies.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 22, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-17511 Filed 6-17-77;8:45 am]

[Docket Nos. CP67-381; CP68-166; CP69-71]

TENNESSEE GAS PIPELINE CO.

Petition To Amend

JUNE 10, 1977.

Take notice that on May 19, 1977, Tennessee Gas Pipeline Company, a Division of Tenneco, Inc. (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket Nos. CP67–381, CP68–166, and CP69–71 a petition to amend the Commission's orders of October 30, 1967 (38 FPC 867), May 1, 1968 (39 FPC 607), and November 1, 1968 (40 FPC 1206), issued in the instant dockets pursuant to Section 7 of the Natural Gas Act so as to authorize the sale of natural gas in interstate commerce to National Fuel Gas Supply Corporation (National Fuel) as successor in interest of Iroquois Gas Corporation (Iroquois), Pennsylvania Gas Company (Penn Gas) and United Natural Gas Company (United Natural) under the terms of a single gas sales contract, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Applicant states that it is presently authorized in Docket No. CP67–381 to render natural gas service to United Natural under its Rate Schedule CD–4 and associated gas sales contract between the parties dated October 30, 1967, which contract provides for the sale and delivery by Applicant and the purchase and receipt by United Natural of a contracted demand of 107,100 Mcf of natural gas per day. Applicant states that it is also authorized in Docket Nos. CP68–188 and CP69–71 to render natural gas service to Penn Gas under Applicant's Rate Schedule CD–4 and associated gas sales contract between the parties dated November 1, 1978, which contract provides for the sale and delivery by Applicant and the purchase and receipt by Penn Gas of a contract demand of 68,340 Mcf of natural gas per day. Applicant indicates that it is presently authorized to render natural gas service to Iroquois under its Rate Schedule CD–5 and associated gas sales contract between the parties dated November 1, 1968, which contract provides for the sale and delivery by Applicant and the purchase and receipt by Iroquois of a contracted demand of 114,240 Mcf of natural gas per day.

Applicant states that by the Commission's order issued on May 10, 1974, in Docket No. CP73–294, the Commission approved the acquisition by National Fuel of the natural gas transmission, storage and production properties of Iroquois, Penn Gas, and United Natural, effective on July 1, 1974. Applicant further states that National Fuel has requested that it substitute one gas sales contract in order to reflect accurately National Fuel's corporate realignment. Consequently, Applicant has entered into a precedent agreement dated October 25, 1976, with National Fuel which provides, among other things, for the execution of a new gas sales contract.

Applicant proposes to render natural gas service to National Fuel under a new gas sales contract which would supersede and cancel Applicant's existing gas sales contracts with Iroquois, Penn Gas, and United Natural. Applicant states that under such new gas sales contract National Fuel would be entitled to receive a contracted demand of 175,000 Mcf per day in Applicant's Northern Rate Zone Rate Schedule CD–4 and a contracted demand of 114,240 Mcf per day in Applicant's New York Rate Zone (Rate Schedule CD–5) for a total of 289,680 Mcf per day. Applicant further states that under the instant proposal National Fuel would not be entitled to take on any day a total volume at all delivery points in either the Northern or New York Rate Zones greater than the total of their existing contracted demands, and that the proposed change would not increase or decrease the annual volumetric limitation (AVL) imposed on Applicant's system in Opinion Nos. 712 and 712–A for sales to Iroquois, Penn Gas, and United Natural in either Applicant's Northern or New York Rate Zones. Applicant states that the change in the form of gas sales contracts pro-

posed herein can be accomplished through the utilization of Applicant's existing facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 30, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-17512 Filed 6-17-77;8:45 am]

[Docket Nos. RP76-136 and RP77-26]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Tariff Filing

JUNE 10, 1977.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) on May 31, 1977, tendered for filing certain revised tariff sheets to its FPC Gas Tariff, Second Revised Volume No. 1, and Original Volume No. 2 to become effective February 1, 1977, March 1, 1977, and May 1, 1977.

Transco states that the revised tariff sheets reflect reductions in rates (1) for sales under the CD, G, OG, E, ACQ, and S-2 rate schedules by 3.1 cents per dekatherm (dt) from those made effective February 1, March 1, and May 1, 1977; (2) for firm transportation service under rate schedules X-11 by 3.1 cents per dt and under rate schedules X-42, X-52, and X-56 by 3.2 cents per Mcf from those made effective February 1, 1977; and, (3) for interruptible transportation service under rate schedule X-47 by 1.6 cents per Mcf from the rate made effective February 1, 1977. Also, Transco states that these rate reductions are based on (1) a reduction in the amount of advance payments included in rate base from that reflected in its rate increase filing in Docket No. RP76-136 to the actual balance of advance payments as of January 31, 1977, the end of the test period in that filing and (2) the elimination from rate base of the unamortized portion of unrecoverable advance payments included in the same filing.

The Company states that copies of the filing have been mailed to each of its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 28, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-423]

PUBLIC SERVICE CO.

Filing of Agreement

JUNE 10, 1977.

Take notice that Public Service Company of New Hampshire (PSNH) on June 3, 1977, tendered for filing as an initial rate schedule a Transmission Contract with Long Island Lighting Company (the Buyer).

PSNH indicates that under the Contract, they will transmit through its system entitlements of power which the Buyer will be purchasing from Vermont Electric Power Company, Inc.

PSNH requests that the Commission waive the normal 30-day notice requirement and permit the rate schedule to be effective as of April 1, 1977.

According to PSNH, a copy of the filing was served upon the Buyer.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 22, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-405]

LOUISIANA POWER & LIGHT CO.

Proposed Electric System Interconnection Agreement

JUNE 10, 1977.

Take notice that on May 31, 1977, the Louisiana Power & Light Company (LP&L) tendered for filing an Electric System Interconnection Agreement dated April 12, 1977, with the Town of Jonesboro, Louisiana (Town), which provides in addition to Emergency Service, when elected by the Town, service schedules for Reserve Capacity, Supplemental Power, Surplus Power, Economy Power, and Transmission Service. LP&L further states that the proposed agreement and schedules, A, B, C, D, E, F, and F-1, are the same as accepted for filing in FPC Docket No. ER76-162 with the City of Ruston (Rate Schedule FPC No. 54); in Docket No. ER76-868 with the Town of Rayville (Rate Schedule FPC No. 58), and in Docket No. ER76-867 with the Town of Homer (Rate Schedule FPC No. 57).

Pursuant to Section 35.3(b) of the Commission's Regulations, LP&L respectfully requests that the Commission waive its notice requirements and allow this Agreement to be tendered for filing more than ninety days before it is to become effective and to accept for filing the Agreement with the Town to become effective on the date upon which the interconnection is first made available, or May 10, 1978, whichever is earlier.

LP&L states that a copy of this filing was mailed to the Town of Jonesboro, Louisiana.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 22, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-17515 Filed 6-17-77;8:45 am]

[Docket No. CP77-417]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Application

JUNE 10, 1977.

Take notice that on May 31, 1977, Transcontinental Gas Pipe Line Corporation (Applicant); Post Office Box 1396; Houston, Texas 77001, filed in Docket No. CP77-417 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to transport natural gas for Texas Eastern Transmission Corporation (Texas Eastern), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that Texas Eastern will purchase natural gas produced in the High Island Block 111 Field, offshore Texas and deliver a daily contract demand quantity of up to 40,000 Mcf into Applicant's North High Island System in High Island Block 110 for transportation and delivery of a thermally equivalent quantity, less .6% for gas lost and unaccounted for and fuel, to Texas Eastern at an authorized interconnection on the west bank of the Sabine River, Jefferson County, Texas.

Applicant avers that no additional facilities will be required to render this transportation service, for which Texas Eastern will pay Transco initially a monthly charge of $153,200.

Any person desiring to be heard or to make any protest with reference to said application, on or before June 30, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Project No. 2426]

DEPARTMENT OF WATER RESOURCES OF THE STATE OF CALIFORNIA AND CITY OF LOS ANGELES DEPARTMENT OF WATER AND POWER

Initiating Review of Initial Decision

JUNE 10, 1977.

On April 29, 1977, Presiding Administrative Law Judge Samuel Kanell issued an initial decision in the above-designated matter. Briefs on exceptions were due to be filed May 31, 1977, but none have been filed.

Inasmuch as no exceptions to the initial decision were timely filed, absent this order the initial decision would become final on June 10, 1977, i.e., within ten days from the time of filing exceptions. Accordingly, pursuant to Section 1.30(d)(2) of the Commission's Rules of Practice and Procedure, the Commission herein initiates review of the initial decision of April 29, 1977, and further orders that the initial decision is stayed pending a final decision by the Commission in this proceeding.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

[CA 3346]

HOPPER MOUNTAIN NATIONAL WILDLIFE REFUGE

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JUNE 10, 1977.

The Fish and Wildlife Service, U.S. Department of the Interior, filed application Serial No. CA 3346 on October 31, 1975, for a withdrawal in relation to the following described lands:

HOPPER MOUNTAIN NATIONAL WILDLIFE REFUGE

SAN BERNARDINO MERIDIAN, CALIFORNIA

T. 4 N., R. 19 W.,
Sec. 2, Lot 2, E½ Lot 7, and SE¼.

The area described aggregates 231.24 acres in Ventura County, California.

The applicant desires that the land be reserved as a part of the Hopper Mountain Wildlife Refuge system for the protection of the endangered California Condor, which now numbers between 50 and 60 birds, with the majority of their nesting occurring within the sanctuary.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on April 20, 1976, page 16585, FR Doc. 76-11302.

Pursuant to Sec. 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing to the State Director, Bureau of Land Management, E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825, on or before July 20, 1977. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before July 20, 1977.

The reserved mineral estate in the acquired lands described above are temporarily segregated from all forms of appropriation under the mineral leasing laws to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal aplication will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the undersigned, Bureau of Land Management, Department of the Interior, Room E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

JOAN B. RUSSELL,
Chief, Lands Section, Branch of Lands and Minerals Operations.

[FR Doc.77-17537 Filed 6-17-77;8:45 am]

[R 4558]

SAN BERNARDINO MERIDIAN, CALIFORNIA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JUNE 10, 1977.

The Bureau of Reclamation, U.S. Department of the Interior, filed application Serial No. R 4558 on November 22, 1971, for a withdrawal in relation to the following described land:

SAN BERNARDINO MERIDIAN, CALIFORNIA

T. 8 N., R. 23 E.,
Sec. 10, Lot 6.

Containing 17.55 acres in San Bernardino County, California.

The applicant desires the land for control of the Colorado River and for recreational uses in connection with the Colorado River Front Work and Levee System.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on December 4, 1971, page 23166, FR Doc. 71-17719.

Pursuant to Sec. 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing to the State Director, Bureau of Land Management, E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825, on or before July 20, 1977. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before July 20, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws (30 U.S.C., Ch. 2), to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the undersigned, Bureau of Land Management, Department of the Interior, Room E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

JOAN B. RUSSELL,
Chief, Lands Section, Branch of Lands and Minerals Operations.

[S 5149]

YOSEMITE NATIONAL PARK

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JUNE 10, 1977.

The National Park Service, U.S. Department of the Interior, filed application Serial No. S 5149 on May 3, 1972, for a withdrawal in relation to the following described lands:

YOSEMITE NATIONAL PARK

MOUNT DIABLO MERIDIAN, CALIFORNIA

T. 3 S., R. 20 E.,
Sec. 18, a parcel of land situated in the S½SW¼ bounded by a line particularly described as follows:
Beginning at Corner No. 1, from which the quarter corner between Sections 17 and 18 of said Township and Range bears N. 60°35'11" E., 4,101.2 feet distant; thence N. 0°55'15" W., 393.6 feet to Corner No. 2; thence N. 32°37'30" W., 640.0 feet to Corner No. 3; thence N. 48°28' W., 174.9 feet to Corner No. 4; thence S. 12°09'15" W., 921.7 feet to Corner No. 5; thence S. 77°41'45" E., 692.3 feet to Corner No. 1, the point of beginning.

The area described aggregates approximately 9.78 acres.

The applicant desires the land for a sewage treatment facility, which is necessary for the proper protection, development, and administration of Yosemite National Park.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on August 24, 1972, page 17068, FR Doc. No. 72-14389.

Pursuant to Sec. 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing to the State Director, Bureau of Land Management, E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825, on or before July 20, 1977. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before July 20, 1977.

The above described lands are temporarily segregated from all forms of location and entry under the general mining laws (30 U.S.C., Ch. 2), and from leasing under the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the undersigned, Bureau of Land Management, Department of the Interior, Room E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

JOAN B. RUSSELL,
Chief, Lands Section, Branch of Lands and Minerals Operations.

Fish and Wildlife Service

THREATENED SPECIES PERMIT

Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 4(d), 16 USC 1533(d), of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant: J. W. Steinbeck, 2830 Camino Tassajara, Danville, California 94526.

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE

FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR: ☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED: Authorization to ship 2 pair Palawan Peacock Pheasants for breeding from New York to California.

3. APPLICANT (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested): J. W. Steinbeck, 2830 Camino Tassajara, Danville, Calif. 94526

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING: (X) MR. ☐ MRS. ☐ MISS ☐ MS. HEIGHT 5' 9" WEIGHT 185; DATE OF BIRTH 9-19-97; COLOR HAIR Grey; COLOR EYES Brown; PHONE NUMBER WHERE EMPLOYED 415-837-6606; SOCIAL SECURITY NUMBER 566-52-1553; OCCUPATION Farmer; ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT: None

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, AGENCY OR INSTITUTION COMPLETE THE FOLLOWING: EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY OR INSTITUTION: N. A.; NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.: N.A.; IF APPLICANT IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED: N. A.

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED: 2830 Camino Tassajara Danville, Calif. 94526

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? ☐ YES ☒ NO. If yes, list license or permit number(s):

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☐ YES ☐ NO. If yes, list jurisdictions and type of document(s): None required

9. CERTIFIED CHECK OR MONEY ORDER (if applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF:

10. DESIRED EFFECTIVE DATE: 4-1-77

11. DURATION NEEDED: 2 years

12. ATTACHMENTS: THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 13.12(b)) MUST BE PROVIDED AS AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED:

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (In ink): J. W. Steinbeck DATE: March 21, 1977

DANVILLE, CALIF.,
March 21, 1977.

Re: FWS/WPO ADM 7–02m.

DIRECTOR,
United States Department of the Interior, Fish and Wildlife Service, Washington, D.C.

DEAR SIR: 1. A "Captive Self-sustaining Population" permit is requested for the following species of pheasant: Palawan Peacock Pheasant (*Polypectron emphanum*).

Applicant seeks a permit to move two pair of subject pheasants from Long Island, New York, to Danville, California for breeding purposes. Procurement will be made from Mr. Charles Sivelle who currently holds a permit for this species.

2. The applicant possesses 45 aviaries varying from 20′ by 30′ x 7′ high to 6′ x 13′ x 7′ high suitably landscaped and with shed shelter in the rear suitable for all weather protection in this climate. Pens are predator-proof for the area and employ heavy wire netting and aluminum siding and roof in their construction.

3. Applicant has been propagating pheasants and doves for 60 years in the state of California, and has raised dozens of the species covered in this request. A year ago the pheasant portion of the collection was disposed of due to ill health and an inability to provide, at that time, complete care of the birds. This problem has since been completely remedied and applicant is trying to re-establish the pheasant portion of his collection.

Applicant has propagated some fifty species of dove and eleven species of pheasant during his 60 years involvment, including first breeding in the United States of White Bellied Plumed Dove (*Lophophaps plumifera*) and Scheepmaker Crown pigeon (*Goura Scheepmakeri*). He also holds the "Master Breeder" award for 1952 from the American Pheasant Society. He has successfully raised four varieties of Peacock Pheasant such as Palawan Grey, Germain and South Sumatra Bronze-tail (*Polyplectron Chalcurum Chalcurum*) and was the first to successfully breed and raise the Blue-eared Manchurian Pheasant some fifty five years ago.

Yours very truly,

J. W. STEINBECK.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2–786–25; please refer to this number when submitting comments. All relevant comments received on or before July 20, 1977 will be considered.

Dated: June 15, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, Fish and Wildlife Service.

NEW YORK ZOOLOGICAL SOCIETY

ATTACHMENTS AS REQUIRED TO NEW YORK ZOOLOGICAL SOCIETY PERMIT APPLICATION

50 CFR 17.22

(1) The common and scientific names of the species sought to be covered by the permit as well as the number, age, and sex of such species, and the activity sought to be authorized (such as taking, exporting, selling in interstate commerce, etc.):

The New York Zoological Society hereby requests permission to obtain on breeding loan and import 0.1 Chinese alligator (*Alligator sinensis*). The age of the specimen is unknown but is of adult status.

(2) A statement as to whether, at the time of application, the wildlife sought to be covered by the permit (i) is still in the wild, (ii) has already been removed from the wild, or (iii) was born in captivity:

The 0.1 chinese alligator has been in captivity at the Stuttgart Wilhelmina Zoologischer-botanischer Garten since 1975.

(3) A resume of the applicant's attempts to obtain the wildlife sought to be covered by the permit in a manner which would not cause the death or removal from the wild of such wildlife:

The 0.1 Chinese alligator is in captivity and represents no removal of wild stock of the species.

(4) If the wildlife sought to be covered by the permit has already been removed from the wild, the country and place where such removal occurred; if the wildlife sought to be covered by the permit was raised in captivity, the country and place where such wildlife was born:

The 0.1 *Alligator sinensis* was collected in the wild from the Yangtze River, in the vicinity of Wuhu and Taihu, China. Date unknown, collector unknown.

(5) A complete description and address of the institution or other facility where the wildlife sought to be covered by the permit will be used, displayed or maintained:

The 0.1 Chinese alligator will initially be maintained at the New York Zoological Park, 185th Street and Southern Boulevard, Bronx, New York 10460, and later transferred to propagation quarters at the Rockefeller Wildlife Refuge, owned and operated by the Louisiana Wild Life and Fisheries Commission and located at Grand Cheniere, Louisiana.

(6i) A complete description, including photographs or diagrams, of the area and facilities where such wildlife will be housed and cared for:

Prior to transportation to Rockefeller Refuge the 0.1 Chinese alligator will be quarantined in the Reptile House facility of the New York Zoological Park. It will be quartered in a 12′×14′ enclosure which includes a pool approximately 12′×8′ in size and a water depth of 2′, tempered to 86° F. Diet will include rats, chicks, fish, liver, and horsemeat with multivitamin and mineral additives.

At the Rockefeller Wildlife Refuge, the 0.1 *Alligator sinensis* will be quartered in one of two, escape-proof, double-fenced, one-half acre enclosures. Each enclosure supports natural vegetation and includes two freshwater 400 sq. ft. (20′×20′) ponds and one 1,875 sq. ft. (25′×75′) pond (see attached sketch of enclosure). All ponds are sloped to a maximum depth of 5′. Six-foot high perimeter fences are buried 1.5′ in crushed and packed shell. Fence corners are rounded and have a 1.5′ overhang to prevent animals from climbing over the top. Maintenance of the animal will parallel that developed by Louisiana Wild Life and Fisheries Commission personnel for American alligators currently being propagated at the Refuge. Diet will consist of rough fish, nutria remains, and freshly obtained road kills.

(6ii) A brief resume of the technical expertise of the persons who will care for such wildlife including any experience the applicant or his personnel have had in raising, caring for, and propagating similar wildlife, or any closely related wildlife:

Although the Department of Herpetology of the New York Zoological Park has been unsuccessful in its attempts to propagate crocodilians within the confines of its Reptile House facility, members of the staff have contributed many scientific publications on crocodilians as well as other reptilian subjects (see attached *curricula vitae*). It has assisted other zoological parks and research facilities, which enjoy more favorable climate, to establish crocodilian propagation programs. Reptilian propagation efforts during the past five years at the New York Zoological Park have resulted in the birth or hatching of radiated tortoises, bog turtles, Burmese pythons, reticulated pythons, Egyptian cobras, king cobras, Pope's pit vipers, boa constrictors, shore pit vipers, pigmy rattlesnakes, water moccasins, rainbow boas, Travancore pond turtles, and Cook's tree boas.

Curricula vitae of Zoological and Conservation Director F. Wayne King, Curator of Herpetology John L. Behler, and Veterinarian Emil P. Dolensek are attached. A list of consultants in animal management and medicine is also attached.

The Chinese alligator's health will be monitored as needed by the staff of the Society's Animal Medical Department, under Dr. E. P. Dolensek, resident veterinarian.

When transferred to Rockefeller Refuge (within 60 days of arrival at the New York Zoological Park) the management of the 0.1 Chinese alligator will be directly supervised by Ted Joanen, Research Leader, Refuge Division. Ted Joanen is well known for his propagation, growth and ecological studies of the American alligator and has authored many significant articles on the subject.

(6iii) A statement of the applicant's willingness to participate in a cooperative breeding program and to maintain or contribute data to a studbook:

The New York Zoological Society has tried unsuccessfully to breed its pair of Chinese alligators within the confines of its Reptile House for many years. Recognizing its limited potential for propagating this species under existing conditions, the Society sought the cooperation of other zoological parks for additional genetic material and looked for a quasi-natural site to develop a propagation effort.

The Rockefeller Wildlife Refuge, owned and operated by the Louisiana Wild Life and Fisheries Commission, and located in the coastal marshes of southwestern Louisiana, appeared to offer suitable ecological parameters. The wild population of Chinese alligators in the Yangtze River Valley lies at about the same latitude as the Rockefeller Wildlife Refuge in Louisiana. Comparison of meteorological data from the two localities indicates roughly similar temperature, precipitation, and seasonal changes. Additionally, the staff of the Refuge is among the most knowledgeable and experienced in studying the ecology, behavior and reproductive biology of the American alligator (*Alligator mississippiensis*), including captive propagation of that species. The knowledge and experience would be a valuable asset to the propagation effort.

The New York Zoological Society submitted a proposal for a joint propagation program to the Louisiana Wild Life and Fisheries Commission. It was approved in late November of 1975 and construction of facilities at the Refuge began immediately under the direction of Ted Joanen, Research Leader, Refuge Division. The U.S. National Zoological Park joined the project by contributing the only other pair available in the United States.

On March 22, 1976, the four Chinese alligators were transferred from the New York Zoological Park to their quarters at the Rockefeller Wildlife Refuge.

Additionally, the New York Zoological Park participated in many cooperative programs with other institutions and individuals. With respect to crocodilians, nine Nile crocodiles are on breeding loan to the Greater Miami Zoo (Florida); three American crocodiles on breeding loan to Rio Grande Zoological Park, Albuquerque (New Mexico); and two slender-snouted crocodiles and four dwarf crocodiles to Natal Parks Board, St. Lucia Crocodile Station, South Africa.

Studbooks are not maintained on crocodilians. However, a survey of crocodilians in captivity was undertaken by New York Zoological Society and Atlanta Zoological Park staff and was published in the International Zoo Yearbook, Vol. 15, 1975. In addition, crocodilians shortly will be censused by the International Species Inventory System (ISIS), Minnesota State Zoological Garden, Apple Valley, Minnesota, of which the New York Zoological Society is a participating member.

(6iv) A detailed description of the type, size, and construction of all containers into which such wildlife will be placed during transportation or temporary storage, if any, and of the arrangements for feeding, watering, and otherwise caring for such wildlife during that period:

Shipment will be made directly from Stuttgart, Germany, to the New York Zoological Park, Bronx, New York, by commercial airline carrier. The shipping enclosure will be constructed of ½″ and ¾″ plywood with sufficient ventilation ports. The enclosure will allow for size and postural adjustment of the animal. After the acclimatization period of the Chinese alligator at the New York Zoological Park, it will be transported by a Zoo vehicle directly to Rockefeller Refuge. An enclosure similar to the above will be provided. Food and water will not need to be provided as transportation periods will not exceed 72 hours.

(6v) For the 5 years preceding the date of this application provide a detailed description of all mortalities involving the species covered in the application and held by the applicant, if any (or any other wildlife of the same genus or family held by the applicant), including the causes of such mortalities and the steps taken to avoid or decrease such mortalities:

The New York Zoological Park has not experienced any losses of *Alligator sinensis* in the last ten years. One of the two (the male) Chinese alligators on breeding loan from the U.S. National Zoo, however, perished in June 1976, three months after its arrival at Rockefeller Refuge. Necropsy was not performed as the specimen displayed advanced post-mortem autolysis. The specimen was known to be at least 40 years of age and was not in excellent health.

(7) Copies of the contracts and agreements pursuant to which the activities sought to be authorized by the permit will be carried out; such copies must identify all persons who will engage in the activities sought to be authorized, and must also give the dates for such activities: Attached.

(8) A full statement of the reasons why the applicant is justified in obtaining the permit:

The New York Zoological Society has a long-term commitment to wildlife conservation. The financial support of the New York Zoological Society is sufficient to assure the continuity of its conservation and propagation activities (see attached annual report).

The New York Zoological Society guarantees that the propagation of the Chinese alligator is a long-term commitment of its staff. Our husbandry and facilities will be updated as our knowledge of Chinese alligators improves. Even so, if for some reason it became necessary to terminate our efforts, we would immediately make our Chinese alligators available to a zoological institution which would continue this program.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2–724–C07; please refer to this number when sub-

mitting comments. All relevant comments received on or before July 20, 1977, will be considered.

Dated: June 15, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, Fish and Wildlife Service.

[FR Doc.77-17497 Filed 6-17-77;8:45 am]

ENDANGERED SPECIES PERMIT

Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant: The University of Michigan, Division of Biological Sciences, Ann Arbor, Michigan 48109.

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE
FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Indicate only one) — IMPORT OR EXPORT LICENSE ☐ — PERMIT [X]

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED: Import not more than 10 Varanus from Switzerland to the U.S. to permit biomechanical research on the animals. Appendix II Endangered Sp. Treaty Washington Convention. Not endangered species.

3. APPLICANT (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested): Dr. Carl Gans, Professor of Zoology, Division of Biological Sciences, The University of Michigan, Ann Arbor, MI 48109 Phone (313) 763-4253

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING: [X] MR. ☐ MRS. ☐ MISS ☐ MS. — HEIGHT 5'9" — WEIGHT 175 lbs. — DATE OF BIRTH 7 Sept. 1923 — COLOR HAIR Gray — COLOR EYES Brown — PHONE NUMBER WHERE EMPLOYED (313) 763-4253 — SOCIAL SECURITY NUMBER 058-22-8250 — OCCUPATION Professor of Zoology — ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT: Principal Investigator under ~~under~~ grant issued to me from the National Science Foundation at the University of Michigan.

5. IF "APPLICANT" IS A BUSINESS CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING — EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION — NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC. — IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED: Research (mastication and locomotion) of specimens imported from Switzerland to Ann Arbor, Michigan, as well as possibly to ansillary laboratories at Princeton and Harvard Universities (for specific experiments).

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? [X] YES ☐ NO (If yes, list license or permit number(s)): PRT 2-146,

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? [X] YES ☐ NO (If yes, list jurisdictions and type of document(s)): Swiss government, permit issued by Dr. Dollinger of the Eidgenossisches Veterinaramt Bern.

CERTIFIED CHECK OR MONEY ORDER (if applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF: $

10. DESIRED EFFECTIVE DATE: 1 July, 1977

11. DURATION NEEDED: Single importation within 90 days but retention of animal

ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 13.12(a)) MUST BE ATTACHED. IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED.

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (In ink): [signature] — DATE: 24 June 1977

GPO 895-042

THE UNIVERSITY OF MICHIGAN,
DIVISION OF BIOLOGICAL SCIENCES,

APRIL 19, 1977.

U.S. DEPARTMENT OF THE INTERIOR,
Fish and Wildlife Service,
Federal Wildlife Permit Office,
Washington, D.C.

GENTLEMEN: This letter serves in supplement to permit application File No. PRT2-729-C00 dated 4/7/77. At that time, I requested specimens of *Varanus* of uncertain provenance, identification, and number.

As indicated on the enclosed Swiss export permit 071, the specimens in question are presumably *Varanus bengalensis* and number 4 subadults. Please treat this information and the attached photocopy as supplements to my original permit application.

Sincerely yours,

CARL GANS,
Professor of Zoology.

U.S. Department of Interior, Federal Fish and Wildlife license/permit application. 12. Attachment. Information requested under 50CFR17 Para. 1723.A.1. The animals to be imported are several specimens (not more than 12) of monitor lizards *Varanus salvator* of unknown sex and unknown provenance.

2. Subject specimens were confiscated by the Swiss government from illegal importation and turned over by their Dr. Dolinger of the Eidgenössische Veterinäramt, Bern to the University of Basel for work by Mr. Oliver Rieppel. A formal statement to this effect issued by the Swiss authority will accompany the animals, and will be transmitted to you by me as soon as it is received.

3. The animals are to be imported in order to permit Mr. Rieppel to carry out experiments on their mastication and/or locomotion and/or ventilation utilizing electromyographical techniques in my laboratory. The work is funded by NSF and the Swiss government. It is possible that some of these specimens will have to be transported temporarily to other institutions, such as the Auditory Research Laboratories of Princeton University and/or The Museum of Comparative Zoology at Harvard University in order there to use specialized equipment as part of the work.

After maximum possible number of experiments have been carried out, these specimens will presumably have to be sacrificed for dissection. (This will obviously be delayed as long as possible.) The bodies will then be retained as reference material here or deposited in a nonprofit research museum.

4. The animals will be kept in our holding facility located in the Department of Biological Sciences, The University of Michigan, Ann Arbor, Michigan 48109. The rooms there have temperature control and light cycles available and due security is maintained to avoid possible escape. Standard cages are available as are veterinary services through the University's animal facilities.

56. At this time of application, the animals are being housed at the University of Basel. Consequently, the issuance of this permit will have on effect on the status of species in the wild. It would be possible for me either to collect or to have this species collected. However, this would hardly be appropriate as it would contravene the intention of the act, which I gather is to protect stocks of the species in the wild. I add also that it is difficult to identify the species of this family (in spite of the existence of at least three monographs purporting to assist this), as the different forms change from a juvenile to an adult color and these changes have been thus far poorly characterized. I gather that the identification is that of the Swiss government and am uncertain whether it has been confirmed by a competent taxonomist.

7-1. My research facility at The University of Michigan contains a series of lockable rooms in which we have both animals and equipment. There are quarantine and long-term holding areas, all arranged to keep the animals secluded and permit their survival under near-natural conditions (which are required for the success of our experiments). Temperature and light controls are available. Individual specimens are housed in doubly screened, glassfronted wooden cages with "dead man" bolts and facilities for individual locks. We have not lost any animals in the six years since the facility was built to specification.

11. The applicant is Professor of Zoology at The University of Michigan and has, since 1959, been funded continuously by the U.S. National Science Foundation for studies dealing on such animals. I have published some 200 papers, books, paper and abstracts on reptilian biology and am organizer-managing editor of the Biology of the Reptilia now in five volumes (three more are in press). I am a Fellow of the Herpetologists League, The Academy of Zoology, as well as Honorary Scientific Fellow of The Zoological Society of London and the New York Zoological Society, Research Associate of the American Museum of Natural History, and the Carnegie Museum in Pittsburgh, a Field Associate of the Smithsonian Institution and a Research Scientist of The Museum of Zoology of The University of Michigan, all in association with studies dealing with the kinds of animals here proposed for importation.

iii. While I have no objection to assisting on studies pertaining to the reproduction of these animals, reproduction is not the aim of this importation. Rather, the aim is an improvement of our understanding of the mechanics of their feeding and locomotion, ventilation, and defensive behavior. Such information would be critical to anyone who attempted to set up breeding programs. My interest in such matters and competence on them can be attested to, for instance by the Zoological Society of Antwerp which has retained me as a consultant on problems of reptile house exhibit design.

iv. In transit to the United States the animals will be transported in person by Mr. Olivier Rieppel upon occasion of his passage to the United States. Mr. Rieppel has informed me that Mr. Rene Honegger of the Zoological Gardens of Zurich will provide packing material and other assistance in handling appropriate shipment. Upon arrival, the plane will be met by me and the animals transferred immediately to our holding area.

Please advise if additional information is necessary.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-729-CO7; please refer to this number when submitting comments. All relevant comment received on or before July 20, 1977 will be considered .

Dated: June 15, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, Fish and Wildlife Service.

ENDANGERED SPECIES PERMIT

Receipt of Request For Amendment

A permit authorizing certain work of the Patuxent Center's Endangered Wildlife Research Program was not included in the Endangered Species Permit and/or Amendment Nos. 1, 2, 3, and 4 when issued. This proposed Amendment No. 5 would update and correct our permit.

A notice containing the application for the permit was published in the FEDERAL REGISTER on August 4, 1975 (40 FR 32766- 68- 69- 70- 71), soliciting public comments for a period of 30 days.

A notice of the issuance of the permit was published on March 9, 1976 (41 FR 10103-04).

Under date of March 28, 1977, the Patuxent Wildlife Research Center submitted a request for changes in the conditions of this permit. Published herewith is a copy of the request for changes which will be considered as an amendment to this permit. This request is being considered pursuant to Section 13.23, Title 50 Code of Federal Regulations (see 39 FR 1162).

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE
FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Indicate only one) — AMENDMENT #5 — IMPORT OR EXPORT LICENSE ☐ — PERMIT [X]

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED: Amendment no. 5 to PRT 8-86-B-C to allow taking of 0.5cc blood samples from adult and young Florida Everglade kites (Rostrhamus sociabilis plumbeus) for blood parasite and chemistry analysis as well as other work not covered by original permit or subsequent amendments.

3. APPLICANT (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested): Patuxent Wildlife Research Center, U. S. Fish and Wildlife Service, Laurel, Maryland 20811

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING. ☐ MR. ☐ MRS. ☐ MISS ☐ MS. — HEIGHT — WEIGHT — DATE OF BIRTH — COLOR HAIR — COLOR EYES — PHONE NUMBER WHERE EMPLOYED — SOCIAL SECURITY NUMBER — OCCUPATION — ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT

5. IF "APPLICANT" IS A BUSINESS CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING. EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION: Wildlife research to enhance the status of endangered and threatened wildlife species. NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.: Lucille F. Stickel, Director, 301-776-4880. IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED: N/A

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED: Peninsular Florida

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? [X] YES ☐ NO (If yes, list license or permit number(s)): PRT 8-86-B-C, PRT 8-85-C, PRT 8-169-C, PRT 2-913-BA, PRT 2-197

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☐ YES [X] NO (If yes, list jurisdictions and type of document(s)): Our biologist was informed that Florida Game & Freshwater Fish Comm. does not require a federal biologist to obtain a state permit if he is working under a valid federal permit.

9. CERTIFIED CHECK OR MONEY ORDER (if applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF: $

10. DESIRED EFFECTIVE DATE: May 1, 1977 — 11. DURATION NEEDED: December 31, 1979

12. ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 13.12(a)) MUST BE ATTACHED. IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED: 17.22

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (In ink): Lucille F. Stickel — DATE: March 25, 1977

GPO 895-042

The following activities are necessary to achieve the research goals of providing information essential to the effective management of the Florida everglade kite. Research is to be conducted on the Florida everglade kite (*Rostrhamus sociabilis plumbeus*) in peninsular Florida. Age categories include eggs and nestlings, immatures and adults of both sexes. No living specimens will be sacrificed nor will any be brought into captivity unless found injured or otherwise handicapped and needing treatment; any such specimens would then be returned to the wild. Any dead specimens will be frozen and sent to the Patuxent Wildlife Research Center, Laurel, Maryland, for autopsy and for further transfer to the National Fish and Wildlife Laboratory, Smithsonian Institution, Washington, D.C., for preservation as scientific specimens.

No research-related mortalities are anticipated in the study of this species, and the risk of injury will be held to an absolute minimum. Only those types of traps which have already been used to capture raptorial birds safely at the Patuxent Wildlife Research Center will be employed in capturing kites of flight age. Each trap will be under close and continuous observation during its operation to prevent drowning of or injury to individually-trapped wild birds. Great handling care will be taken in measuring eggs and kites, collecting ectoparasites, banding, color-banding, obtaining blood (not more than 0.5 cc per bird), fecal, and feather samples utilizing safe procedures. Each trap will be under close and continuous observation during its operation to prevent drowning or injury of trapped birds. Kites will be released immediately at the capture site

as soon as scientific data have been recorded. The indicated activities are essential to obtain information which cannot be secured in the field without handling the living specimens. Effective management of kites is impossible without a complete knowledge of their biology and means of determining age and sex in the field so that production potential and actual production can be compared. Parasites and diseases of kites must be known if all reasons for failure of this species to increase and maintain greater numbers are to be determined. The blood samples will also be used for the determination of physiological norms for the kite, a valuable technique in evaluating their physical condition. Banding is necessary to permanently identify individual birds in order to determine mobility and longevity, pair fidelity, and to allow the study of kite population dynamics, intraspecific strife or territoriality, sexual disparity (if any), maturation rate, and annual productivity of given nesting pairs. This information, and recommendations which will result from ecological studies now in progress, will form the basis for effective management of this endangered species.

Paul W. Sykes, Jr., Biologist-in-Charge of the Delray Beach Field Station, Patuxent Wildlife Research Center, USFWS, who is the principal investigator for this work, holds the M.S. degree in zoology of the North Carolina State University and is a member of the Florida Everglade Kite Recovery Team. He has had 9½ years of field research upon this species as a USFWS research biologist. He is a life member of the American Ornithologists' Union, and a member of the Wilson Ornithological Society, Cooper Ornithological Society, Eastern Bird Banding Association, Northeastern Bird Banding Association, Florida Ornithological Society, and The Wildlife Society. Mr. Sykes is author of several scientific articles, and has served as a consultant on the effects of water development programs upon wildlife in Florida. This research is not in conflict with any other programs designed to enhance the survival of the Florida everglade kite. Results of this research are presented in progress reports submitted annually to the Patuxent Center. The findings are also published in scientific journals, USFWS technical reports and other publications, in popular articles appearing in conservational and natural history magazines, and in talks given to professional and lay organizations.

In keeping with the spirit of the Endangered Species Act of 1973 this notice is being published to allow public comment on the request for an amendment. Interested persons may comment on this amendment by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 8-86-B-C; please refer to this number when submitting comments. All relevant comments on or before July 20, 1977 will be considered.

Dated: June 5, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch,
Federal Wildlife Permit Office.

UNIVERSITY OF MINNESOTA

Issuance of Permit for Threatened Marine Mammals

Although the Endangered Species Act does not require the publication of a Notice of Issuance of Threatened Species permits, due to the interest in the southern sea otter this notice of issuance is being published.

Notice is hereby given that on June 2, 1977, as authorized by the provisions of the Endangered Species Act of 1973 (16 U.S.C. 1539(a)), the U.S. Fish and Wildlife Service issued a permit to Dr. Donald B. Siniff, University of Minnesota, Minneapolis, Minnesota to conduct scientific research on southern sea otters, subject to certain conditions set forth therein. The permit is available for public inspection during normal business hours at the Fish and Wildlife Service's office in Room 512, 1717 H Street, NW., Washington, D.C.

Dated: June 15, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch,
Federal Wildlife Permit Office.

[FR Doc.77-17495 Filed 6-17-77;8:45 am]

UNIVERSITY OF MONTANA

Issuance of Permit for Marine Mammals

On July 27, 1976, a notice was published in the FEDERAL REGISTER (Vol. 41, No. 145) that an application had been filed with the Fish and Wildlife Service by University of Montana, Dr. Charles J. Jonkel, Missoula, Montana for a permit to capture, mark, take blood samples and keep in captivity at Manitoba Laboratory, the polar bears for observational behavior studies.

Notice is hereby given that on January 27, 1977, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 USC 1361-1407), the Fish and Wildlife Service issued a permit to University of Montana, subject to certain conditions set forth therein. The permit is available for public inspection during normal business hours at the Fish and Wildlife Service's office in Room 512, 1717 H Street, N.W., Washington, D.C.

Dated: June 15, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch,
Federal Wildlife Permit Office.

NATIONAL CAPITAL PLANNING COMMISSION

PROPOSED AMENDMENTS TO PROJECT REVIEW AND NOTIFICATION SYSTEM PROCEDURES

The National Capital Planning Commission, at its meeting on June 9, 1977, authorized the publication, for review and comment, in the FEDERAL REGISTER of proposed amendments to its procedures, adopted November 11, 1976, and amended March 3, 1977 (41 FR 53375; 42 FR 17189), implementing the requirement in Section 2.a. of Part I of Attachment A to Office of Management and Budget Circular No. A-95 (Revised) on Evaluation, Review and Coordination of Federal and Federally Assisted Programs and Projects, dated January 2, 1976, respecting notification to the Commission.

Pursuant to Part I of Attachment A to OMB Circular A-95 (Revised), the Commission is to be notified by local jurisdictions of their intent to apply for Federal assistance for projects involving land or water use and development or construction in the National Capital Region. On November 11, 1976, the Commission adopted procedures for its project review and notification system which require applicants to furnish notification on Standard Form 424 of: 1. Identity of the applicant;

2. A map depicting the project's geographic boundaries;

3. A brief description of the proposed project, including estimated cost and beneficiaries. Where appropriate, drawings or other graphics shall be submitted;

4. A list of Federal installations affected, if any, and other project characteristics which will enable the Commission to identify agencies of the Federal government in the National Capital Region having plans, programs, or projects which may be affected by the project;

5. A statement as to whether the applicant has been advised by the funding agency from which assistance is being sought that it will be required to submit environmental impact information in connection with the proposed project;

6. The Federal program title and number and agency under which assistance will be sought as indicated in the latest "Catalog of Federal Domestic Assistance". In the case of programs not listed therein, programs shall be identified by Public Law number or U.S. Code citation; and

7. The estimated date the applicant expects to formally file an application.

With the exception of item (4) above, the procedures are identical to the requirements of OMB for all applicants seeking Federal funds. As a result of concerns expressed through the Metropolitan Washington Council of Governments, the Commission proposes to modify its requirements in order to clarify and simplify compliance by applicants in the following respects:

1. Eliminate the requirement for a list of Federal installations affected, if any.

2. Clarify the notification procedures statement that applications "involving land or water use and development or construction in the National Capital Region" will be forwarded to NCPC, by adding a list of "covered programs", by which the Commission requires notification. This list is a refinement of Attachment D to OMB Circular A-95 (Revised) and is intended to include only those programs which involve construction of new or additions to existing facilities. This will reduce the number of programs covered to approximately 20 percent of all Federal programs.

3. Consider as compliance with the requirement in Part I of Attachment A to OMB Circular A-95 (Revised) receipt of a copy of the completed Form 424 through COG rather than from the applicant directly.

The Commission will consider the adoption, at its July 7, 1977 meeting, of the proposed amendments. Interested organizations, agencies, and citizens are requested to submit their views thereon in writing to the Commission on or before July 1, addressed to:

Daniel H. Shear, Secretary, National Capital Planning Commission, Washington, D.C. 20576.

The proposed amendments are as follows:

1. Amend Section B. by:

(a) Numbering the first two sentences of the first paragraph thereof as paragraph "1." and deleting the last sentence;

(b) Deleting in the first sentence of Paragraph 1 the words "covered by Part I of OMB Circular A-95 (Revised)" and inserting in lieu thereof the words "listed in Paragraph 3 below";

(c) Adding the following new paragraphs:

2. If the Commission receives notification from or through the Metropolitan Washington Council of Governments at least thirty (30) days prior to the submission of the application and in the form set forth in Section C, the applicant will be deemed to have satisfied these procedures.

3. The following programs set forth in Paragraph 3 of Attachment D to OMB Circular A-95 (Revised) are covered by these procedures:

DEPARTMENT OF AGRICULTURE

10.405 Farm Labor Housing Loans and Grants.
10.409 Irrigation, Drainage, and Other Soil and Water Conservation Loans (Exception: Loans to grazing associations to develop additional pasturage and loans for purchase of equipment).
10.410 Low to Moderate Income Housing Loans.
10.411 Rural Housing Site Loans.
10.414 Resource Conservation and Development Loans.
10.415 Rural Rental Housing Loans.
10.418 Water and Waste Disposal Systems for Rural Communities.
10.419 Watershed Protection and Flood Prevention Loans.
10.422 Business and Industrial Development Loans (Exception: Loans to rural small businesses having no significant impact outside community in which located).
10.423 Community Facilities Loans.
10.424 Industrial Development Grants.
10.901 Resources Conservation and Development (Exception: Small projects costing under $7,500 for erosion and sediment control and land stabilization and for rehabilitation and consolidation of existing irrigation systems).
10.904 Watershed Protection and Flood Prevention.

DEPARTMENT OF COMMERCE

11.300 Economic Development, Grants and Loans for Public Works and Development Facilities.
11.304 Economic Development, Public Works Impact Projects (Procedural variation).
11.305 Economic Development, State and Local Economic Development Planning.
11.307 Economic Development, Special Economic Development and Adjustment Assistance Program.
11.405 Anadromous and Great Lakes Fisheries Development.
11.407 Commercial Fisheries Research and Development.
11.418 Coastal Zone Management Program Development.
11.420 Coastal Zone Management, Estuarine Sanctuaries.

DEPARTMENT OF DEFENSE

12.101 Beach Erosion Control Projects.
12.106 Flood Control Projects.
12.107 Navigation Projects.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

13.237 Mental Health, Hospital Improvement Grants.
13.240 Mental Health, Community Mental Health Centers.
13.261 Family Health Centers.
13.340 Health Professions Teaching Facilities, Construction Grants.
13.369 Nursing School Construction, Loan Guarantees and Interest Subsidies.
13.378 Health Professions Teaching Facilities, Loan Guarantees and Interest Subsidies.
13.392 Cancer, Construction.
13.408 Construction of Public Libraries.
13.427 Educationally Deprived Children, Handicapped.
13.477 School Assistance in Federally Affected Areas, Construction.
13.502 Vocational Education, Innovation.
13.570 Libraries and Learning Resources.
13.630 Developmental Disabilities, Basic Support.
P.L. 92-318 (Section 161) Construction of Academic Facilities.
P.L. 93-641 (Section 1516) Planning Grants Health Systems Agencies: (Section 1601 et seq., Title XVI Public Health Service Act) Assistance for modernization, construction or conversion of medical facilities.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

14.001 Flood Insurance (Applications for community eligibility).
14.103 Interest Reduction Payments, Rental and Cooperative Housing for Lower Income Families.
14.105 Interest Subsidy, Homes for Lower Income Families.
14.112 Mortgage Insurance, Construction or Rehabilitation of Condominium Projects.
14.115 Mortgage Insurance, Development of Sales-Type Cooperative Projects.
14.116 Mortgage Insurance, Group Practice Facilities.
14.117 Mortgage Insurance, Homes.
14.119 Mortgage Insurance, Homes for Disaster Victims.
14.120 Mortgage Insurance, Homes for Low and Moderate Income Families.
14.121 Mortgage Insurance, Homes in Outlying Areas.
14.124 Mortgage Insurance, Investor Sponsored Cooperative Housing.
14.125 Mortgage Insurance, Land Development and New Communities.
14.126 Mortgage Insurance, Management-Type Cooperative Projects.
14.127 Mortgage Insurance, Mobile Home Parks.
14.128 Mortgage Insurance, Hospitals.
14.129 Mortgage Insurance, Nursing Homes and Related Care Facilities.
14.134 Mortgage Insurance, Rental Housing.
14.135 Mortgage Insurance, Rental Housing for Moderate Income Families.
14.137 Mortgage Insurance, Rental Housing for Low and Moderate Income Families, Market Interest Rate.
14.138 Mortgage Insurance, Rental Housing for the Elderly.
14.139 Mortgage Insurance, Rental Housing in Urban Renewal Areas.
14.141 Nonprofit Housing Sponsor Loans, Planning Projects for Low and Moderate Income Families.
14.146 Public Housing, Acquisition (Turnkey and Conventional Production Methods), new construction only.
14.154 Mortgage Insurance, Experimental Rental Housing.
14.156 Lower Income Housing Assistance Program.
14.203 Comprehensive Planning Assistance.
14.207 New Communities, Loan Guarantees.
14.218 Community Development Block Grants, Entitlement Grants.
14.219 Community Development Block Grants, Discretionary Grants.

DEPARTMENT OF THE INTERIOR

15.400 Outdoor Recreation, Acquisition, Development and Planning.
15.501 Irrigation Distribution System Loans.
15.503 Small Reclamation Projects.
15.605 Fish Restoration.
15.611 Wildlife Restoration.
15.904 Historic Preservation.

DEPARTMENT OF JUSTICE

16.515 Criminal Justice Systems Development.

DEPARTMENT OF TRANSPORTATION

20.102 Airport Development Aid Program.
20.103 Airport Planning Grant Program.
20.205 Highway Research, Planning, and Construction.
20.214 Highway Beautification, Control of Outdoor Advertising, Control of Junkyards, Landscaping and Scenic Enhancement.
20.500 Urban Mass Transportation Capital Improvement Grants (Planning and construction only).
20.501 Urban Mass Transportation Capital Improvement Loans (Planning and construction only).
20.505 Urban Mass Transportation Technical Studies Grants (Planning and construction only).

20.506 Urban Mass Transportation Demonstration Grants.
20.507 Urban Mass Transportation Capital and Operating Assistance Formula Grants.

VETERANS ADMINISTRATION

64.005 Grants to States for Construction of State Nursing Home Care Facilities.
64.020 Assistance in the Establishment of New State Medical Schools.
64.021 Grants to Affiliated Medical Schools, Assistance to Health Manpower Training Institutes.
64.114 Veterans Housing Guaranteed and Insured Loans (GI Home Loans).

ENVIRONMENTAL PROTECTION AGENCY

66.028 Solid Waste Demonstration Grants.
66.418 Construction Grants for Wastewater Treatment Works.
66.426 Water Pollution Control, Areawide Waste Treatment Management Planning Grants.
66.432 Grants for State Public Water System Subdivision Programs.

4. These notification requirements apply to all types of applications, except augmentation applications, as defined in the instructions to Standard Form 424 prescribped by GSA Federal Management Circular 74–7, involving:

(1) acquisition or leasing of land;

(2) construction of a new building, structure, facility, or transportation improvement;

(3) modification or alteration of a building, structure, facility, or transportation improvement where there is a change in its character or extent; or

(4) installation of new utilities or modification of existing utilities which provide increased capacity.

2. Amend Section C. by deleting subparagraph numbered "(4)" and renumbering subparagraphs "(5)", "(6)", and "(7)" as subparagraphs "(4)", "(5)", and "(6)", respectively.

DANIEL H. SHEAR,
Secretary.

JUNE 14, 1977.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

FEDERAL GRAPHICS EVALUATION ADVISORY PANEL

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given that a meeting of the Federal Graphics Evaluation Advisory Panel to the National Endowment for the Arts will be held on July 7–8, 1977, from 9:30 a.m. to 4:30 p.m., in Room 1125, Columbia Plaza Building, 2401 E Street NW., Washington, D.C. 20506.

This meeting will be open to the public on a space available basis. Accommodations are limited. Interested persons may submit written statements to the panel.

The agenda for this meeting will include the graphics portfolio of HEW and related material.

Further information with reference to this meeting can be obtained from Mr. Jerome Perlmutter, Coordinator of Federal Graphics, Mail Stop 503, National Endowment for the Arts, Washington, D.C. 20506, or call 202–634–4276.

HERBERT R. KUBLI,
Acting Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–358]

CINCINNATI GAS AND ELECTRIC CO., ET AL.

Availability of Final Environmental Statement for William H. Zimmer Nuclear Power Station

Pursuant to the National Environmental Policy Act of 1969 and the United State Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that the Final Environmental Statement prepared by the Commission's Office of Nuclear Reactor Regulation related to the proposed operation of William H. Zimmer Nuclear Power Station located in Clermont County Ohio, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. and in the Clermont County Library, Third and Broadway Streets, Batavia, Ohio. The Final Environmental Statement is also being made available at the Office of the Governor, State Clearinghouse, State Office Tower, 30 East Broad Street, Columbus, Ohio and the Ohio-Kentucky-Indiana Regional Council of Governments, 426 East Fourth Street, Cincinnati, Ohio.

The notice of availability of the Draft Environmental Statement for the William H. Zimmer Nuclear Power Station and requests for comments from interested persons was published in the FEDERAL REGISTER on October 21, 1976 (41 FR 46525). The comments received from Federal, state and local agencies and interested members of the public have been included as an appendix to the Final Environmental Statement.

Copies of the Final Environmental Statement (Document No. NUREG–0265) may be purchased from the National Information Service, Springfield, Virginia 22161 at a cost of $9 for printed copies and $3 for microfiche.

Dated at Rockville, Maryland, this 7th day of June 1977.

For the Nuclear Regulatory Commission.

GEORGE W. KNIGHTON,
Chief, Environmental Projects Branch 1, Division of Site Safety and Environmental Analysis.

[FR Doc.77-17359 Filed 6-17-77;8:45 am]

[Docket No. 50–321]

GEORGIA POWER CO., ET AL.

Corrective Order

In the matter of Georgia Power Company, Oglethorpe Electric Membership Corporation, Municipal Electric Association of Georgia, City of Dalton, Georgia, Edwin I. Hatch Nuclear Plant Unit No. 1.

On March 11, 1977, the Nuclear Regulatory Commission issued an Exemption in the captioned matter. Said Exemption contained a typographical error in Sections II and III. This Corrective Order will rectify such error.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 50, *it is ordered*, that Facility Operating License No. DPR–57 is hereby amended by:

(1) Change "15,500 MWD/ton" to "15,000 MWD/ton" in the second paragraph under "(3) Partially Drilled Core Credit" of Section II of said Exemption, and; (2) Revising the last paragraph of Section III of the Exemption to read as follows:

(1) If the core is to be reloaded prior to completion of the calculations required by paragraph (1); the licensees shall reduce the MAPLHGR for the reloaded core by 2% for 7 x 7 fuel at burnups less than 15,000 megawatt days per ton until further authorization by the Commission.

The March 11, 1977 Exemption incorrectly stated: "* * * for 7 x 7 fuel at burnups greater than 15,000 megawatt days * * *".

Dated in Bethesda, Maryland, this 13th day of June, 1977.

For the nuclear regulatory commission.

EDSON G. CASE,
Acting Director, Office of Nuclear Reactor Regulation.

[FR Doc.77-17360 Filed 6-17-77;8:45 a.m.]

[Docket Nos. 50–282 and 50–306]

NORTHERN STATES POWER CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 21 and 15 to Facility Operating License Nos. DPR–42 and DPR–60, issued to the Northern States Power Company (the licensee), which revised Technical Specifications for operation of Unit Nos. 1 and 2 of the Prairie Island Nuclear Generating Plant (the facilities) located in Goodhue County, Minnesota. The amendments are effective as of their date of issuance.

The amendments revised the Technical Specifications for the facilities to add a provision which permits maintenance on a cooling water supply header of the Containment Cooling Systems. The amendments also corrected minor administrative errors and clarified the intent of some areas of previously approved specifications.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license admendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the application for amendments dated August 27, 1976, (2) Amendment Nos. 21 and 15 to License Nos. DPR–42 and DPR–60, respectively, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at The Environmental Conservation Library of the Minneapolis, Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 6th day of June, 1977.

For the Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[Docket No. 50–244]

ROCHESTER GAS AND ELECTRIC CORP.

Issuance of Amendment to Provisional Operating License

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 14 to Provisional Operating License No. DPR–18, issued to Rochester Gas and Electric Corporation, which revised Technical Specifications for operation of the R. E. Ginna Nuclear Power Plant located in Wayne County, New York. The amendment is effective as of its date of issuance.

This amendment revises the Technical Specifications to clarify the surveillance specification for diesel-generator starting and breaker closing times under test conditions, to establish specifications for equipment designed to mitigate the consequences of flooding of safety-related equipment due to the failure of nonseismic piping and to establish specifications for safety-related shock suppressors (snubbers).

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated March 10, 1975 and February 1, 1977, (2) Amendment No. 14 to Provisional License No. DPR–18 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Lyons Public Library, 67 Canal Street, Lyons, New York 14489 and at the Rochester Public Library, 115 South Avenue, Rochester, New York 14627. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 1st day of June 1977.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Operating Reactors Branch No. 1, Division of Operating Reactors.

[Docket No. 50–244]

ROCHESTER GAS AND ELECTRIC CORP.

Issuance of Amendment to Provisional Operating License, Granting of Relief From ASME Section XI Inservice Inspection (Testing) Requirements and Temporary Exemption From 10 CFR 50.55a (g) Testing Requirements for Pumps and Valves

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 13 to Provisional Operating License No. DPR–18, issued to Rochester Gas and Electric Corporation (the licensee) for the R. E. Ginna Nuclear Power Plant (the facility) located in Wayne County, New York, which revised the Technical Specifications by replacing the existing inservice inspection requirements in § 4.2 with requirements in conformance with 10 CFR 50 50.55a (g). The amendment is effective as of the day of its issuance.

The Commission has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to the licensee. The relief relates to the inservice inspection program for the facility. The relief consists of the substitution of visual or surface examination for certain reactor coolant system components, the allowance of repair requirements of Section III of the ASME B&PV Code, a change in the reference level used as the evaluation criterion in Section V of the ASME B&PV Code and the substitution of the Ginna Station QA Program for the Section XI administrative control requirements. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50.

The Commission has granted an exemption to the licensee deferring the date for commencement of the testing program conforming to the requirements of the ASME Code, Section XI for certain pumps and valves until September 1, 1977.

The application for the amendment, request for relief, and the exemption comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Com-

mission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment and the letter granting the relief and exemption. Prior public notice of these actions was not required since the actions do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment granting of certain relief and temporary exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with these actions.

For further details with respect to these actions, see (1) the application for amendment and relief dated February 27, 1976, as supplemented September 23, 1976, February 8, 1977, and April 13, 1977 (2) Amendment No. 13 to License No. DPR–18, (3) the Commission's related Safety Evaluation, and (4) the Commission's letter to the licensee dated May 17, 1977. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Lyons Public Library, 67 Canal Street, Lyons, New York 14489, and at the Rochester Public Library, 115 South Avenue, Rochester, New York 14627. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 17th day of May 1977.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[FR Doc.77-17363 Filed 6-17-77;8:45 am]

[Docket Nos. 50-259, 50-260 and 50-296]

TENNESSEE VALLEY AUTHORITY

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 30 to Facility Operating License No. DPR–33, Amendment No. 27 to Facility Operating License No. DPR–52, and Amendment No. 6 to Facility Operating License No. DPR–68 issued to Tennessee Valley Authority (the licensee), which revised Technical Specifications for operation of the Browns Ferry Nuclear Plant, Unit Nos. 1, 2, and 3, (the facility) located in Limestone County, Alabama. The amendments are effective as of the date of issuance.

These amendments revise the Environmental Technical Specification 2.1 contained in Appendix B to the licenses. The change would temporarily increase the allowable maximum temperature rise between the 5 foot depth downstream and upstream control points from 5° F to 10° F and temporarily increase the maximum temperature measured at the 5 foot depth of the downstream control point from 86° F to 90° F, for the performance of a diffuser study that is anticipated to be completed in June 1977.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commisson's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated May 23, 1977, (2) Amendment No. 30 to License No. DPR–33, Amendment No. 27 to License No. DPR–52, and Amendment No. 6 to License No. DPR–68, and (3) the Commission's letter to the licensee dated June 7, 1977. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Athens Public Library, South and Forrest, Athens, Alabama 35661. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 7th day of June 1977.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

TOPICAL REPORT

Issuance and Availability

The Nuclear Regulatory Commission has issued a topical report, NUREG–0178, "Basic Considerations for Assembling a Closed Circuit Television System."

As part of the licensee's overall system for safeguarding special nuclear material against theft and protecting facilities against sabotage, closed circuit television systems are often used for surveillance and monitoring of activities in sensitive areas. NUREG–0178 presents information that would be of help to the user or designer in selecting components for the optimum closed circuit television system for a specific application with emphasis on the use of such systems for security applications. The report will help to assist system designers by providing a discussion of the major components of the system and the factors that influence the system's performance, maintenance, and cost.

The report is available for inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. Copies may be purchased at current rates from the National Technical Information Service, Springfield, Virginia 22161. (Paper copy: $4.00, Microfiche: $3.00)

(5 U.S.C. 552(a).)

Dated at Rockville, Maryland this 8th day of June 1977.

For the Nuclear Regulatory Commission.

ROBERT B. MINOQUE,
Director, Office of Standards Development.

[Dockets Nos. 50-280 and 50-281]

VIRGINIA ELECTRIC & POWER COMPANY

Proposed Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses Nos. DPR–32 and DPR–37 issued to Virginia Electric and Power Company (the licensee, for operation of the Surry Power Station Units Nos. 1 and 2, located in Surry County, Virginia.

In accordance with the licensee's application for amendment dated May 27, 1977, the amendments would revise the provisions in the Technical Specifications relating to the spent fuel pool. As amended, the Technical Specifications would permit the licensee to replace the storage racks in the present spent fuel storage pool, increasing its capacity from 464 fuel assemblies to 1044 fuel assemblies.

Prior to issuance of the proposed license amendments, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By July 20, 1977, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendments to the subject facility operating licenses. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioners contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and § 2.714, and must be filed with

the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Mr. Michael W. Maupin, Esq., Hunton, Williams, Gay & Gibson, P.O. Box 1535, Richmond, Virginia 23213, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for amendment dated May 27, 1977, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Swem Library, College of William and Mary, Williamsburg, Virginia.

Dated at Bethesda, Maryland, this 9th day of June 1977.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Operating Reactors Branch No. 4, Division of Operating Reactors.

[Docket No. 50-29]

YANKEE ATOMIC ELECTRIC CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 39 to Facility Operating License No. DPR–3, issued to Yankee Atomic Electric Company (the licensee), which revised Technical Specifications for operation of the Yankee Nuclear Power Station (Yankee-Rowe) (the facility) located in Rowe, Franklin County, Massachusetts. The amendment is effective as of its date of issuance.

The amendment modifies the Technical Specifications authorized by Amendment No. 33 dated December 29, 1976, relating to expanding the storage capacity of the Yankee-Rowe spent fuel storage pool. The modification permits moving additional pieces of equipment over or into the spent fuel pool and clarifies the intent of the criticality criteria imposed by Amendment No. 33.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated March 2 and May 20, 1977, (2) Amendment No. 39 to License No. DPR–3, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Greenfield Public Library, 422 Main Street, Greenfield, Massachusetts 01581. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 3rd day of June 1977.

For the Nuclear Regulatory Commission.

THOMAS V. WAMBACH,
Acting Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[FR Doc.77-17366 Filed 6-17-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON THE NORTH ANNA POWER STATION UNITS 1 AND 2

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the ACRS Subcommittee on the North Anna Power Station, Units 1 and 2, will hold an open meeting on July 6, 1977 in Room 1046, 1717 H Street, N.W., Washington, D.C. 20555. The purpose of this meeting is to discuss settlement, soil conditions, ground water drainage, and other associated topics.

The agenda for subject meeting shall be as follows:

Wednesday, July 6, 1977

8:30 a.m. until conclusion of business.

The Subcommittee may meet in Executive Session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Subcommittee will hear presentations by and hold discussions with representatives of the NRC Staff, the Virginia Electric and Power Company, and their consultants, pertinent to this review.

At the conclusion of this session, the Subcommittee may caucus to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full Committee.

Practical considerations may dictate alterations in the above agenda. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's Licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than June 29, 1977, to Dr. Richard Savio, ACRS, NRC, Washington, DC 20555, will normally be received in time to be considered at this meeting.

Background information concerning items to be considered at this meeting can be found in documents on file and avail-

able for public inspection at the NRC Public Document Room, 1717 H St. N.W., Washington, DC 20555; at the Office of the County Administrator, Board of Supervisors, Louisa County Courthouse, Louisa, VA 23093; and at the Manuscripts Department, Alderman Library, University of Virginia, Charlottesville, VA 22901.

(b) Those persons wishing to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements on topics relevant to the Committee's purview at an appropriate time chosen by the Chairman of the Subcommittee.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on July 5, 1977 to the Office of the Executive Director of the Committee (telephone 202/634–1919, Attn: Dr. Richard Savio) between 8:15 a.m. and 5:00 p.m. EDT.

(d) Questions may be propounded only by members of the Subcommittee and its consultants.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session. Recordings will be permitted only during those sessions of the meeting when a transcript is being made.

(f) A copy of the transcript of the portion(s) of the meeting where factual information is presented will be available for inspection on or after July 13, 1977 at the NRC Public Document Room, 1717 H St., N.W., Washington, DC 20555; at the Office of the County Administrator, Board of Supervisors, Louisa County Courthouse, Louisa, VA 23093; and at the Manuscripts Department, Alderman Library, University of Virginia, Charlottesville, VA 22901.

Copies of the minutes of the meeting will be made available for inspection at the NRC Public Document Room, 1717 H St., N.W., Washington, DC 20555 after October 6, 1977.

Copies may be obtained upon payment of appropriate charges.

Dated: June 15, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc.77-17619 Filed 6-17-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS, WORKING GROUP NO. 1 OF THE REACTOR SAFETY RESEARCH SUBCOMMITTEE

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), Working Group No. 1 of the Reactor Safety Research Subcommittee will hold a meeting on July 7 and 8, 1977 in San Jose, CA. The exact location of the meeting room will be announced later. The purpose of this meeting is to discuss safety research regarding thermal hydraulic aspects of boiling water reactors.

The agenda for subject meeting shall be as follows:

Thursday, July 7, and Friday, July 8, 1977

8:30 a.m. until conclusion of business each day.

The Working Group may meet in Executive Session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Working Group will hear presentations by and hold discussions with representatives of the NRC Staff, the General Electric Company, and their consultants, and with representatives of other organizations participating in safety research regarding thermal hydraulic aspects of boiling water reactors.

At the conclusion of these sessions, the Working Group may caucus to determine whether the matters identified in the Executive Sessions have been adequately cover and whether the project is ready for review by the full Committee.

It may be necessary for the Working Group to hold one or more closed sessions for the purpose of exploring matters involving proprietary information.

I have determined, in accordance with Subsection 10(d) of Public Law 92–463, that it is necessary to conduct the above closed sessions to protect proprietary information (5 U.S.C. 552b (c) (4)).

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Working Group is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing 15 readily reproducible copies to the Working Group at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than June 30, 1977 to Mr. Thomas G. McCreless, ACRS, NRC, Washington, DC 20555, will normally be received in time to be considered at this meeting.

(b) Persons desiring to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Subcommittee will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on July 6, 1977 to the Office of the Executive Director of the Committee (telephone 202/634–1374, Attn: Mr. Thomas G. McCreless) between 8:15 a.m. and 5:00 p.m., EDT.

(d) Questions may be propounded only by members of the Working Group and its consultants.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session. Recordings will be permitted only during those open sessions of the meeting when a transcript is being kept.

(f) Persons with agreements or orders permitting access to proprietary information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least three working days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of the agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to Mr. Thomas G. McCreless, of the ACRS Office, prior to the beginning of the meeting.

(g) A copy of the transcript of the open portion(s) of the meeting where factual information is presented will be available for inspection on or after July 15, 1977 at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555.

A copy of the minutes of the meeting will be made available for inspection at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555 after October 10, 1977.

Copies may be obtained upon payment of appropriate charges.

Dated: June 16, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

OFFICE OF THE FEDERAL REGISTER

"SUNSHINE ACT" MEETING NOTICES

Trial Program Made Permanent

AGENCY: Office of the Federal Register, GSA.

ACTION: Notice.

SUMMARY: This notice announces the continuation of a program of special formatting and handling of announcements of meetings under the "Government in the Sunshine Act." This program began as a 90 day experiment. Because it has provided clear and efficient notice of Agency meetings, it is being continued on a permanent basis.

FOR FURTHER INFORMATION CONTACT:

Samuel Jacobs, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, 202–523–5240.

SUPPLEMENTARY INFORMATION: On March 22, 1977, the Office of the Federal Register (OFR) published in the FEDERAL REGISTER (42 FR 15462) an announcement of a 90 day experimental program for special handling and formatting for "Government in the Sunshine Act" meeting notices. The program had three parts: (1) Agencies prepare notices in a standard format; (2) Agencies may use facsimile equipment to transmit the notices to the OFR; and (3) The OFR publishes the notices on the second work day after receipt. As part of the program a new "Sunshine Act meeting section" of the FEDERAL REGISTER was created to contain all meeting announcements under that Act.

Most agencies covered by the Sunshine Act are participating in the experimental program and there appears to be general satisfaction with it. Therefore, the Office of the Federal Register has concluded that the program accomplishes its purpose of providing the public with notice of "Sunshine Act" meetings in a clear form at the earliest possbile time. Accordingly, the program as previously announced will be continued on a permanent basis.

Agencies already participating in the program may continue to do so without any additional initiative on their part. Agencies that decided not to participate in the program, while it was experimental, are strongly encouraged to reexamine their decision.

FRED J. EMERY,
Director of the Federal Register.

JUNE 14, 1977.

[FR Doc.77-17677 Filed 6-17-77;10:12 am]

OFFICE OF MANAGEMENT AND BUDGET

PRIVACY ACT OF 1974

Reports on New Systems

The purpose of this notice is to list reports on new systems filed with the Office of Management and Budget to give members of the public the opportunity to make inquiries about them and to comment on them.

The Privacy Act of 1974 requires that agencies give advance notice to the Congress and the Office of Management and Budget of their intent to establish or modify systems of records subject to the Act (5 U.S.C. 552a(o)). During the period May 30, 1977 through June 10, 1977 the Office of Management and Budget received the following reports on new (or revised) systems of records.

GENERAL SERVICES ADMINISTRATION

System Names.—Employee Related Files.

Report Date.—May 26, 1977.

Point-of-Contact.—Philip Schmidt, Director of Management Services, General Services Administration, 18th and F Street NW., Washington, D.C. 20405.

Summary.—The report proposes to add additional categories of records to the system and allow disclosure of military service data to officials of the U.S. Army Reserve Components Personnel and Administration Center.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

System Name.—Day Care Center Study Records.

Report Date.—May 26, 1977.

Point-of-Contact.—Mr. Garland Pinkston, Jr., Office of General Counsel, Equal Employment Opportunity Commission, Washington, D.C. 20506.

Summary.—The report proposes a new system to establish and operate a day-care center study program.

OVERSEAS PRIVATE INVESTMENT CORPORATION

System Name.—Travel Advances.

Report Date.—June 8, 1977.

Point-of-Contact.—Mr. Henry Ritter, Overseas Private Investment Corporation, 1129 20th Street NW., Washington, D.C. 20527.

Summary.—The report proposes to computerize this system of records.

VELMA N. BALDWIN,
Assistant to the Director for Administration.

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on June 14, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, 202–395–4529, or from the reviewer listed.

NEW FORMS

SMALL BUSINESS ADMINISTRATION

Management Development Plan, SBA 933, on occasion, selected small businesses receiving management assistance from SBA, Warren Topelius, 395–5872.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education:

Application for the Emergency Adult Education Program for Indochina Refugees, OE 575, single time, State and local educational agencies, Lowry, R. L., 395–3772.

Application Under Indochina Refugee Children Assistance Program (P.L. 94-405), OE-443-2, single time, State education agencies, Lowry, R. L., 395-3772.

DEPARTMENT OF LABOR

Employment and Training Administration, Pretest Questionnaires for Delayed/Never/Immediate Filers for Unemployment Insurance Benefits, ETA 4, single time, delayed/never/immediate filers for unemployment insurance benefits, housing, Veterans and Labor Division, 395-3532.

REVISIONS

SMALL BUSINESS ADMINISTRATION

Minority Vendor Profile, SBA 1023, on occasion, businesses minority-owned, C. Louis Kincannon, Kathy Wallman, 395-3211.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education, Application for Federal Assistance (nonconstruction programs) for Emergency School Aid Act, title VII, PL 92-318, as amended, instructions and supplementary, OE-116-1, annually, LEA's and other eligible applicants, Lowry, R. L., 395-3772.

EXTENSIONS

DEPARTMENT OF AGRICULTURE

Statistical Reporting Service:

Annual Coffee Acreage Survey—Hawaii, annually, growers, Marsha Traynham, 395-4529.

Annual Banana Acreage Survey—Hawaii, annually, banana growers, Marsha Traynham, 395-4529.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration:

Request for and notice of amendment action, DIB-685P, on occasion, commercial exporters, Marsha Traynham, 395-4529.

Acknowledgement Card-Export License Application, DIB-623P, on occasion, commercial exporters, Marsha Traynham, 395-4529.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Administration (Office of Assistant Secretary):

Title I, Refinancing Report (property improvement), FH-5, on occasion, Banks, Savings and Loans, Credit Unions, etc., Housing, Veterans and Labor Divsion, 395-3532.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-13615; File No. SR-BSE-77-1]

BOSTON STOCK EXCHANGE

Proposed Rule Changes

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-20, 16 (June 4, 1975), notice is hereby given that on May 27, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission proposed rule changes as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGES

1. Chapter VII, Section 4 of the BSE rules is amended to delete the prohibition against members paying giveups in excess of 50 percent of the commission.

2. Chapter XI, Section 1 is amended to delete the presumption of a unitary odd-lot specialist system.

3. Chapter XII is amended to delete references to transactions on the primary market and to substitute references to consolidated tape transactions; and to delete the requirement of an odd lot differential.

4. Chapter XV is amended to require specialists to retain records of orders for 3 years, instead of the present 12 months.

5. Chapter XX, pertaining to the hiring of employees for the solicitation of business, is amended to bring it into conformity with the requirements of the Act.

BSE'S STATEMENT OF BASIS AND PURPOSE

Purpose of the Proposed Rule Changes. To comply with the provisions of the Securities Exchange Act of 1934, as amended by the Securities Acts Amendments of 1975. Rules were reviewed by the Securities and Exchange Commission, which ordered a review of all the Rules.

Basis of the Proposed Rule Changes. To bring certain of the Exchange Rules into compliance with the following provisions of the Exchange Act:

Sections 6(b)(5), 6(b)(8), 6(c)(3), 6(e), 11(a)(1)(c), 17(a).

Comments Received From Members, Participants or Others on Proposed Rule Changes. No comments were solicited.

Burden on Competition. No burden on competition is perceived by adoption of the proposed rule changes.

By July 25, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date, if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or (B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by July 11, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

JUNE 9, 1977.

[FR Doc.77-17530 Filed 6-17-77;8:45 am]

[Release No. 34-13621; File No. SR-MSTC-77-7]

MIDWEST SECURITIES TRUST CO.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on May 18, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Interpretation, Subject 312, Certificate Appointments and Good Delivery Requirements, MST System Operations Handbook.

The Midwest Securities Trust Company will accept as good delivery certificates which bear the following registrations:

(a) Domestic individual executor/s or administrator/s.

(b) Domestic individual trustee/s under inter vivos or testamentary trusts.

(c) Domestic guardian/s, including committees, conservators and curators.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed rule change is to clarify the Midwest Securities Trust Company's good delivery policy to include certain legal items. Transfer agents do not require documentation to transfer securities of the type listed above. This interpretation extends only to securities of a domestic issuer which bear the registrations set forth above, and certificates bearing such registrations must be properly assigned. Also, the signatures to the assignment must be guaranteed. These are both current requirements of good deliverable form.

The proposed interpretation of good deliverable form promotes the prompt and accurate settlement of securities transactions by expressly broadening good delivery to include more types of registrations—i.e., certain legal items.

Comments were neither solicited nor received. The Midwest Securities Trust Company does not believe any burden has been placed on competition.

The foregoing rule change has become effective, pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by July 11, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

JUNE 13,1977.

[Release No. 34-13619; File No. SR-MSRB-77-6]

MUNICIPAL SECURITIES RULEMAKING BOARD

Proposed Rule Changes

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on June 9, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission (the "Commission") the proposed rule changes as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGES

The proposed rule changes filed by the Board amend rule G-3(d) to require that, subject to certain exceptions,[1] every financial and operations principal associated with a muncipal securities broker or municipal securities dealer must take and pass the Municipal Securities Rulemaking Board Financial and Operations Principal Qualification Examination" (the "Qualification Examination") prior to being qualified as a financial and operations principal. Under the terms of the proposed rule changes, this requirement would become effective six months following the date of approval by the Commission of the proposed rule changes.

A person presently acting as a financial and operations principal would have six months within which to take and pass the Qualification Examination after approval of the proposed rule changes by the Commission in order to continue functioning as a financial and operations principal. A person who intends to become a financial and operations principal following the six-months grace period would not be able to function as a financial and operations principal without first having taken and passed the Qualification Examination.

The Qualification Examination includes a series of questions and an answer key. In order to preserve the validity of the Qualification Examination as a means of determining the professional qualifications of financial and operations principals associated with municipal securities firms, the Board has requested that the Commission grant confidential treatment to the Qualification Examination pursuant to Commission rule 24b-2. The Board contemplates filing with the Commission in the future additional questions for the Qualification Examination, so that a bank of questions will be available from which to draw questions for alternative versions of the Qualification Examination.

The proposed rule changes provide that the passing grade on the Qualification Examination will be determined by the Board. The Board has determined that the passing grade on the Qualification Examination will be 70 percent, weighted in accordance with a schedule, filed with the proposed rule changes, which indicates the areas covered by the Qualification Examination. The text of the proposed rule changes appears below.

[1] The exceptions are set forth in subparagraphs (d)(ii) and (d)(iv) of Board rule G-3.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule changes are as follows:

PURPOSE OF PROPOSED RULE CHANGES

The proposed rule changes amend rule G-3(d) to designate the Qualification Examination as the examination required for purposes of qualification as a financial and operations principal. The Qualification Examination is designed to test the knowledge of a financial and operations principal associated with a municipal securities firm concerning recordkeeping requirements, financial responsibility rules, and related matters.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGES

The Board has adopted the proposed rule changes pursuant to section 15B(b)(2)(A) of the Securities Exchange Act of 1934, as amended (the "Act"). Section 15B(b)(2)(A) of the Act authorizes the Board to adopt rules establishing standards of professional qualification for associated persons of municipal securities brokers and municipal securities dealers.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS, OR OTHERS ON PROPOSED RULE CHANGES

The Board has not solicited or received comments on the proposed rule changes. However, the Qualification Examination has been reviewed and approved by an advisory committee to the Board composed of five members of the securities industry expert in matters relating to financial responsibility and reporting requirements for securities firms.

BURDEN ON COMPETITION

As indicated in its filing of proposed rules G-2 through G-6 with the Commission (see File No. SR-MSRB-76-3), the Board concluded that any burden on competition imposed by those rules, including the requirement that every financial and operations principal (subject to certain exceptions) take and pass an appropriate qualification examination, was necessary and appropriate in furtherance of the purposes of the Act. Similarly, the Board has determined that the designation of the Qualification Examination, with its particular emphasis on knowledge of the Commission's

financial responsibility and reporting requirements, as well as applicable recordkeeping rules, as the appropriate qualification examination for financial and operations principals, is essential to the protection of investors and the public interest, and will not impose any burden on competition not necessary and appropriate in furtherance of the purposes of the Act.

By July 25, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons of so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by July 11, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

JUNE 10, 1977.

Rule G–3. Classification of Principals and Representatives; Numerical Requirements; Testing.[2]

(a) No change.

(b) No change.

(c) No change.

(d) Qualification Requirements for Financial and Operations Principals.

(i) Except as otherwise provided in this section (d), every financial and operations principal shall take and pass *the Municipal Securities Rulemaking Board Financial and Operations Principal Qualification Examination* [an appropriate qualification examination for financial and operations principals prescribed by the Board by rule] prior to being qualified as a financial and operations principal: *The passing grade shall be determined by the Board.* [Such examination shall test such matters as the Board may deem pertinent.]

(ii) No change.

(iii) No change.

(iv) No change.

(v) The requirements of paragraph (d) (i) *shall become effective on ———, 1977, (six months following the date of approval by the Commission of the proposed rule changes)*[3] **[shall not become effective until six months following the effective date of a rule of the Board first establishing a qualification examination for financial and operations principals].**

(e) No change.

[Release No. 34–13614; File No. SR–NYSE–77–16]

NEW YORK STOCK EXCHANGE, INC.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on May 25, 1977, the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

NYSE'S STATEMENT OF TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The following constitutes the text of Exchange Rule 46, as proposed.

FLOOR OFFICIALS—APPOINTMENT

Rule 46. Each Director who is active on the Floor shall be appointed as a Floor Official. The Chairman, in consultation with the Floor Directors and with the approval of the Board, shall, at the annual meeting of the Board of Directors or, at such time as may be deemed necessary, designate as Floor Officials such other members as he may determine, who shall perform such duties as are prescribed by the Rules of the Board or as may be designated by the Board to serve at the pleasure of the Board of Directors or until the next annual election of the Exchange and their successors are appointed and take office. By the same manner, the Chairman shall designate fourteen such other members as Floor Governors, who shall be empowered to perform any duty, make any decision or take any action assigned to or required of a Floor Director as are prescribed by the Rules of the Board or as may be designated by the Board of Directors or until the next annual election of the Exchange and their successors are appointed and take office. For purposes of this rule, a Floor Governor, by virtue of his appointment as such, shall also be deemed to be a Floor Official and, therefore, empowered to perform such duties as are specifically prescribed by the Rules of the Board or as may be designated by the Board regarding Floor Officials.

NYSE'S STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change are as follows:

PURPOSE OF PROPOSED RULE CHANGE

Exchange Rule 46 provides for the designation of twelve Floor Governors.

A Floor Governor, by virtue of his appointment as such, is empowered to perform certain duties of both Floor Directors and Floor Officials prescribed by the rules of the Exchange relating to supervision and regulation of Floor matters. Each Floor Governor is assigned to either one or two trading Posts on the Floor and is responsible for the supervision and regulation of transactions at such Posts.

A need has been demonstrated for two additional Floor Governors—one in the Bond Room and one in the 20 Broad Street Trading Area (the "Blue Room").

At the present time, only one Floor Governor is regularly stationed in the Blue Room where four Posts are located. Since this sole Floor Governor can adequately cover only two Posts, two other Governors from separate Floor areas must share responsibility for the other two Posts which can lead to delays in the resolution of Floor matters and places additional burdens on the Governors involved. No Floor Governor is regularly stationed in the Bond Room. Therefore, when differences in opinion arise among Floor Officials in the Bond Crowd in adjudicating a matter involving bond trading, a Floor Governor must be called in from the equity Floor.

Therefore, in order to improve the efficiency in the supervision and regulation of Floor matters, the number of Floor Governors should be increased by two, from 12 to 14.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

The proposed rule change relates to Section 6(b)(1) of the Act and Item 4(a)(i) of Form 19b–4A. The rule change will permit the Exchange, through its Floor Governors, to more efficiently perform those duties prescribed in the rules relating to supervision and regulation of Floor matters. It does not relate to the remaining items set forth in Section 4(a) of Form 19b–4A.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED CHANGE

The Exchange has not solicited comments regarding the proposed change to Rule 46 and has received none.

BURDEN ON COMPETITION

The proposed rule change will not impose any burden on competition.

The foregoing rule change has become effective, pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by July 11, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

JUNE 9, 1977.

[FR Doc.77-17533 Filed 6-17-77;8:45 am]

[Release No. 34–13618; File No. SR–PSE–77–14]

PACIFIC STOCK EXCHANGE INC.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. 94–29, 16 (June 4, 1975), notice is hereby given that on June 6, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

PSE'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The Pacific Stock Exchange Incorporated ("PSE") proposes to amend Rule XIII, its rule imposing restrictions on off-board trading, to add exemptions for transactions in securities not listed and registered on any national securities exchange and that are traded on PSE pursuant to unlisted trading privileges,[1] and for securities listed solely on PSE if the issuer of such securities applies for delisting and PSE applies for unlisted trading privileges with respect to such security.

PSE'S STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The proposed rule change is being made to facilitate the development of competitive markets involving PSE and over-the-counter market makers in situations where an issuer has applied for delisting and PSE is attempting to obtain unlisted trading privileges with respect to the securities of the issuer. The proposed rule change would allow such competition to develop during the period pending Securities and Exchange Commission review of and action on the applications for delisting and for unlisted trading privileges.

The proposed rule change contributes to the removal of impediments to and the perfection of the mechanism of a free and open market and a national market system.

Comments regarding the proposed rule change were neither solicited nor received.

The proposed rule change does not impose any burden on competition. Rather the proposed rule change would promote competition between over-the-counter market makers and market makers on the floor of the PSE.

By July 25, 1977, or within such longer period (i) as the Commisison may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by July 11, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

JUNE 10, 1977.

[FR Doc.77-17534 Filed 6-17-77;8:45 am]

[1] This portion of the proposal was previously filed as part of SR–PSE–76–17, which is pending before the Commission, and was published for comment in Securities Exchange Act Release No. 12539 (June 11, 1976), 41 FR 24787 (June 18, 1976).

[Release No. 9814]

LIQUIFUND, INC.

Filing of Application for Order Declaring

JUNE 13, 1977.

Notice is hereby given that Liquifund, Inc. ("Fund"), 75 West 190th Street, Bronx, New York 10468 (811–2519), a Maryland corporation registered under the Investment Company Act of 1940 ("Act") as a non-diversified, open-end management investment company, filed an application on December 24, 1976, and amendments thereto on May 21, 1977, and June 10, 1977, for an order of the Commission, pursuant to Section 8(f) of the Act, declaring that the Fund has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

According to the application, the Fund was incorporated in Maryland on April 8, 1974, and registered as an investment company under the Act on November 7, 1974; Liquifund Management Corporation serves as investment adviser to the Fund. The Fund represents that its shares were not registered under the Securities Act of 1933 and that the Fund never made, nor now intends to make, a public offering of its shares. The Fund represents further that four shareholders have held all of the capital stock issued by the Fund consisting of 10,200 shares, and that no other sales took place nor were any shares of the Fund redeemed. According to the Fund, the four shareholders of the Fund consist of three individuals and a closed corporation owned by two persons. The application states that the Fund has invested only in certificates of deposit and that, as of December 24, 1976, the assets of the Fund consisted of a $100,000 certificate of deposit, accrued interest thereon, and a nominal amount of cash.

According to the application, because of the inactivity of the Fund and the expense of maintaining it, the Board of Directors of the Fund recommended, and the shareholders, on November 15, 1976, unanimously voted, to cease operations, to dissolve and to liquidate the Fund. The Fund represents that on December 13, 1976, a distribution of $102,000 in cash was made to the shareholders, on a pro rata basis, for all shares of the Fund, and that no shares of the Fund remain outstanding. The Fund represents further that it is in the process of filing for voluntary dissolution under the laws of the state of Maryland, and that it has detained $355.51 in cash as a reserve for estimated general liquidation expenses.

Section 8(f) of the Act provides, in part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and that, upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than July 7, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Fund at the address stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an

order disposing of the application will be issued as of course, following said date, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 9813]

STANDARD SHARES, INC.

Filing of Application for Order Exempting Certain Transactions

JUNE 13, 1977.

Notice is hereby given that Standard Shares, Inc. ("Applicant") 230 Park Avenue, New York, New York, 10017, (812-4128), a closed-end, non-diversified management company, registered under the Investment Company Act of 1940 ("Act"), filed an application on April 25, 1977, pursuant to Sections 6(c) and 17 (b) of the Act for an order permitting Applicant to exchange a 6% unsecured promissory note (the "Note") of Brand Insulations, Inc. ("Brand"), in principal amount of $1,000,000, payable on May 1, 1977, for a new promissory note (the "New Note") of Brand, in principal amount of $1,000,000, payment upon which will not be due until 1979, when semi-annual payments of $250,000 each will commence. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

Applicant asserts that Brand, which is engaged primarily in the mechanical insulation contracting business, has approximately 820 common stockholders, including Applicant, which holds nearly 51% of the outstanding voting shares. Applicant further states that if it were to exercise certain conversion rights, it would hold approximately 90% of Brand's outstanding common shares and 91% of its outstanding voting shares. By reason of its ownership of Brand voting securities, Applicant is an affiliated person of Brand as defined in Section 2(a) (3) of the Act to include as an affiliated person of another person any person owning 5% or more of the outstanding voting securities of such other person and any person controlling such other person.

Applicant states that at January 31, 1977, it had total assets of approximately $122,700,000, of which approximately $2,270,000, or less than 2%, were invested in Brand in the form of common and preferred stock and several notes.

The application states that, in April, 1976, when Applicant initially made its investment in Brand, it was assumed by the parties that Brand would be able to meet its then restructured debt obligations, including its obligation to repay $1,000,000 on May 1, 1977, pursuant to the terms of the Note. Applicant states, however, that it is presently the opinion of Brand's Board of Directors and Applicant's management, that payment of the Note at its May 1, 1977, maturity date would have strained Brand's resources and put Brand into a precarious financial condition.

Applicant further asserts that Brand's particular problem in repaying the Note is the effect which such repayment would have upon its working capital. It is asserted that Brand must maintain a significantly better than marginal level of working capital in order to convince builders and prime contractors that it is now a reliable bidder with respect to work scheduled to begin a year to two years in the future. The application further represents that although Brand's new management has achieved considerable success in managing the difficult cash flow problems, it has been able to obtain only a $1,000,000 line of bank credit, which is approximately half the amount it has sought and which is insufficient to finance Brand's cyclical cash flow problems and pay in full the $1,000,000 that was due on the Note at May 1, 1977.

Accordingly, Applicant and Brand have agreed in an Extension Agreement to defer payment of the $1,000,000 obligation until April 1, 1979, at which time Brand will make the first of four semi-annual installments of $250,000 of the New Note. These arrangements take into account, and assume, that Brand will pay, at maturity, an existing $300,000 note held by Applicant, which matures on January 2, 1978. The New Note provides that Applicant can demand payment in full either upon default of certain other obligations of Brand or on or after January 2, 1980.

The proposed exchange of the New Note for the Note might be deemed to constitute a sale of the New Note to Applicant, in violation of Section 17(a) of the Act, which, in pertinent part, prohibits an affiliated person of a registered investment company, acting as principal, from selling any security to such registered company. Consequently, Applicant seeks an exemption from Section 17(a) pursuant to Section 17(b) of the Act, which provides that the Commission upon application shall exempt a proposed transaction from the provisions of Section 17(a) if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are fair and reasonable and do not involve overreaching on the part of any person concerned and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

Applicant asserts that the exchange of the New Note for the Note will be fair and reasonable to Brand in that deferral of payment will alleviate Brand's continuing shortage of working capital, strengthen Brand's interim financial resources and assist it in obtaining jobs from potential builders and prime contractors and enable Brand to repay the $1,000,000 on the new maturity dates without undue strain on its cash flow and working capital position. In general, Applicant asserts that to the extent that Brand is re-established as a viable entity, all of Brand's shareholders will benefit.

The application further states that, in the opinion of Applicant, the proposed exchange would be fair to, and benefit, Applicant in that it is preferable to forego the short-term benefits of receiving $1,000,000 on May 1, 1977, given the possible adverse consequences such a payment might have upon the potential value of Applicant's investment in Brand; deferral could materially increase the long-term profitability potential of Applicant's investment in Brand; and a $1,000,000 debt investment in Brand yielding 6% is not unreasonable given Brand's regular interest payment record, the insertion of protective default provisions in the New Note and the probability that if Standard had received payment on the Note on May 1, 1977, Brand would be unable to pay the $300,000 note due Applicant on January 2, 1978. Applicant further states that, by reason of an agreement with the holders of Brand Series A Preferred Shares, Applicant would, if it had received repayment of the $1,000,000, have been required to apply approximately $510,000 of such amount to the purchase of such shares. To the extent of that amount, therefore, receipt of repayment would, in effect, constitute for Applicant an exchange of a Brand Note for Brand Series A Preferred Shares.

The application also states that the proposed exchange would be consistent with Aplicant's policies with respect to securities investments, would not involve overreaching on the part of any person concerned, and would be consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

The application pertains to a transaction which might be deemed to have been consummated as of May 1, 1977, the maturity date of the Note, at which time Applicant elected not to demand payment on the Note. While the application was filed before such date, it also requests relief pursuant to Section 6(c) of the Act, which provides that the Commission may conditionally or unconditionally exempt any person or transaction from any provision of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than July 8, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

U.S. WATER CO., INC.

Suspension of Trading

JUNE 10, 1977.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the securities of U.S. Water Co., Inc., being traded on a national securities exchange or otherwise is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 2:10 p.m. (EDT) on June 10, 1977 through June 19, 1977.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area No. 1340]

WISCONSIN

Declaration of Disaster Loan Area

Wood County and adjacent counties within the State of Wisconsin constitute a disaster area because of physical damage to wells resulting from drought which occurred from June 17, 1976, through May 12, 1977. Eligible persons, firms and organizations may file applications for loans for physical damage as a result of drought until the close of business on August 11, 1977, and for economic injury until the close of business on March 10, 1978, at:

Small Business Administration, District Office, 122 West Washington Avenue, Room 700, Madison, Wisconsin 53703.

or other locally announced locations.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Date: June 10, 1977.

A. VERNON WEAVER,
Administrator.

[Application No. 06/06-5192]

FINANCIAL INVESTMENTS, INC.

Application for a License to Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under Section 301(d) of the Small Business Investment Act of 1958, as amended (Act) (15 U.S.C. 661 et seq.) has been filed by Financial Investments, Inc. (applicant), with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1977).

The officers and directors are as follows:

Donald J. Locke, President, Treasurer, Director and 100 percent Stockholder, 6205 Northwest Grand Blvd., 6-E, Oklahoma City, Oklahoma 73118.

Ethel M. Locke, Vice President and Director, 215 W. Tonkawa Street, Norman, Oklahoma 73069.

Wanda M. Locke, Secretary and Director, 6205 Northwest Grand Blvd., Oklahoma City, Oklahoma 73118.

The applicant, an Oklahoma Corportion, will maintain an office at 1300 Southeast 82nd, Oklahoma City, Oklahoma 73149, and will begin operations with $300,000 of paid-in capital and paid-in surplus derived from the sale of 300,000 shares of common stock at $1 per share to Mr. Donald J. Locke. Mr. Locke operates Locke Plumbing Supply Co. in Oklahoma City and owns various real estate interests in Oklahoma.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general busines reputation and character of the proposed owner and management and the probability of successful operations of the applicant under this management, including adequate profitability and financial soundness, in accordance with the Act and SBA Rules and Regulations.

Any person may, on or before July 5, 1977, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Oklahoma City, Oklahoma.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 077-112]

PUBLIC INPUT TO COAST GUARD REGULATIONS DEVELOPMENT

Solicitation of Comments

The Marine Safety Council of the Coast Guard is presently examining methods whereby the "notice and comment" method of developing regulations under the Administrative Procedures Act can be reinforced to provide for increased public input.

Most of the Coast Guard's regulatory proposals solicit written comments within a 45 day comment period. When it is expected that rulemaking proposals will result in significant interest warranting a public hearing, one or more hearings are scheduled. Normally hearings are scheduled in Washington, D.C., unless a geographical concentration of the regulated public mandates a location other than or in addition to Wash-

ington, D.C. If more than one hearing for a particular rulemaking is deemed necessary the additional hearing is usually held at a major West Coast port.

The Coast Guard is soliciting views, opinions, and ideas to provide an opportunity for increased input during rulemaking development from all sectors of the public. These ideas need not be modifications of traditional procedures but may be totally new concepts with the caveat that the Administrative Procedures Act must be adhered to.

Anyone interested in commenting on this matter should submit their comments, in writing and referring to this Notice (CGD 077-112), to the Commandant (G-CMC/81), U.S. Coast Guard, Washington, D.C. 20590. Comments should be received by August 15, 1977 to be considered.

Dated: June 6, 1977.

G. H. PATRICK DURSLEY,
Chairman, Marine Safety Council.

Federal Railroad Administration

[Docket No. RFA 511-77-2]

PURCHASE OF TRUSTEE'S CERTIFICATES

Receipt of Application

Project: Notice is hereby given that on May 26, 1977, William M. Gibbons ("Trustee"), Trustee of the Chicago, Rock Island and Pacific Railroad Company, Debtor ("Rock Island"), 332 South Michigan Avenue, Chicago, Illinois 60605, submitted to the Federal Railroad Administration ("FRA") an application under section 511 of the Railroad Revitalization and Regulatory Reform Act of 1976, 45 U.S.C. 831, to secure a commitment by the United States to guarantee trustee's certificates or other evidence of indebtedness to be issued by the Trustee in the principal amount of $81,000,000. Loan arrangements have not been completed at this time.

The proceeds of the loan are to be used by the applicant to (1) add additional capacity to the car shops at Little Rock, Arkansas, and El Reno, Oklahoma, (2) rehabilitate a total of approximately 4,000 freight cars, (3) repair locomotives, (4) acquire eight new locomotives, (5) acquire 300 ballast cars, and (6) acquire 1,587 new revenue freight cars of various types.

Justification for Project: The Trustee states that the car repair and acquisition program described above will reduce dependence on borrowed cars, alleviate car shortages, and reduce loss of business. The Trustee further states that the acquisition of ballast cars is required by the Rock Island to meet its needs for track rehabilitation projects planned or currently under way on the Rock Island and will free up open top hopper cars for revenue service. The Trustee states that the acquisition of eight new locomotives and the repair of units currently in need of repair will enable the Trustee to meet the increased traffic demands which are expected in the immediate future.

Comments: Interested persons may submit written comments on the application to the Associate Administrator for Federal Assistance, Federal Railroad Administration, 400 Seventh Street S.W., Washington, D.C. 20590, not later than the comment closing date shown below. Such submission shall indicate the docket number shown on this notice and state whether the commenter supports or opposes the application and the reasons therefor. To the extent permitted by law or regulation, the application will be made available for inspection during normal business hours in Room 5415 at the above address of the FRA.

The comments will be taken into consideration by the FRA in evaluating the application. However, formal acknowledgment of the comments will not be provided.

The FRA has not approved or disapproved this application, nor has it passed upon the accuracy or adequacy of the information contained therein.

(Sec. 511 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94-210), as amended.)

Dated: June 15, 1977.

Comment closing date: July 20, 1977.

CHARLES SWINBURN,
Associate Administrator for Federal Assistance, Federal Railroad Administration.

[FR Doc.77-17547 Filed 6-17-77;8:45 am]

[Docket No. RFA 505-77-7]

PURCHASE OF TRUSTEE'S CERTIFICATES

Receipt of Application

Project: Notice is hereby given that on May 26, 1977, William M. Gibbons ("Trustee"), Trustee of the Chicago, Rock Island and Pacific Railroad Company, Debtor ("Rock Island"), 332 South Michigan Avenue, Chicago, Illinois 60605, submitted to the Federal Railroad Administration ("FRA") an application under section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976 ("Act"), 45 U.S.C. 825, seeking financial assistance through the sale to the United States of trustee's certificates in the principal amount of $55,000,000. The Trustee proposes to pay the interest on the certificates "* * * in 20 equal annual payments, beginning with the 11th anniversary of the original date such issuance, with interest to accrue commencing with the 11th anniversary at the rate of 2.03 percent". The Trustee proposes to pay the entire principal on the 30th anniversary of the original date of issuance.

The proceeds of the sale of trustee's certificates are to be used by the applicant to finance the rehabilitation and improvement of the Rock Island's main line between West Davenport, Iowa, and Moseby Junction, Missouri, a distance of approximately 286.2 main line route miles, and two branch line segments in Iowa (Ainsworth to Washington and Eldon to Ottumwa).

Major items contained in the work program include subgrade soil stabilization, replacement of cross and switch ties, rehabilitation of roadway crossings, renewal of ballast, surfacing, installation of new and secondhand continuous welded rail, extension of sidings, and rehabilitation of intermediate yards.

Justification for Project: The Trustee states that the work program described above is necessary to assure the successful coordination and consolidation of the facilities of the Chicago, Milwaukee, St. Paul and Pacific Railroad ("Milwaukee Road") between Culver, Iowa and Polo, Missouri. The Trustee states that the rehabilitation of this line segment and the continued tenancy of the Milwaukee Road will provide essential freight service by enabling the average density of the Trustee's line to exceed 20 million gross tons (the highest traffic density level used by the Administrator in determining the public benefits of proposed projects), decrease costs of service due to economies of scale and sharing of maintenance and rehabilitation costs, and improve economic efficiency and productivity by decreasing transit time by more than six hours, improving reliability, and reducing excess capacity in a Corridor of Consolidation Potential, as identified in the final report under section 503 of the Act.

Required Determinations and Findings: Before the Federal Railroad Administrator ("Administrator") may approve the application, he must determine that the requested financial assistance is in the public interest. In addition, section 505(d)(2)(B) of the Act provides that no trustee's certificate shall be purchased under the section unless and until the Administrator makes a written finding that—

(i) such certificates cannot otherwise be sold at a reasonable rate of interest;

(ii) the project to be financed can reasonably be expected to be maintained as part of a financially self-sustaining railroad system; and

(iii) the probable value of the assets of the railroad in the event of liquidation provides reasonable protection to the United States.

Comments: Interested persons may submit written comments on the application to the Associate Administrator for Federal Assistance, Federal Railroad Administration, 400 Seventh Street SW., Washington, D.C. 20590, not later than the comment closing date shown below. Such submittal shall indicate the docket number shown on this notice and state whether the commenter supports or opposes the application and the reasons therefor, including whether the required determinations and findings can be made. To the extent permitted by law or regulation, the application will be made available for inspection during normal business hours in Room 5415 at the above address of the FRA.

The comments will be taken into consideration by the FRA in evaluating the application. However, formal acknowledgement of the comments will not be provided.

The FRA has not approved or disapproved this application, nor has it passed upon the accuracy or adequacy of the information contained therein.

(Sec. 505 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94-210), as amended.)

Dated: June 15, 1977.

Comment closing date: July 20, 1977.

CHARLES SWINBURN,
Associate Administrator for Federal Assistance, Federal Railroad Administration.

[FR Doc. 77-17548 Filed 6-17-77;8:45 am]

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Public Debt Series No. 14-77]

TREASURY NOTES OF JUNE 30, 1979

Series R-1979

JUNE 15, 1977.

1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $1,500,000,000 of United States securities, designated Treasury Notes of June 30, 1979, Series R-1979 (CUSIP No. 912827 GU 0). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may also be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated June 30, 1977, and will bear interest from that date, payable on a semiannual basis on December 31, 1977, and each subsequent 6 months on June 30 and December 31 until the principal becomes payable. They will mature June 30, 1979, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Tuesday, June 21, 1977. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, June 20, 1977.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $5,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5% of the face amount of securities applied for (in the form cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full at the weighted average price (in three decimals) of accepted competitive tenders, and competitive tenders with the lowest yields will be accepted to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the weighted average price of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full or when the price is over par.

4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Thursday, June 30, 1977, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by

check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Monday, June 27, 1977, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Friday, June 24, 1977, if the check is drawn on a bank in another Federal Reserve District. Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

W. MICHAEL BLUMENTHAL,
Secretary of the Treasury.

VETERANS ADMINISTRATION

WAGE COMMITTEE

Meetings

Pursuant to the provisions of section 10 of Public Law 92-463, notice is hereby given that meetings of the Veterans Administration Wage Committee will be held on:

Thursday, July 14, 1977.
Thursday, August 11, 1977.
Thursday, August 25, 1977.
Thursday, September 8, 1977.

The meetings will convene at 2:30 p.m. and will be held in Room 1144C, Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, D.C.

The Committee's primary responsibility is to consider and make recommendations to the Chief Medical Director, Department of Medicine and Surgery, on all matters involved in the development and authorization of wage rate schedules for Federal Wage System (blue-collar) employees.

At these scheduled meetings, the Committee will consider wage survey specifications, wage survey data, local committee reports and recommendations, statistical analyses, and proposed wage schedules derived therefrom.

Under the provisions of section 10(d) of Public Law 92-463, the Federal Advisory Committee Act, as amended by Public Law 94-409, meetings may be closed to the public when they are concerned with matters listed under section 552b, Title 5, United States Code. Two of the matters so listed are those related solely to the internal personnel rules and practices of an agency (5 U.S.C 552(c)(2)), and those involving trade secrets and commercial or financial information obtained from a person and privileged or confidential (5 U.S.C. 552b(c)(4)).

Accordingly, I hereby determine that all portions of the meetings cited above will be closed to the public because the matters considered are related to the internal rules and practices of the Veterans Administration (5 U.S.C 552b(c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C 552b(c)(4)).

However, members of the public who wish to do so are invited to submit material in writing to the Chairman regarding matters believed to be deserving of the Committee's attention. Additional information concerning these meeting may be obtained by contacting the Chairman, Veterans Administration Wage Committee, Room 1175, 810 Vermont Avenue, NW., Washington, DC.

Dated: June 14, 1977.

MAX CLELAND,
Administrator.

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. MC-103]

PROCEDURES IN MOTOR CARRIER APPLICATION PROCEEDINGS WHERE FOR-HIRE CARRIAGE IS SUBSTITUTED FOR PROPRIETARY OPERATIONS

Oral Argument

The Interstate Commerce Commission will hold oral argument in the above-entitled proceeding in order to afford the parties a further opportunity to make their views known to the Commission. Oral argument is scheduled to commence at the office of the Commission in Washington, D.C. at 9:30 a.m. on August 3, 1977.

The August 3rd date has been selected to afford the parties an advance opportunity to consider the views expressed by other parties to this proceeding, and, on the basis of said consideration, to determine whether there is a possibility of consolidating their presentations at oral argument with other parties expressing the same or similar views. Our review of the representations filed in this proceeding reveals that there is substantial repetition of arguments by both the parties supporting and opposing the involved proposal. In these premises, we would strongly advise, in the interest of expediency and to avoid unnecessary repetition, that the related parties in interest explore the possibility of consolidating their presentations.

In response to the notice of filing of petition seeking institution of rulemaking in this proceeding, published in the FEDERAL REGISTER on July 22, 1976, 138 total parties submitted 73 individual or joint written statements of verified facts, views, and arguments regarding the proposed procedures. Attached hereto as an appendix is a service list of the parties or their representatives who have submitted statements. Within 25 days after the publication of this notice the persons desiring to participate in the oral argument shall by letter to Assistant Deputy Director, Office of Proceedings, Section of Operating Rights, Room 5316, Interstate Commerce Commission, Washington, D.C. 20423, advise the Commission (1) that they have served the other persons on the list with copies of their statements previously filed with the Commission in this proceeding or a summary thereof, (2) of the name of the representative who will appear at oral argument on their behalf or on behalf of the party in interest represented, (3) of the names of other parties having similar positions who will have the same representative and (4) of the approximate amount of time needed to present their position at oral argument. If, after examining the statements of other parties planning to present oral argument, parties decide to consolidate their arguments, the Commission should be informed of such decision by letter to the above-noted address no later than 15 days before the date of the argument. Prior to the concerned oral argument a schedule will appear, in the form of a notice in the FEDERAL REGISTER, listing those parties who will participate.

Although the Commission has made no determination on the merits of petitioner's proposal, or whether or not to adopt the proposal with or without modification, it would be helpful to the Commission if the parties at oral argument would address the following issues, which are not to be construed as all inclusive, but rather as focal points for informed discussion:

1. Would adoption of the proposed regulations be consistent with the statutorily imposed requirements of public convenience and necessity set forth in section 207 of the Interstate Commerce Act, as interpreted by Pan American Bus Lines Operation, 1 M.C.C. 190 (1936)?

(a) Would implementation of the involved procedures, and the institution of motor carrier services thereunder, serve a useful purpose, responsive to a public demand or need?

(b) Could this purpose be served as well by existing authorized carriers?

(c) Could the proposal be instituted without endangering or impairing the operations of existing motor carriers contrary to the public interest?

2. Would promulgation of the proposed regulations be consistent with the public interest and the national transportation policy? More specifically, can petitioners proposal concerning issuance of contract carrier authority be reconciled with the definition of contract carriage contained in section 203(a)(15) of the act, and with the criteria to be considered in applications for permits set forth in section 209(b) of the act?

3. Does the Commission hold appropriate authority under its general rulemaking powers to grant relief of the nature sought in the instant proceeding?

4. Are existing procedures, including those contained in section 210 of the act providing for issuance of temporary authority, sufficiently flexible and adequate to effectuate substitution of for-hire for private carriage? If not, how are they deficient?

5. Would implementation of the instant proposal have the beneficial effect of reducing the Commission's workload?

6. Should the proposed regulations, if promulgated, be limited to the transportation of bulk commodities?

7. Is private carriage inherently less efficient and economical than is regulated for-hire carriage? If so, is such inefficiency attributable to existing regulatory policies and practices?

8. Why should existing carriers be prohibited from opposing the issuance of authority under the proposed regulations, where such opposition is predicated solely upon their conflicting authorities? Should they be permitted to oppose an application for such authority if they have solicited the involved traffic, in addition to holding the requisite authority? What weight should such opposition have if, at some time, existing carriers had participated in the involved traffic?

9. What, if any, would be the potential abuses which might arise as a result of the Commission's adoption of the proposed regulations? Is it possible to modify the involved proposal to lessen the potential for abuse? Would it be possible to effectively police any regulations promulgated pursuant to petitioners proposal to eliminate any potential for abuse of the new procedures?

10. To what extent, if any, would existing carriers be adversely affected by adoption of the proposed regulations? How might the proposal be modified to eliminate any potential for the injury of existing certificated carriers?

11. If operating authority under the proposed regulations is issued, how could the Commission[1] effectively insure that the newly authorized carrier does not acquire a portion of the shipper's traffic in excess of that share previously transported in private carriage? Notice of oral argument shall be given to the general public by depositing a copy of this notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection and by delivering a copy of the notice to the Director, Office of the Federal Register for publication therein as notice to interested persons.

H. GORDON HOMME, Jr.,
Acting Secretary.

[Notice No. 416]

ASSIGNMENT OF HEARINGS

JUNE 15, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 139967 Sub 1, SPS Transport Co. now assigned July 14, 1977 at Los Angeles, California is cancelled, application dismissed.
MC 6319 (Sub-8), California Cartage Co., Inc., now being assigned July 14, 1977 (2 days) at Los Angeles, California, in a hearing room to be later designated.
MC 118989 (Sub-145), Container Transit, Inc., now being assigned July 19, 1977 (2 days) in Room 3855, 230 South Dearborn Street, Chicago, Illinois.
MC 117940 Sub 202, Nationwide Carriers, Inc. now assigned June 27, 1977 at New York, New York will be held in Room 1434, Federal Building, 26 Federal Plaza instead of Room 2839 of the same address.
MC 140134 (Sub-7), Caldarulo Trading Co., now assigned July 19, 1977 at Chicago, Illinois, has been postponed indefinitely.
MC 140829 Sub-29, Cargo Contract Carrier Corp., now being assigned July 19, 1977 (1 day) at Chicago, Illinois and will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.
MC 123389 Sub 32, Crouse Cartage Company now being assigned July 22, 1977 (1 day) at Chicago, Illinois and will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.
MC 136849 Sub 1, E & H Distributing Co., Contract Carrier Application now assigned July 6, 1977 at Carson City, Nevada is being postponed indefinitely.
MC 139193 (Sub-Nos. 47 and 49), Roberts & Oake, Inc., now assigned July 22, 1977 at Chicago, Illinois has been postponed indefinitely.

H. G. HOMME, JR.,
Acting Secretary.

[Notice No. 76]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JUNE 14, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 1328 (Sub-No. 27TA), filed June 2, 1977. Applicant: MGS TRANSPORTATION, INC., P.O. Box 270, Alexandria, Ind. 46001. Appplicant's representative: Charles Garrett, P.O. Box 270, Alexandria, Ind. 46001. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Plastic products*, from the plantsite of Amoco Plastic Products Company, Seymour, Ind., to points in Michigan, Ohio, Illinois, Kentucky and Wisconsin; and *return loads* from those points of *materials and supplies* used in manufacturing plastic products, (except in bulk), under a continuing contract, or contracts, with Amoco Plastic Products Company, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. SUPPORTING SHIPPER(S): Amoco Plastic Products Company, P.O. Box 1000, Seymour, Ind. 47274. Send protests to: J. H. Gray, District Supervisor, Interstate Commerce Commission, 343 West Wayne Street, Suite 113, Fort Wayne, Ind. 46802.

No. MC 82079 (Sub-No. 48TA) (Correction), filed April 21, 1977, published in the FEDERAL REGISTER issue of May 31, 1977, and republished as corrected this issue. Applicant: KELLER TRANSFER LINE, INC., 5635 Clay Avenue SW., Grand Rapids, Mich. 49508. Applicant's representative: Edward Malinzak, 900 Old Kent Building, Grand Rapids, Mich. 49503. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food and food products, fresh and frozen products* which require protection from heat or cold in mechanically refrigerated vehicles (except commodities in bulk), from Chicago, Ill., and its commercial zone to points in Michigan on, north and west of a line beginning at the intersection of U.S. 23 and the Michigan/Ohio border north to the intersection of U.S. 23 and M-21 and east on M-21 and M-115 and north on M-15 to Bay City, Mich., such traffic to be restricted to that originating at the origin point and destined to the destination points. Further restricted to traffic originating at the storage and warehouse facilities of U.S. Cold Storage in Chicago, Ill., for 180 days. Supporting shipper(s): U.S. Cold Storage, 8424 W. 47th Street, P.O. Box 312, Lyons, Ill. 60534. Send protests to: C. R. Flemming, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 225 Federal Building, Lansing, Mich. 48933. The purpose of this republication is to add the territorial description.

No. MC 96992 (Sub-No. 3TA), filed May 27, 1977. Applicant: HIGHWAY PIPELINE TRUCKING CO., P.O. Box 1517, Edinburg, Tex. 78539. Applicant's representative: Kenneth R. Hoffman, 1100 Milam Bldg., Suite 3300, Houston, Tex. 77002. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Frozen vegetables, frozen fruits, frozen berries, and frozen citrus concentrate*, (except in bulk), and (B) *Commodities* which are otherwise exempt from regulation under Section 203(b) (6) of the Interstate Commerce Act, when moving in the same vehicle at the same time

with commodities in paragraph A above, from points in Cameron, Hidalgo, Webb and El Paso Counties, Tex., to points in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Massachusetts, Mississippi, New Jersey, New York, Pennsylvania, Tennessee, South Carolina, North Carolina, Virginia, West Virginia, Rhode Island, New Hampshire and District of Columbia, restricted in (a) and (b) above to the use of vehicles equipped with mechanical refrigeration for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Bluebonnet Foods, Inc. Monte Alto, Tex. 78538. International Frozen Foods, Inc. P.O. Box 607, McAllen, Tex. 78501. Sun Valley Sales Company, P.O. Box 3292, McAllen, Tex. 78501. Rio Sales Inc. P.O. Box 1496, McAllen, Tex. 78501. Send protests to: Richard H. Dawkins, District Supervisor, Interstate Commerce Commission, Room B-400 Federal Building, 727 E. Durango Blvd. San Antonio, Tex. 78206.

No. MC 103993 (Sub-No. 895TA), filed June 3, 1977. Applicant: MORGAN DRIVE-AWAY, INC., 28651 U.S. 20 West, Elkhart, Ind. 46514. Applicant's representative: Paul D. Borghesani, 28651 U.S. 20 West, Elkhart, Ind. 46514. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers*, designed to be drawn by passenger automobiles (except recreational vehicles), in initial movements, from Giles County, Tenn., to points in Alabama, Arkansas, Georgia, Illinois, Indiana, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, Ohio, South Carolina, Tennessee, Virginia, and West Virginia, for 180 days. Supporting shipper(s): American Pride Homes, P.O. Box 173, Ardmore, Tenn. 38449. Send protests to: J. H. Gray District Supervisor, Interstate Commerce Commission, 343 West Wayne Street, Suite 113, Fort Wayne, Ind. 46802.

No. MC 103993 (Sub-No. 896TA), filed June 3, 1977. Applicant: MORGAN DRIVE-AWAY, INC., 28651 U.S. 20 West, Elkhart, Ind. 46514. Applicant's representative: Paul D. Borghesani, 28651 U.S. 20 West, Elkhart, Ind. 46514. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers and semi-trailers*, other than those designed to be drawn by passenger automobiles, in initial movements, from Minneapolis-St. Paul, Minn., to points in the United States (except Alaska and Hawaii), for 180 days. Supporting shipper(s): Butler Manufacturing Company, 900 Sixth Avenue, S.E. Minneapolis, Minn. 55414. Send protests to: J. H. Gray District Supervisor, Interstate Commerce Commission, 343 West Wayne Street, Suite 113, Fort Wayne, Ind. 46802.

No. MC 109708 (Sub-No. 70TA) (Correction), filed May 12, 1977. Applicant: INDIAN RIVER TRANSPORT CO., doing business as INDIAN RIVER TRANSPORT, INC., P.O. Box 966, 908 North N.W. Park St., Dundee, Fla. 33462. Applicant's representative: James E. Wharton, Suite 811, Metcalf Bldg., 100 S. Orange Ave., Orlando, Fla. 32801. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Vinegar*, in bulk, in tank vehicles, from points in Massachusetts to points in South Carolina, for 180 days. Supporting shipper(s): Piggie Park Enterprises, P.O. Box 847, West Columbia, S.C. 29169. Send protests to: Donna M. Jones, Transportation Assistant, Interstate Commerce Commission, Monterey Bldg., Suite 101, 8410 N.W. 53rd Terrace, Miami, Fla. 33166. The purpose of this republication is to add in tank vehicles, and correct the zip code under supporting shipper, which was published as 29269, and corrected as 29169.

No. MC 113828 (Sub-No. 245TA) filed May 31, 1977. Applicant: O'BOYLE TANK LINES, INC., P.O. Box 30006, Washington, D.C. 20014. Applicant's representative: William P. Sullivan, Sullivan, Dubin & Kingsley, Federal Bar Bldg., West, Suite 1030, 1819 H Street, N.W., Washington, D.C. 20006. Michael A. Grimm, O'Boyle Tank Lines, Inc., P.O. Box 30006, Washington, D.C. 20014. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sulphur dioxide*, in bulk, from Norfolk, Va., to Colorado, Iowa, New Hampshire, Vermont and Wisconsin for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Virginia Chemicals, Inc., 3340 W. Norfolk Road, Portsmouth, Va. 23703. Send protests to: W. C. Hersman District Supervisor, Interstate Commerce Commission, 12th & Constitution Avenue, N.W., Room 1413, Washington, D.C. 20423.

No. MC 135797 (Sub-No. 72TA) filed May 2, 1977. Applicant: J. B. HUNT TRANSPORT, INC., P.O. Box 200, U.S. Hwy. 71, Lowell, Ark. 72745. Applicant's representative: Don Garrison, 324 North Second Street, Rogers, Ark. 72756. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Unbleached white flour*, from Clovis, N. Mex., to the plantsite and warehouse facilities of Arrowhead Mills, Inc. at or near Hereford, Tex.; and points in Florida and Pennsylvania, (1) diet and nutritional foods; (2) drugs, vitamins and toilet preparations; (3) food grinders, water purifiers, can openers, container lids, cookbooks, seed sprouting kits, safety matches, candles and seeds, from the facilities of Arrowhead Mills, Inc. at or near Hereford, Tex., to points in Arizona, California, Colorado, Illinois, Missouri and Oklahoma, restricted in (1), (2), and (3) are applicable when moving in mixed shipments on traffic originating at the plantsite and warehouse facilities of Arrowhead Mills, Inc. at or near Hereford, Tex. for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Arrowhead Mills, Inc. P.O. Box 866, Hereford, Tex. 79045. Send protests to: William H. Land, Jr. District Supervisor, 3108 Federal?

No. MC 116280 (Sub-No. 17TA) (correction), filed May 9, 1977, published in the FEDERAL REGISTER issue of May 25, 1977, and republished as corrected this issue. Applicant: W. C. McQUAIDE, INC., 153 Macridge Avenue, Johnstown, Pa. 15904. Applicant's representative: Robert E. McFarland, 999 West Big Beaver Road, Suite 1002, Troy, Mich. 48084. 1

AGENCY HOLDING THE MEETING: Commodity Futures Trading Commission.

TIME AND DATE: 10 a.m., June 21, 1977.

PLACE: 2033 K Street NW., Washington, D.C., 5th Floor Hearing Room.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Discussion of Commission Calendar.
2. Inquiry into Operations of Spot Price Committee.

CONTACT PERSON FOR MORE INFORMATION:

Jane Stuckey, 254-6314.

[S-686-77 Filed 6-16-77;9:11 am]

2

AGENCY HOLDING THE MEETING: Federal Communications Commission.

TIME AND DATE: 9:30 a.m., Wednesday, June 22, 1977.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Open Commission Meeting.

MATTERS TO BE CONSIDERED:

Agenda, Item No., and Subject

General—1—Response to GAO Report Titled "Establishing a Proper Fee Schedule Under the Independent Offices Appropriation Act of 1952".

Common Carrier—1—Section 214 application (File No. W-P-C-900) of ITT Corporate Communication Services, Inc. for certificate to establish and operate a "resale" common carrier switched service private line network in the contiguous United States and the District of Columbia.

Common Carrier—2—Remand from the U.S. Court of Appeals for D.C. Circuit of a Commission order denying a petition for reconsideration of the Commission's decision finding American Telephone and Telegraph Company to be in violation of Sections 201(a), 202(a), 214(a), and 203(c) of the Communications Act of 1934, as amended, in the case of: In the Matter of Referral of Chastain et al. v. A.T.&T. from the U.S. District Court for the District of Columbia, Docket No. 19763.

Cable Television—1—Petition for partial reconsideration of the Commission's decision in Television Wisconsin, Inc., FCC 77-97, 62 FCC 2d 1161, released February 16, 1977, filed on behalf of Television Wisconsin, Inc., licensee of Station WISC-TV, Madison, Wisconsin, and Evening Telegram Company.

Cable Television—2—Petition for special relief filed by Total Television of Amarillo, operator of a cable television system at Amarillo, Texas.

Cable Television—3—Applications for certification (CAC-06951-6952) to add Stations KVOF-TV (Spec., Channel 38) and KDTV, (Spec., Channel 60), San Francisco, California, filed by Big Valley Cablevision, Inc., operator of existing cable television systems serving the unincorporated areas of San Joaquin County, and Stockton, California; and opposition filed by KLOC Broadcasting, Inc., licensee of Station KLOC-TV, Modesto, California to Big Valley's carriage of Station KDTV.

Assignment of License and Transfer of Control—1—Applications for voluntary assignment of licenses of UHF television stations: KBHK-TV, San Francisco, California (BALCT-632); WFLD-TV, Chicago, Illinois (BALCT-633); WKBD-TV, Detroit, Michigan (BALCT-331); WLVI-TV, Cambridge, Massachusetts (BALCT-630); and WKBS-TV, Burlington, New Jersey (BALCT-634); from Kaiser Broadcasting Company to Field Communications Corporation; and requests for waivers of Commission's Top-50 Policy and Section 73.636(a) of the rules.

Renewal—1—Results of the Bureau's initial analysis of the informal objection alleging discriminatory employment practices against 36 Colorado broadcast stations filed by the Colorado Chapters of the National Organization for Women.

Renewal—2—Indianapolis Black Media Coalition's petition to deny renewal applications of five Indianapolis-area radio stations.

Television—1—Application (File No. BSTV-2) of WXON-TV, Inc., for authorization of subscription television operations on Channel 20, Detroit, Michigan.

Broadcast—1—Notice of proposed rule making proposing the deletion of Section 73.643(a) of the Commission's Rules regarding movie restrictions on subscription television, on remand from U.S. Court of Appeals.

Complaints and Compliance—1—Application for review filed March 7, 1977 by Dr. John Irvan Moritzky Choate of the Broadcast Bureau's ruling that it is outside the scope of the Commission's jurisdiction to investigate the use of television access by the National Collegiate Athletic Association (NCAA) to assure compliance with its rules.

Complaints and Compliance—2—Response filed by television station WNET, Newark, New Jersey, to the Commission's Notice of Apparent Liability for forfeiture for apparent violation of the personal attack rule.

Complaints and Compliance—3—Application for review of the Broadcast Bureau's March 22, 1977, ruling denying the fairness doctrine complaint of Karl E. Smith against ABC, CBS, and NBC.

Complaints and Compliance—4—Application for review filed by NBC of the Broadcast Bureau's ruling of September 24, 1976, that NBC apparently violated the "equal opportunities" provision of Section 315(a) of the Communications Act.

Complaints and Compliance—5—Request of American Broadcasting School: International for review of a staff ruling that no action would be taken concerning the use of a station's call sign and facilities in connection with another broadcasting school.

Complaints and Compliance—6—Application for review, filed on April 13, 1977, by Eugene S. Bivins, III of the Broadcast Bureau's ruling of April 5, 1977, denying his complaint against WJAC-TV, Johnston, Pennsylvania.

Complaints and Compliance—7—Application for review filed on May 14, 1976 by Council on Children, Media and Merchandising of the Broadcast Bureau's ruling concerning complaint against American Broadcasting Companies, Inc. and CBS, Inc.

Special—1—Discussion of proposed testimony on S. 1547, a bill to amend the Communications Act of 1934, as amended, with respect to penalties and forfeitures, and to authorize the FCC to regulate pole attachments, and for other purposes.

Special—2—Stereophonic broadcasting by AM stations.
Special—3—Adoption of standards for FM quadraphonic sound transmission.

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone number 202–632–7260.

Issued: June 15, 1977.

3

AGENCY HOLDING THE MEETING: Federal Deposit Insurance Corporation.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Board of Directors of the Federal Deposit Insurance Corporation met in closed session at 1:50 p.m. on Wednesday, June 15, 1977, by telephone conference call, to consider a request for an extension of time in which to file exceptions and for oral argument by a bank cited by Section 8 of the Federal Deposit Insurance Act.

In scheduling the meeting, the Board determined by recorded vote that Corporation business required consideration of this matter on less than seven days' notice to the public and that no earlier announcement of the meeting was possible.

The Board voted to close the meeting to public observation pursuant to subsections (c)(8) and (c)(9)(A) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8) and (c)(9)(A)).

Requests for information concerning the meeting may be directed to Mr. Alan R. Miller, Executive Secretary of the Corporation, at 202–289–4446.

Dated: June 15, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

[S–692 Filed 6–16–77;11:31 am]

4

AGENCY HOLDING THE MEETING: Federal Maritime Commission.

TIME AND DATE: June 20, 1977, 10 a.m.

PLACE: Room 12126, 1100 L Street NW., Washington, D.C. 20573.

STATUS: Open.

MATTER TO BE CONSIDERED:

1. Agreement No. 9981–5—Application for extension of term of approval of the Far East Discussion Agreement to June 20, 1978.

CONTACT PERSON FOR MORE INFORMATION:

Joseph C. Polking, Acting Secretary, 202–523–5727.

[S–687 Filed 6–16–77;9:11 am]

5

AGENCY HOLDING MEETING: Federal Power Commission.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: June 14, 1977 (42 FR 30467).

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: June 16, 1977, 2 p.m.

CHANGES IN THE MEETING:

Addition of G–7B, Docket No. CP77–21, Tennessee Gas Pipeline Company, Columbia Gulf Transmission Company and Southern Natural Gas Company; Docket No. CI76–730, Mobil Oil Corporation; Docket No. CI77–120, Texaco Inc.; M–O, National Peoples Action Group.

KENNETH F. PLUMB,
Secretary.

[S–691 Filed 6–16–77;10:40 am]

6

AGENCY HOLDING THE MEETING: Federal Trade Commission.

TIME AND DATE: 10:30 a.m., Friday, June 17, 1977.

PLACE: Room 432, Federal Trade Commission Building, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

Nonadjudicative Matters: (1) Consideration of Nonpublic Part II Matter.

CONTACT PERSON FOR MORE INFORMATION:

Leonard J. McEnnis, Jr., Office of Public Information: 202–523–3830. Recorded Message: 202–523–3805.

[S–690 Filed 6–16–77;10:16 am]

7

AGENCY HOLDING THE MEETING: National Science Board.

TIME AND DATE: June 23–24, 1977.

PLACE: New Mexico Institute of Mining and Technology, Room 26, Workman Hall, Socoro, New Mexico.

STATUS: As previously announce, parts of this meeting will be open to the public. One item has been added to the portion of the meeting closed to the public. Because this matter arose since the last meeting, no earlier announcement was possible.

MATTERS TO BE CONSIDERED:

Portion closed to the public:

Discussion of previously declined grant proposal.

CONTACT PERSON FOR MORE INFORMATION:

Miss Vernice Anderson 202–632–5840.

[S–694 Filed 6–16–77;11:55 am]

8

AGENCY HOLDING THE MEETING: Nuclear Regulatory Commission.

TIME AND DATE: Tuesday, June 21 and Wednesday, June 22, 1977.

PLACE: Commissioners' Conference Room, 1717 H St., NW., Washington, D.C.

STATUS: Some of these meetings will be open to public attendance, some will be closed to public attendance.

OPEN MATTERS TO BE CONSIDERED: Wednesday, June 22, 1:30 p.m.

(1) Amendments to 10 CFR Part 73 to Provide Upgraded Security Personnel and Qualification Requirements; and Amendments to 10 CFR Part 73 to Provide Strengthened Physical Protection Against Radiological Sabotage and Theft of Strategic Special Nuclear Material. (Approx. 1 hour.)

(2) Reconsideration of the Question of Classification for Light Water Nuclear Power Plant Physical Security Plans and Related Sensitive Information. (Approx. 1 hour.)

(3) Staff Presentation of Export-Import Licensing Regulations. (Approx. 1 hour.)

(4) Affirmation of NRDC Petition for Rulemaking on Waste Management; and Proposed Cost-Sharing Contract with the Electric Power Research Institute and the Westinghouse Electric Corporation. (The Affirmations will consist of votes on matters previously reviewed individually by the Commissioners and are expected to take no more than 5 minutes.)

CLOSED MATTERS TO BE CONSIDERED: Tuesday, June 21, 2:30 p.m.

(1) Discussion of Draft Opinion on W. Germany (Burgeraktion) Intervention Petition. (Approx. 1 hour.) (Exemptions 9, 10.)

(2) Discussion of Executive Branch Views of Tarapur Export License. (Approx. 1 hour.) (Exemptions 1, 10.)

(3) Draft Order—Florida Power & Light. (Approx. 30 minutes.) (Exemption 10.)

Wednesday, June 22, 10 a.m.

(1) Discussion of Sufficiency of Safeguards. (Approx. 1 hour.) (Exemptions 1, 4, 6.)

(2) Staff Presentation of Safeguards Risks Associated with Non-Power Reactors. (Approx. 1 hour.) (Exemptions 1, 4.)

CONTACT PERSON FOR MORE INFORMATION:

Walter Magee, 202–634–1410.

Dated: June 15, 1977.

WALTER MAGEE,
Office of the Secretary.

[S–685 Filed 6–16–77;2:04 pm]

9

AGENCY HOLDING THE MEETING: Securities and Exchange Commission.

TIME AND DATE: 11 a.m., June 15, 1977.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

STATUS: Closed meeting.

SUBJECT: Personnel matters.

Chairman Williams, Commissioners Loomis, Evans, and Pollack determined that Commission business required consideration of this matter and that no earlier notice thereof was possible.

JUNE 15, 1977.

[S–682 Filed 6–15–77;11:45 am]

10

AGENCY HOLDING THE MEETING: Securities and Exchange Commission.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of June 20, 1977, in Room 825, 500 North Capitol Street, Washington, D.C.

Closed meetings will be held on Tuesday, June 21, 1977, at 10 a.m. and immediately following the 10 a.m. open meeting on Wednesday. Open meetings will be held on Wednesday, June 22, 1977, at 10 a.m. and at 3 p.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(8)(9)A and (10) and 17 CFR 200.402(a)(4)(8)(9)(i) and (10).

Chairman Williams and Commissioners Loomis, Pollack, and Evans voted to hold the aforesaid meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, June 21, 1977, will be:

Formal Orders of Investigation.
Institution of Injunctive Actions.
Settlement of Administrative Proceedings.
Other litigation matters.
Referral of investigative files to Federal, State or Self Regulatory authorities.
Regulatory matters arising from or bearing enforcement implications.
Matters relating to issuer registration statements, proxies, tender offers, etc.
Authorization of staff member of testify in private litigation.
Requests for investigative transcripts.

The subject matter of the closed meeting scheduled for Wednesday, June 22, 1977, will be:

Institution of administrative proceedings.
Regulatory matters arising from or bearing enforcement implications.
Opinion.

The subject matter of the open meeting scheduled for Wednesday, June 22, 1977, at 10 a.m. will be:

1. Consideration of application of Everad M. C. Stamm to remove bar from association with a broker-dealer in a managerial or supervisory capacity, while associated with present employer.

2. Consideration of an application by Salomon Brothers for an order which would exempt interests in its Profit Sharing Plan from the registration requirement of Section 5 of the Securities Act.

3. Consideration by the Commission of request to extend the comment period to July 1, 1977, regarding proposed reporting requirements for institutional investment managers.

4. Consideration by the Commission of issuance of a release requesting the submission of comments with respect to the offer and sale of guaranteed interest contracts and similar products and the availability of the exemption provided by Section 3(a)(8) of the Securities Act, which relates to insurance policies and annuity contracts.

5. Consideration of the Commission's report to the Office of Management and Budget on the Commission's implementation, during 1976, of the Privacy Act of 1974 and affirmation of the action of the duty officer on June 9, 1977, authorizing the Office of General Counsel to transmit a draft of the Privacy Act report to the staff of the Office of Management and Budget.

6. Consideration by the Commission regarding the transmittal of comments to the House Committees on Government Operations and Rules and the Senate Committee of Government Operations concerning H.R. 1885, H.R. 3100, and S. 600, all entitled, "The Regulatory Reform Act of 1977".

7. Consideration by the Commission of Freedom of Information Act appeal of William G. Scarborough, Esq.

8. Consideration of publication for comment certain amendments to Securities Exchange Act Rule 10b–10. Rule 10b–10 prescribes confirmation delivery and disclosure requirements for securities transactions.

9. Consideration by the Commission of the institution of proceedings with respect to New England Securities Depository Trust Company ("NESDTC") to determine whether registration of NESDTC as a clearing agency should be granted or denied at the expiration of its existing registration.

10. Consideration by the Commission of an exposure draft of the Municipal Securities Rule Making Board's Fair Practice rules.

11. Consideration of an appeal of staff denial in the matter of Westates-Italo Company's application pursuant to Rule 12b–25 under the Securities Exchange Act of 1934 requesting an extension of time to file its Form 10–K Annual Report for the fiscal year ended December 31, 1976.

12. Consideration of various requests that the Commission extend for a period of two or more months the due date for written comments concerning the Commission's re-examination of rules relating to shareholder communications, shareholder participation in the electoral process and corporate governance generally.

13. Consideration by the Commission regarding the transmittal of an interpretive letter to Merrill Lynch concerning Rule 145(c) relating to underwriter status.

14. Consideration of a recommendation to allow interested persons an opportunity to request a hearing on an application by Local Finance Corporation for an order which would exempt the applicant from certain reporting requirements, commencing with the annual report on Form 10–K for the period ended December 31, 1976.

15. Consideration of the adoption of amendments to Rule 16b–e under the Securities Exchange Act of 1934 relating to stock appreciation rights. The amendments clarify exemptions provided by the rule for cash settlements.

The subject matter of the open meeting scheduled for Wednesday, June 22, 1977, at 3 p.m. will be:

1. Consideration will be given to the institution of a proceeding to consider the amendment of existing exchange off-board trading rules and certain collateral proposals.

JUNE 15, 1977.

[S–683 Filed 6–15–77;11:45 am]

11

AGENCY HOLDING THE MEETING: United States International Trade Commission.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 30574 (June 15, 1977).

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 9:30 a.m., June 16, 1977.

CHANGES IN THE MEETING: The following items, previously noticed for the meeting of June 16, 1977, will be discussed at the meeting of June 23, 1977 (if necessary):

11. Reorganization.
12. Agenda.
13. Minutes of May 20, 24, and 31, 1977.
14. Ratification List 77–5.
15. Paving equipment (Inv. AA1921–166)—briefing (see report distributed June 10, 1977, and a memorandum from the Deputy Director of Operations of June 23, 1977.
16. Petitions and complaints (if necessary): (a) Golf balls; (b) Specialty steel—see action jacket ID–77–37 (being circulated); also a memorandum from the General Counsel of June 10, 1977; (c) Fishing industry—see action jacket ID–77–20.
17. Financial disclosure regulations—see draft from the General Counsel, dated May 19, 1977, and a memorandum from Mr. J. Cook, dated May 31, 1977.
18. Response to letter dated April 22, 1977, from the Administrative Conference of the United States (if necessary).
19. Any items left over from previous agenda.

20. Certain Steel Toy Vehicles (Inv. 337-TA-31)—if action jacket 001-77-100 is approved.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

■

NATIONAL FLOOD INSURANCE PROGRAM

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI 2973]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Suspension of Community Eligibility

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to list communities where the sale of flood insurance as authorized under the National Flood Insurance Program will be suspended because of noncompliance with the program regulations.

DATES: The last date that appears in the fourth column is the effective date of the suspension of the sale of flood insurance.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93–234) requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program and insurance is purchased. Accordingly, for communities listed under this Part such restriction exists as of the effective date of suspension because insurance, which is required, cannot be purchased.

Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities suspended in this notice no longer meet that statutory requirement for compliance with program regulations (24 CFR Part 1909 et seq.). Accordingly, the communities are suspended on the effective date in the list below.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.6 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community.

The entry reads as follows:

§ 1914.6 List of eligible communities.

(24 CFR § 1914.6)

[Docket No. FI-2972]

PART 1914—COMMUNITIES ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final Rule.

SUMMARY: The purpose of this rule is to list those communities where the sale of flood insurance is authorized under the National Flood Insurance Program.

Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the state.

DATE: The date that appears in the fourth column of the table is the effective date of authorization for the sale of flood insurance.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93-234) requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified for at least one year by the Secretary of Housing and Urban Development. The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction except as authorized by Section 202(b) of the Act, as amended, unless the community has entered the program. Accordingly, for communities listed under this Part no such restriction exists, although insurance, if required, must be purchased.

The addresses of the National Flood Insurers Association servicing companies, where flood insurance policies can be obtained, are published at § 1912.5 (24 CFR Part 1912).

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.6 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 1914.6 List of eligible communities.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for City of Alamosa, Colorado

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final Rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his final determinations of flood elevations for the City of Alamosa, Colorado, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917).

Final base flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, P.O. Box 419, Alamosa, Colorado 81101.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free line 800-424-8872, Room 5270, 451 Seventh Street Southwest, Washington, D.C. 20410.

DATES: In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community. The effective date of the Flood Insurance Rate Maps will be published in the FEDERAL REGISTER under § 1915.4.

SUPPLEMENTARY INFORMATION: The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Rio Grande	D&RGW Railroad Bridge.	7,537
	State Street Bridge	7,541
Rio Grande Left Overbank	North River Rd. Bridge.	7,541
Rio Grande Right Overbank	State Ave	7,537
	Main St.	7,540
	Murphy Dr.	7,542

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: May 24, 1977.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for County of Walton, Florida

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the County of Walton, Florida.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for Walton County, Florida.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the County of Walton, Florida.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the County of Walton, Florida are available for review at the Walton County Courthouse, DeFuniak Springs, Florida.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Town of Sparks, Georgia.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Town of Sparks, Georgia are available for review at Town Hall, P.O. Box 186, Sparks, Georgia.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Bear Creek	Patterson Ave	231
	Gay Ave	232
	McCranie Rd	234

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: May 25, 1977.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for City of Cedar Rapids, Iowa

AGENCY: Federal Insurance Administration, HUD

ACTION: Correction to final rule.

SUMMARY: The Federal Insurance Administrator hereby rescinds the notice of the Final Determinations of Base Flood Elevations (100-year flood) for the City of Cedar Rapids, Iowa, which was published at 42 FR 17278 on March 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard W. Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 7th Street, Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Changes in the physical features in the Flood Plain Area of Cedar Rapids, Iowa have made it necessary to restudy the Flood Hazard Area in this community. Proposed Base Flood Elevations (100-year flood) will be published when the restudy is completed.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 USC 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: May 23, 1977.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for City of John Day, Oreg.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final Rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his final determinations of flood elevations for the City of John Day, Oregon, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Ppb L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917).

Final base flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, 240 South Canyon Boulevard, John Day, Oregon 97845.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

DATES: In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community. The effective date of the Flood Insurance Rate Maps will be published in the FEDERAL REGISTER under Part 1915.4.

SUPPLEMENTARY INFORMATION: The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, National Geodetic vertical datum
Canyon Circle	Main St. Highway 26 Bridge	3,077
	Delore St.	3,079
	Canton St.	3,081
	Southwest 2nd Avenue.	3,091
	Southwest 41st Avenue.	3,116
	Southwest 6th Avenue.	3,125

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: May 24, 1977.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Wenatchee, Chelan County, Wash.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his final determinations of flood elevations for the City of Wenatchee, Chelan County, Washington, in accordance with the Flood Disaster Protection Act of 1973 which added to the National Flood Insurance Act of 1968.

Final Base Flood Elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall in the main lobby, 129 South Chelan Avenue, Wenatchee, Washington.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

DATES: In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community. The effective date of the Flood Insurance Rate Maps will be published in the FEDERAL REGISTER under § 1915.4.

SUPPLEMENTARY INFORMATION: The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Areas flooded: Flooding in Wenatchee is mainly caused by drainage from Canyons No. 1 and 2, and Dry Gulch. For the 100-year flood, shallow sheet flooding occurs in the western part of the City to an estimated depth of one foot. The flood insurance Zone A0 is located north of Cherry Street. The eastern boundary is formed by the following streets: Pearl Street, Charles Street, Princeton Street, Pear Lane, Elliott Avenue and Berg Avenue. The rest of the City, except for a small section in the southwest, is subject to shallow flooding with depth less than one foot.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4011–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

Issued: May 16, 1977.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the office of the Borough Secretary, 681 Wyoming Avenue.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, DC 20410.

DATES: In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

SUPPLEMENTARY INFORMATION: The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas.

In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Left	Right
Susquehanna River	West end of Monocanock Island	554	20	(1)
	East end of Monocanock Island	555	45	(1)
	8th Street Bridge	555	(1)	(1)
Abrahams Creek of Wyoming	U.S. Route 11 Bridge	554	(1)	0
	Pettibone St. extended	548	40	270
	Institution St. extended	551	40	250
	8th Street Bridge	554	20	0

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

Issued: May 16, 1977.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Borough of Ambler, Montgomery County, Pennsylvania

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his final determinations of flood elevations for the Borough of Ambler, Montgomery County, Pennsylvania, in accordance with the Flood Disaster Protection Act of 1973 which added to the National Flood Insurance Act of 1968. Final Base Flood Elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the bulletin board in the Borough Hall, 31 East Butler Avenue, Ambler.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

DATES: In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community. The effective date of the Flood Insurance Rate Maps will be published in the FEDERAL REGISTER under § 1915.4.

SUPPLEMENTARY INFORMATION: The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Wissahickon Creek	Stuart Farm Creek	167
	Tannery Run	179

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4011–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

Issued: May 16, 1977.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Evansdale, Blackhawk County, Iowa

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his final determinations of flood elevations for the City of Evansdale, Blackhawk County, Iowa, in accordance with the Flood Disaster Protection Act of 1973, which added to the National Flood Insurance Act of 1968.

Final Base Flood Elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the lobby of the City Hall on the bulletin board.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street Southwest, Washington, D.C. 20410.

DATES: In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community. The effective date of the Flood Insurance Rate Maps will be published in the FEDERAL REGISTER under § 1915.4.

SUPPLEMENTARY INFORMATION: The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the community must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Cedar River	South end of McCoy Rd.	836
	Intersection of Jule St. and Michigan Dr.	839
	Waterloo RR crossing of Cedar River.	840
	Intersection of Brookside Ave. and Grand Blvd.	841
	Intersection of Brookside Ave. and South Evans Rd.	842
	Intersection of River Forest Rd. and Central Ave.	844
	Intersection of Lafayette Dr. and Randall Ave.	845
Elk Run Creek	500 ft. downstream of Lafayette Rd.	840
	Lafayette Rd.	841
	U.S. 20	844

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4011–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-2933]

PROPOSED FLOOD ELEVATION DETERMINATIONS FOR CITY OF LEE'S SUMMIT, MO.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Lee's Summit, Missouri. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Lee's Summit, Missouri in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 220 South Main Street, Lee's Summit, Missouri.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor W. R. McKee, City Hall, 220 South Main Street, Lee's Summit, Missouri.

The proposed 10-year flood elevations for selected locations are:

PROPOSED FLOOD ELEVATION DETERMINATIONS FOR BOROUGH OF MILLSTONE, N.J.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Borough of Millstone, New Jersey. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Borough of Millstone, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Borough Hall, Main Street, Millstone, New Jersey.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Mary Patrick, Borough Hall, Main Street, Millstone, New Jersey 08849.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Millstone River	Amwell Rd	44

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

PROPOSED FLOOD ELEVATION DETERMINATIONS FOR BOROUGH OF NORTH ARLINGTON, NEW JERSEY

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed Rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Borough of North Arlington, New Jersey.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Borough of North Arlington, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Borough Hall, 214 Ridge Road, North Arlington, New Jersey.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Ernest Cerone, Borough Hall, 214 Ridge Road, North Arlington, New Jersey 07032.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, National Geodetic vertical datum
Passaic River	Upstream side of Belleville Turnpike.	10
	Intersection of River Rd. and Jauncey Ave.	12

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

[Docket No. FI–2958]

PROPOSED FLOOD ELEVATION DETERMINATIONS FOR VILLAGE OF ENDICOTT, BROOME COUNTY, NEW YORK

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Endicott, Broome County, New York, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917. Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Honorable Joseph A. Caldwell, Mayor of Endicott, 1009 East Main Street, Endicott, New York 13760.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Proposed base flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Village Hall on the Bulletin Board, 1009 East Main Street, Endicott, New York 13760.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, National Geodetic vertical datum 1929
Susquehanna River.	Southwest corporate limits.	827
	Exchange Ave. (extended).	830
	Madison Ave. (extended).	831
	Northeast corporate limits.	832
Nanticoke Creek...	Disposal Plant Rd...	829
	Duane Ave.	829

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

Issued: May 20, 1977.

PROPOSED FLOOD ELEVATION DETERMINATIONS FOR CITY OF BATAVIA, GENESEE COUNTY, NEW YORK

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Batavia, Genesee County, New York. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Batavia, Genesee County, New York in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the bulletin board in the lobby of Batavia City Hall, 10 West Main Street, Batavia, New York.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Ira M. Gates, City Administrator of Batavia, Batavia City Hall, 10 West Main Street, Batavia, New York 14020.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Tonawanda Creek..	River St.	853.1
	South Lyon St.	853.7
	Oak St.	859.3
	Walnut St.	860.4

PROPOSED FLOOD ELEVATION DETERMINATIONS FOR THE VILLAGE OF HAMMONDSPORT, STEUBEN COUNTY, NEW YORK

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Village of Hammondsport, Steuben County, New York.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Hammondsport, Steuben County, New York in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Glenn H. Curtiss Museum Building, Village Clerk's Office, 41 Lake Street, Hammondsport, New York 14840.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mrs. Carol G. Jenkins, Village Clerk of Hammondsport, 41 Lake Street, Hammondsport, New York 14840.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Keuka Inlet	Keuka Lake	724

[Docket No. FI-2957]

PROPOSED FLOOD ELEVATION DETERMINATIONS FOR THE VILLAGE OF SOUTH CORNING, STEUBEN COUNTY, NEW YORK

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of the proposed determinations of base flood elevations (100-year flood) for the village of South Corning, Steuben County, New York, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify the Honorable Robert S. Smoogen, Mayor of South Corning, 1 Clark Street, Corning, New York 14830.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Proposed base flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Village Hall on the bulletin board, 1 Clark Street, Corning, New York.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, National Geodetic vertical datum
Chemung River	South corporate limit	922
	New York Route 225 (extended).	923
	Tuxill Ave. (extended).	924
	North corporate limits.	925

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

Issued: May 24, 1977.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-2948]

PROPOSED FLOOD ELEVATION DETERMINATIONS FOR CITY OF RALEIGH, N.C.

AGENCY: Federal Insurance Administration.

ACTION: Proposed rule.

SUMMARY: The Federal Insurance Administrator hereby gives notice of his proposed determinations of flood elevations for the City of Raleigh, North Carolina, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.4(a)).

Due to recent engineering analysis, this notice revises the proposed determinations of base flood elevations published in 41 FR 50286 on November 15, 1976, and in the Raleigh Times-Observer published on February 1, 1977, and February 2, 1977, and hence supersedes those notices. Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, Raleigh, North Carolina 27602.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. L. P. Zachary, City Manager, P.O. Box 590, Raleigh, North Carolina 27602.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

[Docket No. FI-2928]

PROPOSED FLOOD ELEVATION DETERMINATIONS FOR CITY OF SHELBY, N.C.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Shelby, North Carolina. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Shelby, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, Shelby, North Carolina.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Lester D. Roark, City Hall, P.O. Box 669, Shelby, North Carolina 28150.

The proposed 100-year flood elevations for selected locations are:

PROPOSED FLOOD ELEVATION DETERMINATIONS FOR VILLAGE OF CRAIG BEACH, MAHONING COUNTY, OHIO

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Village of Craig Beach, Mahoning County, Ohio. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Craig Beach, Mahoning County, Ohio, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Craig Beach Mayor's office, 2154 Grandview Road, Village of Craig Beach, Ohio.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable L. J. Clark, Mayor of Craig Beach, Village of Craig Beach, 2154 Grandview Road, Lake Milton, Ohio 44429.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Lake Milton	Glendale Rd. extended	953
	Edgewater Rd	953
	Jersey St	953
	Grandview Rd	953

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February, 1969, as amended (39 FR 2787, January 24, 1974).)

PART III

ENVIRONMENTAL PROTECTION AGENCY

PESTICIDE PROGRAMS

Submission of Test Data in Support of Application for Registrations, Compensation Claim for Use of Data, Rules of Practice

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 162 and 173]

[OPP-30011; FRL 739-8]

PESTICIDE PROGRAMS

Submission of Test Data in Support of Application for Registration, Compensation Claim for Use of Data; Rules of Practice for Claims Determinations

AGENCY: Environmental Protection Agency.

ACTION: Proposed rules.

SUMMARY: These proposed regulations would prescribe how applicants for registration and reregistration of a pesticide should submit data in support of the application; describe how persons may file claims for compensation for use by other persons of their data; and establish rules of practice for use in the claims determination hearings under section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act.

DATES: Comments must be received on or before August 19, 1977.

ADDRESS: Comments should be addressed to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Room 421, East Tower, 401 M Street SW., Washington, D.C. 20460. Comments should be filed in triplicate and bear the identifying notation OPP-30011. All written comments filed pursuant to this notice will be available for public inspection at that office from 8:30 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Jesse Mayes, Assistant to the Associate Director for Registration, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460 (202-426-4110).

SUPPLEMENTARY INFORMATION: These regulations are proposed under the authority of section 3(c)(1)(D) and section 25 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (Pub. L. 92-516, 86 Stat 973; Pub. L. 94-140, 89 Stat 755; 7 U.S.C. 136 et. seq. hereinafter referred to as "FIFRA").

Pursuant to the requirements of section 25(a)(2)(A) of FIFRA, a draft of these proposed regulations was forwarded to the Secretary of Agriculture for his review and comment. The comments of the Secretary and the Agency's response thereto are published as Appendix II to these proposed rules.

Pursuant to FIFRA section 25(a)(3), a draft of these proposed regulations was distributed to the appropriate Congressional Committees. In addition, pursuant to FIFRA section 25(d), these proposed regulations were submitted to the Scientific Advisory Panel. No comments were received from either of these bodies. The Scientific Advisory Panel voted unanimously to waive their right to review these proposed regulations. Their statement to this effect is published as Appendix III to these proposed rules.

Congressional hearings on the amended FIFRA are pending. Among the matters which are being considered is substantive amendment to section 3(c)(1)(D) of the Act. Any legislative amendment will, of course, be reflected in the regulations before they are published in final form. If a major legislative amendment requires it, these regulations will be reproposed for public comment.

STATUTORY PROVISIONS

FIFRA section 3(c)(1)(D), 7 U.S.C. 136a(c)(1)(D), provides that each applicant for registration of a pesticide shall file with the Administrator a statement which includes—

If requested by the Administrator, a full description of the tests made and the results thereof upon which the claims are based, except that data submitted on or after January 1, 1970, in support of an application, shall not, without permission of the applicant, be considered by the Administrator in support of any other application for registration unless such other applicant shall have first offered to pay reasonable compensation for producing the test data to be relied upon and such data is not protected from disclosure by section 10(b). This provision with regard to compensation for producing the test data to be relied upon shall apply with respect to all applications for registration or reregistration submitted on or after October 21, 1972. If the parties cannot agree on the amount and method of payment, the Administrator shall make such determination and may fix such other terms and conditions as may be reasonable under the circumstances. The Administrator's determination shall be made on the record after notice and opportunity for hearing. If either party does not agree with said determination, he may, within thirty days, take an appeal to the Federal district court for the district in which he resides with respect to either the amount of the payment or the terms of payment, or both. Registration shall not be delayed pending the determination of reasonable compensation between the applicants, by the Administrator or by the court.

Section 10 FIFRA, 7 U.S.C. 136h, provides:

PROTECTION OF TRADE SECRETS AND OTHER INFORMATION

(a) In General.—In submitting data required by this Act, the applicant may (1) clearly mark any portions thereof which in his opinion are trade secrets or commercial or financial information and (2) submit such marked material separately from other material required to be submitted under this Act.

(b) Disclosure.—Notwithstanding any other provision of this Act, the Administrator shall not make public information which in his judgment contains or relates to trade secrets or commercial or financial information obtained from a person and privileged or confidential, except that, when necessary to carry out the provisions of this Act, information relating to formulas of products acquired by authorization of this Act may be revealed to any Federal agency consulted and may be revealed at a public hearing or in findings of fact issued by the Administrator.

(c) Disputes.—If the Administrator proposes to release for inspection information which the applicant or registrant believes to be protected from disclosure under subsection (b), he shall notify the applicant or registrant, in writing, by certified mail. The Administrator shall not thereafter make available for inspection such data until thirty days after receipt of the notice by the applicant or registrant. During this period, the applicant or registrant may institute an action in an appropriate district court for a declatory judgment as to whether such information is subject to protection under subsection (b).

Finally FIFRA section 3(c)(2), 7 U.S.C. 136a(c)(2), provides, in pertinent part:

* * * Except as provided by subsection (c)(1)(D) of this section and section 10, within 30 days after the Administrator registers a pesticide under this Act he shall make available to the public the data called for in the registration statement together with such other scientific information as he deems relevant to his decision.

BACKGROUND

The data compensation provision of FIFRA first became part of the pesticide regulatory process by the enactment of section 3(c)(1)(D) of the 1972 FIFRA (86 Stat. 973). On November 19, 1973, EPA partially implemented section 3(c)(1)(D) by publication in the FEDERAL REGISTER of a general notice entitled "Consideration of Data by the Administrator in Support of Applications: Interim Policy," 38 FR 31862. On June 11, 1974 the Agency conducted a public meeting to exchange views with interested parties and facilitate the development of regulations. On July 3, 1975, the Agency promulgated final regulations on the registration, reregistration and classification of pesticides, 40 CFR Part 162, 40 FR 28242. On November 28, 1975, the President signed into law Pub. L. 94-140 a bill which substantively amended section 3(c)(1)(D) of FIFRA. Accordingly, on January 22, 1976, the Agency published an Implementation Plan (41 FR 3339) to explain the changes to the procedures for submitting data accomplished by the enactment of Pub. L. 94-140 and the promulgation of 40 CFR Part 162. The Implementation Plan also announced the availability of the then current draft of the section 3(c)(1)(D) regulations and invited public comment. Comments were received from eight (8) parties; these have been considered in the development of these proposed rules.

Section 162.9 as proposed would set forth the manner in which all applicants for registration would be required to submit or cite the data required to support the registration action. In addition, these regulations would establish procedures for assertion of a claim for compensation for the use by another party of one person's data. The procedures would apply both to applications for new or amended registration and to applications for reregistration. The new Part

173, as proposed, prescribes Rules of Practice for the adjudicatory claims determination hearings.

DETERMINATION OF REASONABLE COMPENSATION

Under the proposal, the Administrator would award reasonable compensation for the cost of producing test data in accordance with the rules of § 162.9 and the Rules of Practice governing hearings under section 3(c)(1)(D).

Section 162.9(h): *Prerequisites to determination of amount of entitlement.* Section 162.9(h), as proposed, provides that as a prerequisite to determining the amount of entitlement, the Administrator or the Administrative Law Judge must first find:

(1) That the procedures of § 162.9 and the Rules of Practice governing hearings under section 3(c)(1)(D) have been satisfied, § 162.9(h)(1),(2);

(2) That the item of data had been produced at the expense of the claimant, § 162.9(h)(3);

(3) That the item of data was considered in support of the application without the permission of the claimant, § 162.9(h)(4); and

(4) That the applicant's use of the item of data in the subject application otherwise is subject to the reasonable compensation requirement, § 162.9(h)(5).

Each of these elements is discussed briefly below.

(1) Section 162.9(h)(1),(2): *That the procedures of § 162.9 and the rules of practice governing hearings under section 3(c)(1)(D) have been satisfied.* These regulations and the Rules of Practice governing hearings under section 3(c)(1)(D) would set forth procedures designed to encourage negotiated settlements between the parties on the amounts and terms of reasonable compensation. If the claimant's failure to follow any of the pertinent procedures results in actual prejudice to the applicant/respondent, the claim for compensation would be dismissed.

These regulations would require an applicant to state which one of four data categories describes each item of data submitted or cited, § 162.9(b)(3). Pursuant to the procedures of these regulations, claims for compensation would be entertained only with respect to items of data in Data Category IV. All other data is either beyond the scope of section 3(c)(1)(D) (data category I), is accompanied by a certificate of ownership (data category II) or is accompanied by a consent statement (data category III). Any person wishing to assert a claim for compensation against an applicant for use of category II or III data would be disputing the accuracy of the signed certification of ownership or consent statement. The Agency will not adjudicate such disputes; a person seeking to make such an assertion would be free to pursue the matter in the appropriate court. Intentional falsification of any part of an application for registration would be a violation of FIFRA section 12(a)(2)(M). This would include falsification of the certification or consent statement.

(2) Section 162.9(h)(3): *That the item of data has been produced at the expense of the claimant.* Section 3(c)(1)(D) provides that compensation is to be paid "for producing the test data" and a right of appeal is given to the "owner of the test data." Therefore, in order to receive reasonable compensation, claimant must establish that the item of data was developed at his expense (or at the expense of his legal predecessor(s) in interest.)

(3) Section 162.9(h)(4): *That the item of data was considered in support of the application without the permission of the claimant.* The term "data considered in support of an application" is defined at § 162.9(a)(7).

Data is not considered in support of an application until the Administrator (or his delegate) approves an application for registration. In order for data to be considered in support of an application, the applicant would be required to cite it on a Supporting Data Citation form. If an item of data were withdrawn from the Administrator's consideration prior to approval of the application, in accordance with § 162.9(b)(1)(i), it would not be "considered in support of the application."

The Agency would not, however, return data to the submitter when it is withdrawn from the Administrator's consideration. For the purpose of section 3(c)(1)(D), such data are "data previously submitted in support of an application for registration."

A draft copy of the proposed supporting Data Citation form is published as Appendix I to this notice for public comment.

(4) Section 162.9(h)(5): That the applicant's use of the item of data in the subject application is otherwise subject to the reasonable compensation requirement: (Hereinafter, data otherwise eligible for compensation.)

In order for an item of data to be otherwise eligible for compensation, it must have been previously submitted in support of an application for registration. The term "data submitted in support of an application for registration" is defined at § 162.9(a)(6).

The first requirement is that the item of data must have been submitted to the Agency, or its predecessor Agencies. It is not necessary, however, that the application with respect to which the data was submitted have been approved. Data submitted with respect to an application or an existing or former registration is "submitted in support" whether or not such submission was requested or required by the Agency. Moreover, data first submitted, (1) as part of an application for an experimental use permit or with respect to an existing or former permit or (2) in support of a petition for a tolerance is "data submitted in support of an application for registration" if the item of data is referred to or included in an application for registration. In addition, data submitted for the purpose of determining that the product complies with FIFRA under the terms of the Interagency Agreement with the Department of Health, Eduiation, and Welfare, Food and Drug Administration (36 FR 24234, as amended by 38 FR 24233) is considered "submitted in support of an application."

The determination of exactly what data is otherwise eligible for compensation would turn on when the applicant filed his application for registration with the Agency and when it was approved.

Date application filed	Date application approved	Date eligible for compensation
Before Oct. 21, 1972	Anytime	None.
Before Nov. 19, 1973	Before Nov. 28, 1975	None.
After Nov. 19, 1973	Before Nov. 28, 1975	Data submitted after Oct. 21, 1972.
After Oct. 21, 1972	After Nov. 28, 1975	Data submitted after Jan. 1, 1970.

This reflects past practice and Congressional intent.

The November 19, 1973, Interim Policy Statement (38 FR 31862), which partially implemented section 3(c)(1)(D), provided that all data first submitted to the Agency in support of an application for registration on or after October 21, 1972 and subsequently considered in support of another application for registration submitted on or after November 19, 1973, would be eligible for compensation. As a result of much controversy regarding this interpretation of the scope of section 3(c)(1)(D), Congress by Pub. L. 94-140 amended section 3(c)(1)(D) of FIFRA. This Act became effective on November 28, 1975 and provides that with respect to all applications for registration submitted to the Agency on or after October 21, 1972 and then still pending before the Agency, all data first submitted to the Agency on or after January 1, 1970 is eligible for compensation. The amendment changed both the effective date of section 3(c)(1)(D) and the data within its scope, as to applications previously received and still pending before the Agency. See S. Rep. No. 94-452, 94th Cong., 1st Sess., at 11 (1975).

Section 162.9(i): *Amount of entitlement, terms and conditions of compensation.* Section 162.9(i), as proposed, provides that the Administrative Law Judge might make such determination concerning the amount, terms and conditions of compensation as he found reasonable under the circumstances, equitable to the parties and permitted by the law, and might consider any factors which he considers relevant to this determination.

Various parties have argued that the Agency should set forth in these regulations substantive rules governing the amount and method of compensation, including a formula to compute "reasonable compensation." The Agency has evaluated the feasibility of this approach. In 1974, in fact, the Office of

Pesticide Programs contracted with Science, Engineering and Analysis, Inc., Springfield, Virginia for this particular purpose. Their contract report entitled "Economic methodology for the determination of reasonable compensation under section 3(c)(1)(D) of FIFRA" and subsequent investigation has led to the present Agency position that a precise formula for reasonable compensation is not practicable. The Agency nonetheless specifically solicits the submission of a precise formula for determining the amount and method of reasonable compensation and comment regarding the factors appropriate to this determination. We expect that widely divergent theories of data valuation and compensation may be proposed, and that widely divergent factual situations will be involved in the various claims. It seems desirable, therefore, that the initial determinations of the Administrative Law Judge be governed solely by the statutory standard of "reasonable compensation for producing the test data," as applied to the particular circumstances of each case. These proposed regulations adopt this approach. After some disputed claims for compensation have been decided by the Agency (and, perhaps, reviewed by the Federal Courts), the Agency may be in a position to state substantive rules governing the determination of reasonable compensation.

Various factors, some of which are set forth below, have been suggested as appropriate for consideration in determining the amount, method, and terms of reasonable compensation. The Agency at this time makes no determination as to whether these factors are appropriate for consideration by the Administrative Law Judge or the Administrator in reaching a decision as to the amount, method and terms of reasonable compensation in any particular case. It is not here suggested that evidence on these factors should be received by the Administrative Law Judge or the Administrator. These factors (1 through 11) are enumerated to show the broad scope of diversity of views on the question of reasonable compensation.

(1) The actual (historical) cost of the test data;

(2) The current cost of duplicating the data;

(3) The fair market value of the data;

(4) The availability of alternative data of comparable reliability;

(5) When the test was performed;

(6) When the data was submitted to the Agency;

(7) The foreseeable nature, extent and profitability from marketing of the pesticide by the applicant;

(8) The extent to which the claimant has recovered, and/or may recover his investment in the data by sale of the pesticide, both to the general public and, in particular, to the applicant. (In many cases, the claimant may already have recovered a portion of his investment in the data by means of a pricing structure which includes recovery of that investment. If the applicant formulator has been purchasing the pesticide from the claimant, he may already have paid at least partial compensation for the claimant's investment in the supporting data. Likewise, if the applicant will be purchasing the pesticide from the claimant in the future, he may pay a portion of the cost of producing the test data each time he purchases the pesticide.)

(9) Whether the claimant's decision to produce the test data was made with the expectation of receiving compensation under section 3(c)(1)(D) of the Act. (Commenters have argued that Section 3(c)(1)(D) was not intended to give a "windfall" to a person who made an investment decision without any expectation of compensation under FIFRA.)

(10) The ability of the applicant to pay compensation. (If it can be shown that compensation above a certain level will adversely affect the applicant's ability to remain in business, it is argued that the effects not only on the applicant but also on the marketplace and the economy in general may be relevant.)

(11) The estimated effect of the amount and method of compensation on research and development of pesticides. (It is urged that one of the purposes of section 3(c)(1)(D) is to encourage investment in research and development. Accordingly, it has been suggested that this factor should be considered in determining whether the terms of compensation will foster this purpose.)

IMPLEMENTATION

Section 162.9(e) would provide that § 162.9 will become effective 30 days after publication in the FEDERAL REGISTER of the final rule. Under proposed § 162.9(m), no application pending before the Agency on the effective date of these rules would be approved until the applicant had modified the application to comply with § 162.9(b). If the modified application contained any supporting data stated to fall within Data Category IV, the Agency would publish notice of receipt of the modified application in accordance with § 162.9(c). Accordingly, there would be no reason for the Agency to decide the compensation due on any claim filed with the Agency prior to the effective date which was based on an "old," unmodified application. Pursuant to § 162.9(n)(2), the claimant could file a new preliminary claim for compensation based on the modified application. (These procedures for handling applications and claims pending on the effective date are necessary in order to satisfy FIFRA §§ 3(c)(2) and 3(c)(1)(D) and to facilitate efficient processing of applications and claims.)

Proposed section 162.9(n)(1) concerns pending claims pertaining to applications approved before the effective date of these regulations. Where the application has been approved the claim for compensation has already matured and the rules in effect at the time of approval of the application must govern. Therefore, these rules would provide that the Administrator would notify each person who has submitted a claim that the application in question has been approved. For the purposes of § 162.9(g)(3), this notice would be regarded as the notice required by § 162.9(f). Thereafter, the rules of this section and the Rules of Practice would apply except that (1) in making the determination required by § 162.9(h)(1), the comparable provisions of the November 19, 1973 Interim Policy Statement would apply instead of § 162.9(d) and (2) in making the determination required by paragraph (h)(5), the Administrative Law Judge or the Administrator would determine on a case-by-case basis whether or not the item of data was considered in support of the application without the claimant's consent.

RULES OF PRACTICE

Section 3(c)(1)(D) provides that the Administrator's determination of reasonable compensation for producing the test data must be made "on the record." The Rules of Practice of proposed Part 173 would govern the commencement and conduct of these hearings.

By FEDERAL REGISTER notice on October 19, 1976 (41 FR 64021) the Administrator announced that he had made effective the determination of claims provision of section 3(c)(1)(D) in the absence of these formal procedural regulations. The Chief Administrative Law Judge or his designee has been instructed to adopt procedural rules on a case-by-case basis for the conduct of the hearings and matters related thereto. Both § 162.9 and Part 173 will become effective 30 days after publication in the FEDERAL REGISTER of the final rules. Once these regulations have been adopted, all claims for compensation will be adjudicated in accordance with these rules. However, the Administrative Law Judge may, in his discretion, continue to conduct a claims determination hearing pending on the effective date of these rules of practice, in accordance with the procedural rules adopted by the Administrative Law Judge on a case-by-case basis.

ECONOMIC IMPACT ANALYSIS STATEMENT

Executive Order 11821 (as extended) and OMB circular A-107 requires every Federal agency to evaluate the economic impacts of every major legislation proposal and regulation. EPA's guidelines on Economic Impact analysis Statements (formerly Inflation Impact Statements) provide that regulations shall be considered a "major" action and shall require an Economic Impact Analysis under the following conditions: (1) If the incremental annualized costs of compliance, including capital charges, exceed $100 million in any year, (2) the incremental cost of production of any major product exceeds five percent of the selling prices of the product, (3) net national energy consumption would be increased by the equivalent of 25,000 barrels of oil a day, or (4) the supply or demand of certain specified materials would be affected by more than three percent.

The EPA has determined that these regulations do not constitute a major proposal requiring preparation of an

Economic Impact Analysis. However, since the data compensation provision impacts directly on the economic impact of the registration guidelines, the incremental costs of complying with these regulations as compared to the costs of complying with the requirements of FIFRA standing alone, will be factored into the economic analysis being prepared on the guidelines.

NOTE.—The Environmental Protection Agency has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: June 8, 1977.

DOUGLAS M. COSTLE,
Administrator.

(Secs. 3(c)(1)(D) and 25 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended.)

1. It is proposed to revise 40 CFR 162.9 to read as follows:

§ 162.9 Submission of test data in support of applications for registration; compensation claims for use of data.

(a) *Definitions.* For the purposes of this section:

(1) "Application for Registration" means any request for action with respect to registration, including an application for new registration, amended registration, or reregistration of a pesticide product under the Act.

(2) "Applicant" means a person who has submitted an application for registration to the Agency, or that person's legal successor in interest.

(3) "Claim" means a claim for compensation under section 3(c)(1)(D) of the Act.

(4) "Claimant" means a person who files a claim with the Agency, and where the context so requires, the term includes any prior holder of rights in the data from whom claimant acquired legal interest.

(5) "Test data" includes information concerning the objectives, methodology, results, and significance of any test or experiment performed on or with a pesticide, information concerning observations about the effect of a pesticide on any organism, and information concerning the behavior of a pesticide in the environment.

(6) "Data submitted in support of an application for registration" means those data submitted to the Agency (or its predecessor Agencies):

(i) As part of an application for registration, or with respect to an existing or former registration, whether or not such submission was required or requested by the Agency;

(ii) As part of an application for an experimental use permit, or with respect to an existing or former experimental use permit, whether or not such submission was required or requested by the Agency, if such data were also referred to or included in an application for registration, either explicitly or implicitly;

(iii) In support of a petition for a tolerance pursuant to section 406, 408 or 409 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346, 346a, 348), if such data were also referred to or included in an application for registration, either explicitly or implicitly;

(iv) For the purposes of obtaining a determination by the Agency that a product complies with the requirements of the Act, under the Agreement between the Agency and the Department of Health, Education, and Welfare (36 FR 24234, as amended by 38 FR 24233), which pertains to matters of mutual responsibility under the Federal Food, Drug, and Cosmetic Act and Federal Insecticide, Fungicide, and Rodenticide Act.

(7) "Data considered in support of an application" means data cited on a Supporting Data Citation form in an application for registration which has been approved under section 3 of the Act. (An item of data which is withdrawn from the Administrator's consideration prior to approval of the application shall not be regarded as data considered in support of an application.)

(8) "EPA Data Catalog" means the Agency catalogue which identifies and assigns a unique number to each item of data previously submitted to the Agency in support of an application for registration.

(b) *Identification of data supporting an Application*—(1) *General requirements.* (i) An item of data will be considered by the Administrator in support of an application only if it is specifically identified by the applicant on a Supporting Data Citation form [EPA Form No. ----]. At any time before approval or denial of an application, an applicant may submit additional items of data for the Administrator's consideration or may withdraw any item of data from the Administrator's consideration by submitting a written amendment to the application.

(ii) An item of data never previously submitted to the Agency must be physically submitted with the application, and must be identified on a Supporting Data Citation form.

(iii) An item of data previously submitted to the Agency need not be physically resubmitted, but must be identified on a Supporting Data Citation form.

(2) *Supporting data citation requirements.* (i) An applicant must complete the following entries in the Supporting Data Citation form for any cited item of data never previously submitted to the Agency, and for any cited item of data not described in the EPA Data Catalog:

(A) Identification of the application supported;

(B) Identification of the person(s) who performed the test, and the date(s) of testing;

(C) Identification of the substance tested;

(D) Identification of the specific test performed;

(E) If the item of data is known to have been previously submitted to the Agency, identification of the submitter, the registration number in support of which it was submitted, and the date of previous submission; and

(F) Designation of the category of data, as set forth in paragraph (b)(3) of this section, and the required statement, set forth in paragraph (b)(4) of this section appropriate to that category of data.

(ii) In the case of an item of data described in the EPA Data Catalog, an applicant need complete only the following entries on the Supporting Data Citation form:

(A) Identification of the application supported;

(B) Identification of the specific test performed, including the EPA Data Catalog number assigned to the item of data; and

(C) Designation of the category of data, as set forth in paragraph (b)(3) of this section, and the required statement, as set forth in paragraph (b)(4) of this section, appropriate to that category of data.

(3) *Data catagories.* The applicant shall designate each item of data cited in support of an application as being in one of the four following categories:

(i) *Data Category I*, which includes all data first submitted to the Agency in support of an application for registration before January 1, 1970.

(ii) *Data Category II*, which includes all data not within Data Category I which were produced at the expense of the applicant alone;

(iii) *Data Category III*, which includes all data not within Data Category I or II which is accompanied by a Consent Statement as set forth in paragraph (b)(4) of this section; or

(iv) *Data Category IV*, which includes all data not within Data Categories I, II or III.

(4) *Required statements to accompany data citations.* Each item of data cited in support of an application must be accompanied by one of the following three statements, as appropriate to the Data Category designated. The statements must be signed as indicated by the applicant or consenting party or, if such person is a corporation or other juridical person, an individual with authority to act on behalf of the applicant. Signature of any of these statements constitutes certification by the signing party of his understanding that, if any of the statements which he signs are known by him to be false, he may be subject to criminal penalty under 18 U.S.C. 1001, criminal or civil penalty under 7 U.S.C. 136j (a)(2)(M), or both.

(i) *Certification statement.* The following statement signed by the applicant must accompany each citation of supporting data designated as falling with Data Categories I or II:

The undersigned hereby certifies that, to the best of his knowledge and belief, for the purposes of Section 3(c)(1)(D) of FIFRA, as amended, the applicant has the unqualified right to rely on the data described above to support this application, without either compensation to, or consent of, any other person.

(ii) *Consent statement.* The following statement, signed by the person(s) at whose expense the data were produced, must accompany each citation of supporting data designated as falling within Data Category III:

The undersigned hereby irrevocably consents to the Administrator's consideration of the data described above in support of the identified application. The undersigned hereby certifies that, to the best of his knowledge and belief, for the purposes of section 3(c)(1)(D) of FIFRA, as amended, there is no other person whose consent to the use of this data is required.

(iii) *Offer to pay reasonable compensation.* The following statement, signed by the applicant, must accompany each citation of supporting data designated as falling within Data Category IV:

The undersigned hereby offers to pay, to the extent provided in section 3(c)(1)(D) of FIFRA, as amended, and the regulations thereunder, compensation in the amount and on the terms determined by the Administrator or the appropriate federal court to be reasonable under the circumstances for use of the data described above to support this application. The undersigned further certifies that this offer has been made directly to each person known by the undersigned to be the person(s) from whom EPA received this data for the first time in support of an application on or after January 1, 1970, thereby providing them notice of his intent to rely on the data.

(c) *Public notice of receipt of application.* When the Agency receives an application for registration which includes any citation of supporting data stated to fall within Data Category IV, the Agency shall publish in the FEDERAL REGISTER a notice of the receipt of such an application. The notice shall state:

(1) The name and address of the applicant;

(2) The identifying number of the application;

(3) A specific identification of each item of test data falling within Data Category IV cited by the applicant; and

(4) The address of the EPA office to which a preliminary claim should be sent under paragraph (d) of this section.

(d) *Procedure for filing preliminary claim for compensation.* Any person may file a preliminary claim for compensation in accordance with this paragraph. A preliminary claim shall be personally delivered, or mailed by certified mail, return receipt requested, within 60 calendar days from the date of publication in the FEDERAL REGISTER of the notice prescribed by paragraph (c) of this section, to the applicant and to the EPA office designated in the FEDERAL REGISTER notice. A preliminary claim shall be in writing, and shall state:

(1) The name and address of the claimant;

(2) The name and address of the applicant against whom the claim is filed;

(3) The EPA file symbol or EPA registration number pertaining to the application in support of which the item of data has been cited without permission of the claimant;

(4) The following information, with respect to each item of data to which the preliminary claim applies:

(i) The EPA file symbol, EPA registration number, experimental use permit number, or tolerance petition number associated with the original submission of the item of data to the Agency by the claimant;

(ii) The date of submission of the item of data; and

(iii) The EPA Data Catalog Number assigned to the item of data, or, if no such number is known to have been assigned, the name and affiliation of the person who performed the test, the date(s) the test was performed, the identity of the substance tested, and a description which was performed; and

(5) A certification that the preliminary claim has been delivered to the applicant and to EPA.

(e) *Request to delay approval of application.* An applicant may request the Agency to withhold approval of his application, in order to allow time for him to become aware of any claims which may be filed and conduct negotiations with other persons concerning payment of reasonable compensation. Such a request shall be granted unless the Agency finds that granting the request would impair efficient administration of the Act.

(f) *Notice to claimants of approval of applications.* When the Administrator approves an application, he shall furnish written notice of the approval to each person who has filed a preliminary claim pertaining to the application.

(g) *Rules of practice governing Agency hearings on claims; when and where final claim must be filed.* (1) The Rules of Practice governing Agency hearings on claims under Section 3(c)(1)(D) of the Act for compensation for consideration of data in support of applications appear at Part 173 of this chapter.

(2) Any person who wishes the Administrator to determine the amount of compensation to which he is entitled under Section 3(c)(1)(D) of the Act shall file a final claim with the Hearing Clerk (A-110), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. A copy shall be sent to the applicant who has cited the item of data in support of an application.

(3) A final claim under this paragraph must be received by the Hearing Clerk not later than the 90th calendar day following the claimant's receipt of the notice of approval of an application prescribed by paragraph (f) of this section, except as otherwise provided in the Rules of Practice.

(4) The Rules of Practice should be consulted concerning all matters pertinent to the final claim and the procedures for determination, including the contents of the claim and the persons on whom it should be served.

(h) *Prerequisites to determination of amount of entitlement.* In accordance with the Rules of Practice at Part 173 of this chapter, the Administrator or the Administrative Law Judge shall determine the amount of reasonable compensation due a claimant if he first finds:

(1) That the claimant has satisfied the requirements of paragraph (d) of this section, or has shown good cause for his failure to do so;

(2) That there has been compliance with the applicable provisions of the Rules of Practice at Part 173 of this chapter;

(3) That the item of data in question was produced at the expense of the claimant;

(4) That the item of data in question was considered in support of the application without the permission of the claimant; and

(5) That the item of data was either—

(i) (A) Submitted to EPA by the claimant for the first time on or after January 1, 1970, in support of his application, and (B) subsequently considered in support of another person's application which was submitted to EPA after October 21, 1972, and which was approved on or after November 28, 1975; or

(ii) (A) Submitted to EPA by the claimant for the first time on or after October 21, 1972, in support of his application, and (B) subsequently considered in support of another person's application which was submitted to EPA on or after November 19, 1973, and which was approved before November 28, 1975.

(6) In the case of a claim received prior to the effective date of this section, which pertains to an application required by paragraphs (h) (1) and (5) of this section shall be made in accordance with paragraph (n) (1) of this section.

(i) *Amount of entitlement; terms and conditions of compensation.* The Administrator or the Administrative Law Judge may make such determination concerning the amount, terms, and conditions of compensation as he finds reasonable under the circumstances, equitable to the parties, and permitted by the law, and may consider any factors which he considers relevant to this determination.

(j) *Transfer of registration.* If a final claim for compensation is filed with respect to a registration, no sale, assignment, or other transfer of the registration shall be recorded by the Agency on its registration records before all claims with respect to such application have been determined by the Agency and any opportunity for appeal therefrom has expired or been exhausted, unless:

(1) The claimant consents in writing to such recording of the sale, assignment or transfer; or

(2) The party to whom such sale, assignment or transfer is made executes an assumption of liability with respect to such claim.

(k) *Data which may be entitled to confidential treatment under section 10 of the Act.*—(1) No data first submitted in support of an application for registration on or after January 1, 1970, shall be considered by the Administrator in support of another application without the written consent of the original submitter, unless and until it is found to be available to the public under Part 2 of this chapter.

(2) Whenever EPA receives a Supporting Data Citation form, the Office of Pesticide Programs shall initiate the procedure under Subpart B of Part 2 of this chapter, for determining whether the cited data is available to the public or is entitled to confidential treatment.

(l) *Effective date of this section.* This § 162.9 shall be effective on and after [30 days after publication in the FEDERAL REGISTER of the final rule], notwithstanding § 162.23.

(m) *Pending applications.* Notwithstanding § 162.23, no application submitted to, but not approved by the Agency before [effective date] will be approved by EPA until the applicant has modified the application to comply with paragraph (b) of this section. The provisions of this section will apply with respect to any such modified application received by the Agency.

(n) *Pending claims.*—(1) *Pending claims pertaining to applications approved before the effective date.* Any claim received by the Agency before the effective date of this section which pertains to an application approved before that date shall be regarded as a preliminary claim for compensation under this section. The Administrator shall notify each person who has submitted such a claim that the application in question has been approved; for the purposes of paragraph (g) (3) of this section, such notice shall be regarded as the notice required by paragraph (f) of this section. The further processing of such claims shall comply with this section and with Part 173 of this chapter, except that:

(i) In making the determination required by paragraph (h) (1) of this section, paragraph (d) of this section shall not apply and the comparable provisions of the "Interim Policy Statement Concerning Consideration of Data by the Administrator in Support of an Application for Registration" (38 FR 31862, November 19, 1973) shall apply in lieu thereof; and

(ii) In making the determination required by paragraph (h) (5) of this section, paragraph (a) (7) of this section shall not apply and the Administrative Law Judge or the Administrator shall determine, on a case-by-case basis, whether or not the item of data was considered in support of the application without the claimant's consent.

(2) *Other pending claims.* The Agency will make no determinations of the amount, if any, due to claimants based on claims filed with the Agency prior to (the effective date of this section), except as provided in paragraph (n) (1) of this section. Paragraph (m) of this section states that before the Agency approves any application pending before the Agency on the effective date of this section, the applicant must modify his application to conform with paragraph (b) of this section. The Agency will then publish notice of the receipt of such a modified application under paragraph (c) of this section. At that time any person may file a preliminary claim with respect to the modified application, in accordance with the provisions of paragraph (d) of this section.

2. It is proposed to establish a new 40 CFR Part 173 to read as follows:

PART 173—RULES OF PRACTICE GOVERNING HEARINGS UNDER SECTION 3(c)(1)(D) OF THE FEDERAL INSECTICIDE, FUNGICIDE AND RODENTICIDE ACT, AS AMENDED, FOR COMPENSATION FOR USE OF DATA PREVIOUSLY SUBMITTED IN SUPPORT OF AN APPLICATION FOR REGISTRATION

GENERAL

173.29 Procedure for disposition of motions.

AUTHORITY: Sec. 3 (c) (1) (D) and 25, Federal Insecticide, Fungicide, and Rodenticide Act, as amended 86 Stat. 973, 89 Stat. 755, 7 U.S.C. 136 et seq.

GENERAL

§ 173.1 Scope.

(a) These rules of practice shall govern all proceedings conducted under section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, 7 U.S.C. 136(a)(c)(1)(D), for compensation for use of data previously submitted in support of an application for registration of a pesticide.

(b) In the absence of specific provisions in these rules, and where appropriate, questions arising at any stage of the proceeding shall be resolved at the discretion of the Administrative Law Judge or of the Administrator as appropriate pursuant to the provisions of § 173.14(c).

§ 173.2 Use of number and gender.

As used in this part, a word in the singular number shall be deemed to import the plural and words in the masculine gender shall be deemed to import the feminine and vice versa, as the case may require.

§ 173.3 Definitions.

For the purposes of this part:

(a) "Act" means the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 973, 89 Stat. 755, 7 U.S.C. 136 et seq.).

(b) "Administrative Law Judge" means an Administrative Law Judge appointed pursuant to 5 U.S.C. 3105 (see also 5 CFR Part 930, as amended), and such term is synonymous with the term "Hearing Examiner" as used in the Act or in the United States Code.

(c) "Administrator" means the Administrator of the Agency, or any officer or employee thereof to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead. Where the Administrator has delegated authority to the Judicial Officer the term "Administrator" shall be interchangeable with the term "Judicial Officer."

(d) "Agency", unless otherwise specified, means the United States Evironmental Protection Agency.

(e) "Claimant" means a person asserting a claim for compensation under these rules.

(f) "Director" means Director, Registration Division, Office of Pesticide Programs, Environmental Protection Agency, or any officer or employee of the Agency to whom authority has been or may hereafter be lawfully delegated to act in his stead.

(g) "Hearing Clerk" means the Hearing Clerk, Environmental Protection Agency, Washington, D.C. 20460.

(h) The term "Initial Decision" means the decision of the Administrative Law Judge supported by findings of fact and conclusions regarding all material issues of law, fact, or discretion, as well as reasons therefor.

(i) "Intervenor" means a person granted leave to intervene pursuant to § 173.12.

(j) "Judicial Officer" means an officer or employee of the Agency designated to act for the Administrator.

(k) "Party" means claimant, respondent, or intervenor.

(l) "Person" includes any individual, partnership, association, corporation, state or political subdivision thereof, and any organized group of persons, whether incorporated or not.

(m) "Preliminary Claim for Compensation" means the notice of intent to file a claim for compensation which was filed with the Director, pursuant to § 162.9(d) of this chapter.

(n) "Respondent" means the person against whom a claim for compensation is made under section 3(c)(1)(D) of the Act.

Terms defined in the Act and not explicitly defined herein shall have the meanings given in the Act.

§ 173.4 Filing and service.

(a) All documents or papers required or authorized to be filed, shall be filed with the Hearing Clerk, and except as otherwise herein provided, shall bear the caption of the case and the docket number. An original and two copies of all documents shall be filed with the Hearing Clerk. At the same time that a party files documents or papers with the Hearing Clerk, the party shall serve upon all other parties copies thereof, with a certificate of service on or attached to each document or paper, including those filed with the Hearing Clerk. If a party is represented by counsel or other representative, service shall be made on such representative. Service may be made personally or by regular mail, and if made by mail shall be deemed complete on mailing. If filing is accomplished by mail addressed to the Hearing Clerk, filing shall be deemed timely if the papers are postmarked on the due date.

(b) All orders, decisions, or other documents made or signed by the Administrative Law Judge, the Judicial Officer, or the Administrator shall be filed with the Hearing Clerk. The Hearing Clerk shall immediately serve all parties with a copy of such order, decision, or other document.

(c) All papers and documents on file in a proceeding shall be available for public inspection at the Office of the Hearing Clerk except as otherwise directed by the Administrative Law Judge, the Judicial Officer, or Administrator, as may be appropriate.

§ 173.5 Time.

(a) *Computation.* In computing any period of time prescribed or allowed by these rules, except as otherwise provided, the day of the act, event, or default from which the designated period of time begins to run shall not be included. Saturdays, Sundays, and legal holidays shall be included in computing the time allowed for the filing of any document or paper, except that when such time expires on a Saturday, Sunday, or legal holiday, such period shall be extended to include the next following business day.

(b) *Enlargement.* When by these rules or by order of the Administrative Law Judge, the Judicial Officer or the Administrator, an act is required or allowed to be done at or within a specified time, the Administrative Law Judge (before his initial decision is filed), or the Judicial Officer, or the Administrator (after the Administrative Law Judge's initial decision) for good cause shown may at any time in his discretion (1) with or without motion or notice, order the period enlarged if request therefor, which may be made ex parte, is made before the expiration of the period originally prescribed or as extended by a previous order, or (2) on motion made after the expiration of the specified period, permit the act to be done where the failure to act was the result of excusable neglect or other good cause.

(c) *Additional time after service by mail.* A prescribed period of time within which a party is required or permitted to do an act shall be computed from the time of service, except that when the service is made by mail, three (3) days shall be added to the prescribed period.

§ 173.6 Ex parte discussion.

At no stage of a proceeding shall the Administrator, the Judicial Officer, or the Administrative Law Judge discuss ex parte the merits of the proceeding with any party or with any person who has been connected with the preparation or presentation of the proceeding as an advocate, or in an investigative or expert capacity, or with any representative of such person: *Provided, however,* That the Administrator, the Judicial Officer, or the Administrative Law Judge may discuss the merits of the case with any such person if all parties to the proceeding, or their representatives have been given reasonable notice and opportunity to be present. Any memorandum or other communication addressed to the Administrator, the Judicial Officer, or the Administrative Law Judge during the pendency of the proceeding, and relating to the merits thereof, by or on behalf of any party, shall be regarded as argument made in the proceeding. The Administrator, the Judicial Officer, or the Administrative Law Judge shall cause any such communication to be filed with the Hearing Clerk and served upon all other parties to the proceeding who will be given the opportunity to file an answer thereto.

COMMENCEMENT OF PROCEEDING

§ 173.7 Commencement of proceeding.

(a) *Filing a claim for compensation.* A claim for compensation must be filed with the Hearing Clerk and served upon the respondent, in accordance with § 173.04. The Hearing Clerk shall assign a FIFRA COMP. docket number. The Chief Administrative Law Judge shall assign himself or another Administrative Law Judge to conduct the proceeding and the Chief Administrative Law Judge or his designee shall notify the parties that such assignment has been made.

(b) *Time for filing.* A final claim under this section must be received by the Hearing Clerk not later than the 90th calendar day following the claimant's receipt of the notice of approval of an application prescribed by § 162.9(b) of this chapter.

(c) *Contents of claim.* A claim for compensation shall contain the following information:

(1) A copy of the preliminary claim for compensation, filed pursuant to § 162.9(d) of this chapter;

(2) Any other relevant and material correspondence with the Agency relating to the claims;

(3) The amount of compensation claimed and the method of computing said amount, with detailed justification of the amount claimed and method of compensation.

(4) A certification as to the following:

(i) Whether the Administrator or any court has made determinations for payment by any other persons to claimant for use of the same test data and, if so, the identity of the persons against whom the for determinations were issued and the applications registration for which the test data had been used;

(ii) Whether any other claims against any persons are pending before the Agency or in any court for use of the same test data and, if so, the identity of the persons against whom the claims are pending and the applications for registration on which the claims are being made;

(iii) Whether the claimant has granted permission to persons other than respondent to use the test data in support of an application for registration and, if so, the identity of the persons to whom, and the application for which, the permission was granted and the amount of compensation, if any, agreed upon for the use of the data. If such permission was given under written agreements or documents the claimant shall furnish copies thereof.

(d) *Transmittal from the Director.* The Administrative Law Judge may at his discretion direct the Director to transmit any information the Administrative Law Judge deems relevant, including:

(1) A copy of the application, including the confidential formula, other supporting data and/or the approved labeling;

(2) A copy of any preliminary claim for compensation;

(3) A copy of all correspondence in the Director's possession which relates to the claim;

(4) Information as to the data considered in support of the registration.

The Administrative Law Judge shall order protective measures to safeguard and restrict access to information entitled to confidential treatment under section 10 of the Act. This shall include, as may be necessary, withholding such

information from the public record in the case and other protective measures, as set forth in § 173.18(a).

§ 173.8 Answer to the final claim.

If respondent (a) contests any material fact alleged by claimant, or (b) contends that the amount of compensation claimed or method of computation is inappropriate, or (c) contends that he is entitled to judgment as a matter of law, he shall file a written answer to the claim with the Hearing Clerk. Any such answer must be filed within thirty (30) days after service of the claim computed in accordance with § 173.05. If the respondent takes issue with the statement of claimant as to the amount of compensation claimed or method of computation, the respondent shall file a statement as to his position as to the amount of reasonable compensation and detailed justification as to method of computation.

ADMINISTRATIVE LAW JUDGE

§ 173.9 Qualifications and duties of Administrative Law Judge.

(a) *Qualifications.* The Administrative Law Judge shall have the qualifications required by statute. He shall not decide any matter in connection with a proceeding where he has a financial interest in the subject matter of the proceeding or in any of the parties or a relationship with a party that would make it otherwise inappropriate for him to act.

(b) *Disqualification of the Administrative Law Judge.* (1) Any party, may, by motion made to the Administrative Law Judge, as soon as practicable, request that he disqualify himself and withdraw from the proceeding. The Administrative Law Judge shall then rule upon the motion and shall upon request of the movant, certify an adverse ruling to the Administrator for review.

(c) *Withdrawal sua sponte.* The Administrative Law Judge may at any time withdraw from any proceeding in which he deems himself disqualified for any reason.

(d) *Power.* Subject to review, as provided elsewhere in this part, the Administrative Law Judge shall have power to take actions and render decisions in conformity with statute or in the interests of justice.

(e) *Absence or change of the Administrative Law Judge.* In the case of the absence or unavailability of the Administrative Law Judge, or his inability to act, or his removal by disqualification or withdrawal, the powers and duties to be performed by him under this part in connection with a proceeding assigned to him may, unless otherwise directed by the Administrator, be assigned to another Administrative Law Judge so designated to act by the Chief Administrative Law Judge, the Administrator, or the Judicial Officer.

JUDICIAL OFFICER

§ 173.10 Qualifications and functions of Judicial Officer.

(a) *Qualifications.* A Judicial Officer shall be a permanent or temporary employee or officer of the Agency who may perform other duties for the Agency. Such Judicial Officer shall not be employed by the Office of Pesticide Programs or have had any connection with the registration of the pesticides that are the subject of the proceeding.

(b) *Functions.* The Administrator may delegate any or part of his authority to act in a given case to a Judicial Officer. The Administrator can separately delegate his authority to rule on interlocutory orders and motions, and may also delegate his authority to make findings of fact and draw conclusions of law in a particular proceeding, providing that this delegation shall not preclude the Judicial Officer from referring any motion or case to the Administrator when the Judicial Officer determines such referral to be appropriate. The Administrator, in deciding a case himself, may consult with and assign the preliminary drafting of conclusions of law and findings of fact to any Judicial Officer.

APPEARANCES, INTERVENTION, AND CONSOLIDATION

§ 173.11 Appearances.

(a) *Representatives.* Parties may appear in person or by counsel or other representative. Persons who appear as counsel or in a representative capacity must conform to the standards of ethical conduct required of practitioners before the courts of the United States.

(b) *Failure to appear or respond.* Any party to the proceeding, who after being duly notified and without good cause being shown, fails to appear at any prehearing conference under § 173.15 or fails to respond to correspondence under § 173.16 shall be subject to whatever orders or determinations the Administrative Law Judge may make in his discretion. The failure of a party to appear at a hearing shall constitute a waiver of the right to present evidence at such hearing. Where respondent fails to appear at a hearing, the Administrative Law Judge shall require the presentation by claimant of such evidence as the Administrative Law Judge deems necessary to prepare an initial decision in conformity to the requirements of section 3(c)(1)(D) of the Act. Upon conclusion of the hearing, the Administrative Law Judge shall cause a copy of the initial decision to be served upon respondent as well as upon the other parties.

§ 173.12 Intervention.

(a) *Motion.* Any person may file a motion for leave to intervene in any proceeding conducted under these rules of practice. Such motion must set forth the grounds for the proposed intervention, the position and interest of movant in the proceedings, and the likely impact that such intervention will have on the expeditious progress of the proceeding.

(b) *When filed.* A motion for leave to intervene in a proceeding must ordinarily be filed prior to the first prehearing conference or, in the absence of a prehearing conference, prior to the initiation of correspondence pursuant to § 173.16, or if there is no such correspondence, prior to the setting of a time and place for a hearing. Any motion filed after that time must include in addition to the information set forth in paragraph (a) of this section, a statement of good cause for the failure to file in a timely manner. Such motion for leave to intervene shall be granted only upon a finding that (1) extraordinary circumstances justify the granting of the motion; and (2) the intervenor shall be bound by any agreements, arrangements, and other matters previously made in the proceeding.

(c) *Disposition.* Leave to intervene may be granted only insofar as movant demonstrates that (1) there exist common questions of fact or law; (2) he may be adversely affected by a final order of the Administrator; and (3) his participation in the case would not unreasonably broaden the issue regarding reasonable compensation to claimant for producing the test data in question, or unduly prolong or otherwise prejudice the adjudication of the rights of the original parties. If leave is granted, the movant shall thereby become a party to the proceeding. Any party, or the movant if leave is denied, may request that the ruling on any motion for leave to intervene in a proceeding conducted under these rules of practice be certified on interlocutory appeal to the Administrator as provided in § 173.25(a).

(d) *Amicus curiae.* Persons not parties to the proceeding who wish to file briefs therein may upon good cause shown, so move the Administrative Law Judge or the Administrator as appropriate pursuant to § 173.14(c). Such motion for leave to file briefs shall identify the interest of the movant and shall state the reasons why the proposed amicus brief is desirable. In the event such motion is granted, the Administrative Law Judge or Administrator shall issue an order setting the time for filing such brief. An amicus curiae shall be eligible to participate in any briefing following the granting of his motion, and shall be served with all briefs, reply briefs, motions and orders relating to issues to be briefed.

§ 173.13 Consolidation and severance.

(a) *Consolidation.* The Chief Administrative Law Judge may by motion or sua sponte, consolidate any or all matters at issue in two or more proceedings docketed under these rules of practice where there exist common parties, common questions of fact and law, and where such consolidation would expedite or simplify consideration of the issues. Consolidation may also be effected where separate claims for use of the same test data are made against different respondents. Consolidation shall not prejudice any rights granted parties to proceedings conducted under these rules of practice and shall not affect the right of any party to raise issues that could have been raised if consolidation had not occurred.

(b) *Severance.* The Administrative Law Judge may, by motion or sua sponte, for good cause shown order any proceeding severed with respect to some or all parties or issues.

§ 173.14 Motions.

(a) *General.* All motions, except those made orally on the record during a hearing, shall (1) be in writing; (2) state with particularity the grounds therefor; (3) set forth the relief of order sought; and (4) be accompanied by any affidavit, certificate or other evidence relied upon. Such motions shall be served in accordance with the provisions of § 173.04(a).

(b) *Response to motions.* Except as otherwise provided by the Administrative Law Judge or the Administrator as appropriate pursuant to § 173.14(c), any party may file a response in support of or in opposition to any written motion within ten (10) days after service of such motion. This response shall be accompanied by any affidavit, certificate, or other evidence relied upon. If no response is filed within the designated period, the parties shall be deemed to have waived any objection to the granting of the motion. The Administrative Law Judge or the Administrator, as appropriate may set a different time for response, or make such other orders concerning the disposition of motions as he deems appropriate.

(c) *Ruling.* The Administrative Law Judge shall rule upon all motions until the Administrative Law Judge has filed an initial decision. The Administrator shall rule on all motions filed after the issuance of the initial decision.

PREHEARING PROCEDURES

§ 173.15 Prehearing conference.

(a) *Purpose of prehearing conference.* When it appears that such procedure will expedite the proceeding, the Administrative Law Judge, at any time prior to the commencement of the hearing, may request the parties and their counsel or other representative to appear at a conference before him to consider:

(1) The possibility of settlement of the case;

(2) The simplification of issues and stipulation of facts not in dispute;

(3) The necessity or desirability of amending or supplementing documents in the record;

(4) The possibility of obtaining admissions or stipulations of fact and of documents which will avoid unnecessary proof;

(5) The limitation of the number of expert or other witnesses;

(6) The setting of a time and place for the public hearing, given consideration to the convenience of all parties and to the public interest; and

(7) Any other matters as may expedite the disposition of the proceeding.

(b) *Exchange of witness lists and documents.* Unless otherwise ordered by the Administrative Law Judge each party at the prehearing conference shall make available to each other party the names of the expert and other witnesses he intends to call, together with a brief narrative summary of their expected testimony and copies of all documents and exhibits which the party intends to introduce into evidence, which documents shall be marked for identification as ordered by the Administrative Law Judge. Thereafter, witnesses, documents, or exhibits may be added and narrative summaries of expected testimony amended only upon motion by a party for good cause shown.

(c) *Record of the prehearing conference:* No transcript of any prehearing conference shall be made unless ordered upon motion of a party or sua sponte by the Administrative Law Judge. In the absence of a transcript, the Administrative Law Judge shall prepare and file a report of the action taken at such conference. Such report shall incorporate any writen stipulations or agreements made by the parties, all rulings upon matters considered at such conference, and appropriate orders containing directions to the parties. Such report shall, as appropriate, direct the subsequent course of the proceeding, unless modified by the Administrative Law Judge, on motion or sua sponte.

§ 173.16 Prehearing correspondence.

Where circumstances render a prehearing conference unnecessary or impracticable, or when the Administrative Law Judge decides that correspondence with the parties may accomplish any of the objectives of a prehearing conference he may, on motion or sua sponte, request the parties to correspond with him for the purpose of accomplishing any of the objectives set forth in § 173.15. The Administrative Law Judge shall include such correspondence as part of the proceeding and a written summary of any stipulation or agreements reached by means of such correspondence as provided in § 173.15(c). Following such correspondence the Administrative Law Judge may if he considers it desirable or necessary order a prehearing conference with the parties.

HEARING PROCEDURES

§ 173.17 Scheduling of hearing.

(a) *Notice of hearing.* The Administrative Law Judge shall after consideration of the convenience of the parties, serve upon the parties a notice of hearing setting a time and place for such hearing.

(b) *Postponement of hearing.* Except for good cause shown, no request for postponement of a hearing will be granted. Such request must be received in writing at least five (5) days in advance of the time set for the hearing. In case of postponement, the hearing shall be rescheduled for a date as early as circumstances will permit.

§ 173.18 Evidence.

(a) *General.* The Administrative Law Judge shall admit all evidence which is relevant, competent and material, and is not unduly repetitious. Relevant, competent, and material evidence may be received at the hearing although such evidence may be inadmissible under the rules of evidence applicable to judicial proceedings. The weight to be given all evidence shall be determined by its reliability and probative value. In the presentation, admission, disposition, and use of evidence, the Administrative Law Judge shall preserve the confidentiality of trade secrets and other privileged commercial and financial information, pursuant to section 10 of the Act. The confidential or trade secret status of any evidence shall not, however, preclude its being introduced into evidence. The Administrative Law Judge may make such orders as may be necessary to consider such evidence in camera, including the preparation of a supplemental initial decision to consider questions of fact and conclusions regarding material issues of law, fact, or discretion which arise out of that portion of the evidence which is confidential or which includes trade secrets.

(b) *Order to produce.* For good cause, motion or sua sponte, the Administrative Law Judge may order a party, or an officer or agent thereof, to produce testimony, documents, or other non-privileged evidence and failing the production thereof without good cause being shown, adverse inferences may be drawn against such party.

(c) *Examination of witnesses.* Except as otherwise provided in these rules of practice or by the Administrative Law Judge, witnesses shall be examined orally, under oath or affirmation. Parties shall have the right to cross-examine a witness who appears at the hearing provided that such cross-examination is not unduly repetitious.

(d) *Verified statements.* The Administrative Law Judge may admit and insert into the record as direct evidence in lieu of oral testimony, statements of fact or opinion prepared by a witness. The admissibility of the evidence contained in such statement shall be subject to the same rules as if such testimony were produced under oral examination. The witness shall swear to or affirm the statement and shall be subject to oral cross-examination on the contents thereof. Before any such statement is read or admitted into evidence, the witness shall deliver a copy of the statement to the Administrative Law Judge, the reporter, and other parties to the proceeding. Such statements shall not be admitted when it appears to the Administrative Law Judge that the memory or the demeanor of the witness is of importance.

(e) *Admissibility.* Evidence shall be admissible to show that claimant has agreed to accept payment from another person for use of the test data in question which was used in support of another application for registration. Evidence shall also be admissible to show that a determination for compensation has been made by the Administrator or a court in favor of claimant against another person for use of the test data in question in support of another application for registration.

(f) *Exhibits.* Except where the Administrative Law Judge finds it impracticable, an original and two copies of each exhibit shall be filed at the time the exhibit is offered into evidence and a copy shall be furnished to each party. A true copy of an exhibit may be substituted for the original.

(g) *Official notice.* Official notice may be taken of any matter judicially noticed in the Federal courts, and of other facts within the specialized knowledge and experience of the Agency. The parties shall be given adequate opportunity to show that such facts are erroneously noticed.

§ 173.19 Objections and offers of proof.

(a) *Objections.* Any objection concerning the conduct of the hearing, the admission or rejection of evidence, the limitation of the slope of any examination or cross-examination, or a ruling by the Administrative Law Judge, may be stated orally if on the record, or in writing. The party raising the objection must supply a short statement of the grounds for the objection. The ruling and the reasons given therefore by the Administrative Law Judge on any objection shall be a part of the transcript. An automatic exception is not waived by further participation in the hearing.

(b) *Offer of proof.* Whenever evidence is excluded from the record, the party offering such evidence may make an offer of proof, which shall be included in the transcript. The offer of proof for excluded oral testimony shall consist of a brief statement describing the nature of the evidence excluded. The offer of proof for excluded documents or exhibits shall consist of the insertion in the record of the document(s) or exhibit(s) excluded. Where the Administrator decides the ruling of the Administrative Law Judge in excluding the evidence was both erroneous and prejudicial, the hearing may be reopened to permit the taking of such evidence, or, where appropriate, the Administrator may evaluate such improperly excluded evidence in preparing his final order. In the event that the Administrator in the preparation of his final order relies upon any evidence excluded at the hearing by the Administrative Law Judge, he shall explicitly identify in the final order any such excluded evidence relied upon and his reasons therefore.

§ 173.20 Burden of presentation; burden of persuasion.

The claimant shall have the burden of going forward and the burden of proof to establish his entitlement to a reasonable amount of compensation that respondent should pay for use of the test data relied upon. Each matter of controversy shall be decided by the Administrative Law Judge upon a preponderance of the evidence.

§ 173.21 Filing of transcripts.

The hearing shall be transcribed verbatim. Promptly following the taking of the last evidence, the reporter shall transmit to the Hearing Clerk as many copies of the transcript of testimony as are called for in the reporter's contract with the Agency, and shall transmit to the Administrative Law Judge the original transcript. A party to the proceeding may purchase a copy of the transcript from the Hearing Clerk upon payment of the costs of reproduction of such transcript.

§ 173.22 Filing of briefs, proposed findings of fact and conclusions of law, and proposed order.

Unless otherwise ordered by the Administrative Law Judge, each party may within thirty (30) days after delivery of the transcript of a hearing to the Hearing Clerk as provided in § 173.21, file with the Hearing Clerk and serve upon all other parties, proposed findings of fact, conclusions regarding material issues of law, fact, or discretion, a proposed order based solely upon the record, and a brief in support thereof, together with references to relevant exhibits. Within fifteen (15) days thereafter each party may file a reply brief concerning matters contained in opposing briefs and containing alternative findings of fact, conclusions regarding material issues of law, fact, or discretion and proposed orders. Oral argument may be had at the discretion of the Administrative Law Judge in motion of any party or sua sponte.

ACCELERATED OR INITIAL DECISION

§ 173.23 Accelerated decision.

(a) *General.* The Administrative Law Judge upon motion or sua sponte, may at any time render an accelerated decision in favor of claimant or respondent as to all or any portion of the proceeding, without further proceedings or upon such limited additional evidence such as affidavits as he may require, under any of the following conditions:

(1) Failure to state a claim upon which relief can be granted, or direct or collateral estoppel;

(2) There is no genuine issue of any material fact and a party is entitled to judgment as a matter of law; or

(3) Such other and further reasons as are just.

(b) *Effect.* (1) In the event an accelerated decision is issued by the Administrative Law Judge, the decision shall be treated for the purpose of these rules of practice in the same manner as an initial decision of the Administrative Law Judge rendered after completion of a hearing under § 173.24.

§ 173.24 Initial decision.

(a) *Contents of initial decision.* The Administrative Law Judge shall as soon as practicable after the filing of briefs evaluate the record before him, and prepare and file his initial decision with the Hearing Clerk. The initial decision shall contain his findings of fact, and conclusions regarding all material issues of law, fact or discretion including the matters set forth in § 162.9(h) of this chapter, as well as reasons therefore. In accordance with § 162.9(i) of this chapter, the initial decision shall make a determination as to the reasonable compensation respondent must pay to claimant for producing the test data relied upon including the amount and method of payment, and such other terms and conditions as may be reasonable under the circumstances and equitable to the parties. In so doing, the Administrative Law Judge may require the furnishing of a bond or other guarantee of payment by the respondent to the claimant.

(b) *Effect of initial decision.* The initial decision of the Administrative Law Judge shall become the final order of the Administrator within forty-five (45) days after transmission thereof by the Hearing Clerk to the Administrator and without further proceedings unless (1) an appeal to the Administrator is taken from it by a party to the proceedings, or (2) the Administrator elects, sua sponte, to review the initial decision.

APPEALS AND ADMINISTRATIVE REVIEW

§ 173.25 Appeal from or review of interlocutory orders or rulings.

(a) *Request for interlocutory appeal.* Except as provided in this section, appeals to the Administrator shall obtain as a matter of right only from an initial decision of the Administrative Law Judge. Appeals from other orders or rulings shall lie only if the Administrative Law Judge, upon motion of a party, certifies such orders or rulings to the Administrator on appeal. Requests to the Administrative Law Judge for such certification shall be filed in writing within five (5) days of notice of the ruling or service of the order and shall state briefly the grounds to be relied upon on appeal.

(b) *Availability of interlocutory appeal.* The Administrative Law Judge may certify a ruling for appeal to the Administrator when (1) the order or ruling involves an important question of law or policy concerning which there is substantial ground for difference of opinions; and (2) either (i) an immediate appeal from the order and ruling will materially advance the ultimate termination of the proceeding, or (ii) review after the initial or accelerated decision is issued will be inadequate or ineffective.

(c) *Decision.* If the Administrator determines that certification was improvidently granted, or if he takes no action within twenty (20) days of the certification, the appeal shall be deemed dismissed. When the Administrative Law Judge declines to certify an order or ruling to the Administrator on interlocutory appeal, it may be reviewed by the Administrator only upon appeal from the initial decision, except when the Administrator determines, upon motion of a party and in exceptional circumstances, that to delay review would be deleterious to the public interest. Such motion shall be made within five (5) days of service of an order or notice of ruling of the Administrative Law Judge refusing to certify a ruling for interlocutory appeal to the Administrator. Ordinarily, the interlocutory appeal will be decided on the basis of the submissions made to the Administrative Law Judge. The Administrator may, however, allow further briefs and oral argument.

(d) *Stay of proceedings.* The Administrative Law Judge may stay the proceedings pending a decision by the Administrator upon an order of ruling certified by the Administrative Law Judge for an interlocutory appeal, or upon the denial of such a certification by the Administrative Law Judge. Except in extraordinary circumstances proceedings will not be stayed.

§ 173.26 Appeal from or review of initial decisions.

(a) *Exceptions and request for oral argument.* (1) Within twenty (20) days

after service of the Administrative Law Judge's initial decision, any party may take exception to any matter set forth in such decision or to any adverse order or ruling to which he objected during the hearing and may appeal such exceptions to the Administrator. Appeal may be made by filing exceptions in writing with the Hearing Clerk. Such exceptions shall contain alternative findings of fact, conclusions regarding material issues of law, fact or discretion and a proposed order together with references to the relevant pages of the record and initial decision. A copy of each such document taking exception to the initial decision shall be served upon each other party and amicus curial. Within the same period of time each party filing exceptions and amicus curiae shall file with the Hearing Clerk and shall serve upon all parties a brief concerning each of the exceptions being appealed. The party shall include in its brief, page references to the relevant portions of the record and to the Administrative Law Judge's initial decision.

(2) Within ten (10) days of the service of exceptions and briefs under paragraph (a)(1) of this section, any other party or amicus curiae may file and serve a reply brief responding to exceptions or arguments raised by any party, together with references to the relevant portions of the record, initial decision, or opposing brief. Reply briefs shall not, however, raise additional exceptions.

(b) *Sua sponte review by Administrator.* Whenever the Administrator determines sua sponte to review an initial decision, notice of such intention shall be served upon the parties by the Hearing Clerk within forty-five (45) days after the date of service of the initial decision. Such notice shall include a statement of issues to be briefed by the parties and a time schedule for the service and filing of briefs.

(c) *Scope of appeal or review.* Except when the Administrator determines that additional issues should be argued, the appeal of the initial decision shall be limited to the issues raised by appellant. Where it is determined that additional issues should be argued, counsel for the parties shall be given reasonable written notice of such determination to permit preparation of adequate argument.

(d) *Argument before the Administrator.* A party who has filed exceptions may therein request oral argument which the Administrator, in his discretion, may grant or deny. Failure of a party to request oral argument on the exceptions filed shall constitute a waiver of oral argument. The Administrator may, nonetheless, sua sponte, set a matter for oral argument. The time and place for such oral argument, if granted, shall be assigned after giving consideration to the convenience of the parties.

§ 173.27 Final order.

If a party to the proceeding takes an appeal to the Administrator from the initial decision of the Administrative Law Judge, or the Administrator sua sponte, reviews such decision the Administrator as soon as practicable after service upon him of the initial decision, shall issue his final order. Such final order may accept or reject all or part of the initial decision. The final order shall include findings of fact and conclusions regarding material issues of law, fact, or discretion as well as reasons therefor and shall make a determination as to the reasonable compensation, if any, that respondent must pay to the claimant for producing the test data relied upon, the method of payment, and, may fix such other terms and conditions as may be reasonable under the circumstances and equitable to the parties, including the furnishing of a bond or other guarantee of payment by the respondent to the claimant.

MOTION TO RECONSIDER

§ 173.28 Motion to reopen hearings; to rehear or reargue proceedings; or to reconsider.

(a) *Filing and service.* A motion to reopen a hearing to take further evidence, to rehear or reargue any matter related to such proceeding, or to reconsider any final order, must be made by motion to the Administrator or the Administrative Law Judge, in accordance with § 173.14, and filed with the Hearing Clerk. Every such motion must state the specific grounds upon which relief is sought.

(b) *Motion to reopen hearing.* A motion to reopen a hearing for the purpose of taking further evidence may be filed at any time prior to the issuance of the Administrator's final order. Such motion shall state briefly the nature and purpose of the evidence to be adduced, shall show that such evidence is not cumulative, and shall set forth a good reason why such evidence was not adduced at a hearing.

(c) *Motion to rehear, reargue, or reconsider.* Motions to rehear or reargue any matter related to a hearing or to reconsider the final order shall be filed within ten (10) days after the date of service of the final order. Such motion must state specifically the matters claimed to have been erroneously decided. The nature of any alleged error must be briefly stated.

§ 173.29 Procedure for disposition of motions.

Within ten (10) days following the service of any motion provided for in § 173.27 any other party to the proceeding may file with the Hearing Clerk and serve on all other parties an answer thereto. As soon as practicable thereafter, the Administrator or the Administrative Law Judge, as appropriate shall announce his intent to grant or to deny such motion. Unless the Administrator determines other vise, implementation of the final order shall not be stayed pending the decision to grant or to deny the motion. The conduct of any proceeding which may be required as a result of the granting of any motion allowed in this section shall be governed by the provisions of the applicable section of these rules.

EPA FORM 8570-

DIRECTIONS

Prior to the preparation of the supporting data portion of a pesticide application, you should become familiar with the data requirements. The general requirements are stated in the Federal Insecticide, Fungicide, and Rodenticid Act, as amended; and in the implementing regulations. The specific data requirements are explained in the Registratio Guidelines. Additional assistance is available in the EPA Regional Offices or from the EPA Registration Division (WH-567) Washington, D.C. 20460.

A list of the tests cited should be prepared as an index to the Supporting Data Citation forms. The list should specify each test and the page number of the corresponding form.

Supporting Data Citation forms must be submitted wheter the actual data is submitted or cited. One form must be completed for each test submitted.

Forms submitted must contain original signatures in the certification box.

DRAFT

SPECIFIC DIRECTIONS

Box 1. Consecutively number all citation sheets being submitted with the application.

THE APPLICATION

Box 2. For EPA use only.

SECTION A: IDENTIFICATION OF THE APPLICATION SUPPORTED.

Box 3. Specify the name of the product in support of which the data is submitted.
Box 4. Specify the date the supported application is being submitted.
Box 5. Specify the product registration number, file symbol, or company number of the product in support of which the data is submitted.

SECTION B: IDENTIFICATION OF THE SPECIFIC TEST PERFORMED.

Box 6. Specify the test index number used in the Registration Guidelines and the EPA Data Catalog for the specific data requirement.
Box 7. Specify the test name used in the Registration Guidelines and the EPA Data Catalog for the specific data requirement.
Box 8. For data being cited from the EPA Data Catalog specify the catalog test number for the specific test cited.
Box 9. Specify the test organism or application site as appropriate.
Box 10. When appropriate, specify the pest against which the test is being conducted.
Box 11. Identify the method of application or other descriptor necessary to identify the test.

SECTION C: IDENTIFICATION OF THE PERSON WHO PERFORMED THE TEST.

Box 12. Specify the individual or organization that performed the test. If the test was conducted by a university, experiment station, or independent laboratory, state the name and address. If the test was performed by the applicant or a previous applicant, state the company name and address.
Box 13. If the individual/organization that conducted the test has been assigned a company number, insert the number in Box 13.
Box 14. Specify when the test was conducted. If the test took longer than one day specify the first day of the test.
Box 15. If you have a code number or other identifier for the test, place it in Box 15.

SECTION D: IDENTIFICATION OF THE SUBSTANCE TESTED.

Box 16. List the active ingredients in the material tested. List one ingredient per line and specify the percentage of that ingredient in the material tested. Do not specify any inerts or other confidential information.
Box 17. Specify the nature of the material tested.
Box 18. If the material tested was a formulated material, specify the formulation type in Box 18.
Box 19. If the material tested has previously been registered specify the registration number.

SECTION E: REFERENCE CITATION FOR PREVIOUSLY SUBMITTED DATA.

Box 20. When citing data previously submitted to the Agency specify the name and address of the original submitter.
Box 21. Specify the date the cited data was originally submitted to the Agency or its predecessors.
Box 22-24. Specify, as appropriate, the registration number, petition number, or experimental permit number under which the data was originally submitted.

SECTION F: CERTIFICATION OF STATUS.

Box 25. Select the appropriate catagory of data from the following list and mark the appropriate box.
Catagory I includes all data first submitted to the Agency in support of an Application for Registration before January 1, 1970.
Catagory II includes all data not within Data Catagory I which were produced at the expense of the applicant alone.
Catagory III includes all data not within Catagory I or II which is accompanied by a Consent Statement as set forth in Box 28.
Catagory IV includes all data not within Data Categories I, II, or III.
Box 26. For data being submitted to the Agency for the first time with this application, specify whether trade secret status is claimed for the data.
Box 27. For data submitted under Catagory I or II the applicant must sign the certification in Box 27A. (See Notice Bel:
Box 28. For data submitted under Catagory III the owner of the data must sign the certification in Box 28A. (See Notice Below)
Box 29. For data submitted under Catagory IV the applicant must sign in Box 29A. (See Notice Below)
NOTICE: The statements must be signed as indicated by the applicant or consenting party or if, such person is a corporation or other juridicial person, an individual with authority to act on behalf of the applicant. Signature of any of these statements constitutes certification by the signing party of his understanding that if any of the statements which he signs are known by him to be false, he may be subject to criminal penalty under 18 U.S.C. § 1001, criminal or civil penalty under 7 U.S.C. §136j (a)(2)(M), or both.

Supporting Data Citation (reverse)

APPENDIX II

FIFRA section 25(a)(2)(A) requires the Administrator to provide the Secretary of Agriculture with a copy of any proposed regulation at least 60 days prior to signing it for publication in the FEDERAL REGISTER. The comments of the Secretary and the Administrator's response thereto are published below.

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, December 21, 1976.

Hon. RUSSELL E. TRAIN,
Administrator, U.S. Environmental Protection Agency, Waterside Mall, Room W1200 A 100, Washington, D.C.

DEAR MR. TRAIN: Enclosed are comments on the proposed draft of regulations to implement Section 3(c)(1)(D) of FIFRA, as amended. This response is pursuant to the Congressional provision for review and comment by the Secretary of Agriculture. We believe these suggestions will be helpful to your Agency in developing the final proposal. Our major concern is that this implementation of the data compensation provision may increase the already complex burden of registering and reregistering pesticides.

Please be assured that this Department wants to assist EPA in every way possible in its important role of implementing the FIFRA, as amended.

Sincerely,

JOHN A. KNEBEL,
Secretary.

Enclosure.

USDA COMMENTS ON THE EPA DRAFT OF SECTION 3(c)(1)(D) REGULATIONS

The U.S. Department of Agriculture has made major commitments for assisting EPA in the implementation of FIFRA, as amended, in the areas where USDA has primary interests and expertise. These commitments include providing scientific information regarding the need for pest control, the best techniques for such control, research in many areas relating to the use of pesticides and their fate in the environment, and the education of applicators and users of pesticides. In compliance with the provisions of Section 25(a)(2)(A) of FIFRA, as amended, we are submitting these comments in response to your proposed regulations to implement the provisions of Section 3(c)(1)(D).

The provisions of Section 3(c)(1)(D) and the regulations promulgated thereunder are primarily a concern of firms engaged in the business of producing and formulating pesticides and pesticide products. While the Department is sensitive to these concerns, it shares an interest with EPA in the expeditious registration and reregistration of pesticides that should be registered under the provisions of FIFRA, as amended, (*e.g.* pesticides that are efficacious and do not cause unreasonable adverse effects on the environment).

Any regulation that causes an undue impediment to the registration of pesticides would be counterproductive. Accordingly, we are concerned that regulations on compensation fully effectuate both the spirit and the intent of the statutory mandate that "(r)egistration shall not be delayed pending the determination of reasonable compensation between the applicants, by the Administrator, or by the court." We firmly believe that regulations which dissuade prospective applicants from using reliable data generated by another person to support an application for registration would constitute a great disservice to the public interest, and contravene the Congressional purpose underlying the enactment of Section 3(c)(1)(D).

The effect of the proposed regulations on American agriculture cannot be discerned with sufficient accuracy to enable this Department to make detailed comments at this time. Issues such as the identification of trade secrets and the applicability of dates which determine the rights of parties regarding compensation for use of data are in litigation. In addition the regulations require additional and extensive paperwork both by applicants for registration and claimants for compensation. This requirement is likely to deter applicants from registering products and may result in significantly increased costs.

USDA is concerned about the implementation of any regulation which would unnecessarily impinge on the availability of pesticide products, interfere with continued efficient agricultural production, or work to the detriment of the American farmer.

While we recognize the possibility that the American farmer may have to pay more money for pesticides as a result of the provisions of Section 3(c)(1)(D), we realize that manufacturers whose registration data are used by others should be compensated in an equitable manner. All benefactors of the development of data essential to registration should bear a fair share of the financial burden of generating that data. The primary goal should be to encourage continued research by the private sector to develop new and improved pesticides for pest control.

While the proposed regulations indicate some awareness of a need for criteria, they do not specify the criteria that will be applied to define reasonable compensation nor do they establish simple methodolgy for determining such compensation. Persons may desire to use compensable data but be unable to identify the owner(s) or, having ascertained the owner(s) be unable to negotiate an agreement on compensation. Such prospective applicants are left in a serious quandary regarding whether or not to rely on another's data with a binding commitment to pay. They are unable to be certain of the basis on which your agency will decide the matter of compensation after the registration is granted, and thus the actual cost of using the data. Fundamental guidelines establishing the basis for adjudging compensation would greatly minimize the dilemma that now exists, and we believe that the promulgation of such guidelines by your agency under Section 3(c)(1)(D) would greatly facilitate the using of data generated by others to support new registrations.

The identification of information to be considered as trade secrets or confidential, under Section 10 of FIFRA, as amended, should be resolved before the issuance of regulations under Section 3(c)(1)(D) because such a definition is inextricable from considerations applicable to ascertaining the scope of those data that are compensable. In September 1976 in a talk given to the Pesticide Formulators Association, an EPA official indicated that 10 cases involving the question of trade secrets were in the courts. The statement was made that these pending court actions involve thousands of products on which no registration or reregistration action can be taken and that "(t)rade secret questions may prove to be the most difficult problem we have in the long run and may require legislative changes."

While it is recognized that the matter of trade secrets, as they are involved in the court actions, is not specifically an item under Section 3(c)(1)(D), nevertheless they are related to the requirements of the Section. The Department has a deep concern that the initiation of court actions has prevented EPA from carrying out its mandate to register pesticides and is preventing American agriculture from utilizing these materials.

The requirement that a form be filed for each item of data submitted may prove unduly burdensome on applicants and on EPA. Consideration should be given to methods of reducing the paperwork required, especially in the case where numerous items are being cited, all are derived from one registrant, and particularly when consent has been given for all the data relied on by the applicant.

A proposal and policy which will require the applicant for registration to specifically identify each piece of data that is to be considered in the evaluation of the proposed product registration, the requirement that each claimant also identify each specific item of data, plus the requirement to file written reports regarding this data irrespective of the date of production of the data, appears to be extremely time-consuming and may go beyond the intent and purpose of Section 3(c)(1)(D). In the case of the older pesticides, it may not be possible to adequately identify the source of the data by either the applicant or the claimant. In Senate Report No. 94-452, the Committee expressed the view that "old data" should not be compensable.

"In view of its purpose, it would seem sound not to require cost sharing with respect to "old data". To make the provision applicable to "old data" could create a windfall for producers of this data since such data was prepared without any reasonable expectation that the law would require sharing of the costs of production." (94th Cong., 1st Sess., Sen. Rpt. No. 94-452, at p. 10)

The financial burden for the applicant may be greater in identifying the data, item by item, prior to completion of "EPA Data Catalog" than the initial registrant's claim for compensation. There does not appear to be any provision for an agreement covering "data packages" rather than individual items.

The definitions in the regulations, Sections 162.9(a)(5) and 162.9(a)(6) (ii) and (iii) are unnecessarily broad and may lead to disputes over the use of data. Section 162.9(a)(5) could be amended by adding the phrase "pertinent to the proposed registration" at the end of the first line. It is unlikely that EPA would rely on data which are not cited with some specificity. Sections 162.9(a)(6) (ii) and (iii) could be amended to delete the words "or implicitly" at the end of the last line of each section. Since it was the intent that the required cost sharing should be for the cost of data required to obtain or continue a registration, Section 162.9(a) (6) and (7) could be modified to identify the data required, requested, and used by EPA in consideration of a registration.

The proposed rules of practice under Section 3(c)(1)(D) include references to the legal concepts of "material issues of law or fact" and include an additional "material issue of discretion." The meaning of the latter term will be a source of confusion and controversy. It should be omitted as superfluous or it should be defined for purposes of Section 3(c)(1)(D) administrative proceedings.

In the development of information on the efficacy, phytotoxicity, residues, and similar data, it has been a normal practice to utilize the cooperative programs of the State and Federal governments. While this information may eventually be published, and therefore become public knowledge, not all of it is published prior to use in the registration process. Because of the public support of the development of this information, one could question how to go about determining the amount of compensation and to

whom the compensation should be paid. Consideration should be given to providing an exemption from the requirement of compensation for information developed with public monies.

As the regulations for the registration of pesticides have been promulgated, under FIFRA, as amended, it has become apparent that registrations of pesticides for "minor uses" have become more difficult to obtain both from the standpoint of the additional data requirements and registrant's interests. The problem appears to be primarily one of economics. For the potential supplier of the minor use pesticide, it is obvious that any additional economic requirements will further reduce the interest and participation in the "minor use" program.

Specifically, controversies on the required payment for data, could seriously delay or stop registration of minor use pesticides due to the regulations under Section 3(c)(1)(D). When the applicant for the minor use registration is the supplier of the data on a major use on a particular active ingredient, he can use his original data to support the minor use registration. However, in many cases, because only small quantities of registered products are required, the minor use applicant will be a different party, usually a smaller company, and Section 3(c)(1)(D) could enter the picture. Besides the time-consuming delays in proceeding to registration we also have the question of the size of payment. Unless the volume of anticipated use of the pesticide is a factor in determining compensation, the minor use applicant probably cannot affort the cost of data to support his low volume registration and he will not move forward with his application.

The joint commitment of EPA and this Department with respect to the registration of the minor uses of pesticides can be seriously handicapped if the proposed regulations do not accommodate this important use of pesticides.

RESPONSE OF THE ADMINISTRATOR

1. The Secretary requests that the Agency specify the criteria that will be used to determine reasonable compensation and establish a simple methodology for determining such compensation. He recommends that the Agency publish guidelines in this regard.

Response: As is explained in the Preamble, the Agency has evaluated the feasibility of establishing in these regulations substantive standards governing the amount and method of compensation and has concluded, on the basis of available information, that a precise formula for determining reasonable compensation is not practicable at this time. We expect that widely divergent theories of data valuation and compensation will be proposed and that widely divergent factual situations will be involved in the various claims. Therefore it seems more desirable that the initial determinations of the Administrative Law Judge and the Administrator be governed solely by the statutory standard of "reasonable compensation for producing the test data," as applied to the particular circumstances of each case. After some disputed claims for compensation have been decided, the Agency may be in a position to state substantive rules governing the determination of reasonable compensation. At the present time we have set forth in the Preamble various factors which have been suggested as appropriate for consideration in determining the amount, method and terms of reasonable compensation. These various factors are intended to serve as "guidelines" of the types of factors which the Administrator may consider in setting reasonable compensation.

In response to this comment, the Agency has modified the Preamble to explicitly solicit the submission of a precise formula for determining the amount and method of reasonable compensation and comment regarding the factors appropriate to this determination.

2. The Secretary recommends that the identification of information which is entitled to confidential treatment under section 10 of FIFRA should be resolved before the issuance of these regulations.

Response: The Agency has by memorandum [1] outlined the types of data which in its opinion are entitled to confidential treatment under FIFRA, section 10. As the Secretary points out, various lawsuits have been brought regarding this memorandum. The Environmental Protection Agency and the Department of Justice are pursuing this litigation with all possible speed. To delay issuance of these regulations pending resolution of these lawsuits (which may eventually be decided by the Supreme Court) would serve no useful purpose since the matter of what information is entitled to confidential treatment is not addressed in these regulations.

3. The Secretary suggests that it should not be necessary to complete a separate form for each item of data if all the data referenced by an applicant is derived from one registrant, particularly when consent has been given for use of the data.

Response: The Agency agrees that the paperwork required to support an application should be minimized whenever possible. We have determined, however, that requiring a separate form for each item of data will result in the most efficient registration process and will avoid questions which would, in fact, lead to greater amounts of paperwork.

4. The Secretary suggests that an applicant should not be required to identify the data he intends to use to support his application and that a claimant should not be required to identify the data for which he intends to file a claim for compensation. The Secretary states that it may be particularly difficult to identify the source of the data in the case of older pesticides.

Response: The statutory provisions of the 1972 FIFRA, as amended in 1975, mandate that the applicant identify the data he intends to use to support his application so that (1) the Administraion will know what data to review and to determine whether the pesticide product meets the requirements of section 3 of the Act; (2) the rights of the owner of the data to confidential treatment and reasonable compensation under sections 3(c)(1)(D) and 10 may be preserved; and (3) the Administrator will be able to notify the public of what data was relied upon to support the registration action, as required by section 3(c)(2).

The claimant must identify the data for which he intends to assert a claim for compensation so that (1) a claimant previously unknown to the applicant may be identified; and (2) the applicant will be able to estimate his maximum financial exposure if he continues to rely on the data he has cited.

The Agency expects the complete EDA Data Catalog to be available within the next several months. Each piece of data previously submitted to the Agency has already been assigned a unique number. Therefore identification of available "relatively old" data will be feasible. Moreover, no claims for compensation are likely to be filed with the Agency for data first submitted in support of an application prior to January 1, 1970, because such data is not eligible for compensation.

5. The Secretary suggests that the definition of the term "test data" at section 162.9(a)(5) be amended by adding the phrase "pertinent to the propose(d) registration" to avoid disputes over the use of data.

Response: The definition of the term "test data" is an issue separate and apart from the use of data. In accordance with the present statutory framework the Administrator will only consider in support of an application that data which has been cited by the applicant on a Supporting Data Citation form. An applicant would not be expected to cite (and perhaps offer to pay reasonable compensation for) data which are not pertinent to the registration.

6. The Secretary suggests that the definition of the term "data submitted in support of an application for registration" at section 162.9(a)(6) should be amended to delete the words "or implicitly" at the end of the last line of §§ 162.9(a)(6)(i) and 162.9(a)(6)(ii): He argues thereby that only data explicitly included in an application for registration should be considered "data submitted in support of an application."

Response: The effect of this suggestion would be to require the physical resubmission of data already in the Agency's files which was first submitted on or after January 1, 1970 in support of an experimental use permit or tolerance petition which was not explicitly included in an application for registration merely for the purpose that it might be eligible for compensation. This would clearly be a needless exercise. Moreover, such a definition, would encourage owners of data first submitted to the Agency prior to January 1, 1970 in support of an experimental use permit or tolerance petition and not explicitly included in an application for registration to resubmit the data and thereby make it eligible for compensation. That clearly would be contrary to the legislative intent that data first submitted prior to January 1, 1970 is not eligible for compensation.

7. The Secretary suggests that the terms "data submitted in support of an application," § 162.9(a)(6), and "data considered in support of an application," § 162.9(a)(7), should be modified to identify the data required, requested and used by EPA in consideration of a registration.

Response: The registration guidelines will detail the data required to support the registration of a pesticide. Presumably an applicant will identify the data requirements for his particular product and either reference or submit an item of data to satisfy each requirement. There is nothing to stop an applicant from submitting additional data. Nor should there be. An applicant may possess additional information which is relevant to the registration action which should be submitted to the Agency. Moreover, pursuant to § 162.8(a)(4) of the registration regulations an applicant is required to submit any factual information regarding adverse effects of the pesticide on the environment or man which have been obtained by him or come to his attention.

An item of data does not become eligible for compensation until a subsequent applicant references it in support of an application for registration. The subsequent applicant need only reference the data required to support his application. The subsequent applicant is not required to reference data previously submitted by another applicant which though relevant to this registration is not "required to" support the application.

The Agency will consider in support of an application all data cited on a Supporting Data Citation form to determine if the requirements of the Act have been satisfied. To define the terms "data submitted in support of an application for registration" and "data considered in support of an application" in terms of the data that is required, requested and used by EPA would be to merge several processes and confuse the structure of these regulations.

8. The Secretary suggests that the terms "material issues of law or fact" and "material issue of discretion" which are used in the Rules of Practice should either be omitted as superfluous or defined.

Response: These terms are generally understood within the legal community, have been defined by case law and are within the competence of the Administrative Law Judges and the Administrator to employ in a reasonable fashion.

9. The Secretary suggests that these regulations should include an exemption from "the requirement of compensation for information developed with public monies."

Response: Data developed by state and federal agencies which was first submitted to the Agency on or after January 1, 1970, would for the purposes of these regulations fall within data category IV if the data was prepared at the expense of someone other than the applicant and submitted without a "consent statement." The company that previously submitted the data in support of an application would not be eligible for compensation because the item of data would not have been produced at its expense, § 162.9(h)(3). Moreover, in most cases the state or federal agency at whose expense the data was produced will not be able to claim compensation because their agency would not have previously submitted the data in support of an application for registration, § 162.9(h)(5). If the state or federal agency at whose expense the item of data was produced did previously submit the data in support of an application, they would be eligible to claim reasonable compensation. Nothing, however, compels a state or federal agency to file a claim for compensation.

10. The Secretary is concerned that unless the volume of anticipated use of the pesticide is a factor in determining compensation, the applicant for a "minor use" registration will be put at a serious disadvantage and perhaps choose not to pursue registration.

Response: EPA shares USDA's concerns regarding minor use registrations. Item 7 in the Preamble list of factors suggested as appropriate for consideration in determining the amount, method and terms of reasonable compensation provides as follows: the foreseeable nature, extent and profitability from marketing of the pesticide by the applicant. This factor has been suggested in part with the interest of the minor use registrant in mind, and specifically addresses the concern raised by the Secretary.

[1] See, Memorandum of March 5, 1976 from Robert V. Zener, General Counsel, to Edwin L. Johnson, Deputy Assistant Administrator for Pesticide Programs entitled "Extent to which FIFRA § 10(b) requires EPA to afford confidential treatment to test data."

APPENDIX III

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

JANUARY 4, 1977.

Subject: Review of FIFRA Section 3(c)(1)(D) Proposed Regulations.

From: Executive Secretary, FIFRA Scientific Advisory Panel.

To: Deputy Assistant Administrator for Pesticide Programs (WH-566).

Proposed Section 3(c)(1)(D) regulations of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) were presented for consideration by the FIFRA Scientific Advisory Panel on December 10, 1976.

The FIFRA Scientific Advisory Panel waives scientific review and comment on proposed Section 3(c)(1)(D) regulations. This action was deemed appropriate in consideration of the certification by the U.S. Environmental Protection Agency that there were no questions of scientific nature involved in the regulations; and a determination made by the Panel following discussions in open session with representatives of both the Agency and the Pesticide Industry that the proposed regulations would not affect the availability or interpretation of scientific data.

H. WADE FOWLER, JR., PHD.

ADVISORY OPINION REQUESTS

NOTICES

FEDERAL ELECTION COMMISSION

[Notice 1977-34, AOR 1977-25 and AOR 1977-26]

ADVISORY OPINION REQUESTS

Pursuant to 2 U.S.C. § 437f(c) and the procedures reflected in Part 112 of the Commission's regulations, published on August 25, 1976 (41 FR 35954), Advisory Opinion Requests 1977-25 and 1977-26 have been made public at the Commission. Copies of AOR 1977-25 and 1977-26 were made available on June 15, 1977. These copies of the advisory opinion requests were made available for public inspection and purchase at the Federal Election Commission, Public Records Division, at 1325 K Street, NW., Washington, D.C. 20463.

Interested persons may submit written comments on any advisory opinion request within ten days after the date the request was made public at the Commission. These comments should be directed to the Office of the General Counsel, Advisory Opinion Section, at the Commission. Persons requiring additional time in which to respond to any advisory opinion requests will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered before the Commission issues an advisory opinion. Comments on pending requests should refer to the specific AOR number of the requests and statutory references should be to the United States Code citations rather than to the Public Law citations.

A descriptive listing of each of the requests recently made public as well as the identification of the requesting party follows hereafter:

AOR: 1977-25: Is it necessary for a principal campaign committee, which plans for a fundraising concert to pay outstanding campaign debts, to include in radio advertisements publicizing the concert a statement that a copy of the committee's report is available for purchase from the Federal Election Commission?

Requested by Gilbert E. Matthews, Controller, Lowenstein '76 Committee, New York, New York.

AOR 1977-26: May a Senate candidate's principal campaign committee accept payment from a voter registration political committee of a State political party for services performed by the candidate who, while a candidate, actively encouraged voter registration in that State? Would payment for these services be subject to limitation under the Federal Election Campaign Act?

Requested by Timothy J. Michals, M.D., Treasurer for the Green for Senate Committee, Philadelphia, Pennsylvania.

Dated: June 14, 1977.

THOMAS E. HARRIS,
Chairman for the Federal Election Commission.

INTERSTATE COMMERCE COMMISSION
Washington, D. C.

AB 7 (SDM)

CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD COMPANY

SYSTEM DIAGRAM MAP

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, Part 1121.22, that the Chicago, Milwaukee, St. Paul and Pacific Railroad Company, has filed with the Commission its color-coded system diagram map in docket No. AB 7 (SDM). The maps reproduced here in black and white are reasonable reproductions of that system map and the Commission on June 3, 1977, received a certificate of publication as required by said regulation which is considered the effective date on which the system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 7 (SDM).

Jun 14 3 ... '77

Robert L. Oswald
ROBERT L. OSWALD,
Secretary.

AB 2 (SDM)

LOUISVILLE & NASHVILLE RAILROAD COMPANY

SYSTEM DIAGRAM MAP

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, Part 1121.22, that the Louisville & Nashville Railroad Company, has filed with the Commission its color-coded system diagram map in docket No. AB 2 (SDM). The maps reproduced here in black and white are reasonable reproductions of that system map and the Commission on May 6, 1977, received a certificate of publication as required by said regulation which is considered the effective date on which the system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 2 (SDM).

Robert L. Oswald

reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

NOTE: There were no items eligible for inclusion in the list of RULES GOING INTO EFFECT TODAY.

List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IV—FEDERAL CROP INSURANCE CORPORATION, DEPARTMENT OF AGRICULTURE

PART 402—RAISIN CROP INSURANCE

RAISIN CROP INSURANCE

Revision of Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule wil revise the Raisin Crop Insurance Regulations for the 1976 and Succeeding Crop Years by restructuring the format of the regulations; by increasing reconditioning allowance for wet and dry processed raisins; by increasing the coverage for those raisins removed from the field; by clarifying the intent of the Corporation with respect to other insurance; by eliminating the provision whereby the Corporation and the insured agree to establish units; by placing the "Meaning of terms" section at the beginning of the regulations; and, by eliminating the "Application" portion of the regulations in order to utilize the Standard Application Form as is currently being used with other crops. The revised regulations are needed to correct the present regulations. The revisions will make the regulations more equitable and administratively effective.

EFFECTIVE DATE: June 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3325).

SUPPLEMENTARY INFORMATION: Under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), the Federal Crop Insurance Corporation is revising the Raisin Crop Insurance Regulations effective with the 1977 crop year. These regulations, which were published in the FEDERAL REGISTER on June 2, 1976 (41 FR 22252–22255), contain some elements which are being corrected in order to make them more equitable and more administratively effective. The specific revisions, as contained in the Raisin Crop Insurance Regulations for the 1977 and Succeeding Crop Years, as set forth below, are as follows:

(1) Increase the wash and dry reconditioning allowance from $45.00 to $55.00 to reflect more nearly the reconditioning costs in the market place, (2) Increase coverage $25.00 per ton for raisins removed from the field. This corrects an inequity which allows no differential between raisins removed from the field, and raisins remaining in the field, thus making no provision for this additional production expense, (3) Provides that if the insured purchases any other insurance before the raisins are placed on trays for drying, the Federal Crop Insurance contract will be voided for the current crop year for the unit(s) on which the private insurance was secured. Otherwise, such FCIC contract will continue, (4) The elimination of the provision whereby the insured and the Corporation agree to the establishing of units. Inasmuch as insurance is provided on the basis of separate units by variety, it is felt that the current provisions which permitted the establishment of units by prior agreement between the insured and the Corporation serves no useful purpose in the operation of the program and therefore has been eliminated, (5) The application portion of § 402.6 has been eliminated in favor of using the Standard Application Form as is currently being used with other crops. Such application form will be processed in the same manner and by the same method as standard applications, and (6) The "Meaning of Terms" section of the regulations will be placed at the beginning of the document to assist the reader in following the language.

The above revisions are not considered by the Corporation to be substantive, and do not adversely affect the policyholder. Notice of any changes must be given to the insured not later than June 15, 1977, in order to be effective for the 1977 crop year. It is, therefore, impossible to follow both the procedure for notice and public participation and the contractual obligations relative to giving notice of changes to current insureds by June 15, 1977. In view of this, the Corporation has found and determined that compliance with the procedure for notice and public participation would be impracticable and contrary to the public interest. Therefore, these revisions are being issued without compliance with such procedure.

RULE

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.), as amended, 7 CFR Part 402, Raisin Crop Insurance Regulations, is amended to read as set forth below effective with the 1977 crop year and succeeding crop years until amended or superseded. The provisions of the Raisin Crop Insurance Regulations for the 1976 and Succeeding Crop Years shall remain in effect for the 1976 crop year.

Sec.

402.1 Availability of raisin crop insurance.
402.2 Premium rates and amounts of insurance.
402.3 Application for insurance.
402.4 Public notice of indemnities paid.
402.5 Creditors.
402.6 The policy.

AUTHORITY: Sections 506, 516, 52 Stat. 73 as amended, 77, as amended; (7 U.S.C. 1506, 1516).

§ 402.1 Availability of raisin crop insurance.

Raisin Crop Insurance shall be offered for the 1977 and Succeeding Crop Years under the provisions of §§ 402.1 through 402.6 in counties in California within the limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from a list of counties approved by the Board of Directors of the Corporation for raisin crop insurance. The counties designated by the Manager shall be published by appendix to this section.

§ 402.2 Premium rates and amounts of insurance.

(a) The Manager shall establish premium rates and amounts of insurance per ton which shall be shown on the actuarial table on file in the office for the county. Such premium rates and amounts of insurance may be changed from year to year.

(b) The following shall apply to the transfer of any premium reduction earned under the provisions of section 8 of the Policy set forth in § 402.6 if the insured is a partnership, corporation, or any other joint enterprise and there is no break in the continuity of participation. Upon dissolution of such enterprise, such premium reduction may be credited to the contract of any member or stockholder thereof if the Corporation determines such person is operating only land formerly operated by the dissolved enterprise. Upon formation of a joint enterprise, the smallest premium reduction (zero if none), which the Corporation determines would have been applicable to any insurable acreage brought into the enterprise if the enterprise had not been formed, may be credited to the joint enterprise contract.

§ 402.3 Application for insurance.

The application for insurance, on a form prescribed by the Corporation, shall be submitted at the office for the county for the Corporation on or before the July 31, of the first crop year for which insur-

ance is to be in effect, or such earlier day as may be established by the Corporation for any county in any year upon its determination that the insurance risk involved is excessive. The Manager of the Corporation is authorized in any crop year to extend the closing date for acceptance of applications in any county by publishing a notice in the FEDERAL REGISTER, upon his determination that no adverse selectivity exists: *Provided, however*, That if adverse conditions should develop during such period the Corporation will immediately discontinue the acceptance of applications.

§ 402.4 Public notice of indemnities paid.

The Corporation shall provide for the posting annually in each county at the county courthouse of a listing of the indemnities paid in the county.

§ 402.5 Creditors.

An interest of a person other than the insured in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or any involuntary transfer shall not entitle the holder of the interest to any benefit under the contract other than as provided in the Policy set forth in § 402.6.

§ 402.6 The policy.

The provisions of the Policy for Raisin Crop Insurance for the 1977 and Succeeding Crop Years are as follows:

RAISIN POLICY

Subject to the regulations of the Federal Crop Insurance Corporation (herein called "Corporation") and in accordance with the terms and conditions set forth in this policy, the Corporation upon acceptance of a person's application does insure such person's raisin crop against unavoidable loss of production due to rainfall. No term or condition of the contract shall be waived or changed on behalf of the Corporation except in writing by a duly authorized representative of the Corporation.

TERMS AND CONDITIONS

1. *Meaning of terms.* For purposes of insurance on raisins the terms:

(a) "Actuarial table" means the forms and related materials approved by the Corporation which are on file for public inspection in the office for the county, and which show the applicable amounts of insurance, premium rates, and related information regarding raisin crop insurance in the county.

(b) "Contiguous land" means land which is touching at any point, except that land which is separated by only a public or private right of way shall be considered contiguous.

(c) "Contract" means the application, this policy, and the actuarial table.

(d) "County" means the county shown on the application.

(e) "Crop year" means the calendar year in which the raisins are placed on trays for drying.

(f) "Office for the county" means the Corporation's office serving the county shown on the application for insurance or such office as may be designated by the Corporation.

(g) "Person" or "Insured" means an individual, partnership, association, corporation, estate, trust, or other business enterprise, or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

(h) "Raisin tonnage report" means the form prescribed by the Corporation for initially reporting and revising (if necessary) all of the insured's acreage, share and tonnage of raisins in the county.

(i) "Share" means the share of the insured as landlord, owner-operator, or tenant in the insured raisins as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect, and no other share in the raisin crop shall be deemed to be insurable.

(j) "Tenant" means a person who rents land from another person for a share of the crop or proceeds therefrom.

(k) "Ton" means 2,000 pounds of raisins on the trays. When deemed appropriate, the Corporation may determine raisin tonnage computed on the basis of one ton of raisins insured for every four tons of fresh grapes when first placed on trays for drying.

(l) "Unit" as to each insured variety of raisins means all acreage in the county of that variety located on contiguous land, on the date insurance attaches for the crop year, (1) in which the insured has a 100 percent share; (2) which is owned by one person and operated by the insured as a tenant; or (3) which is owned by the insured and rented to one tenant. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the crop on such land only shall be considered as owned by the lessee. The Corporation shall determine units as herein defined when adjusting a loss, notwithstanding what is shown on the raisin tonnage report, and has the right to consider any acreage, tonnage, and share reported by or for the insured's spouse or child or any member of the insured's household to be the bona fide share of the insured or any other person having the bona fide share.

2. *Cause of loss.* (a) The insurance provided is against unavoidable loss resulting from rainfall on the raisins while in the vineyards, on trays or in rolls, for drying.

(b) The contract shall not cover any loss or damage due to (1) neglect or malfeasance of the insured, any member of the insured's household, tenants, or employees; (2) failure to follow recognized good raisin management practices; or (3) any cause not specified as an insured cause in this policy.

3. *Raisins insured.* The raisins insured are all of the varieties (a) Thompson seedless, (b) Muscats, (c) Monukkas, and (d) Sultanas produced by the insured on the unit: *Provided*, That insurance shall not attach in any crop year to raisins which are first placed on trays after September 20 for those raisins drying in east-west rows, or an earlier date if specified on the actuarial table for those raisins drying in north/south rows, as determined by the Corporation.

4. *Life of contract and contract changes.* (a) The contract shall be in effect for the crop year specified on the application and may not be canceled for such crop year. Thereafter, either party may cancel insurance for any crop year by giving written notice to the other by the June 30 immediately preceding such crop year. In the absence of such notice to cancel, and subject to the provisions of subsection (b), (c), and (d) of this section, the contract shall continue in force for each succeeding crop year.

(b) If the insured is an individual who dies or is judicially declared incompetent, or the insured entity is other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution; however, if such event occurs after insurance attaches for any crop year, the contract shall continue in force through such crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

(c) If the premium for any crop year is not paid by the July 31 following the calendar year in which the insurance period begins, the contract shall terminate for the succeeding crop year: *Provided*, That the date of payment for a premium (1) deducted from a loss claim shall be the date the insured signs such claim, or (2) deducted from payment under another program administered by the U.S. Department of Agriculture shall be the date such payment was approved.

(d) The contract shall terminate if no premium is earned for three consecutive years.

(e) The Corporation reserves the right to change the terms and conditions of the contract from year to year. Notice thereof shall be mailed to the insured or placed on file and made available for public inspection at the office for the county by the June 15 immediately preceding the crop year for which such changes are to become effective, and such mailing or filing shall constitute notice to the insured. Acceptance of any changes will be conclusively presumed in the absence of any notice from the insured to cancel the contract as provided in subsection (a) of this section.

(f) For any crop year, the insured may with the consent of the Corporation change the amount of insurance per ton which was previously elected by notifying the Corporation in writing not later than the closing date for filing applications for such crop year.

5. *Responsibility of insured to report tonnage, acreage, and share data.* The insured at the time of filing the application shall also file on a form prescribed by the Corporation, a report showing by variety (1) the name of the variety, (2) the location of the vineyard(s), (3) acreage, (4) estimated tonnage of insurable raisins to be produced, and (5) the insured's share. Such information may be revised by the insured by giving notice in writing to the office for the county not later than August 25 of any crop year. *Provided, however*, That downward revisions of estimated tonnage after August 25 of any crop year for premium adjustment purposes for any unit may be allowed if requested by the March 31 immediately following the crop year involved and substantiated by records satisfactory to the Corporation. When an annual premium is recomputed on the basis of a downward revision made after August 25 of any crop year, such recomputed premium shall be increased $10. The latest acceptable revision for any crop year shall be considered as the basis for continuation of insurance from year to year.

6. *Insurance period.* For each crop year, insurance attaches at the time the raisins are placed on trays for drying, as provided in section 3 above, and ceases upon the earlier of October 25, or the date the raisins are boxed or removed from the vineyard.

7. *Amount of insurance.* The amout of insurance for any unit for the crop year shall be determined by multiplying the insured tonnage of raisins times the applicable amount of insurance per ton times the insured's share. The insured tonnage and share for each crop year shall be that reported by the insured or as determined by the Corporation, whichever the Corporation shall elect.

8. *Annual premium.* (a) The annual premium for each unit is earned and payable at the time insurance attaches and shall be determined by multiplying the insured tonnage times the applicable premium rate times the insured's share at the time insurance attaches and, where applicable, applying the premium reduction or adjustment

herein provided and adding thereto any increase provided in section 5 above.

(b) In counties where the actuarial table does not provide for adjustments in premium, the total annual premium on all insurance units shall be reduced as follows after consecutive years of insurance without a loss for which an indemnity was paid on any unit hereunder (eliminating any year in which a premium was not earned): 5 percent after five years; 7 percent after six years; 9 percent after seven years; 11 percent after eight years; 13 percent after nine years; 15 percent after ten years; 17 percent after eleven years; 19 percent after twelve years; 21 percent after thirteen years; 23 percent after fourteen years; and 25 percent after fifteen or more years. However, if the insured has a loss for which an indemnity is paid hereunder the number of such consecutive years of insurance without a loss shall be reduced by five years, except that where the insured has fifteen or more such years, a reduction to ten shall be made and where the insured has five or less such years, a reduction to zero shall be made. *Provided*, That, if at any time, the cumulative indemnities paid hereunder exceed the cumulative premiums earned hereunder from the start of the insuring experience through the previous crop year, the premium reductions in this subsection shall not thereafter apply until such cumulative premiums equal or exceed such cumulative indemnities.

(c) In counties where the actuarial table provides for adjustments in premium, the provisions of subsection (b) of this section shall not apply.

(d) If there is no break in the continuity of participation, any premium reduction or adjustment applicable under subsection (b) or (c) of this section shall be transferred to (1) the contract of the insured's estate or surviving spouse in case of death of the insured; (2) the contract of the person who succeeds the insured as the insured's transferee in operating only the same vineyard or vineyards, if the Corporation finds that such transferee had previously actively participated in the vineyard operation involved; or (3) the contract of the same insured who stops operating a vineyard in one county and starts operating a vineyard in another county.

(e) If there is a break in the continuity of participation, subsection (b) of this section, or any reduction in premium earned under subsection (c) of this section shall not thereafter apply.
